VOL. XIII; NO. 12

REDSTONE ARSENAL, HUNTSVILLE, ALABAMA

JULY 29, 1964

Minute Man Flag To Be Flown In 3 Locations

INTRODUCING THE PERSHING—Col. Edward D. Mohlere (left) new Chief of Staff of the Army Missile Command, and Col. Jesse L. Fishback who was Acting Chief of Staff, look over a desk model of the Pershing ballistic missile. Col. Mohlere assumed his assignment Monday, reporting from his previous duty in Vietnam.

Col. E. D. Mohlere Is Chief Of Staff

Col. Edward D. Mohlere, a veteran of 28 years' Army service has assumed his new assignment as Chief of Staff of the U. S. Army Missile Command.

He takes over from Col. Jesse L. Fishback who has been Acting Chief of Staff. Col. Fishback has been assigned Special Assistant to the Commanding General pending his departure in August for Ft. L. J. McNair where he will attend the Industrial College of the Armed Forces.

A native of New York City, Col. Mohlere came to Redstone Arsenal from Vietnam where he served as Chief, Logistics Division, Military Assistance Advisory Group and under the reorganization as Director of Logistics.

Prior military assignments have carried him from his first post at Ft. Ringgold, Texas, to Ludwigsburg, Germany. They include the Puerto Rican Department; Office, Chief of Ordnance in Washington; U. S. Military Academy; Commanding Officer of the 47th Ordnance Group, Germany; Commanding Officer, Detroit Ordnance District, and the faculty of the U. S. Army War College.

Col. Mohlere is a graduate of the U. S. Military Academy from which he holds a BS degree in military engineering. He holds an MS degree in meteorological engineering from Massachusetts Institute of Technology, and an MA degree in International Affairs from George Washington University. In addition, he has completed the U. S. Army War College, Carlisle, Pa., and the Armed Forces Staff College, Norfolk, Va.

Mrs. Mohlere is the former Nancy Elizabeth Knott, a native of Raleigh, N. C. Col. and Mrs. Mohlere are parents of three children: Richard D., a First Classman at West Point; Michael H., a student in Wesley College, Dover, Delaware; and Melinda, who will enter East Carolina College, Greenville, N. C., this fall.

Value Engineering Will Be In Spotlight This Fall

Fall will be a busy season for value engineering at the U. S. Army Missile Command.

Two seminars and a symposium are scheduled for the next four months dealing with the subject.

The first one will be held August 5 and 6 for top management personnel. Another seminar is scheduled for mid-September.

Then, on Nov. 18 and 19, value engineering specialists from the Army, Navy, Air Force, NASA, Defense Supply Agency and industry will convene at Redstone for a symposium on "Advancements in the State-of-the-Art."

The August meeting will be held in cooperation with the Training (See VALUE on Page 2)

Col. David Marcelle has announced plans for a gala ceremony next Wednesday commemorating the excellent record of Arsenal personnel in the payroll deduction plan for buying U. S. Savings Bonds.

Highlighting the ceremonies will be the presentation of the U. S. Treasury Department Minuteman Flag to three organizations and a luncheon for all chairmen, sub-chairmen and canvassers at the Officers Club.

Special guests for the occasion will be Maj. Gen. W. C. Haneke, Chief of Finance for the U. S. Army; W. N. Neal, Assistant Secretary of the Treasury and National Director of the Savings Bond program; Col. Roy G. DeVecchio, Chief of Finance and Ac-

counting, U. S. Army Materiel Command; Oscar P. Drake, Bond Director for the State of Alabama; and Gene Starnes, Area Director for the U. S. Treasury Department.

Gen. Haneke and Neal will preside over the ceremonies awarding the Minuteman Flag to the U. S. Army Missile Support Command, the Supply and Maintenance Directorate and the Procurement and Production Directorate.

Each of these organizations has attained 90 per cent participation in the payroll deduction program and jointly become the first organizations that ever earned the right to fly the Minuteman Flag at the Arsenal.

