VOL. X, NO. 8

REDSTONE ARSENAL, HUNTSVILLE, ALABAMA

JULY 5, 1961

HAPPY, SAD? GOALS ACCOMPLISHED, FINAL STROKE OF THE PEN—With more than 30 years in the Army it's the final, official signout today for Maj. Gen. John A. Barclay, retiring Deputy Commanding General of the Army Ordnance Missile Command, at the Headquarters desk in the building which has been his working home for the past 16 months. Prior to this duty the pioneer space and missileman was Commander of the Army Ballistic Missile Agency during a part of the time it managed the successful efforts of the famed von Braun rocket development team.

GEN. BARCLAY SAYS FAREWELL

TO: All AOMC Personnel

30 June 1961

As I leave the Army Ordnance Missile Command, and the Army, I want to avail myself of this last opportunity to express my appreciation for the fine support which you have accorded me during my various assignments at Redstone Arsenal, and association with White Sands Missile Range. My only regret is that there is no opportunity to see each of you and personally express my feelings. Our organization is too numerous for that, and there are even some of you whom I have not had the opportunity to know personally; however, your presence has been known to me by the magnitude of the accomplishments achieved by our very fine military-civilian team.

Our organization here has been characterized by its dedication to its purpose—to prepare for war in times of peace. The devotion which you have displayed to this purpose is well illustrated by the successful weapons systems which have been brought into being to assure strong defense forces that can maintain our system of Government and our free way of life. I am sure that each of you will continue in this same dedication to National purposes. There will be hallmarks of success interspersed with disappointment and frustration. A characteristic of this organization has been its determination to thrive in the face of adversity. Remember that it takes hot fires to make good steel. As an organization, and as individuals, your strength and unity will increase as you overcome these obstacles, and as has often been said—"only the game fish swims up stream." I urge you to keep a strong, moral, and unified organization, devoted to the urgency of the task that confronts you, putting the highest ideals of Government service above self service.

I appreciate the opportunity of having served with this fine organization. Any credit which has come to me is credit due to the efforts of the many fine people who, with an overriding sense of urgency, have made the accomplishments of the Command possible. I have been only the recipient of this recognition which I pass along to you who so rightfully deserve it.

Mrs. Barclay and I wish you and your families well. May God watch over you, success attend your efforts, and may you continue in the highest ideals of dedication to Government service. My heartfelt thanks go out to you all.

J. A. BARCLAY
Major General, USA

MAJ. GEN. COOPER, MAJ. GEN. MYERS VISIT REDSTONE

Maj. Gen. Ralph C. Cooper and Maj. Gen. Samuel L. Myers concluded a three day visit at Redstone Arsenal on June 30.

Gen. Cooper, Commanding General, 21 Corps, U. S. Army, at Indian Town Gap Military Reservation in Pennsylvania, is slated to follow Maj. Gen. Samuel L. Myers soon as Assistant Deputy Chief of Staff for Logistics, Department of the Army.

While at Redstone the two were briefed on organization, mission, and logistic functions of the Army (See 2 GENERALS on Page 3)

Aerojet Receives \$1 Million Contract

The U. S. Army today awarded a \$1,211,453 contract to the Aerojet General Corporation for equipment to be installed at Redstone Arsenal.

Aerojet will fabricate, install and checkout instrumentation for a solid propellant rocket motor test facility to be built at the home of the Army Ordnance Missile Command.

Fabrication will be done at Aerojet's Aetron-Covina plant at Covina, Cal.

The new facility will be capable of handling captive firing tests for all Army missile motors. The structure has been designed to absorb the thrust of rocket motors (See AEROJET on Page 2)

Pace Confers With Missile Experts Here

Former Secretary Of Army Is Now With General Dynamics Corp.

Frank Pace, former Secretary of the Army, conferred with Army rocket and missile experts June 28 at the Army Ordnance Missile Command at Redstone Arsenal.

Pace, Chairman of the Board, General Dynamics Corporation, had a roundtable discussion with missilemen concerning missile system management problems.

Discussion was led by Brig. Gen. John G. Zierdt and Brig. Gen. Richard M. Hurst, Commanders of the Army Rocket and Guided Missile Agency and the Army Ballistic Missile Agency, respectively.

Other Army officers conferring with the former Army Secretary included:

Col. Foster L. Furphy, Chief of (See FRANK PACE on Page 2)

Mauler Contract Goes to Convair

The U. S. Army June 27 funded further development of its Mauler air defense missile system with a \$6,221,230 contract awarded the Convair Division of the General Dynamics Corp.

Work will be performed at Convair's Pomona, Calif., facility.

Mauler is being developed under the technical supervision of the Army Rocket and Guided Missile Agency at Redstone Arsenal, Ala.

An air defense guided missile system, each Mauler unit will be self-contained on self-propelled chassis. Mauler is designed to travel with fast-moving Army units on the battle field and defend them against high performance tactical aircraft and short range missiles and rockets.

The contract is administered by the Los Angeles Ordnance District.

Final Redstone Fired In Engineering Tests

\$4400 Goals Set AER-ARS Drive

A \$4400 goal is set at this installation for the Joint Army Emergency Relief and Army Relief Society fund campaign.

The Chairman, Maj. George L. Grace, said that in 1960 AER provided approximately 4.2 million dollars in assistance to nearly 34,000 members of the Army and their dependents. During 1960, \$21,709 in AER funds were spent at Redstone Arsenal.

Maj. Gen. August Schomburg, Commanding General of the U. S. Army Ordnance Missile Command, said, "I am pledging my full support to this joint annual campaign and urge you and all military members of your organization to assist in meeting our goal of these two worthwhile organizations."

The campaign committee consists of Maj. Grace, Capt. Francis R. Williams, AOMC; Capt. Milton A. Sulkowski, ABMA, Lt. Theophilus H. Rushing, ARGMA; and Lt. Arthur G. Woodle, OGMS.

\$29 Million Contract Awarded for Sergeant

The U. S. Army June 29 awarded two contracts to the Sperry Rand Corporation totalling \$29,980,102 for continued production of the Sergeant ballistic missile system.

A third award for \$3,196,278 announced at the same time, went to Fruehauf Trailers to procure trailers and enclosures for the Sergeant system.

Work funded under the larger awards will be performed by the Sperry Utah, Company, a Division of Sperry Rand, at its Salt Lake City, Utah, plant.

Representing the balance of an industrial production contract for (See \$29 MILLION on Page 2)

Missile Reliability Proved in More Than 40 Firings at Cape

The U. S. Army's Redstone ballistic missile was successfully fired June 26 in a test at Cape Canaveral, Fla.

The Army said the missile met all test objectives.

The missile was the final round to be fired in an engineering qualification program of production missiles manufactured by the Chrysler Corporation of Detroit, Michigan, the prime contractor.

Redstone firings in the future will be annual troop practice launchings at other locations.

More than 40 Redstones have been fired at Cape Canaveral. The first in the missile's eight year association with Canaveral was launched August 20, 1953. The latest missile in the research and development program was fired November 5, 1958. Earlier that year, on January 31, a modified Redstone was used by the Army (See FINAL on Page 2)

Three Contracts Awarded Northrop

The U. S. Army last week awarded three contracts totalling \$9,528,639 to the Northrop Corp. covering work on two missile systems and target missile service.

Largest of the three was a \$3,957,124 award to Northrop's Northronics Division for production of launchers for the Army's Hawk air defense guided missile system. Work will be performed at the Division's plant at Anaheim, Calif.

A second contract totalling \$2,999,986 also went to the Northronics Division for production of warhead components for the Army's Sergeant ballistic missile. Work will be performed at the Division's Hawthorne, Calif., plant.

The third contract, for \$2,571,529, was awarded to Northrop's Radio-plane Division, Van Nuys, Calif. It covers flight service for (See NORTHROP on Page 2)

CERTIFICATE FOR OUTSTANDING EFFORT—A. A. Stewart (left), 1960 Chairman of the United Givers Fund Drive at this installation, and Maj. Gen. August Schomburg, Commanding General of the U. S. Army Ordnance Missile Command, hold the certificate recently presented by the United Community Funds and Councils of America for the participation of the people at the installation during the 1961 UGF Campaign. The presentation was made to Mr. Stewart during the Southeastern Conference of UCFA at Biloxi, Miss. He, in turn, presented it to Gen. Schomburg.

