'O' Drops From AOMC in Army Reorganization

UNITED STATES ARMY MATERIEL COMMAND
Office of the Commanding General
Washington 25, D. C.

1 August 1962

TO ALL PERSONNEL OF THE U. S. ARMY
MATERIEL COMMAND:

The Army Materiel Command today becomes a full-fledged member of the U. S. Army team. Its mission, stated in its simplest terms, is to equip the Army to take the field—whenever, wherever, and however it is called upon.

For all of us in AMC and its component elements, this mission represents an unprecedented challenge and an unlimited opportunity. It is a challenge because never before has there been a single integrated organization specifically conceived and designed to provide the Army's weapons and equipment.

For months now those of us charged with bringing AMC into being have been at work developing countless charts, graphs, procedures, and directives. Despite the efforts expended, however, no organization can be better than the people who operate it. The measure of AMC's success will be the measure of our individual successes—yours and mine—in the performance of our everyday responsibilities.

Each of you brings to AMC a specific skill or experience. Most of you bring a personal enthusiasm for your special field of work. Many of you also bring a time-tested loyalty to the Technical Services and the other Army elements with which you previously were associated.

It is important that you bring all these things to AMC. We need your skill and experience. Particularly, we need your enthusiastic interest in your specialty. Above all, we need your capacity for loyalty to what is now our common cause: That the U. S. Army shall be the best equipped in the world.

Despite its newness in the Army spectrum, AMC represents a merger of proud traditions that extend, in some instances, to the birth of the Army itself. With your help, I am confident AMC will prove worthy of that great heritage.

F. S. BESSON, JR.
Lieutenant General, USA
Commanding

Lt. Gen. Frank S. Besson

Maj. Gen. Francis J. McMorrow
Commanding General
Army Missile Command

Four Technical Services Absorbed by 'Materiel'

The Army Ordnance Missile Command undergoes a name change today . . . it becomes the Army Missile Command—without the "O".

"Ordnance" is being dropped from the Command's name under an Army-wide reorganization. The Ordnance Corps, Signal Corps, Chemical Corps, and Transportation Corps all are being absorbed into the new Army Materiel Command (AMC), commanded by Lt. Gen. Frank S. Besson.

Col. Pickett Promoted To General

Stars were pinned today on the shoulders of Col. George E. Pickett, promoted to Brigadier General.

General Pickett is one of two Army Missile Command Officers confirmed by Congress for promotion to Brigadier General several (See PICKETT on Page 3)

Engineering Data Conference to Be Here August 7-9

A fourth conference of the Department of Defense Engineering Data Systems Committee will be held Aug. 7-9 at Redstone Arsenal.

Reports and studies concerning project work being accomplished will be presented during the three-day period. Subjects such as language technology, documentation requirements in the fields of design engineering, research and development, maintenance engineering and personnel training will be discussed and evaluated.

Over 100 participants are expected to attend, representing the (See CONFERENCE on Page 3)

The Missile Command is one of seven major field commands under the Army Materiel Command.

Redstone Arsenal's Army Ordnance Missile Support Agency also undergoes a name change under the reorganization. It becomes the Army Missile Support Command.

The new reorganization places Watertown Arsenal, Mass., under the Missile Command and institutes a new concept of project managers. Watertown is one of the former Ordnance installations transferred to a major field command. It will support the Missile Command in the managership of the 19 missile systems under the Missile Command.

The project manager concept goes into effect at the Missile Command and throughout the Materiel Command. A total of 28 project managers have been established within AMC.

Seven missile project managers will be at the Missile Command, with one manager reporting directly to the Materiel Command. An eighth missile project will have personnel at Redstone but will also report directly to AMC.

The Nike Zeus project office, headed by Col. Ivey O. Dweyry Jr., will report to the Materiel Command but will be located at Redstone Arsenal. The project manager for the Field Army Ballistic Missile Defense System (FABMDS) also will report to AMC, but will be located in Washington with some FABMDS project personnel, located at Redstone Arsenal.

The other project managers and the missile systems they manage (See 'O' DROPS on Page 2)

Chief of Ordnance Has Busy Day at Redstone

He Stands Retreat, Presents Awards, Visits Other Posts

Maj. Gen. Horace F. Bigelow, Chief of Ordnance, paid a farewell visit to the Army Missile Command Thursday.

During the day he also visited Anniston Ordnance Depot and the Birmingham Ordnance District.

Gen. Bigelow's busy day included a Retreat Parade and Review here, presenting awards to six men who were recognized for outstanding Research and Development Achievements for the Missile Command, and a briefing on one of the Army's newest missile systems.