An official flag raising ceremony will be conducted at Building 7101 at 10:15 at which time the Support Command flag will be presented to Col. Thomas Cooke, Commander of the U. S. Army Missile Support Command.

The flag will be raised below the American Flag by the Military Police honor guard. The Support Command flag will fly from the flag pole in front of Post Headquarters as long as the 90 per cent participation is maintained.

At the conclusion of the ceremony at Building 7101 the official party will go to Building 8027 (See MINUTEMAN on Page 5)

Col. G. C. Abert Heads Staff Of Special Review

Col. George C. Abert has been assigned as Special Assistant for Special Review to the Commanding General of the U. S. Army Missile Command.

A native of Syracuse, N. Y., Col. Abert comes to Redstone Arsenal from New Orleans, La., where he was Deputy Commander of the Oversea Supply Agency from August, 1962.

Col. Abert attended Colgate University and graduated in 1938 from the U. S. Military Academy at West Point. He graduated from the Army War College in 1956.

He has previously served in Washington in the Office, Quartermaster General; on the General Staff of the War Department; and in the office, Chief of Ordnance. He has also served as Commanding Officer of the Sioux Ordnance Depot, Sidney, Neb.

During World War II, Col. Abert served with the 24th Infantry Division in the Southwest Pacific during which time he earned the Bronze Star Medal and the Purple Heart.

Col. and Mrs. Abert are parents of a son, George C., Jr.

LT. COL. G. L. BASS

Lt. Col. Bass Named Chief

Lt. Col. Glenn L. Bass has been assigned as Chief, Installation Services Office, of the U. S. Army Missile Command. He has been Acting Chief for the past two months.

A native of Springfield, Mo., Col. Bass has been at Redstone Arsenal since June, 1962, serving as Chief of the Transportation Division of I&S.

Col. Bass entered military service in 1942. During his career he has been assigned to General Headquarters, Far East Command, Tokyo; Office, Chief of Transportation, Washington; Commanding Officer of the 53rd Transportation Battalion, Germany; Headquarters, 37th Highway Transport Command, Europe.

He was awarded the U. S. Army Commendation Ribbon, while assigned to the Atlantic Terminal Command in 1946, and the Bronze Star during duty with Far East Command in 1952.

RIBBON CUTTING—Miss Vicki Knight (center) helps Capt. Robert E. Lees, (right), Exchange Officer, cut the ceremonial ribbon Saturday to begin a day of "Salute" to the customers of the Redstone Arsenal Main Post Exchange. Saturday marked the 69th anniversary of the Exchange Service and was celebrated with price slashes in food, clothes and service. The "Salute" will continue through Aug. 5. At left is Claude Adams, General Manager of the Exchange. Vicki, daughter of Lt. Col. J. A. Knight, (ret.), reigned all day. (See story on Page 3)

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the Information Office, Army Missile Command, Redstone Arsenal, Ala., Bldg. 5250, Room A-136, Extension 876 4161.

All advertising copy and payments therefor are received by Mrs. Zillah T. Heath, Huntsville, Ala., P. O. Box 346, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wanted—is noon of Friday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$6.36 a year, or \$3.50 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala.

Rocket Ruminations

The vocation of every man and woman is to serve other people.
—Tolstoi

Equal Treatment, Opportunity

"The Civil Rights Act of 1964 is an immensely important and historic expression of this nation's commitment to freedom and justice. It has special meaning for the members of our Armed Forces, all of whom have already given a personal commitment to defend freedom and justice, and some of whom have not always been accorded full freedom and full justice in their own country.

"The President has made it very clear that he expects each department to move with dispatch within its areas of concern in developing programs and policies which will give full effect to the Civil Rights Act.