The Redstone Rocket

The Redstone Rocket is a privately owned newspaper published every Wednesday at no expense to the Government by Jack W. Hoffhaus, Hartselle, Alabama, with exclusive regard for the reader interests of personnel at Redstone Arsenal, Alabama, in accordance with an agreement between the publisher and the Public Information Office, Army Ordnance Missile Command, Redstone Arsenal, Alabama.

The Rocket is NOT an official or semi-official Army or Ordnance Corps publication. Policies and statements reflected in the news and editorial columns represent the views of the individual writers and are not necessarily those of the Department of the Army, the Ordnance Corps, or any organization at Redstone Arsenal, Alabama. Appearance of advertisements in the Rocket does not constitute an endorsement of the advertising matter by the Department of the Army, the Ordnance Corps, or any organization at Redstone Arsenal, Alabama.

The publisher will receive editorial content for publication in the Rocket only through the Public Information Office, Army Ordnance Missile Command, Redstone Arsenal, Alabama, Bldg. 7101, Extension 876-3362. All advertising copy and payments therefor are received by Mrs. Zillah T. Heath, 311 Holmes Ave., N.E., Huntsville, Alabama, P. O. Box 346, telephone 534-4701, as representative of the publisher.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates for the Rocket are \$5.15 a year, or \$2.83 for six months, Alabama sales tax included. Mailing arrangements may be made with the publisher.

Ours Is Major Role In Halting Gold Rush

Monetary problems, when they involve millions and billions of dollars, are over the heads of most of us. Staggered by their astronomical figures, we leave them to experts. But now we have the problem of stemming the outflow of our gold overseas—in other words, correcting a situation where U. S. dollar payments abroad exceed receipts from abroad. It's a grave economic problem, and we, the members of the Armed Forces are intimately caught up in it.

All of us stationed overseas have been asked by the President to cut down our spending and save our dollars. Earlier this year the problem of gold outflow was to be tackled by gradually reducing the 486,700 military dependents abroad to 200,000. Few, if any of us wanted that, and the measure was rescinded.

We were gratified, for what man wants to be separated from his family for long periods? But at the same time, cropping of this measure imposed upon each and every one of us the personal responsibility to cooperate with the alternate measure now put forward.

It is estimated that if each of the more than one million military and civilian personnel and their dependents overseas cut annual spending by \$75 to \$110 it would effect the same dollar retention as the recall of dependents was meant to do. So the question arises: is this a hardship?

Of course it isn't. It can be done in a dozen different ways. We can probably save much more without hurting ourselves a bit. Service people abroad are notorious luxury shoppers. They collect "quaint" and "picturesque" souvenirs that, once back home, they'll consign to the basement. It was an amiable extravagance once, but it isn't any more.

The same is true of recreation and entertainment. Just as most of our overseas bases have well-stocked exchanges where a man and his family can fill their needs, so they also have theaters and comfortable clubs and other facilities where dollars can be spent without ending in foreign banks.

Finally, there's the best way of all for us to respond to the President's plan to halt the "gold rush"—U. S. Savings Bonds. Now if ever is the time for us to boost our payroll allotments or to begin them if we haven't any. It's money in the bank for us, and we're not only doing ourselves a good turn but helping our country. (AFPS)

FINAL

(Continued From Page 1) to orbit the Free World's first earth satellite.

Redstone's reputation for reliability, proven in several score firings, resulted in its selection for use in the Project Mercury man-in-space program. A modified Redstone was used to boost the first American astronaut on a suborbital space flight May 5.

In tonight's test, liftoff and operation of the liquid-fueled propulsion system were normal. The warhead unit separated from the propulsion unit at the completion of powered flight as planned.

Preliminary data indicated that the warhead unit impacted in the pre-selected target area approximately 200 miles down range.

Redstone missiles have been operational with Army units in Europe since 1958.

The missile fired tonight was similar to the tactical weapon.

It carried a dummy warhead and heavy load of instrumentation for range safety, tracking and data collection.

The Instrumentation Engineering Branch of ABMA's Industrial Operations, headed by John L. Tidd, has been the technical supervisor of the engineering qualification program.

A crew from the Launch Operations Directorate of the George C. Marshall Space Flight Center launched the missile fired tonight.

\$29 MILLION

(Continued From Page 1) Sergeant awarded Sperry Utah in December, they cover procurement of Sergeant missiles, related ground support equipment and test devices.

Fruehauf's Missile Products Division will perform work under the third award in its Los Angeles, Calif., facility.

Sergeant, a solid fuel missile capable of carrying a nuclear warhead, is guided to its target by a self-contained inertial guidance system.

The missile system is being readied under the technical supervision of the Army Ballistic Missile Agency as a successor to the Army's operational Corporal surface-to-surface missile.

The contracts are administered by the Los Angeles Ordnance District.

FRANK PACE

(Continued From Page 1) Staff, AOMC; Col. Harold N. Brownson, Deputy Commander, ABMA; Col. H. H. Wishart, Deputy Commander, ARGMA; Col. J. S. Jefferds, Industrial Operations Chief, AOMC; and Col. Paul B. Schuppener, Research and Development Chief, AOMC.

General Dynamics officials accompanying Pace were William H. Patterson, William K. Brehm, Palmer Osborn, Allen C. Siebens, Frederick Horne, Kenneth M. Smith, James P. Hamill, W. J. Morrow and J. P. Rimer.

NORTHROP

(Continued From Page 1) the RP-76 target missile to be furnished at El Paso, Texas.

The targets are provided for training firings of Army air defense guided missiles conducted on ranges near El Paso.

Sergeant missile work is under the technical supervision of the Army Ballistic Missile Agency at Redstone Arsenal.

The Hawk missile system and target missiles are under technical supervision of the Army Rocket and Guided Missile Agency at the same location.

The contracts are administered by the Los Angeles Ordnance District.

AEROJET

(Continued From Page 1) of present and forecast magnitude with an adequate safety factor.

The Mobile District of the U. S. Army Corps of Engineers is supervising construction of the test facility. Announcement of the selection of construction contractor has not yet been made.

Military Picnickers Have Ample Facility

At the end of the rain and chilly weather, the Tennessee River and the Normandy Farm Picnic areas have become a Saturday and Sunday must for picnickers.

The Tennessee River Area is fenced and has all the conveniences needed for comfort. There are horse shoes, badminton, volleyball, swings, and space for softball. Equipment is at the area for use.

A boat harbor with an unloading ramp is available to all who have boats. At present care should be taken when backing up the trailer. The water is low and a drop-off may occur. Picnic tables, coolers, and barbecue pits are available.

The Tennessee River Picnic Area must be reserved at least one week in advance by calling Sports Branch, Special Services Division 876-2943.

The Normandy Farm Picnic Area is located one mile west of Patton Road near Range 7 in the vicinity of Gate 9. No reservations are required for this area. It is a wooded area.

A badminton court, volleyball court, and horseshoe pits are available. Equipment can be checked out on hand-receipt from Special Services Supply, Bldg. 3619 Monday through Friday 0700-1530 hours.

Picnic areas are opened to military personnel, dependents and guests.

Operation Hours are: Tennessee River — Monday thru Friday — 1300-2100 hours; Saturday, Sunday and holidays — 0900-2100 hours.

Normandy Farm—Monday thru Friday — 1530-2100 hours; Satur-

20-YEAR MAN — David Davis, an ammunition handler in the Depot Division of the U. S. Army Missile Support Agency, recently received a 20-year service pin. When he first came to work at the Arsenal the Kershaw-Butler Construction Company was still building. Davis worked as an ammunition handler after the construction was completed, and later worked in the renovation program. Mr. and Mrs. Davis reside at 116 Newman Ferry Road in Huntsville. He graduated from Council High school when it was still known as City school.

WESTERN ELECTRIC WILL DO MORE NIKE ZEUS WORK

The U. S. Army awarded a \$1,150,000 contract to the Western Electric Company June 27 furthering development of the Nike Zeus anti-missile missile system.

Western Electric is prime contractor for the proposed ballistic missile defense system.

Majority of the work will be performed by the Bell Telephone Laboratories at Whippany, N. J., responsible for Nike Zeus system design and development.

Sharing in the award will be the Cornell Aeronautical Laboratory at Buffalo, N. Y.; Avco Everett of Everett, Mass., and General Electric Company for work to be performed at Syracuse, N. Y.

day, Sunday and holidays — 0900-2100 hours.

The Judge Advocate Advises

Before you grant a power of attorney to anyone, first consider whether you need one at all. If you do not need one, do not grant one. Then, if you decide you need a power of attorney, limit it closely to serve the specific purpose in mind.