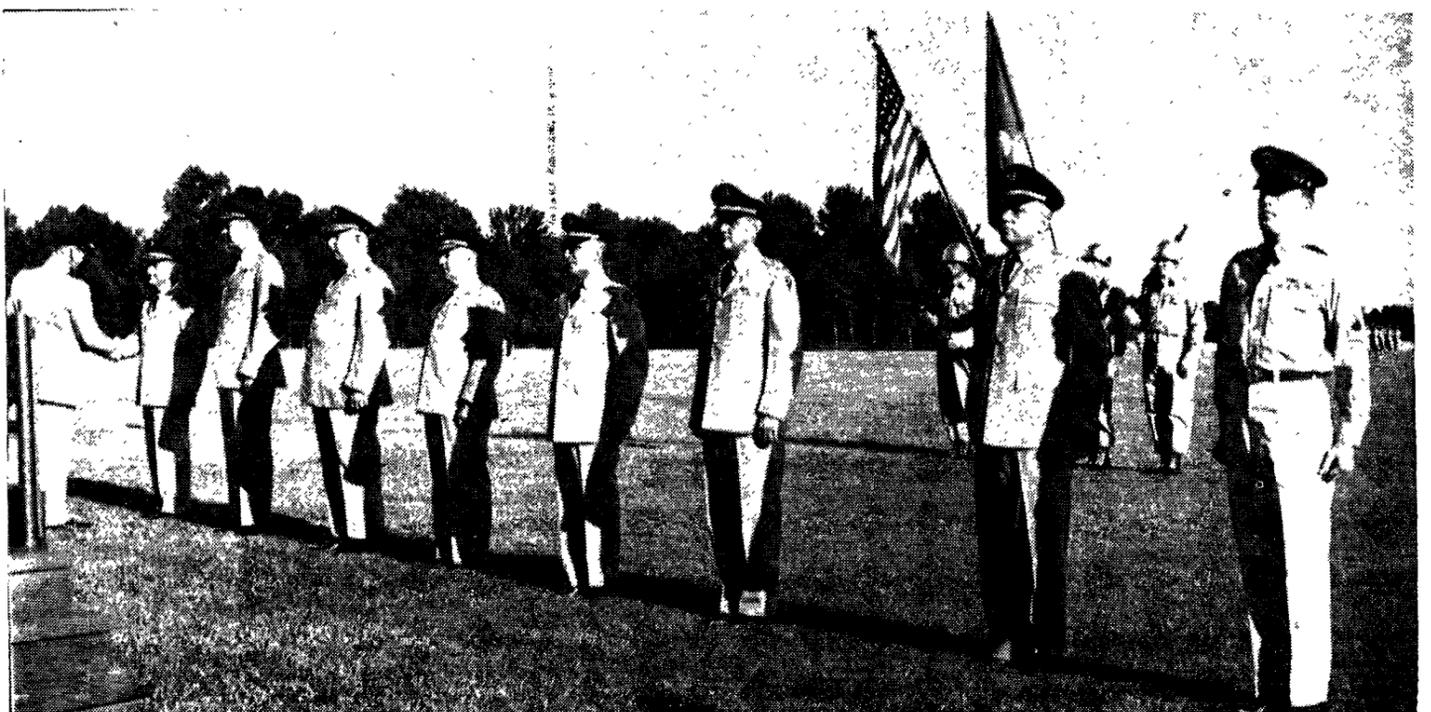

At the Retreat parade, Gen. Bigelow delivered a farewell address to the troops from Ordnance and the other services represented at Redstone Arsenal. He pointed out that a combined force is necessary, but it is the job of the Ordnance men to see that the tools the other services used are produced and delivered on schedule lest a battle be lost for lack of equipment.

He also presented scrolls to six men retiring from active Army duty: Lt. Col. John E. Batterson; Lt. Col. Henry L. Gotzian; Lt. Col. William R. Cowan; Maj. John W. Kelly; Capt. Richard L. Dineley; CWO Jack W. Nelson; CWO George M. Seely; and M/Sgt. William S. Linkins.

Earlier in the day, Gen. Bigelow was flown from Redstone to Birmingham and Anniston to pay his farewell respects to the Ordnance personnel before the Chief of Ordnance Office was discontinued on

Aug. 1.

Upon his return to Redstone Arsenal he addressed more than 400 key people representing the Army (See GEN. BIGELOW on Page 2)

DOUBLE FAREWELL—The last Chief of Army Ordnance says goodbye to eight men retiring from active Army service during the farewell visit of Maj. Gen. Horace F. Bigelow to Army Ordnance installations. The General was at Redstone Arsenal last Thursday. During the day he also visited Anniston Ordnance Depot and the Birmingham Ordnance District. Among his activities at Redstone Arsenal were a missile briefing, a farewell address

to more than 400 key personnel in the Missile Command, and a Retreat Parade and Review at which the eight men retiring were presented scrolls by Gen. Bigelow. Left to right are the General, Lt. Col. John E. Batterson, Lt. Col. Henry L. Gotzian, Lt. Col. William R. Cowan, Maj. John W. Kelly, Capt. Richard L. Dineley, CWO Jack W. Nelson, CWO George M. Seely; and M/Sgt. William S. Linkins.

The Redstone Rocket

The publisher will receive editorial content for publication in the Rocket only through the Information Office, Army Ordnance Missile Command, Redstone Arsenal, Alabama, Bldg. 5250, Room A-135, Extension 876-4161. All advertising copy and payments therefor are received by Mrs. Zillah T. Heath, Huntsville, Alabama, P. O. Box 346, telephone 534-4701, as representative of the publisher.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates for the Rocket are \$5.15 a year, or \$2.83 for six months, Alabama sales tax included. Mailing arrangements may be made with the publisher.

It isn't the number of guards put on,
Or the stairs with the well-kept rails;
It isn't the lights that they install,
Or the lack of rusty nails,
It's true that these do help a bit,
But when all's been done and said,
The thing that prevents the accidents
Is the way you use your head!

1 August 1962

TO MISSILE COMMAND PERSONNEL:

Today, the Army Ordnance Missile Command became the Army Missile Command. This name change came about, as you no doubt are aware, in the overall reorganization of the Army.

As in any major structural change, we will have our problems and confusion. We must accept these problems as inherent in any change as we strive to fit our functions into the general needs of today's dynamic, modern Army.

To paraphrase Shakespeare, a missile command by any other name is still the Missile Command and our mission is still the same—to provide the finest, most advanced missiles that technology can devise.

To do this will require that each of us continues to give the same cooperation and concentration of effort which have been traditional with this Command in the past.

This is all the warranty we need to guarantee success in our mission here at the Missile Command.

FRANCIS J. McMORROW
Major General, USA
Commanding

GEN. BIGELOW

(Continued From Page 1)

Missile Command telling them:

"On Aug. 1 the material functions of the Ordnance Corps will be assumed by the new Army Materiel Command.

"The Office of the Chief of Ordnance shall exist no more and the life of the Corps itself will be at an end. From that date on . . . Ordnance will become a branch of the Army much like the Infantry, Artillery or Armor.

"Thus 150 years plus a few months after the Congress of the United States legislated the Ordnance Department into existence on May 14, 1812 that Department, called a Corps since 1959, fades away on midnight July 31, 1962.

"None of us welcome this event.

"But let us remember that our early Armed Forces carried out ordnance missions before the Corps

was born and that serious ordnance missions still remain to be carried out after the Corps has gone."

The General gave a short run down on the composition of the Army Materiel Command and the fact that it has ordnance missions and the need for ordnance personnel to carry them out. He estimated that three-fifths of the new command is ordnance oriented, the remainder of the functions are normally assigned to other technical services. He said he did not make the statement in a vain way but for two reasons, it is an obvious truth and it underscores the importance of ordnance trained people.

"In my honest opinion," he said "There will be more work for more people to do in the future than in the past. And the services of experienced ordnance people will be at a premium. This has always been so."

Following his talk, Gen. Bigelow presented a team of AOMC scientists the Army's highest research and development award.

The Army R and D plaque was presented to Dr. Walter W. Wharton, Joseph W. Connaughton, Barry D. Allan, Edgar F. Croomes, Harvard Eng and John R. Cain, Jr., for the scientific contribution in the field of high-energy pre packaged liquid rocket propellants

He left by air for Washington D. C. at the end of the day.

'O' Drops

(Continued From Page 1)

are Col. W. W. Holmes, Missile "B"; Col. John E. Aber, Sergeant; Col. Harry M. Murray, Hawk; Lt. Col. J. C. Baer, Hercules; Col. O. M. Hirsch, Pershing; and Mr. Lewis L. Gober, Mauler (acting project manager.)

The field commands under AMC, including the Missile Command, are expected to be "phased into" the new organization by Dec. 31, 1962.

Under the AMC concept of operations, Materiel Command headquarters will furnish overall policy direction for its far-flung operations. The major subordinate commands will serve as the "mid-management level" to supervise performance, and the individual installations and activities will accomplish the actual execution of the Army's materiel program.

In a message today to all personnel within his command, Gen. Besson cited the establishment of AMC as "an unprecedented challenge and an unlimited opportunity."

He explained: "It is a challenge because never before has it been so important that our Army have the finest possible weapons and equipment. It is an opportunity because never before has there been a single integrated organization specifically conceived and designed to provide the Army's weapons and equipment."

Referring specifically to the Technical Services, one of which was Ordnance, Gen. Besson said: "Despite its newness in the Army spectrum, AMC represents a merger of proud traditions that extend, in some instances, to the birth of the Army itself . . . I am confident AMC will prove worthy of that great heritage."