"In the Department of Defense this means primarily, the vigorous, determined, sensitive commitment of military commanders to a program of fostering and securing equal treatment for all their men, and their families, off-base as well as on, this has been our policy for some time now. But the Civil Rights Act creates new opportunities to win equal treatment for all servicemen, and we cannot afford to lose any opportunity to gain a goal so simple, so just and so compelling.

"I want to make it very clear that it is and will be a continuing responsibility for all commanders to foster equal treatment for every serviceman, and to support him in the lawful assertion of the rights guaranteed to him by the Constitution and the Civil Rights Act of 1964.

"This department was created to defend the freedom of the United States. The denial of the rights of members of the Armed Forces is harmful to the very purpose in which we are engaged, for discrimination against our people saps the military effectiveness we strive so to maintain. This last reason alone compels an affirmative commitment by all members of the Department of Defense to the cause of equal treatment and opportunity."

ROBERT S. McNAMARA
Secretary of Defense

Lt. Pacine Briefs Troops At Cape On Lance Missile

A soldier from the U. S. Army Missile Command flew to Cape Kennedy this week to brief Army and Air Force personnel there on the Lance, one of the Army's newest weapon systems now under development.

Giving the briefing was 2nd Lt. Wayne Pacine who is assigned to the Ground Support Equipment Branch of the Lance Project Office. Lt. Pacine explained the Lance System to troops of the Missile Command's Detachment A stationed at the Atlantic Missile Range, Patrick Air Force Base, as well as personnel of the Air Force Technical Staff.

Lance is a surface-to-surface ballistic missile being designed to provide greater firepower for Army troops and will be the first Army missile to use pre-packaged storable liquid propellant.

Lt. Col. W. E. Mehlinger is Lance Project Manager and directs the program from the Army Missile Command at Redstone Arsenal.

and Development Division of the Army Missile Support Command. Sixteen hours long, it will be the second of its kind and is a part of a Missile Command program to take advantage of cost reductions through value engineering.

Subjects to be covered range from familiarization with value engineering concepts and mechanics to their application to Missile Command hardware items and proce-

RESERVE OFFICERS MEET—J. L. Edgar (right), President of the Huntsville Chapter of the Reserve Officers Association, talks with Maj. Gen. John G. Zierdt, Commanding General of the Missile Command, during an ROA luncheon. Edgar is a Lt. Col. in the Reserves and Deputy Finance and Accounting Officer at Redstone.

Reserve Officers Honor Gen. Zierdt

Members of the Reserve Officers Association met for luncheon last Wednesday at the Redstone Officers Club with Maj. Gen. John G. Zierdt, Army Missile Command Commanding General, as a special guest.

President of the Huntsville Chapter, J. L. Edgar, Deputy Finance and Accounting Officer of the Army Missile Support Com-

mand, talked to the group, and reviewed some of the objectives of ROA. He also outlined the history of the Association and of the local chapter and spoke of the resolutions adopted at the ROA national convention last month in Portland, Oregon.

The Huntsville Chapter has a Reserve Officers Ladies Club, the first one organized in Alabama. The ladies raised funds to purchase an ROA flag which will be on display at Fall meetings this year.