The power of attorney is an instrument by which you may enable another person to bind you legally to the consequences of his acts as though they had been your own acts. When you make a power of attorney, it might confer only the power to do particular things, in which case it is called a special power of attorney. It might, however, not limit the powers of the attorney, in which case it is called a general power of attorney.

General powers of attorney are dangerous instruments in the hands of persons inexperienced in business matters, persons of unstable temperament, or a spouse when a marriage has deteriorated to the breaking point. A general power will not accomplish the purpose in mind.

Experience has shown that many persons seeking a general power of attorney have no need for

one or have no definite purpose in mind.

Two further points are: (1) that a power of attorney is to be voluntarily granted, if at all, and should not be drawn merely because a commander says to execute a power of attorney; and (2) that a power of attorney in no way performs the function of a will.

The power of attorney does not operate to clear up the grantor's affairs after his death, it dies with him.

Once again, there are two basic rules in deciding what powers to grant.

(1) Decide whether there is any purpose to be served by a power of attorney.

(2) Grant only those particular powers required to serve that purpose. The general principle underlying these two rules is simply that man was given the power to choose for himself and should not share that power with another unless he would be unable conveniently to act by himself.

If money is your illness, value is your medicine.

2 GENERALS

(Continued From Page 1)

Ordnance Missile Command as well as the functions of the newly organized Missile and Rocket Inventory Control Center.

Other discussions included a briefing by Brig. General John G. Zierdt and Brig. Gen. Richard M. Hurst, Commanders of AOMC commodity agencies.

The Missile and Rocket Inventory Control Center is one of the national functions assigned the Army Ordnance Missile Support Agency, an agency which recently took on additional importance at Redstone Arsenal.

WATER SKI CLUB TO BE ORGANIZED

Members of the American Water Ski Association met Tuesday, June 27, to organize a local Water Ski Club. The meeting was held at the Outboard Boat and Motor Company in Huntsville.

A committee has been named to draft a constitution.

The club's aims would be:
1. To provide instruction for beginners and teach advanced techniques to skiers.
2. To teach water safety and

courtesy.

3. To sponsor water ski shows, and

4. To sponsor tournaments.

The temporary chairman is Fred Chesebro who works in Industrial Operations of the Army Rocket and Guided Missile Agency.

Present plans are to combine regular meetings with outings and ski activity.

The next meeting will be called in July to discuss organization and will include a film. Interested individuals are invited to attend by the organizing group.

Ceremony, Fashion Show, Buffet Mark Pool Opening

Friday night the swimming pool at the Squirrel Hill Officers Club was opened with pomp, ceremony and water exhibitions, followed by a buffet supper and dancing.

Unofficially the pool opened in the afternoon with a children's program and swimming.

Diving, clowns, and a water safety show was highlighted with music by the 55th Army Band. Ice cream and Cokes were furnished by the club.

In the evening, the formal opening was held with Col. Thomas W. Cooke, Commander of the Army Ordnance Missile Support Agency, cutting a ribbon.

The program included the same water show as the one earlier in the day. A buffet was served on the patio. Vacation wear was modeled by members of the Gay Mar Modeling Agency.

The evening ended with dancing on the patio.

The celebration climaxed months of work by committees coordinating and financing the new pool. Col. S. A. Hall, president of the Board of Directors, was the man who organized the basic plans.

Col. O. N. Hirsch then took over as chairman. His technical committee, Col. E. M. Detchemedy and Lt. Ben F. Glisan carried out the plan and coordinated with designers and contractors to make the pool a reality.

Wet weather held up the opening date.

BAR-B-Q IS JULY 16

The NCO Ladies Auxiliary will hold the annual BAR-B-Q Sunday, July 16 at the Arsenal Boat Dock. The event will begin at 9 a.m. and last until dark.

Reservations must be made by July 13 with Mrs. Robert Paton 877-4773 or Mrs. James Walden 877-5470.

Auxiliary members, husbands and children are invited to attend. Entertainment is planned for the children.

Mrs. Robert Ross, Lt. Col. Cliff Are Winners at Bridge

At Monday night Party Bridge at the Squirrel Hill Officers Club on June 19, Mrs. Robert Ross was high for the women and Lt. Col. James Cliff was winner for the men.

Second for the women was Mrs. Eugene Krembs with Lt. Col. Dennis Grace second for the men.

The Group did not play Monday, July 3, but will play again on July 10. Reservations may be made by calling Mrs. John Severeid by Saturday noon.

At the Service Club

I hope you had an enjoyable holiday on the Fourth of July. It seems that everyone I saw on the Fourth was in a very happy holiday mood. If you'd like to hold on to your holiday mood for awhile, come by the Service Club one of the evenings this week and enjoy some of the programs scheduled.

Wednesday evening, the 5th, the EM Council will meet at 1330 hours for their regular monthly meeting. Then at 1900 hours, the Dance Classes will take over the Main Lounge for further instruction on ways and means for propelling a partner around a dance floor.

The Shutter Club will meet at 1800 hours on Thursday night in the small lounge. Then at 1830 hours, we will hold a "Record Requests" session, so be thinking of a few of your favorites to request.

Another much-requested Pool Contest will begin at 2000 hours on Friday night.

Saturday, July 8, we have scheduled a tour to the Birmingham Zoo, a fascinating place through which you can wander and see all

HONORED AT MISSILE SCHOOL—Veteran instructor Willard E. Osterheld, (left), accepts congratulations from Col. Charles W. Eifler, commandant, after being presented a Department of the Army Certificate of Service during ceremonies recently at the U. S. Army Ordnance Guided Missile School. An instructor in the continuous wave radar section at the Hawk branch, Osterheld received the award after more than 20 years of active federal service. He was formerly employed at Keesler Air Force Base, Miss., before coming to the Missile School. He resides with his wife, Doris, at 504 Samola Dr., Athens, Ala.

sorts of beasts. The bus will leave the Service Club at 1300 hours, so I would advise you to be here a few minutes early. It will be necessary to sign up in advance for this, also.

Sunday morning Coffee Call will be held at the usual time, 0930 hours, when hot coffee and donuts will be served from the kitchen. At 1330 the pinochle players will gather for another contest. Then at 1900 hours, we'll swing into the Sunday Evening Record Dance, guaranteed to be a swinging session.

Game night will begin at 2015 hours on Monday night.

Talent auditions for a Jazz Festival will be held in the main lounge at 1830 hours Tuesday, July 11. If you are musically inclined and interested in the Festival, contact Pfc Sam Wolfson, Special Services Division, Entertainment Section—876-4531. Later that evening the Bridge Club will hold its weekly meeting at 1930 hours in the small lounge.

Future

Getting back to the Jazz Festival, this is going to be an unusual festival, featuring a variety of talent. It is tentatively scheduled for July 28.

Several parties are being featured this month that you will want to plan for in advance. There will be an Ice Skating Party on July 13, a Patio Bridge Party on July 15, and a Splash Party on the 30th, so keep these in mind as you plan your schedule.

HISTORY

I have heard many who made the tour to Guntersville last week saying that they had a very enjoyable time swimming and basking in the sun. Perhaps we can schedule another in the near future.

Remember on these hot humid days that we are completely air-conditioned here at the Club and offer a cool haven for the warm, weary soldier. See you soon.

Margaret

Randolph School Classes Use Yale Method in Math

An advanced approach to mathematics will be initiated this fall by the Randolph School, a private, non-profit school in Huntsville which will enroll more than one-third of its 250 pupils from Redstone Arsenal families.

Rev. W. David Leech, headmaster, said new mathematics teaching methods developed by Yale University and the National Science Foundation will be adapted for sixth and seventh grade classes "to instill an early knowledge of the basic language of science—mathematics—in our pupils who come to us from the Army and NASA agencies here."

They will be taught by Miss Elizabeth Bolton Patton, a mathematics specialist who is joining the faculty. She holds a B. A. degree from the University of Alabama, an M. S. from the University of Wisconsin and last year took advanced mathematics courses at Columbia University's graduate school of arts and sciences.

This summer she is attending other graduate courses at the University of California in Berkeley. She has previously taught at Ferry Hall Academy in Lake Forest, Ill., and the Mountain Brook Junior High School in Birmingham.

"The addition of a mathematics specialist to the Randolph faculty is now possible because the Randolph School development fund drive has received two-thirds of the \$186,000 it is seeking to provide the school with new buildings and equipment on its recently purchased 16-acre campus in southeast Huntsville.