The seven AMC major subordinate Commands, all of which became operational today, include five commodity-type Commands which are responsible for research, development, production and procurement in their assigned commodity areas. They are:

U. S. Army Weapons Command, commanded by Major General Nelson M. Lynde, with headquarters at Rock Island Arsenal, Illinois. This Command is responsible for

major Army weapons and weapons systems. It will supervise the Rock Island and Watervliet Arsenals, Springfield field Armory and the Ordnance Weapons Command.

U. S. Army Munitions Command, commanded by Maj. Gen. William H. Ghormley, with headquarters at Picatinny Arsenal, Dover, New Jersey.

This command is responsible for ammunition, and chemical, radiological and biological systems. It will supervise Frankford, Picatinny, Pine Bluff and Rocky Mountain Arsenals, the Army Chemical Center, three other Chemical Corps activities, and additional active and inactive Ordnance plants and works.

U. S. Army Mobility Command, commanded by Maj. Gen. Alden K. Sibley, with headquarters at Detroit, Michigan. This Command will be responsible for planes, tanks, automotive equipment and other transportation-type materiel. It will supervise the Detroit Arsenal, the Ordnance Tank - Automotive Command, the Transportation Materiel Command, the Quartermaster

LOCAL & LONG DISTANCE
MOVING • STORAGE

"A Mayflower Move Is A Good Move"
Call 534-2445
WHITE-MAYFLOWER

Equipment and Parts Center, the Army Subsistence Center, two Army Support Centers and other installations and activities.

U. S. Army Missile Command, commanded by Maj. Gen. Francis J. McMorrow, with headquarters at Redstone Arsenal, Huntsville, Alabama. This Command will be responsible for ballistic missiles, guided missiles and rockets. It will supervise the Redstone and Watertown Arsenals, and the Charlotte, Michigan, and Tarheel Ordnance Plants.

U.S. Army Electronics Command, commanded by Maj. Gen. Stuart S. Hoff, with headquarters at Fort Monmouth, N. J. This Command will be responsible for communications system, electronic warfare systems, combat surveillance systems, automatic data processing equipment and radar. It will supervise Fort Monmouth, the Army Signal Supply Agency, the Air Defense Engineering Agency, the Materiel Support Agency, and other related research and development laboratories and activities.

The other two AMC major subordinate field Commands which became operational today are functional-type commands. They are:

U. S. Army Supply and Maintenance Command, commanded by Lt. Gen. August Schomburg, with headquarters in Washington, D. C.

This Command is responsible for the delivery and supply of all Army materiel to installations in the continental United States and to overseas Commands, including storage, issue, transportation, maintenance and inventory control. It will supervise depots, separate maintenance activities, separate storage activities, transportation terminal commands, and other miscellaneous activities.

U. S. Army Test and Evaluation Command, commanded by Brig. Gen. William F. Ryan, with headquarters at Aberdeen Proving

Ground, Maryland. This Command is responsible for engineering, service, production and surveillance tests and evaluation of all materiel and for the supervision of such materiel as conducted by the U. S. Continental Army Command. It will supervise activities at Dugway, Aberdeen, Jefferson and Army Electronic Proving Grounds; the Artillery, Armor, Infantry, Air Defense, Airborne Electronic, and Aviation Boards formerly assigned to U. S. CONARC; and test facilities in Arizona, New Mexico, Alaska, Canada and Panama.

In addition to the above, AMC headquarters will supervise procurement districts and offices, the Army Logistics Management Center, the Ordnance Management Engineering Training Center, the Diamond Ordnance Fuze Laboratories, the Quartermaster Research and Engineering Command and other installations and activities.

The Army Ordnance Missile Command was established in March, 1958. At that time, the command combined under one headquarters two activities, the Army Ballistic Missile Agency, organized in 1956 to speed development of the Jupiter missile, and the guided missile laboratory at Redstone. Then, in April, 1958, the Army Rocket and Guided Missile Agency was formed to manage the guided missile systems.

ABMA and ARGMA were abolished during a reorganization last winter. The missile systems they directed were brought under one organization, AOMC, to streamline command management.

Lt. Col. Bass Named Chief Command Transportation

Lt. Col. Glenn L. Bass became Chief of the Army Missile Command Transportation Office today, succeeding Col. Theodore Antonelli scheduled to study at the Industrial College.

Lt. Col. Bass came here from the Military Air Transport Service (MATS) where he was assigned as liaison to MATS for the chief of Transportation, Washington, D. C.

Col. Bass studied military science, air transportation and transportation management at the University of Maryland, the American University in Washington, D. C., and Stanford University re-

LT. COL. G. L. BASS

spectively. He is a member of the National Defense Transportation Association. He entered the Army in January, 1942.

He has served in both the Far East and Europe and in the Office of the Chief of Transportation in Washington.

He is married to the former Miss Joan Murtha, daughter of Mrs. Edwin G. Murtha, Point Lookout, New York. The couple has two sons, Glenn, Jr., 13 and Jeffrey, 10; and twin daughters, Kathieen, and Donna, 9.

The family resides at 38 Ripley Drive, Redstone Arsenal, Alabama.

PICKETT

(Continued From Page 1) weeks ago. The second man is Col. B. J. L. Hirshorn, now assigned in Hawaii.

Brig. Gen. Pickett came to Redstone Arsenal in July, 1959, as Chief of the AOMC Signal office. More recently he has been assigned as Chief of Plans and Programs.

He is a native of Palestine, Texas, and graduated from the U. S. Military Academy in 1939, where he received his commission as a second lieutenant in the Signal Corps. His first assignment was at Ft. Monmouth, N. J.

During World War II he served with the 1st Infantry Division, participating in eight campaigns in North Africa, Sicily and Europe including the D-Day landings in North Africa, Sicily and Normandy.

He returned to the United States in April, 1946, and was assigned to the G-3 Section of Headquarters, Army Ground Forces, which was then located in Washington, D. C., and later moved to Ft. Monroe, Va.

In June, 1949, he transferred to the Office of the Chief Signal Officer where he served as chief of the Signal Corps Career Management Branch and later as Assistant Chief of the Personnel and Training Division.

In 1951, Col. Pickett was selected to attend the Armed Forces Staff College and upon graduation was assigned to the Strategic Logistic Branch Plans Office, Assistant Chief of Staff for the Department of the Army.

He transferred to the Office of the Under-Secretary of the Army as Executive Assistant; Munitions Board, later became Assistant Executive Officer and finally Executive Officer for two years.

Following this assignment he went to the National War College before assignment with the Military Assistance Advisory Group in Taiwan.

He is married to the former Jane M. Stanton of Rye, New York. The couple has four children: George, Jr., a student at Yale University; Jane, 8; Thomas, 6, and Sharon, 2. In September, Col. Pickett expects to be transferred to Eighth Army Headquarters as Signal Officer for the Eighth Army in Korea.

Among his citations and decorations he includes the Silver Star Medal, the Legion of Merit, the Bronze Star for Valor, the Army Commendation Ribbon, The Croix de Guerre from France, the War Cross from Czechoslovakia, the French Fourragere and the Belgian Fourragere.