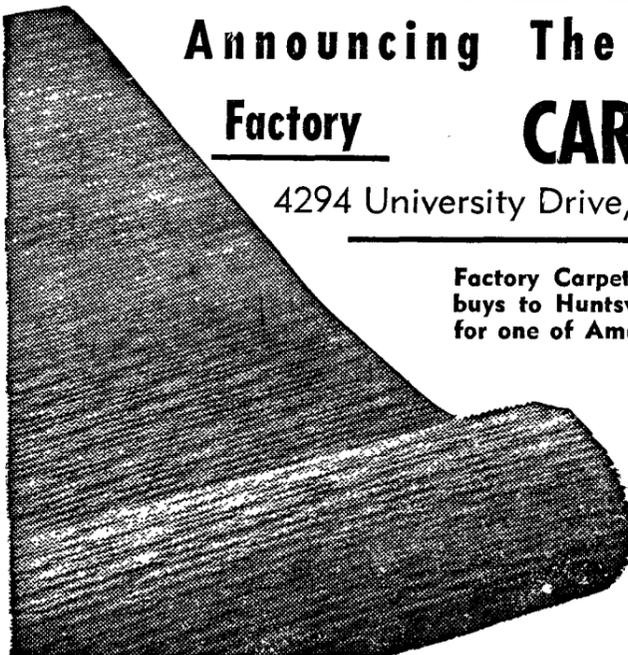

ROA's mission "is to support a military policy for the U. S. that will provide adequate national security and to promote the development and execution thereof."

The next ROA social meeting will be a covered-dish picnic supper on Aug. 28 at a Monte Sano private club.

4294 UNIVERSITY DRIVE

NAMED UGF DIRECTORS—The 1964 UGF drive on the Arsenal will be directed by this trio of Procurement and Production employees. Marion C. Taylor (center) was named Executive chairman of the drive by Maj. Gen. John G. Zierdt succeeding James J. Fagan, who directed the campaign last year. S. A. "Sam" Moyers (left) was named Executive Secretary, and Howard Andrews will be the Assistant Secretary. Al LaGrone of the U. S. Army Missile Support Command will serve as Financial Chairman for the second consecutive year.

Procurement And Production Team Will Manage United Givers Fund

A three-man team of Procurement and Production personnel has been named by Maj. Gen. John G. Zierdt to manage the United Givers Fund campaign on the Arsenal this fall. The Commanding General of the Army Missile Command designated Marion C. Taylor, Chief of the Management Plans Office, as the Executive Chairman of the drive

which will get underway on Sept. 22. The veteran Redstone employee will succeed James Fagan who directed the 1963 campaign. Taylor, selected S. L. "Sam" Moyers to serve as Executive Secretary and H. R. Andrews as Assistant Secretary. Al LaGrone, Chief of the Missile Support Command's Review and Analysis Division will

serve as Financial Chairman for the second year. A native of Haynesville, La., Taylor is a graduate of the University of Arkansas and a Navy veteran of both World War II and the Korean Conflict.

He came to Redstone in 1954 after having been employed by the Navy Department as a Budget Administrator in the Pentagon. His first position here was Chief of the Management and Plans Office of the Industrial Division, Redstone Arsenal.

When the Army Rocket and Guided Missile Agency was activated, Taylor was assigned to the same position in the ARGMA Industrial Division. He assumed his present position in 1960.

Moyers came to Redstone in 1959 after having spent five years in New Orleans as civilian officer in charge of the Michoud Ordnance Plant. Included in his more than 20 years of Federal service is an 18-year stint in Germany at Headquarters, USAREUR.

The Chief of the Systems Program Branch, Moyers is a native of Wheeling, W. V. He attended Linsly Technical Institute in Wheeling.

Another veteran Federal employee, Andrews came to Redstone in 1955 when the Augusta Arsenal was deactivated. He had been employed at the Georgia installation and had risen to the position of Fiscal Officer.

He was employed here originally by Mr. Taylor for a position in the Industrial Division of Redstone Arsenal and he has remained with him ever since.

As Financial Chairman of the drive last year, LaGrone developed a completely new procedure which resulted in a great savings in manhours required for reporting.

He came to the Arsenal in 1957 from the Mallery Air Force De-

Exchange Celebrates 69th Anniversary By Cost Cuts

Redstone Arsenal's Army-Air Force Exchange service observed its 69th anniversary Saturday with a "salute" to its customers. The observation will continue through Aug. 5, according to Capt. Robert E. Lees, Exchange Officer.

"Even though it's our birthday," Capt. Lees said, "the customers get the presents - - in the form of special savings on selected items of merchandise, food and

services." The Exchange was established in 1895 to provide troops with items of convenience and necessity and to earn funds for recreation and welfare. Before General Order 46, sutlers served soldiers.