Miss Patton's abilities will enable us to place the proper emphasis on early math training which the scientific-minded parents of our Redstone Arsenal pupils have wanted," Rev. Leech said.

Eighty-six percent of U. S. Army officers and 45 percent of the Army's enlisted personnel are married.

University College Has A 'Million Mile' Campus

At home or overseas, how do the thousands of military personnel who enroll for courses with University College of the University of Maryland, or with other institutions, measure up academically? The answer comes readily from Drs. Ralph J. Klein and Stanley J. Drazek, two deans of University College. Says Dr. Drezek: "The great majority of these students in uniform are mature, and, very important, highly motivated. Many instructors have compared them favorably with students enrolled under the post-WWII 'G. I. Bill.'"

"Although some complete their degrees—either a Bachelor of Arts in General Studies or a Bachelor of Science in Military Studies—with the Maryland Overseas Program, most transfer their Maryland credits to home institutions within the United States."

Both deans agree that an amazingly high percentage of these students have since graduated from other institutions with honors. Also, many who completed their degree requirements in Maryland's off-campus program have been accepted for advanced work at leading graduate schools throughout the country.

"Our 'Million Mile Campus' has posed administrative problems unique in the history of higher education," says Dr. Klein. "Solutions to them can't be based on precedent. Long-range logistical problems call for a great deal of imagination plus the latest in transportation and communications resources.

"Radio, trans-oceanic cables, air craft and helicopters are some of the modern means we employ to achieve the traditional ends of a quality educational program."

What type of people are the students in uniform who are graduated by the Maryland Overseas Program yearly in Heidelberg, in Tokyo, in Labrador, in Iceland and Newfoundland? The two deans say that for the most part they are in their mid-thirties, married and generally have two or three children. And they are ambitious.

There is Navy CPO Maurice S. Fortin who began taking Maryland courses at Argentina, Newfoundland, 10 years ago. By 1958, while assigned to the Pentagon, he completed his degree requirements. Today he is pursuing graduate work at the University of London, and plans to teach on the college level when he retires. Another student, MSgt. Thomas L. Dorpalen, who began in Maryland's European Division, has the same aim.

Still another example is an airman, Peter D. Wimbrow Jr., who managed to graduate in Heidelberg despite the fact that his wife suffered a serious injury during his last semester. He now has an Air Force commission.

An Army man, Wolf Schmoekel, studied with Maryland in Germany, Iceland, and at Ft. Meade, Md., finally completing his studies on the College Park campus as a civilian. He received his B. A. degree from Maryland and later his M. A. from Brown University; then he spent a year teaching with Maryland's Overseas Program. He is now completing his Ph.D. degree at Yale.

"Certain problems in Armed Forces education exist and are looming larger with each semester," says Dr. Drazek. "They do not only concern University College but all American universities which operate programs for service people."

Dr. Klein cites as one the fact that tuition assistance plans of the services are geared to the fees charged by universities over 10 years ago. Since then educational

costs have risen and tuition rates have followed.

"Another," says Dr. Drazek, "is that a flood of students has begun to descend upon American campuses. Physical plants, although expanding, are beginning to burst at the seams.

"But more important, qualified professors—who have spent from seven to ten years preparing themselves to teach on the college level—are becoming scarce. As a result some educators feel that all effort should be concentrated on quality education exclusively for full-time, on-campus students, and that "mar-

ginal" programs such as those for the military need reconsideration."

Nevertheless, both deans think that American universities in general and Maryland in particular are giving service people at home and overseas valuable educational opportunities and hope to continue them.

"Maryland's Overseas Program was made possible by the cooperation, planning and work of many people, both civilian and military," says Dr. Klein. "These programs were dictated by our times and our country's new role in world affairs."

Eight Post Engineer Men Earn 20-Year Certificates

Eight men in the Post Engineer Division of the U. S. Army Ordnance Missile Support Agency received 20-year Service pins and certificates during a ceremony in the office of the Post Engineer, Col. W. G. Trainer, recently.

One of them, Charles A. Broadway, crew chief in the Fire Marshall Division, is the seventh man to be placed on the payroll at the Arsenal during its beginning in World War II. Broadway also worked in the Office of the Secretary of War in Washington, D. C., and for the District Engineer at Louisville, Ky.

He is married, has two children and two grandchildren and has an interest in baseball, football, basketball and other sports. He is also an active hunter and fisherman.

Milburn P. Riggins who lives at Lynchburg, Tenn., began his Government career at Camp Forrest, Tenn., and spent one year with the Post Office Department before transferring to the Arsenal thirteen years ago.

He is married to the former Miss Glyndon Tipps. The couple has three sons.

Elba L. Perkins lives at Union Grove, Ala. His twenty-year pin was delayed more than a year. His Government service began 21 and one-half years ago with active Army duty.

He has been employed at the Arsenal for more than 19 years. The Perkins have one daughter.

He is a crew Chief in the Fire Marshal Branch of Post Engineer.

James E. Drake is supervisory

fire fighter whose entire service has been in this department, first at Anniston, Ala., later at Huntsville Arsenal and when the conversion was made to merge the two Arsenals, Mr. Perkins was put on the Redstone Arsenal payroll. He also has one year of Army service.

He is married to the former Miss Gladys Casey. They have two children, a son and a daughter.

Bernice B. Humphrey from New Hope is a truck driver in the Property Section of the Control and Supply Division. His service includes employment at Huntsville Arsenal, more than five years of active Army duty, and twelve years at Redstone Arsenal.

His hobbies are fishing and hunting.

The Humphrey family includes two children, a son and a daughter.

John F. Jackson was born at Rockdale, Tenn. and graduated from high school at Murfreesboro. He received a certificate in steam engineering from the International Correspondence School in 1941.

Mr. Jackson is married to the former Miss Mary Frances Howse. They have two daughters and one son.

Jackson's Government career began at Camp Forrest, Tenn. He has been here for the past fourteen years.

His hobbies are hunting and fishing.

Walter M. Bills, twice a grandfather, is an electrician in the Building Services Section of Post Engineer.

He began his Government service at the Charleston (S. C.) Ordnance Depot, moved on to the Army Ordnance Works at Sylacauga, and approximately seven years ago joined the staff at Redstone Arsenal.

Mr. Bills lists gardening as his chief hobby, but he also likes to hunt and fish.

Thea E. Jackson spent one year in the Army before he was employed at Redstone Arsenal almost 19 years ago.

He is a laborer in the Preventive Maintenance Section.

Mr. Jackson was born in Madison County and has been a deacon in the St. Bartley Primitive Baptist Church for 26 years, a member of the church for 38 years.

He is also a member of the Evening Star Lodge No. 6 and a Mason.

His two children were born by his deceased wife, Elmira Williams. He is now married to Eucale Carlisle. Jackson is also the oldest of

THE FIRST OF 28 YHC-1B CHINOOK helicopters, ordered by the Army from Boeing Airplane Company's Vertol Division, was completed and rolled from the plant recently, and after being flight tested, will be delivered to the Army. The CHINOOK features straight-in loading through a rear ramp and can fly with the ramp open. A 30-foot long cargo compartment has a capacity of three tons.

Cat Rescues Baby

Laughlin AFB, Tex. (AFPS)—Many's the faithful dog whose frantic barking has alerted its owners to fire or other household disasters, but when a cat goes in for heroics it makes news.

SSgt. and Mrs. Urban Schaeffer, however, are mighty happy parents today because their one-eyed cat was on duty when a fire broke out in the bedroom where their five-month-old son lay sleeping.

It was the cat's frantic yowling that aroused Mrs. Schaeffer to call for help. A neighbor, A/2C Pablo Minjares, hurriedly entered the smoke-filled room.

He found the faithful kitty trying to push the baby out of his bassinet which had already caught fire.

Firemen said Minjares' quick action undoubtedly saved the baby from suffering serious or even fatal burns. But the airman gave most of the credit to the tabby.

The group. He was born in June, 1895.

Development Work Contracts Awarded

The U. S. Army June 30 awarded three contracts totalling \$12,222,032 funding further work on two of its missile systems.

Two contracts totalling \$7,787,000 went to the Martin Company's Orlando, Fla., Division for work on the Pershing ballistic missile system which is now under development. Some of the money will procure items of ground support equipment for training purposes.

The remaining award went to the Western Electric Company, prime contractor for the Army's Nike Hercules air defense guided missile system.