TEST DESIGNER—SP7 Ernest W. McClure puts the finishing touches on a timer for use in testing missile parts to discover how long the parts will remain useful and at what point they will begin to wear beyond the point of reliability.

SP7 McClure Designs, Builds Timers for Tests

Representative of the military men, both enlisted and officers, who are engaged in missilery in the Fabrication Laboratory of the Industrial Directorate's Engineering Division, Army Ordnance Missile Command, is SP7 Ernest W. McClure.

He has his present job worked down to a science. He can fabri-

cate a timer for a missile test with speed reduction ratios of 1/518,400. On most phases, McClure plans to spend only two hours for a finished design.

He has been stationed at Redstone Arsenal for the past five years. SP7 and Mrs. McClure own a house in the Sherwood Park section of Huntsville and another at

San Antonio, Tex.

McClure is a graduate from the University of Missouri School of Mines who began his Army career with the Combat Engineers and transferred to Ordnance in 1940.

McClure was in the first convoy to leave San Francisco harbor following Pearl Harbor and spent World War II in the Southwest Pacific Theater. He returned to the United States right after the invasion of the Philippines.

Among his assignments was a tour with the Air Corps as an Aviation Ordnance Officer. McClure's travels through the Southwest Pacific placed him on a number of islands including New Guinea and the Dutch Mandate territories. He also was assigned in Australia.

When he was released from Service as a Lieutenant Colonel, he went to Texas. Then, he decided to rejoin the Army.

Now, SP7 and Mrs. McClure are thinking ahead to where they would like to live when he retires.

The odds are strong that they will return to Texas, but it's like a horse race. They could change their minds and stay right here in Huntsville.

AUSA Plans Museum at Philadelphia

The Association of the United States Army, with Department of the Army approval, has undertaken a project to establish an Army memorial museum at Independence Square in Philadelphia, Pennsylvania.

The museum will be located in Pemberton House, a famous historical building intimately associated with the early history of the Nation and Army. It will commemorate the founding of the U. S. Army at Independence Hall on June 14, 1775.

Through the memorial visitors will get a more comprehensive knowledge of the United States Army and its place in our history. The museum will be a permanent symbol of the American soldier's faith, from Lexington to Leyte, from Ticonderoga to Tokyo, and from King's Mountain to Korea.

Funds for the construction and maintenance of the commemorative building will be raised through nominal subscriptions—a dollar or less—in a voluntary program.

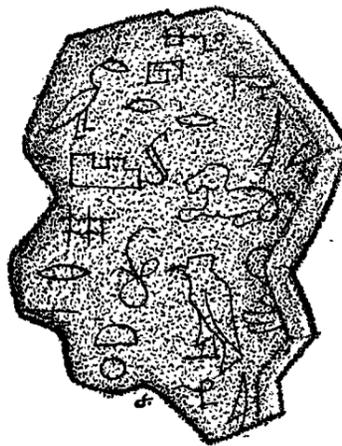

All personnel at AOMC and the Guided Missile School, both military and civilian, will have an opportunity to participate in the Army Memorial Fund. Each contributor will receive a card which shows his membership in "Guardians of Independence." In addition, the name of each contributor will be appropriately recorded in the museum and on records of the AUSA.

The fund drive will be conducted during August and will be coordinated on the Arsenal by William P. Burnett, Chairman. Further information will be furnished to all employees through selected AUSA coordinators.

From Mother Goose to Space Rockets . . . and then some! Yes, the range of material—factual and fictional—at your Post Library is virtually unlimited. The book collection serves the needs, the curiosities, and the moods of everyone . . . from tiny tots to our senior retired military personnel. Hundreds of Redstone residents just enjoy the relaxed informality of the "library habit"—dropping in to leisurely scan newspapers and periodicals, or just to relax in the quiet yet busy atmosphere.

For patrons who wish to keep abreast of the latest Best Sellers we recommend the following new Fiction titles now available:

- (1) Ship of Fools, Porter; (2) Youngblood Hawke, Wouk; (3) Dearly Beloved, Lindbergh; (4) Uhuru, Ruark; (5) The Prize, Wallace; (6) The Reivers, Faulkner; (7) The Big Laugh, O'Hara; (8) Franny and Zooey, Salinger; (9) The Agony and the Ecstasy, Stone; (10) Pale Fire, Nabokov.

Added copies of spring fiction favorites are Kirkland Revels, by Holt; Sold to the Lady in the Green Hat, by Emma Bailey; The Murderers, by Harry Auslinger; Give Me Tomorrow, by William Crawford; No Parade for Mrs. Greenia, by Anne Downes; In High Places, by Arthur Hailey; Spen-

cer's Mountain, by Earl Hamner; The Fox in the Attic, by Richard Hughes; The Lotus and the Robot, by Arthur Koestler; Whatever You Do, Don't Panic, by Jean Mercier; A Star in the Wind, by Robert Nathan; Tomorrow's Miracle, by Frank Slaughter; I Met a Lady, by Howard Spring; Refuge in Avalon, by Marguerite Steedman;

The Ivy Tree, by Mary Stewart; The End of the Battle, by Evelyn Waugh, and Nine Hours to Rama, by Stanley Wolpert.

On the Non-Fiction Best Seller list this week are The Rothschilds, Morton; (2) My Life in Court, Nizer; (3) In the Clearing, Frost; (4) The Guns of August, Tuchman; (5) Calories Don't Count, Taller; (6) Conversations with Stalin, Djilas; (7) Six Crises, Nixon; (8) O Ye Jigs & Juleps (on order); (9) Veeck—As in Wreck, Veeck (on order).

New Non-Fiction titles added this week are Success Through a Positive Mental Attitude by Napoleon Hill and W. Clement Stone; Southern Belle, the personal memoirs of Mary Craig Sinclair (the late Mrs. Upton Sinclair); You Can Trust the Communists (to do exactly as they say) by Dr. Fred Schwarz; Eskimo Sculpture, by Jorgen Meldgaard;

Trumpets from Montparnasse, by Robert Gibbins; Castles in the Air, the biography of Vernon and Irene Castle; The Labyrinth by Steinberg; Kahn's Thermonuclear War, Magill's Masterpieces of

World Philosophy and The Illustrated Guide and Hand-book of Israel.

Two copies of The Heart of the Christian Year by Harold Blake Walker offer daily meditations and devotional material.

Students will enjoy Roger Blough's Christmas Trees and How They Grow; Minarik's Cat and Dog, and "Early I Can Read Book,"

Jerome Meyer's Engines; and Schneider's Your Telephone and How it Works as well as the new biography of John Muir and The FDR Story.

Take advantage of this free community service. Visit your Post Library today!

About 6,000 service outlets are operated as concessions by local small businessmen for the Exchange Service. These include gasoline stations, barber shops, shoe and watch repair shops and similar activities operated to satisfy the serviceman's needs.

Sports Car Buffs

By Ray Mosling

The last two weeks have witnessed somewhat increased sports car activity on the local scene. July 22 saw two big events conducted for the enjoyment of area enthusiasts.