The Arsenal Exchange will operate on the regular schedule during the celebration.

In addition to the special items offered during this period, the local Exchange, like all Exchanges throughout the country, will reduce the price of two-ounce hamburgers from 20 to 15 cents and will increase the content of the 20-cent milkshake from 12 to 16 ounces. In addition, they are adding a four-ounce jumbo hamburger for a quarter.

Exchange officials explained that the decision to increase portions and reduce prices is merely another step in the A&AFES' program to improve service and create customer savings wherever possible.

Other reductions include clothing, luggage and toys. Uniform prices have been cut 7½ per cent and uniform accessories dropped 2½ per cent.

The Exchange Service anticipates more money pouring into welfare fund programs through increased sales.

AL LaGRONE

pot in Memphis. He left a position as Chief of Management Engineering there to become a supervisory management analyst here.

LaGrone is a native of Panama City, Fla. and has accumulated a total of over 18 years of Federal service including a two year tour in the Navy during World War II.

July 16, 1945—The first atomic bomb was exploded at Trinity Site, White Sands Missile Range, New Mexico, which ushered in a new era in science, history and world politics.

Gremlins Could Play Havoc With Utilities

If a World War II gremlin should visit Redstone Arsenal, he could have a good time with the Utilities Division, Electrical Distribution Systems Branch of Post Engineer.

For one thing, he could figure out a way to shoot a rocket into the underground electric cable which crosses a mile of test range. The Engineers put it underground in the first place because test missiles shot out the overhead wires and subsequently halted other types of test, research and development in the laboratories where the Army Missile Command is developing America's mighty missiles.

The gremlin could also help the construction workers dig up the cables and put offices and laboratories alike out of business until the linemen could restore power. Crane and digger operators working on building contracts don't necessarily know where the lines are strung.

Along with the electricians, he could create extra hours for the Military Police by flipping switches and retarding or stepping up the timers on the automatic traffic lights at the Arsenal's busiest intersections.

When he tired of these pastimes, the gremlin might change the dielectric strength of the Arsenal's transformers and play with the 161,000 volts

applied across arsenal lines from five primary and 17 unit substations. The 85,000 kilowatts available could be re-distributed on circuits carrying only 120 volts and shock the secretaries and electric accounting machine operators.

This would really cause the telephones of James L. Anderson and C. I. Smith to buzz while they directed their crews by two way office-to-truck radio to the troubled area.

With this one full swoop, the gremlin could also knock a lineman or two off the pole—electrocuted, a thing that has not happened since Anderson helped set the first pole on Redstone Arsenal on a hot August day 21 years ago. The men in this division are proud of their safety pins. Anderson's represents 15 years of safe practices. Smith, the first line supervisor hired by the Chemical Corps at Huntsville Arsenal in April, 1942, wears a 20-year safety pin.

The gremlin could visit the shop and divert the attention of operators testing the rubber equipment used to protect men, lines and electrical units. This could help promote burns on hot wires because although the men inspect their gloves as automatically as they don them, they can't tell visually whether or not the rubber will withstand 10,000 volts. The gloves might remain in the safe as long as