The \$4,435,032 contract covers production of ground guidance and control equipment for Nike Hercules. Most of the work will be done in Western Electric plants in Burlington and Winston-Salem, N. C. Some of it will be done at the Douglas Aircraft Company's Santa Monica, Calif., facility.

Pershing is being developed under the technical supervision of the Army Ballistic Missile Agen-

cy as a general support weapon for the field Army. Nike Hercules, an operational weapon, is under the technical direction of the Army Rocket and Guided Missile Agency.

Both agencies are elements of the Army Ordnance Missile Com-

SOLDIER OF THE MONTH—SP4 Chester R. Huddleston (center) of the 228th Ordnance Detachment, Unit Training Command at OGMS receives a letter of privilege and a check from Col. ter H. Levine, Deputy Commander of the U. S. Army Ordnance Missile Support Agency, a Soldier of the Month. At left is his unit commander, 1st Lt. Joel F. Thomas. SP Huddleston is from Ripley, Miss. Prior to entering the Army in December, 1959, he was studying mechanical engineering at Mississippi State University. He is the son of Mr. and Mrs. Elbert Huddleston of Ripley.

Camp Perry Matches Are Scheduled July 28, Aug. 27

"Count Down—Commence Firing" TEN (Ready), NINE (On The), EIGHT (Right), SEVEN (Ready On), SIX (The Left), FIVE (Ready), FOUR (On), THREE (The), TWO (Firing Line), ONE (Commence), ZERO (Firing).

Whether it be at Cape Canaveral, Florida, Vandenberg Air Force Base, California, or Camp Perry, Ohio, the mixture is the same—highly talented, dedicated people

endeavoring to shoot something somewhere else with accuracy, speed and efficiency, and with a specific target, or goal, in mind. The something being hurled forward may be called by any number of names, rockets, missiles, projectiles, or just plain bullets.

More missiles will be fired down-range in an hour of almost any given morning during the 1961 National Matches at Camp Perry, Ohio (July 28, August 27) than all the rockets sent aloft since the first Nazis V-2 sped its erratic way toward England during World War II. True, there is a difference in the sizes and costs of the Camp Perry projectiles when compared with space vehicles, but both have a definite place in the scheme of things, whether their dimensions approximate the size of an eraser on a common lead pencil or a ten-story office building.

Because the day has yet to dawn—and the best minds cannot fore-

tell—when an individual could be equipped with any futuristic death-ray or atomic-powered hand or shoulder weapon even remotely comparable with the tried and true ball ammunition type, the United States Army persists in its efforts to improve small arms and the techniques of their use.

The National Matches afford the best opportunity for military and civilian marksmen to demonstrate their shooting proficiency before the eyes of the nation. Held yearly at Camp Perry since 1907, and established by Act of Congress, their only interruptions were caused by war-time conditions. Last year about 6,500 individuals took part in the competitions and courses of instruction at Camp Perry. More are expected this year.

Never having missed a scheduled competition, the US Army again looks forward to the friendly rivalry of other Armed Services and non-military entrants. This year's Army national trophy teams were selected from the winners of the recent All-Army Championships at Fort Benning, Georgia, where 20 existing Army records were broken. The Army's big wallop will be provided by the teams designated All-US Army: US Army-Europe; US Army-Pacific: Western Region (of the United States) and Alaska; Eastern Region and the Caribbean Command; and the US Army Air Defense Command. This six-team system was used last year for the first time. Army Reserve Component entries will be on hand from reserve organizations in each major command, National Guard units of each state, and many ROTC units.

A bountiful crop of trophies was reaped by the Army at Camp Perry in 1959. However, the 1960 Matches yielded an even richer harvest when the Army carted off all five of the prized National trophies as well as the National rifle and pistol individual championships.

Although performances since the 1960 Matches might be construed as good cause for Army optimism, when asked for a forecast of what the Army will do this year, a spokesman stated: "We will be on the pad waiting for the count-down."

Competition for Ginna Medaris Trophy Begins

Twenty-two members of the Golf Group sponsored by the Redstone Arsenal Officers Wives Club began competition for the Ginna Medaris Golf trophy on the Redstone Arsenal Course Wednesday, June 28.

Others are expected to enter the competition for the trophy between now and the final day of play on July 18.

The trophy was presented to the group in 1960 by Mrs. J. B. Medaris, wife of the former Commanding General of the Army Ordnance Missile Command. The Wives Golf Group sponsors an annual competition for the cup.

At Wednesday's meeting of the Golf Group, members had a farewell picnic at which PFC Jim Er-

UTC Downs 291st MPs

With one of the warmest nights of this season for baseball a good crowd was on hand to watch HQ UTC bomb the 291st MP pitching staff; picking up 18 runs on 12 hits. The pitcher for Hq UTC, Lt. Doug Grindle aided his own cause with four hits at six times at bat and he scored three runs.

The MP's scored the first run of the evening in the second inning. Hq UTC tied the score in their half of the second and from then on had things pretty much their own way.

The big inning was the eighth when they scored 10 runs on six hits and four walks. The first baseman for the 291st MP's Sp/4 Herman Holman increased his batting average as he singled twice in four trips to the plate. The winning pitcher, Lt. Grindle allowed six hits, walked three, and struck out three.

Totals for the game: Hq UTC, 18 runs on 12 hits. 291st MP, 1 run on six hits.

COMPANY B, OGMS GOES 11 INNINGS TO DEFEAT 'A'

Co. A, OGMS was handed their first defeat of the season by their arch rival Co. B, OGMS in an 11 inning battle that ended when Sgt. John Schillo cracked a single to right center to drive in Sp4 Bob Schlett from second with the winning run.

The first score of the game came in the fourth inning when Schillo smashed a 400-foot home run off SP5 Ken Hunsicker; it was the first ball hit out of Lanton Field this year. Co. B picked up two more runs; one in the fifth and one in the seventh, both unearned, to take a 3-0 lead.

In the top half of the eighth inning Co. A scored three runs when their right fielder, PFC Larry Walrod hit an inside-the-park home run with two men on base.

Neither team scored in the 9th inning. Co. A scored three runs in the top of the tenth only to have Co. B score three in their half of the inning to tie the score once again.

Co. A scored one in the 11th to take a slim lead but Co. B tied the game on a wild pitch and won when Schillo came through with his single to right center.

The winning pitcher SP4 Bob Schlette gave up eight hits, three walks, and struck out 13 batters.

The losing pitcher was SP5 Jimmy Ramsdell who worked in relief of SP5 Ken Hunsicker.

Ramsdell replaced Hunsicker in the last of the tenth when Hunsicker had loaded the bases with none out. Hunsicker allowed four hits, walked five batters, and struck out eight in the nine innings he worked.

Totals for the game: Co. B, 8

Swimming Pool Is Open Seven Days

The Special Services Swimming Pool is more popular with the change in weather.

It offers opportunity for beginners to learn to swim mornings and is staffed with reliable lifeguards.

Hours of open operation are from noon until 9 p.m. seven days a week.

The location is off Vincent Road in the new Troop area.

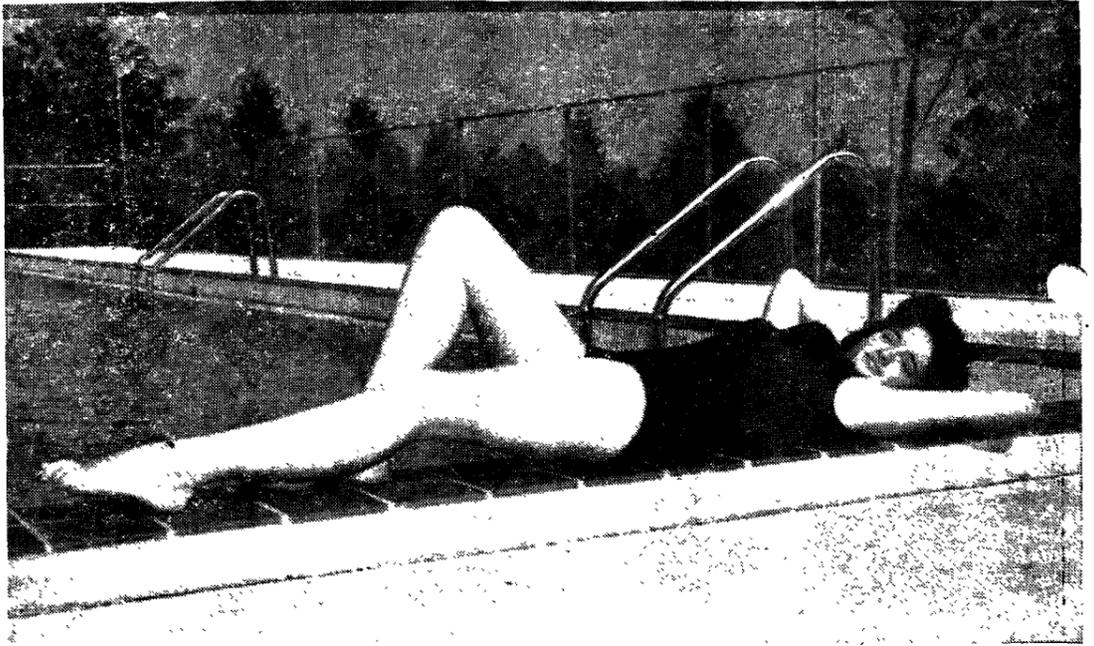

AIR FORCE WINS

The 866th Air Force continues to dominate softball with a 14-0 record.