Number one in local interest was the "straightforward TSD" Rally conducted by Don Franke (NASA) and Tom Dennis (Chrysler). Thirty entrants started the 125-mile course; however, only twenty arrived at the finish control. Some of the area's top rallyists became lost during this rigorous event. Thirty-five average speed changes caused the amateur navigator considerable difficulty. One section of 0.2 mile was to be traveled at an average speed of 1.1 miles per hour, a speed not found in standard rally tables, causing many misplaced decimal points and words.

Coming down to the finish wire in first place were Web Mayfield (AOMC) and Vick Baucom (Chrysler). Second place was won by Bob Bramlette and Curt Flurry (Thiokol), and third was taken by Bill Mohr and John Broell (both Boeing). Trophies will be awarded at the Twickenham Auto Club meeting tomorrow evening at 7:30

Movie Schedule

 WEDNESDAY, August 1
 "Under Ten Flags" (F)
 THURSDAY-FRIDAY, August 2-3
 "The Interns" (M)
 SATURDAY, August 4
 "Deadly Duo" (F)
 SUNDAY-MONDAY, August 5-6
 "The Vikings" (M)
 TUESDAY, August 7
 "The Best of Enemies" (M-YP)
 Two shows nightly at 6 and 8.30 p.m.
 Saturday matinee at 1 p.m., and Sunday matinee at 2 p.m.

at Clark Steadman's Restaurant. The Chattanooga Region, Sports Car Club of America, sponsored an autocross on July 22 at Jubilee City shopping center in Chattanooga. Over 80 contestants battled until after sunset in an effort to capture winning positions, providing some of the hottest competition seen in an event of this type. The "caravan" of Huntsville entrants brought home their share of trophies, with Gene Salyer (Consolidated Systems Corp.) as chief collector. Gene placed second in the 2000cc class, also winning the BMC trophy. Martha Barnes (AOMC) placed second in the Ladies' class, and Leroy Barnes (AOMC) placed second in the 0-1000cc class. Ray Mosling (Thiokol) placed fourth in the 1000-1700cc class

IN THE MIDDLE OF A HEAT WAVE—Miss Dee Mytinger is ready for a dip. This week's pretty Rocket pinup is the daughter of CWO and Mrs. DeWitt Mytinger. Her father is the maestro for the 55th Army Band. Dee is spending the summer as an employe of the Post Exchange. She is a brown-eyed redhead who is 5'3" and she graduated from Butler high last Spring. (Photo by Charles Griffin)

Federal employes called to court as witnesses for the United States or District of Columbia Government, or to serve on a jury, may take leave with pay. No charge against annual leave is made, but they may receive no fees.

Communism to Be Topic at Sodality Meeting on Friday

The Catholic Women's monthly Sodality meeting will be following 9 a.m. Mass in the Post Chapel Friday.

Breakfast will be served in the social room of the chapel. A special presentation on "Confraternity of Christian Doctrine" and "Roles of Communism and Religion" in Daily Life" will be discussed.

The Rocket nursery will be available to those making reservations by Thursday.

The Sodality has two new officers replacing two who have resigned: Mrs. John O'Shea, vice president and Mrs. Robert Jones, spiritual development chairman.

Personnel Society Installs Officers

The Huntsville Chapter of the Society for Personnel Administration installed new officers recently at a meeting at the Squirrel Hill Officers Club.

The new president is Luther F. Adams, Army Missile Command Personnel Office. Robert F. Townley, AOMC Personnel was installed as vice president; Mrs. Katie M. Lyle, Marshall Space Flight Center Personnel was installed as secretary for a second term; and Roy Hollihan of the Redstone Federal Credit Union was installed as treasurer for a third term.

Stuart H. Jones from the MSFC Personnel Office, outgoing president, was the installing officer.

Engineers Meeting Scheduled August 9

Harry G. Simrall, Dean of the School of Engineering at Mississippi State College, and vice president of the National Society of Professional Engineers will be the guest speaker at the next meeting of the Northeast Alabama Chapter of the Alabama Society of Professional Engineers on August 9, 1962.

Dean Simrall will speak on "Advances in Engineering Education." The meeting will be held in the Southern Cafeteria of the Huntsville Industrial Center. Prospective members are invited to contact John Lands at 876-2592 for detailed information and reservations. Mullins at 539-6931 can supply further information.

SOCIAL ^{and} CLUB EVENTS

'Teahouse of August Moon' To Be Presented Saturday

Fantasy Playhouse presents "The Teahouse of the August Moon" in the round at the Russel Erskine Hotel Aug. 4, 5, 10, and 11. Performance time is 8:15 p.m. This is a benefit performance to help finance the regular season of children's plays which begins with "Heidi" on Oct. 26.

This humorous story of the struggles of the American Army of Occupation in Okinawa after World War II includes a cast of characters familiar to Huntsville theatregoers. The play is being directed by Mrs. Don Linger, who has done much work with Huntsville theatre groups.

As always, Tom Melton promises to be superb as Col. Purdy who is determined to bring democracy to the people of Okinawa and also to get his promotion to General. He is one of the founders and serves on the board of Fantasy Playhouse.

Sakini, the ageless Okinawan interpreter and commentator is played by Lawrence Ray Lovelace. Lawrence is originally from Powell, Wyo. and is in the service here. A graduate of Northwestern University, he has acted in children's plays at the University. Since he has been in Huntsville, he has played in "The Drunkard" at the Redstone Arsenal service club.

Fred Gros, as Captain Fishy tries to bring industry to the village of Tobiki but succumbs to oriental living instead. A native of Buffalo, N. Y., Fred attended Syracuse University and the New School for Social Research in Manhattan. Off Broadway, he appeared in "The Seashell." He has made frequent television appearances and is currently a staff actor for OGMS television with Teleprompter Corp. After his discharge from service, he plans to attend Chouinard Art Institute and Pasadena Playhouse. In early 1964 he will begin shooting "The Wounds of Hunger," a movie on bullfighting.

in Mexico.

Lotus Blossom, the persistent geisha girl, is portrayed by Jerrilee H. Parker. Jerrilee, the daughter of Mr. and Mrs. George M. Parker, graduated from Huntsville High School this year. Her father was president of Huntsville Little Theatre last year. While in school, Jerrilee was president of the Junior-Senior Dramatics Club, junior sponsor of the sophomore dramatic club, and a member of the Thespians. She has been a member of Fantasy Playhouse for the past year and has played the role of Fantasy for "Pied Piper" and "Tom Sawyer."

George Rendziperis portrays Capt. McLean, the psychiatrist who yields to his desires to be a farmer. George has played the role of Scrooge's nephew, Fred, in "A Christmas Carol" and has sung in the chorus of "South Pacific." His earliest stage experience was memorizing and reciting poems in Greek at church functions. George is from Pontiac, Mich. and is presently a student at OGMS.

Tickets are on sale at the public library and Universal Photo Shop at Parkway City. There will be a ticket booth at Dunnivant's Aug. 2, 3, and 4 from 11 a.m. to 3 p.m. Season ticket sales are being held during August, September, and October. During the month of August only there will be a special rate to families pur-

At the Service Club

Can you believe it? The last month of the good old summer time is here. It doesn't seem like anytime since we were beginning to prepare for the summer activities, which have included swimming, parties and patio cook-outs. Come to the Service Club this week and the remaining weeks for the rest of the summer activities.