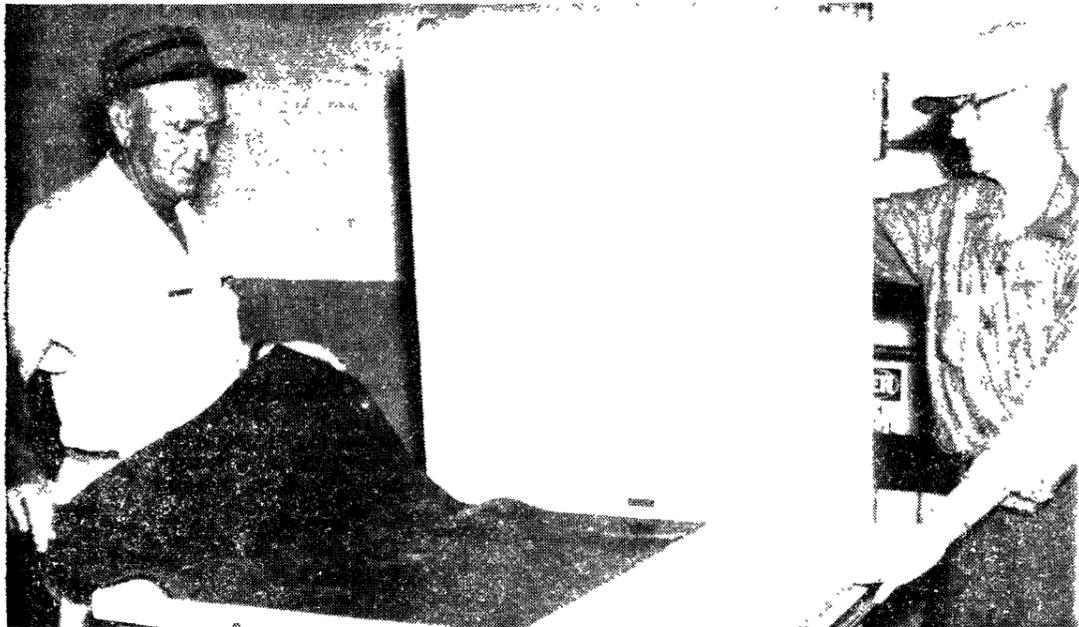

30 days before a lineman discarded his old pair for new ones. The other types of rubber protectors are inspected three times a year.

Atop a research laboratory filled with electronic equipment, the gremlin could have a ball in a lightning storm and the electricians would be at a loss to understand why the lightning arrestors they maintain weren't functioning according to physical rules.