They are already making plans for the Third U. S. Army Softball tournament to be held 11-15 September at Fort Jackson, S. C.

Rain held back a lot of teams from being a close contender, or from building a threatening team.

Fans are even beginning to enjoy a 30-1 score with the PX mobile truck.

SUNNING ON THE POOLSIDE—Miss Helen Montgomery relaxes on the edge of the Redstone Arsenal swimming pool. The pretty 19-year-old clerk-steno in the ARGMA Control Office is from Moulton, Ala. Vital statistics: hair and eyes are brown, 5'4" tall and weight 115 pounds.

Arsenal Skin Divers Visit Bahama Islands

Six members of the Redstone Arsenal Skin Diving Club returned recently from eight days of spearfishing and skin diving in the Bahama Islands. Those in the group were Hugh Vandegrift, Dick Dickson, Jerry D'Urso, Bill Arnold, Mary Jo Smith and Vera Vandegrift. The club combined for the trip with an out-of-town club and chartered an 85' cabin yacht from Miami.

First day of the cruise was spent diving and spearfishing on a sunken World War I vintage freighter near Bimini. The remainder of the cruise was spent diving on the coral reefs at the West End of Grand Bahama Island near Wood Key. These locations are among the finest diving locations in the world. Many skin divers consider the area second only to certain reefs near Australia.

Crystal clear waters and multi-colored coral reefs characterize Bahama waters. "We did mostly free diving (without aqualungs) while in the islands and the favorite fish speared were grouper and hog snapper," stated Vandegrift.

The club has had several week-end trips to the Northern Florida Gulf area in past weeks to prepare for the Bahama diving. Additional trips to the Gulf and the clear water springs are planned for the remaining summer months. Civilian and military personnel interested in the club and skin diving are asked to contact Vandegrift, 536-6935, after working hours.

runs on 5 hits. Co. A, 7 runs on 8 hits.

put on one of the finest pitching performances seen here at Lanton Field. Vasko struck out a remarkable total of 22 batters; including eight in a row. He was tapped for five hits and only one of the five runs scored against him was earned.

Co. B's starting pitcher PFC. Mel Shaffer worked the first four innings and gave up 6 runs on 6 hits and was charged with the defeat. He was relieved by Sgt. John Schillo who worked the remaining four innings. Schillo allowed one run on four hits, struck out ten batters, and walked three.

The MP's jumped off to a 6-0 lead in the first four innings. Co. B scored three in the fifth and two more in the fourth, but failed to score the rest of the way. PFC. Dave Merritt had two of the five hits off Vasko, both singles. The MP's second baseman SP-4 Earl Dennis had three singles in five attempts to pace the MP's 10 hit attack.

Totals for the game: 291st MP, 8 7 runs on 10 hits. Co. B, 5 runs on 5 hits.

DO IT YOURSELF is motto in Field Service Operations and the men in the Maintenance Support Branch of the Maintenance Division use the principle in the classroom as well as on the job as a part of the career development program.

'Do It Yourself' Classes Aid Career Development

A group of employes in Field Service Operations, Maintenance Division, ARGMA, have scattered to the four winds the age-old adage that "Readin', Ritin', and 'Rithmetic are taught to the tune of a hickory stick." They have voluntarily organized their own "Do it Yourself" class to acquire knowledge about subjects essential to their jobs.

Using their lunch periods for classroom sessions, they are presently "diggin' deep" into the complicated maze of electricity and electronics.

Each work day, they carry their home-prepared lunches to a classroom in Building 5681 where sandwiches and schematics, calories and capacitors, and omelets and ohms, become the simultaneous bill of fare.

Even the instructor devotes his time in this manner so there will not be any cost to the Government for the time devoted by the entire class. The course was put into effect, "on their own," by taking advantage of the instructor's valuable experience, plus the use of existing vu-graphs, films, transparencies, charts and a blackboard. In addition, class participation is enthusiastic in resolving

any question or problem presented by any member of the group.

It is a vivid example of the intense effort that our people will make to satisfy a burning desire to learn—learn about the things that have become so vital to our modern way of life.

The course covers basic electricity and electronics, using as a pattern a course offered by Bell Telephone Laboratories to their employes. The training material is a cooperative provision made by the Depot Maintenance Operations Branch of the ARGMA Maintenance Division. This material includes text books for off-duty assignments which are given after each class. Text books were made available through the generous advice and assistance of Mrs. C. C. Slayden of ARGMA Technical Library.

Like "Topsy", the course just grew after one man expressed an earnest desire "to learn a little about electronics" from someone who "knew a lot" about the subject. He got his wish, and the word was passed around until 14 students from the Maintenance Division joined in the development of the present class.

The class instructor is Mr. John

L. Stensby, who is a retired Chief Warrant Officer and a former instructor at the Ordnance Guided Missile School (OGMS). He says that it is a genuine pleasure to work with the group of volunteer students, because interest and a determination to learn are most outstanding since they made their own decision to participate.

Mr. Stensby directs the class in particular discussions and resolutions of practical problems encountered in the course of work. Attendance is strictly voluntary, and progress of the students is determined by their ability to learn comprehensively.

The class is composed of Mr. Chester L. Murphy, Mr. F. Griffith, Mr. F. Tipps, Mr. E. C. Smale, Mr. P. D. Kennemar, Mr. R. L. Cramer, Mr. T. C. Grooms, Mrs. L. M. St. John, Mr. C. M. Adams, Mr. M. L. Kingsmore, Mr. R. S. Kucharski, SP5 H. Lamoree, Mr. R. A. Martin and Mr. Austin League.

Yes, the class, like "Topsy", has grown up. An expressed desire to learn by a single individual has opened the door to a program of advanced knowledge that will have beneficial effects upon many others in the days ahead.

Gary Metzger Captains Winning Junior Golfers

Twenty-three of the Junior Golf Group teed off Thursday morning on the Redstone Arsenal Golf Course.

The winning team was captained by Gary Metzger who had Victor Swan, Terry Thompson, Jeff Jefferds, Mike Zierdt and Karen Miller as team members.

The Junior Group plays each Thursday morning, teeing off between 8 a.m. and 10 a.m.

Marbel L. Edwards Retires With Thirty Years Service

Marbel L. Edwards, Industrial Specialist in ABMA's Industrial Operations' Facilities and Resources Office, ABMA, retired at the end of June after 30 years of service.

Mr. Edwards is a native of Indianapolis, Ind. He and his wife live at 603 First Avenue, Athens.

Mr. Edwards joined the Ordnance Corps at Redstone Arsenal in June, 1951, as a member of the Guidance & Control Laboratory of the Guided Missile Development Division. This organization became a part of the Development Operations Division in the establishment of ABMA in February, 1956.

Prior to June, 1951, Mr. Edwards was employed at Langley Field, Va., as a machinist in Aircraft Research. He began his machinist career as an apprentice in 1915 while attending high school.

Mr. Edwards says that the only machining he will do from now on will be on fishing equipment. He is an ardent fisherman and intends to keep lines wet from this day forward.

Extension Class Graduates Eleven At Missile School

Eleven persons at the Army Ordnance Guided Missile School were awarded certificates of completion by the Huntsville Board of Education recently at the termination of a 39-week course in basic electricity designed to supplement occupational skills.

The group included contractor, civil service and military personnel employed at the Missile School.

The course, part of the trade extension program held at Butler High School, was conducted by the State Department of Education, in cooperation with the local board of education. The courses were organized to provide an opportunity for employed industrial workers to increase their occupational knowledge and improve trade skills, according to James C. Hunnicutt, local coordinator.