The first event for the first day of August will be the E. M. Council Meeting, which will begin today at 2 p.m. If you have any suggestions for the future programs, let the representative from your company know these suggestions. He represents you each month at the meeting.

Have you ever wanted to learn to dance? Don't put it off any longer. Let Sgt. Frank Guierrez teach you the basic steps and techniques of a good dancer. The beginners classes will start tonight

at 6 p.m. and the advanced classes will begin at 8 p.m.

The little lounge will be reserved for card games on Thursday, Aug. 2, at 7:30 p.m.

Horseshoe, handminton, croquet, and deck shuffleboard will be among the outside games which will be played on Friday, Aug. 3, at 5:30 p.m. hrs.

When the sun goes down and the games are over, punch and cookies will be served.

Forget about eating that desert with your meal on Saturday, Aug. 4, because Molly will serve you delicious ludge at 8 p.m.

Molly will also serve you coffee and donuts on Sunday, Aug. 5 at 9:30 a.m.

"The August Whirl" is the theme for the record dance on Aug. 5, at 8 p.m. Come and let Disc Jockey Jim Budd play your favorite dance records.

An evening of games with two grand prizes will be held on Monday, Aug. 6 at 8:15 p.m.

Do you think that you know the popular tunes of the day? If you do, come down on Tuesday, Aug. 7, and play "Name That Tune." Prizes will be given to those who can name the familiar hits.

MISCELLANEOUS

August will be filled with big activities. A sneak preview into program shows a Circus Swing Dance, a Western Patio Eat-Out, A Summer Band Concert, and The Boy Friend, a musical comedy.

Keep your eye on this column each week for the date and time of these and other Service Club events.

See you at the Service Club.

CHOREOGRAPHER—PFC Vincent Apicella, right, goes over the "blocking" for the musical number "Never Too Late to Fall in Love" with 1st Lt. Harry Ennis and Mrs. Ennis. They will be featured in the Entertainment Section's production of "The Boy Friend", Aug. 30, 31 and Sept. 1 at the Service Club.

Entertainment

PVT. ART KALIN

The rehearsals for "The Boyfriend" are moving along very well. At this point, it looks as though the featured parts will be played by Jean Ennis, Lynne Singer, Mrs. Virginia Goetz, 1st Lt. Harry Ennis, SP4 Bob Waleski, Jean Tyson and PFC Vincent Apicella, who incidentally is also doubling as choreographer for the show. A few of the other parts are still up in the air, but by the end of the week, the casting should solidify itself, and we can really get down to work.

We still need people who would like to help out backstage. If you think you would enjoy helping out, let me know. We would be more than glad to have you working with us. Contact Pvt. Art Kalin, 876-4531, if you are interested. Experience is not necessary.

So far, I have had no response to last week's article on the Variety Show we are planning. I

hope by this printing a few people will have contacted me. But once again I say, if you sing, dance, do impressions, play an instrument, have a combo, singing group, or an act of any kind, contact me or stop by the Service Club and make your presence and talent known. I'm sure there are a lot more talented people here

at Redstone than have presented themselves, and I would like to meet you all.

Remember the dates for "The Boyfriend", Aug. 30, 31 and Sept. 1. Remember, also, the auditions for the Variety Show, and be sure to watch this column for more news about your Entertainment Section.

SWEDES STUDY HAWK—The first Swedish graduates from the Ordnance Guided Missile School receive their diplomas from Brig. Gen. Richard M. Hurst, Deputy Commanding General, Ballistic Missiles, Army Ordnance Missile Command. The graduation on Friday included the 15th nation to send students to the Missile School which has trained more than 28,000 men in less than 10 years. Left to right above are: Roger Pettersson, Hasse Ekberg, Torgny Bylund, Capt. Sven Platerud, Brig. Gen. Hurst, Anders A. Ekloff, Gunnar Zetterlund, and Bertil Gustavsson.

Swedish Students Graduate From Guided Missile School

The first missile men from traditionally neutral Sweden Friday received diplomas from the U. S. Army Ordnance Guided Missile School.

The pioneer Swedish included three Army officers and six civilian engineers. They completed training along with 77 others from the United States, Denmark and Germany.

The Swedes were trained on the Hawk air defense missile. Sweden has purchased rights to use the weapon from the U. S. Government.

The graduates heard one of the Army's missile research leaders call for weapons that approach the perfection of the "wonderful one-horse shay" of American poetry.

"We want simple and powerful weapons with parts that will last a long time, cost less and wear out all at once," declared Brig. Gen. Richard M. Hurst, deputy commander of the Army Missile Command.

Capt. Per E. H. Back, 35, of Goteborg, Sweden, scored 93.6 to lead his countrymen in academic

honors.

Top man for the entire group was U. S. Army Private Kelvin L. Kean, 23, of 6339 Buffalo Speedway, Houston, Texas. A 1960 graduate of Harvard University, Kean averaged 96.4 in courses on the Nike air defense missile to quality for an outstanding student award

from the Association of the U. S. Army.

The Swedish graduates included Capt. Sven Platerud of Goteborg; Lt. Erik Albertsson of Gallinge; Torgny Bylund of Stockholm; Hasse Ekberg of Lysekil; Anders A. Ekloff of Goteborg; Bertil Gustavsson of Nykoping; Roger Pettersson of Goteborg; and Gunnar Zetterlund of Kramfors.

Sweden is the 15th nation to send students to the Missile School which has trained more than 28,000 men in less than 10 years.

CIVIL SERVICE EXAMS

The Board of U. S. Civil Service Examiners has issued Announcement No. AT-35-1362 for offset press operators with grades ranging from W-6 (\$2.15 an hour) to W-19 (\$2.82 an hour).

The Board has also issued announcements to close earlier registers established on Announcement No. 5-35-9 (59) for guided missile mechanical inspector at W-

12 (\$3.14 an hour); Announcement No. 5-35-32(99) for metal surface cleaner at W-7 (\$2.32 an hour); Announcement No. 5-35-23(59) for telephone installer and repairer and telephone linemen with grades ranging from W-8 (\$2.49 an hour) to W-11 (\$2.97 an hour); and editorial and information clerks on announcement 5-35-11(60) with a grade range between GS-4 (\$4040 a year) to GS-6 (\$4830 a year).

WEST POINTERS GET POINTERS—Jack Kane (right) an aeronautical power plant research engineer from the Research and Development Directorate, gives pointers on liquid propellant testing to four instructors from the United States Military Academy at West Point. The instructors, left to right, are S/Sgt. James H. Korjus, SFC Edward M. Beeler, Maj. Robert Sherman, and Maj. Francis King. Kane works on the Liquid Propellant Evaluation Program, a nationwide study effort headed by the R&DD Research Laboratory.

Missile Command Visited by West Point Instructors

Four instructors from the United States Military Academy at West Point received a firsthand look at the latest developments in missile research on a visit last week to the Research and Development Directorate of the Army Ordnance Missile Command.

The instructors, Maj. Robert Sherman, Maj. Francis King, SFC Edward Beeler, and S/Sgt. James Korjus, were interested primarily in test methods used for liquid propellants.