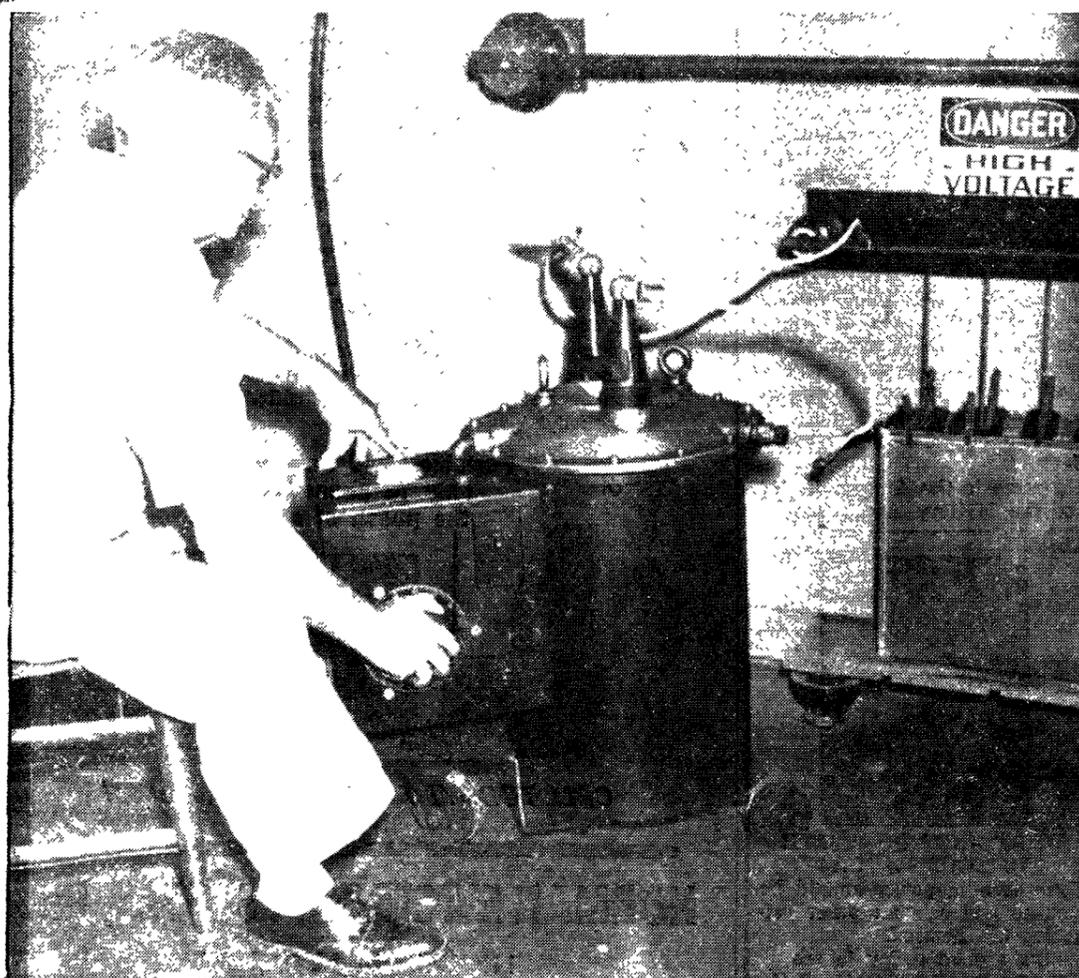

Or he could confuse his favorite victim, the Army pilot, landing on the Arsenal Air Strip. The runway lights can be brightened or dimmed by the tower operator; but if the gremlin decided to take a hand in controlling the lights, the operator would automatically call for the electricians who are on an around the clock call schedule. They normally work a five-day week.

If he were in a really fiendish mood, he might mess up the power in the car of a troubleshooter from Tuscumbia, Ala. or Lewisburg, Tenn. provided he could move that fast. He might even call in his relatives to help.