Four-hour classes in basic electricity were begun in September and held one night a week. Edmond Falconbury, a project officer in the department of Individual Training at the Missile School, was the course instructor.

Personnel at OGMS who received certificates include SFC. Tyler C. Craig, S/Sgt. R. H. Moore, Levin Soule, SFC. Edward F. Smith, N. Q. Allen, J. A. Crawford, Jr., Capt. George Adamson, Olin E. Henley, Ken R. Hertha, Harold A. Schulz and S/Sgt. L. E. Jenne.

Books in Review

I WALKED WITH HEROES by Carlos P. Romulo (Holt, R. Ehart & Winston, 342 pp. \$5.00)

There is something for everybody to get mad at in this autobiography of the little Filipino who rose to become the President of the Fourth General Assembly of the United Nations—where he sat to sit on three New York phone books in order to be seen.

But even the most rabid critic of the general's points of view must admit that he exemplifies what President Kennedy was talking about when he said, "Ask not what your country can do for you, but what you can do for your country."

Nor can they disagree with the dedication of the book "... all children — this book is written with hopes of the time to come, when no child shall lie down in terror or waken to hunger, but shall know of himself as a being of unique value in a safer and kinder world."

These two themes set the tone of the book—it is a passionate plea to freedom and also a sentimental record of the personal life of Romulo.

Teacher, author of ten books, an editor-in-chief at 31, last man off Bataan, Ambassador to the United States—his honors have been many, including 31 degrees

from educational institutions — and the Silver Star and the Purple Heart.

His heroes are Heroes of Freedom. He is not, as has been said, a defender of the United States, but a defender of ideals of democracy. "Freedom," he writes, "must be for all men in all countries before any man can be truly free."

He is anti-communist, for communism is the antithesis of freedom. But he does believe that Khrushchev "is doing what the democracies are failing to do—he is giving voice."

His comments on the inner workings of the United Nations, Philippine politics, and on United States-Philippine relations are of particular interest.

"I Walked With Heroes" is a warm, human book, with perhaps the flaw of a too-humble humility. Romulo's gift of words—he is a Pulitzer Prize winner—as well as the candor of his opinions, makes this a highly readable volume.

The Heritage of Man by Godwin Smith (Scribners, 896 pp. \$12.50)

With brilliant lucidity, Mr. Smith, professor of history at Wayne University, has compressed the history of the world from prehistoric times to the present into one comprehensive volume which reads as interestingly as the latest best-seller on the book lists.

"History," writes Smith, "is the vital, vivid and complex tale of deeds and ideals of a multitude of human beings," and "this book is a journal of certain experiences of mankind rebuilt out of the memory of the historians . . . I

have consistently sought to stress the varying trials and problems of the human race and the particular ways in which men have met the challenge of their hour."

He has endeavored to relate history in terms of men and "to seize the mood and atmosphere of . . . vanished years," and has succeeded. This is not a dry chronicle of facts, but the pageant of history come alive, the tangled web unravelled in clear incisive prose. A fine book, and one it is hoped will appear in paperback format to render wider audiences.

Forty-one maps, 125 illustrations, bibliography.

MANILLA GALLEON by F. Van Wyck Mason (Little, Brown & Co., 495 pp., \$5.95)

In the historical fiction field, they don't come much better than F. Van Wyck Mason, as translation of his books into fifteen languages indicates. He is also the author of the Colonel North stories, which are highly popular.

The Manila Galleon was a Spanish treasure ship plying between Acapulca and Manila in the 1740s. Commodore George Anson, Father of the British Navy and by extension father of the U.S. Navy too, was given the assignment of harassing the Spanish Dons on sea and on land, and of capturing the Galleon.

Manned with inexperienced pressed seamen, supplied with aged horse meat and ill-built ships, Anson underwent the bleak winter storms of cape Horn and the hurricanes of the Pacific, arriving at the rendezvous off the coast of South America with half his fleet sunken or turned tail and two thirds of his men dead. Undaunted, his ships refurbish-

Raytheon Receives 2 Army Contracts

The U. S. Army today awarded two contracts to the Raytheon Company of Waltham, Mass., totaling \$4,964,937 for work in connection with the Hawk Missile

system. A \$2,788,649 award covers production of radar test equipment. The work is to be performed at Raytheon's Bristol, Tenn., facility. The other, for \$2,176,288, will procure radar. Work will be performed at the company's Andover, Mass., plant.

The U. S. Army Rocket and Guided Missile Agency at Redstone Arsenal, is the Army's Hawk program supervisor.

ed and his crews filled out with seamen from prize vessels, Anson sacked the rich port of Payta, failed to lure the Galleon out of Acapulco, and sailed for China, where his flagship was the first man-o-war to enter Chinese waters. He then sailed back into the Pacific, with only 267 men and took the Galleon, and departed for home, with Spanish doubloons for ballast.

He arrived in England four years after he left, with one ship instead of eight, and with only 124 of the 2,139 men who sailed with him still alive. His countrymen proclaimed him a new Drake and made him an admiral. Eight of his officers were later made admirals, and Anson and two others became First Lord of the Admiralty.

This is rousing he-man stuff, with a good historical base, not quite up to the level of Forester's Hornblower or "Mutiny on the Bounty," but of far higher caliber than most novels of the genre. Mason's writing has a smooth flow which carries the reader along easily, until he looks up at the clock and realizes he should have been in bed long ago.

In Columbus, New Mexico... Retirement is a Beginning Not the End!

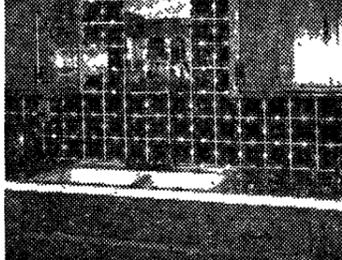

BOB AND MADGE BICKSTON run the Pancho Villa Museum and a gun shop in Columbus. The Museum is a popular tourist attraction. Bob is a former stunt man and quick-draw pistol expert. He also teaches fencing and archery to Columbus residents. The Bickstons came to Columbus with a road show, liked it and stayed.

PANCHO VILLA STATE PARK is being developed by the State of New Mexico. It will be opened this Fall with a big Western show and barbecue. Park is on site of old Army camp and battleground.

NEW HOMES IN CONTEMPORARY STYLE are by Sam Pinckney and Associates. Two bedroom models sell for \$7450; three bedroom models for \$7950.

THIS THREE BEDROOM HOME, by Hercules Construction Company, sold for \$7500 including all appliances and extras, such as Mexican tile in kitchen (left). One bedroom adobe homes like this sell for \$4500. Traditional Spanish style is popular in Columbus.

COLUMBUS IS NOT A FOGEYVILLE

Columbus is a vigorous, growing town for individuals located on the border of Old Mexico 80 miles west of El Paso, Texas. It needs the energy and experience of retired people who wish to work or start new businesses, service the tourist trade and keep the town growing. In Columbus older people are not relegated to an "old fogie" colony stuck out in the boondocks. In Columbus no one need fear endless years of shuffleboard and sitting.

COLUMBUS IS NOT A PROMOTER'S PIPE DREAM

People who buy in Columbus, New Mexico, aren't buying barren land where a town may or may not develop someday. Columbus is there and is growing. Houses and tourist courts are going up. There's a good school, three churches, a library, good roads, an airport and a municipal swimming pool. The Southern Pacific Railroad's Golden State Limited and Sunset Limited stop at Columbus every day. A paved highway in Mexico is now being built to connect Columbus with Parral, Chihuahua City and Mexico City which will make Columbus a major Port of Entry. More than 350 people live in Columbus now and all agree the town just has to grow. You can grow with Columbus.

COLUMBUS IS BUILDING FOR THE FUTURE

Columbus is a planned and zoned community. Land is sold only subject to strict deed restrictions. Commercial, industrial and residential areas are clearly defined in accordance with up-to-date city planning precepts to provide for orderly and attractive growth.

PAY ONLY \$35 DOWN FOR YOUR LOT

\$35 down and \$10 a month for 72 months buys one in-town residential lot. Cash price per lot is just \$725. Lots are 50 ft. wide and 120, 140 and 160 ft. deep. You can buy any number — side by side or separated.