According to Col. John D. Billingsly, head of the Academy's Department of Ordnance, more time is being devoted to missile propulsion studies at the Academy, and experiments on both solid and liquid propellants are needed to supplement classroom work.

The West Pointers were interested in learning details of setting up instrumentation and hardware

for testing propellants. In a letter to Maj. Gen. Francis J. McMorrow, commanding general of AOMC, Col. Billingsly said "The success of our efforts to improve our course is linked directly to the knowledge and capability that our instructors acquire by being able to discuss problem areas and other matters with acknowledged experts in the field . . ."

The group spent the morning of July 24 discussing liquid propellant test methods with personnel of the R&DD Research Laboratory. The Laboratory's Propulsion Chemistry Branch, headed by Dr. W. W. Wharton, heads a nationwide study effort in the evaluation of liquid propellants.

Dr. Wharton and five chemists of the Branch recently received the Army's Research and Development Achievement Award for progress made in the liquid propellant field.

The four instructors talked with David Mendel of the R&DD Advanced Systems Laboratory about aeroballistics and drag curves for missiles.

The group returned to West Point Friday.

Transportation Corps Celebrates Birthday

WASHINGTON, D. C. — Yesterday, Transportation personnel stationed from the Arctic to the Antarctic and from the deserts of the Middle East to the jungles of Viet Nam paused to celebrate the twentieth anniversary of the youngest of the Army's technical services, the U. S. Army Transportation Corps.

The anniversary was marked by garrison reviews, receptions, demonstrations, and special ceremonies in the United States and throughout the world.

In recent years, the Transportation Corps has assumed a position of leadership in the development of new and improved transport techniques and in the research and development of new air and surface transportation equipment. Among these advanced innovations has been pioneering in the widespread use of containerization to facilitate the shipping of cargo, the employment of roll-on, roll-off ships for the movement of tracked and wheeled vehicles and the development of improved techniques and equipment for over-the-beach logistical operations in areas where ports are not available or are denied by enemy action.

Its research and development achievements include the development of successful vertical and short take-off and landing aircraft, a family of all-aluminum amphibians carrying multiples of from 5 to 60 tons of cargo over water or land, and research in the field of the wheelless Ground Effect Machines (GEMs) which travel over the surface supported by a cushion of air. Recently, the corps successfully demonstrated a one-man rocket device capable of lifting soldiers over streams, embankments and other obstacles.

Established in 1942 under the stresses and strains of the largest wartime mobilization in history, the corps proceeded to carry out one of the most gigantic transportation tasks ever undertaken. Through its eight wartime ports of embarkation alone, poured 7,290,000 passengers and more than 126,700,000 measurement tons of cargo destined for the far flung theaters of operations of that multi-front war. Among the major types of cargo shipped overseas were more than 1,500,000 motor vehicles, 47,851 aircraft and more than 11½ million tons of ammunition and explosives. Much of this moved in the corps' 1,700 ship fleet of ocean transports. Following World War II, the bulk of this fleet was transferred to the Navy.

Overseas, members of the corps established the famed Red Ball Express, a trucking line which delivered more than 412,000 tons of supplies in 81 days to support the armies advancing across France. An even larger operation, the

XYZ Line, hauled 871,895 tons in 63 days to armies engaged in the final advance into Germany.

Three days after the outbreak of the war in Korea, on June 28, 1950, the corps was made a permanent branch of the Army. Almost immediately, activities again grew by leaps and bounds. Within the three years ending June 30, 1953, some 4,359,000 passengers were moved and 41,557,000 tons of cargo were shipped on government bills of lading. Army ocean terminals outloaded or received 3,700,000 passengers and 48,000,000 measurement tons of cargo. Transportation Corps transport helicopter units first saw action in Korea, moving vitally needed supplies to troops cut off in forward areas, carrying combat troops into battle and evacuating the wounded in areas virtually inaccessible to other means of transport.

Rail and highway elements of the corps successfully discharged difficult assignments to keep the troops and supplies moving despite a disrupted transport system and the constant threat of ambush and guerilla activities by the enemy. Lessons learned from helicopter operations during the Ko-

Rhymes of the Times

HOLD BACK THE BUCK ON A FOREIGN SHORE AND YOU'LL BE IN LUCK WHEN OTHERS GROW "PORE"
...AFPS

rean War have proved invaluable in the development of the Army's steadily expanding aviation program of today.

SOLDIER OF THE MONTH—SP4 Joseph J. Halisky, Headquarters and Headquarters Detachment of the Army Missile Command, receives congratulations from Col. T. W. Cooke, Commander of the Army Missile Support Command, during ceremonies in which SP4 Halisky was excused from company duty for a month and awarded a check for being selected the Soldier of the Month. He is assigned in the Missile Command's Electro Magnetics Laboratory. SP4 Halisky is a graduate from the University of Notre Dame with a degree in mechanical engineering. Left to right at the ceremony are: First Sgt. E. R. Slayton, Lt. Ronald E. Sorrell, Company Commander; SP4 Halisky and Col. Cooke.

Lt. Col. Kriz Appointed Chief of Support Control

Lt. Col. Robert F. Kriz is now chief of the Control Office, Army Ordnance Missile Support Command, succeeding Lt. Col. Henry L. Gotzian who retired from active military service yesterday.

Col. Kriz joined the staff at the Missile Support Command in May following an assignment with the 9th Logistical Command on Okinawa where he served as commanding officer, as executive officer and as Ordnance officer.

A native of Chicago, he has studied at the University of Chicago Law School and the Chicago Kent College of Law.

He joined the Army in April, 1942. He graduated from the Ordnance Officer Candidate School at Aberdeen Proving Ground in February, 1943, and went to the West Coast. His overseas assignments have included Hawaii, Korea, Japan and the Ryukyus.

Lt. Col. Kriz is married to the former Hertha R. Skerritt. His parents, Mr. and Mrs. Frank J. Kriz reside at Bradenton, Fla.

Awards and Decorations

Army Commendation Medals have been awarded the following:

Col. Theodore Antonelli, Army Ordnance Missile Command Transportation Chief;

Lt. Col. Charles E. Harrison, Deputy Chief, AOMC Signal Office;

Lt. Col. Henry L. Gotzian, Chief Army Ordnance Missile Support Agency Control Office;

Lt. Col. John E. Batterson, Post Chaplain;

Col. Paul B. Schuppener, Deputy Director, Research and Development Directorate;

Maj. Paul W. Simpson, Project Office of the Maintenance Division, Field Service Directorate;

Maj. L. V. Ott, Chief, High Altitude Branch, Maintenance Division, FSD;

Maj. Donald S. Hanline, forwarded from an assignment in Viet Nam with the Military Assistance Advisory Group, now Maintenance

Division Liaison Officer for Missile Command Field Service at Ft. Bliss, Tex.

Certificates of Achievement have been awarded to:

Capt. Richard Lindgren, Chief of the Radiology Departments at the U. S. Army Hospital;

SP4 Freddie L. Hinckley, assigned as a systems engineer for Pershing in the Office of the Senior AOMC representative at the Martin Plant, Orlando.