CLIMATE... RECREATION... COST OF LIVING

Columbus is in high (4300 ft.), dry, rolling country surrounded by irrigated farms and ranches. Average summer temperature: 80°. Average Winter temperature: 60°. Columbus has 355 days of sunshine a year and residents find relief there from asthma and hay fever. There's an unlimited supply of 99%-pure water. Recreation in New Mexico and Old Mexico is unlimited and varied. Many necessities and conveniences are available at way below U.S. prices in Palomas, Mexico, just 3 miles to the South.

THE COLUMBUS GUARANTEE

Whether you buy your lot in Columbus sight unseen or after a visit, the Columbus Development Board, Inc., guarantees that, if at any time during the three years following the date you sign your purchase contract, you are not satisfied with your investment, your money will be refunded in full and without penalty upon surrender of your contract.

HISTORY

In 1916 the famous Mexican revolutionary, Pancho Villa crossed the border, raided Columbus and did a lot of damage before the U.S. Cavalry drove him back to Mexico with heavy casualties. Today the most happy relationship exists between Columbus, New Mexico, and its sister city Palomas, Mexico.

He succeeds Adm. Arleigh A. Burke, who retires Aug. 1.

New Hearing Aid 77½% Smaller Than Original

A completely new, vastly improved eyeglass hearing aid has just been announced by the Otarion Listener Laboratories. The new aid called the X-100, is 77½% smaller than the original eyeglass hearing aid which was introduced by Otarion.

Because of its smaller size, it has been possible to style the new X-100 so it looks, feels and wears just like the most popular fashion in eyewear. The sleek, smart temples have been universally accepted by both men and women. Three colors, with either plain or engraved temples, are available to suit the most discriminating tastes.

In addition to the smart styling, the X-100 provides superb hearing qualities, fitting most moderate to severe hearing losses. The exceptionally clear tone provides not only better hearing, but better understanding as well. Many additional conveniences have been designed into the new eyewear, including a separate on-off switch, a "set and forget" volume control and a forward mounted microphone for absolute sound reception. Thus, even folks who have never worn a hearing aid before can quickly and easily enjoy all the benefits of normal conversation.

If you have missed the pleasures of your family, friends, church or club because of a hearing loss, prompt action now can bring these joys back to you. All you need do is phone, write or drop in to the office serving your area. There is no obligation for a free test and consultation in the office or in the privacy of your own home. A consultation today may bring many years of restored hearing joy for you. So don't delay. Do it today!

General Taylor...

General Maxwell D. Taylor, USA-Ret., was recently appointed by President John F. Kennedy to assist in the review of the U. S. intelligence services, para-military and guerrilla warfare activities. General Taylor, a graduate of the U. S. Military Academy in 1922, was Army chief of staff prior to his retirement. "The Uncertain Trumpet," General Taylor's book, is currently on the recommended list of the U. S. Army Contemporary Military Reading Program.

Army
A PARATROOPER of 1st Airborne Battle Group, 502nd Infantry Regiment seems surprised to find the privacy of his one-man foxhole invaded by an intruding "Iroquois" helicopter. The pilot was shocked just as much when he found his hastily selected landing pad honeycombed with similar defensive works prepared for a recent Airborne-Armor Link-Up demonstration at Ft. Campbell, Ky. The Army's HU-1 IROQUOIS is made by Bell Helicopter Corp.

Movie Schedule

Wednesday, July 5, "Hell to Eternity" (M-YP) starring Jeffrey Hunter and Vic Damone. Time 1800 and 2030 hours.

Electronic Brain Is Aid to ARGMA Management

An electronic brain is the newest and perhaps the strangest management aid being used by the U. S. Army Rocket and Guided Missile Agency to expedite development of the Nike Zeus anti-missile missile system.

Charged with day-by-day technical supervision of one of the most challenging projects ever tackled in America—finding, identifying and intercepting attacking intercontinental ballistic missiles—the Army Zeus project personnel must keep close tabs on test and development progress.

Their task is complicated by the widespread Zeus activity at test sites spread over half the world's surface and an industrial effort involving more than 2,000 businesses in 41 states.

They are introducing the Program Evaluation Review Technique—PERT for short—specific areas of the Nike Zeus program, testing its effectiveness as a means of keeping atop the situation in those areas and considering its application in other portions of the Zeus program.

By feeding regularly prepared program summaries into an electronic computer at Redstone Arsenal, the Army project leaders can get lightning quick evaluation of how well things are moving now and even more important in a high priority project like Zeus, how well they will be moving months from now if things keep on as they are.

PERT is able to point up potential trouble spots long before they occur. It can also suggest alternate plans that promise more efficiency or faster completion of work. If asked the right questions, it can give all the consequences that might result from a late delivery of a seemingly inconsequential item from a manufacturer any where in the United States or a missed completion date of a construction job on some far away Pacific island.

Brig. Gen. John G. Zierdt, ARGMA Commander, puts the need for such a system this way: "In a program like Zeus, there must be plans and detailed schedules for each portion. Every person participating must know where he is going and when he is expected to get there. The schedule must be adhered to. We look for yellow warning lights when we study our progress. We want to nip potential trouble spots quickly before they become red lights that would have far reaching effects.

"We must keep the program moving at top speed."

"PERT focuses our attention on danger signs in time to take corrective action," says Capt. Henry Magill of ARGMA who worked out introduction of PERT into the Nike Zeus program

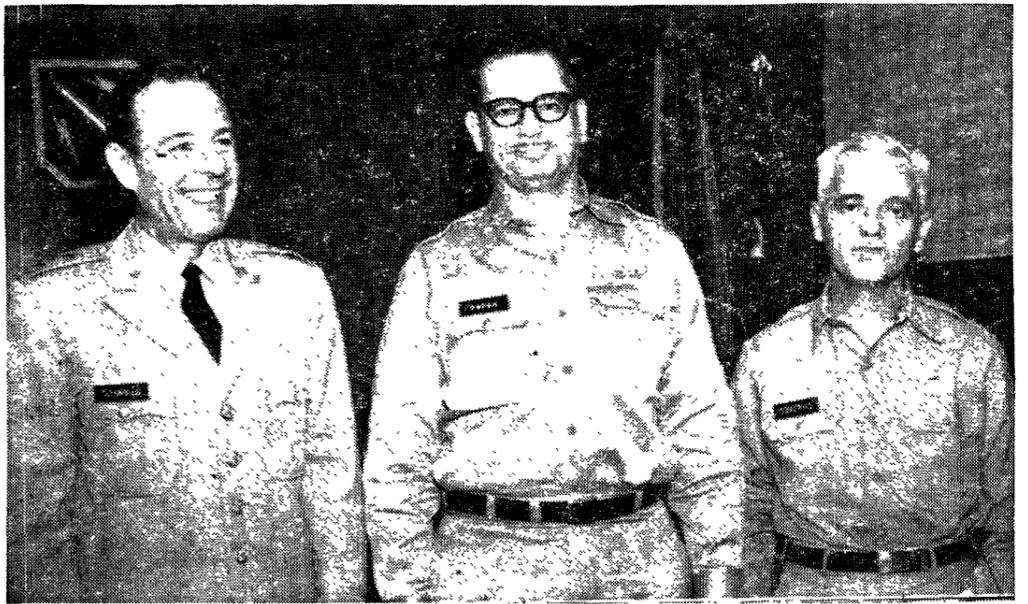

"Its one way of keeping things moving all along the line, of making sure we meet our development schedule deadlines on time."

In the PERT system, an electronic computer is programmed to monitor any plan that requires specific events to be performed

consecutively. In Nike Zeus, for example, missile motors must be ready well in advance of the time missiles are scheduled to be fired to allow ample time to assemble the complete missile prior to testing.

Persons directly responsible for specific events are required to furnish regular reports that include three dates for accomplishment of their objective: optimistic, most likely and pessimistic. The computer manipulates three basic elements, time, resources and performance to give the statistical probability of doing the job in the required time.

Initially developed by the Navy, the PERT system was used in the management of its successful Polaris fleet ballistic missile program.

NEW DUTY, NEW RANK . . . A GOOD OMEN—Flanked by his "big" boss and his immediate boss Maj. Gen. August Schomburg (left) and Lt. Col. James W. Soverns) Lt. Col. Leadlay H. Ogden is shown above just after his gold leaf had turned silver. A newcomer to Headquarters of the U. S. Army Ordnance Missile Command, his new rank insignia was pinned on recently in the office of the Commanding General. He is Assistant Inspector General of AOMC. Ogden is married, has an 8-month-old son, and the family lives on Post at Redstone.