CWO Clyde E. Brown, Executive Officer at the Missile Firing Laboratory, and Administrative Officer to the Atlantic Missile Range; Army Field Office;

S/Sgt. James A. Melton, Jr., Noncommissioned Officer in Charge of the Cryptographic Section, Communications Center, Post Signal, Army Ordnance Missile Support Agency.

F. E. Croxton Appointed Information Center Head

Frederick E. Croxton, Jr., has been appointed director of the new Redstone Scientific Information Center here.

A career man in technical libraries operation, Croxton comes here from the Goodyear Atomic Corp., in Portsmouth, Ohio, where he has been superintendent of Information and Records since 1953.

He has served as chief of the Cataloging Branch for the Atomic Energy Commission at Oak Ridge, Tenn. from 1949-53.

Croxton will take over the joint Army Ordnance Missile Command-NASA Marshall Space Flight Center program in early August. He

holds a master's degree in library science from Columbia University. His bachelor's degree in chemistry came from Oberlin College, Oberlin, Ohio.

The Center will consolidate various technical libraries on the installation and is eventually expected to contain one of the largest collection of missile, rocket and space documentation in the Free World.

An eight man board of directors, half from AOMC and half from MSFC, will give policy guidance to the Center director. The chairmanship of this board will be rotated each year between AOMC and MS-

Army Engineers Test Radar Sketch Device

A radar sketching device that provides a capability for transferring mapping data from side-looking radar photography to a controlled manuscript or plotting sheet is currently being tested by the U. S. Army Engineers.

A unique design feature of the instrument is its ability to sketch or elongate detail on a radar photograph up to 10% of its original size along one axis while detail along the other axis remains its original size. This stretching is accomplished with a special type lens built into the instrument.

This capability provides a means for compensating for uneven scales on the radar photograph caused by incorrect ground speed of the aircraft set into the radar equipment by the operator at the time of the radar observations.

The Sketching Device is designed as an attachment to the standard Army autofocus reflecting projector. This gives the equipment a dual capability and makes the reflecting projector a more ver-

satile piece of equipment.

The radar sketching capability was obtained by redesigning the overhead camera assembly of the reflecting projector so that the projection system of the instrument would accommodate radar film transparencies of any size up to 9½" x 9½", or equal widths of roll film in lengths up to 250

feet. Automatic focus is possible throughout a magnification range of .33X to 3.0X.

The device was built by Aero Service Corporation, Philadelphia, Pa., under a contract with the U. S. Army Engineer Geodesy, Intelligence and Mapping Research and Development Agency, Fort Belvoir, Va.

Training Classes On Improved Nike Hercules Complete

The new equipment training course on the Improved Nike-Hercules Anti-Jam Display Modifications will be completed Aug. 3. The fifth class was completed

July 20. Capt. Gerald Z. Demers of the Liaison and Training Office, Field Service Directorate, U. S. Army Missile Command delivered the graduation address to 27 key military and DA civilian instructor personnel, who satisfactorily completed two weeks of instruction.

Top student of the fifth class was Eugene A. Willard, a civilian employe assigned to the Defense Clothing and Textile Supply Center at Philadelphia, Pa. with an overall average of 95.3.

The sixth and last class started July 23. George W. Wilde, Project Training Officer, U. S. Army Missile Command welcomed 32 key military and DA civilian instructor personnel to Redstone Arsenal, and the contractor instructor personnel of Western Electric Company commenced the final two weeks of instruction.

U. S. Army Missile Command has the mission of assuring an orderly transfer of system knowledge and skills from the developer to appropriate technical service and user agency. This applies to new missile systems, and the use of

modifications in systems. A total of 164 key military and DA civilian personnel have been enrolled in the six classes on the AJD Modifications of the Improved Nike-Hercules New Equipment Training Course in facilities furnished the U. S. Army Missile Command by USAGMS at Redstone Arsenal, Ala.

How's Your Know How?

1. What New York City politician had a ring named for him?
2. What is Chiaroscuro?
3. If a continent is a large body of land nearly or entirely surrounded by water, how were Europe and Asia called continents?
4. What famous novel transposes the letters nowhere for its title?
5. What army was known as "The Steam Roller" in WWI?

(Answers to Quiz)

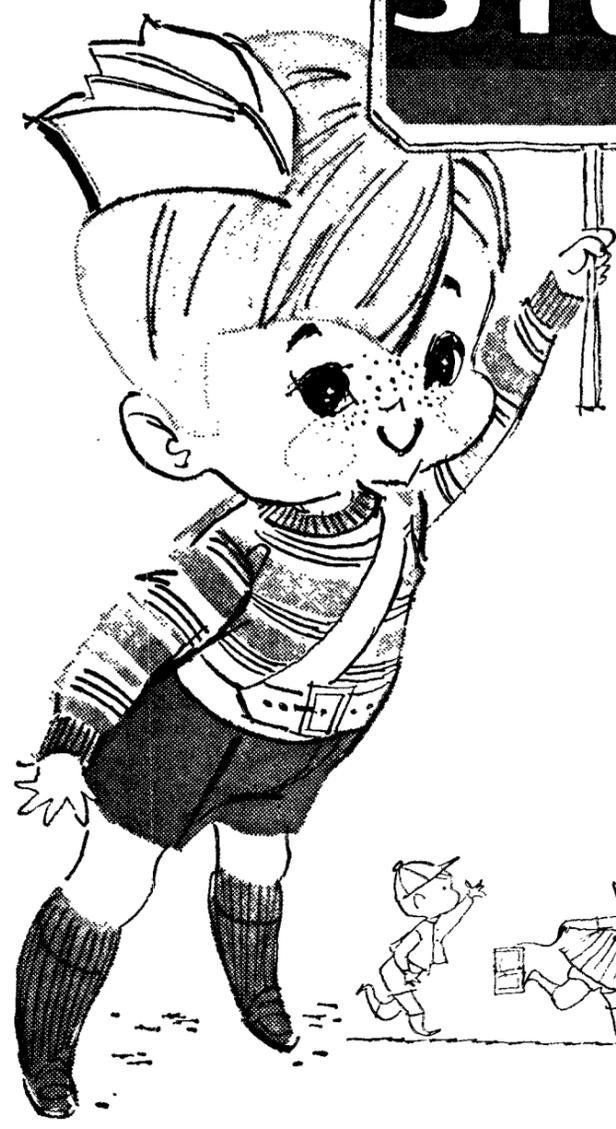

1. Boss William Tweed (The Tweed Ring)
2. The distribution of lights and shades in a picture.
3. Originally the Black Sea, which is between the two continents, was thought to be much larger than it actually is.
4. Erewhon by Samuel Butler.
5. The Russian Army.

THE INTELLIGENT WORKER: Yogi Berra used to call his catcher's gear "the tools of ignorance." There are a lot of "sports" around who may feel the same way about safety clothing—goggles, hard hats, gloves, safety shoes—but, a pro like Berra gets behind the plate with his protective equipment. Like Berra's gear safety clothing is a tool of the intelligent worker.

GUIDED MISS — One of the main attractions at Cypress Gardens, Fla., is pert Barbara Clack. Known as the "golden girl of water skiing," Barbara is co-holder of the women's water ski jumping record.