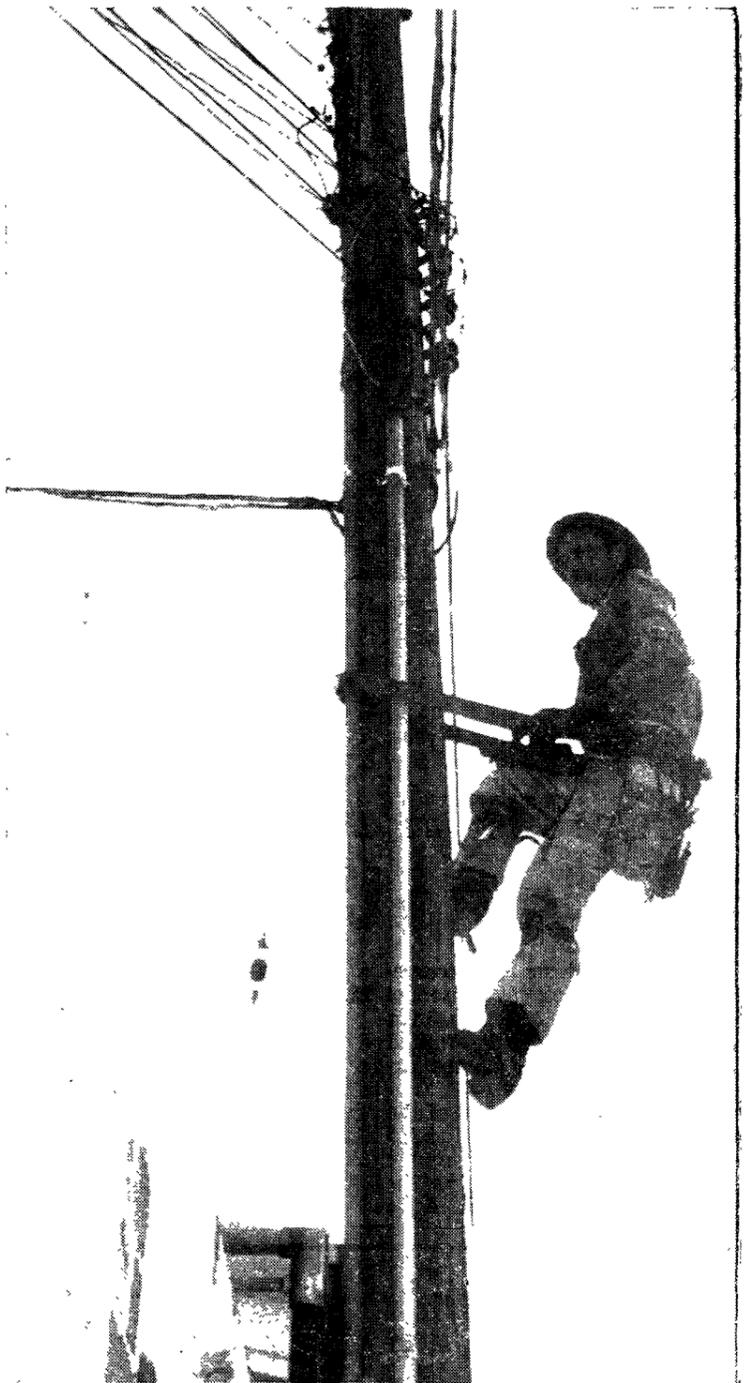

So, the men in the Power Distribution Branch fervently hope that the gremlin remains in retirement wherever he went when the War ended. So do Col. R. P. Davidson, the Post Engineer, and the Utilities Division chief, Niles Prestage.

HOT FOOT—Blankets, gloves, hoods and all other rubber items used to protect electric units at Redstone Arsenal are given the hotfoot with more than 10,000 volts. If the item withstands the test, it is locked away until needed. Here Hubert A. Penn (left) and Earnie A. Gibbs prepare a blanket for a shock.

EXAMINATION—Oscar L. Sharpe tests a cable to see whether it is a safe piece to place in use at Redstone Arsenal. There hasn't been an electrocution among the men handling the electrical maintenance along the hundreds of miles of line since the lines were first installed.

UP IN THE AIR—Royce C. Hickson of the Post Engineer Utilities Division at Redstone Arsenal is representative of the outside maintenance crew in the Electric Branch. From Lewisburg, Tenn., he commutes. Here he is ready to replace a wire pulled from the pole with a forklift.

From The Top—

"This country has no more important job right now than to get the very best men in every field for more effective service to our embattled friends in South Vietnam. I want no U. S. officer to be in doubt of the value of service in South Vietnam and of the importance which I personally attach to it."

President of the United States, Lyndon B. Johnson. (ANF)

(Continued From Page 1)

where Col. Marcelle, Finance and Accounting Officer, will present a briefing on the Financial Management Quality Assurance program as it is executed at Redstone Arsenal.

The second flag presentation will be made at Building 5681 at noon. Gen. Maneke will make the presentation of the Supply and Maintenance flag to Col. Robert Grote, Director.

The S & M flag will be hung from a flag staff on the front of building 5681.

Immediately after this short ceremony the official party will go to Building 4488 where the Procurement and Production flag will be presented to Paul Scaepi, Acting Director.

The directorate plans to have their flag hung from a portable flag pole and displayed periodically in the various divisions.

The luncheon will be a Dutch treat buffet in the main ballroom of the Officers Club starting at 1. All chairmen, sub-chairmen and canvassers are invited to attend.

Those persons planning to attend the luncheon are asked to notify their respective chairman by Thursday, July 30, and should be at the Club by 12:45.

Auburn Club Endorses 4 Year College

The Madison County Auburn Club has endorsed the local fund drive to raise \$750,000 for the University of Alabama four-year college at the Huntsville Center.

The announcement was made July 18 by Ray Lawrence, president of the Club.

"Our Auburn alumni are proud to offer their full support to the establishment of this vital addition to our present educational institutions," Lawrence said.

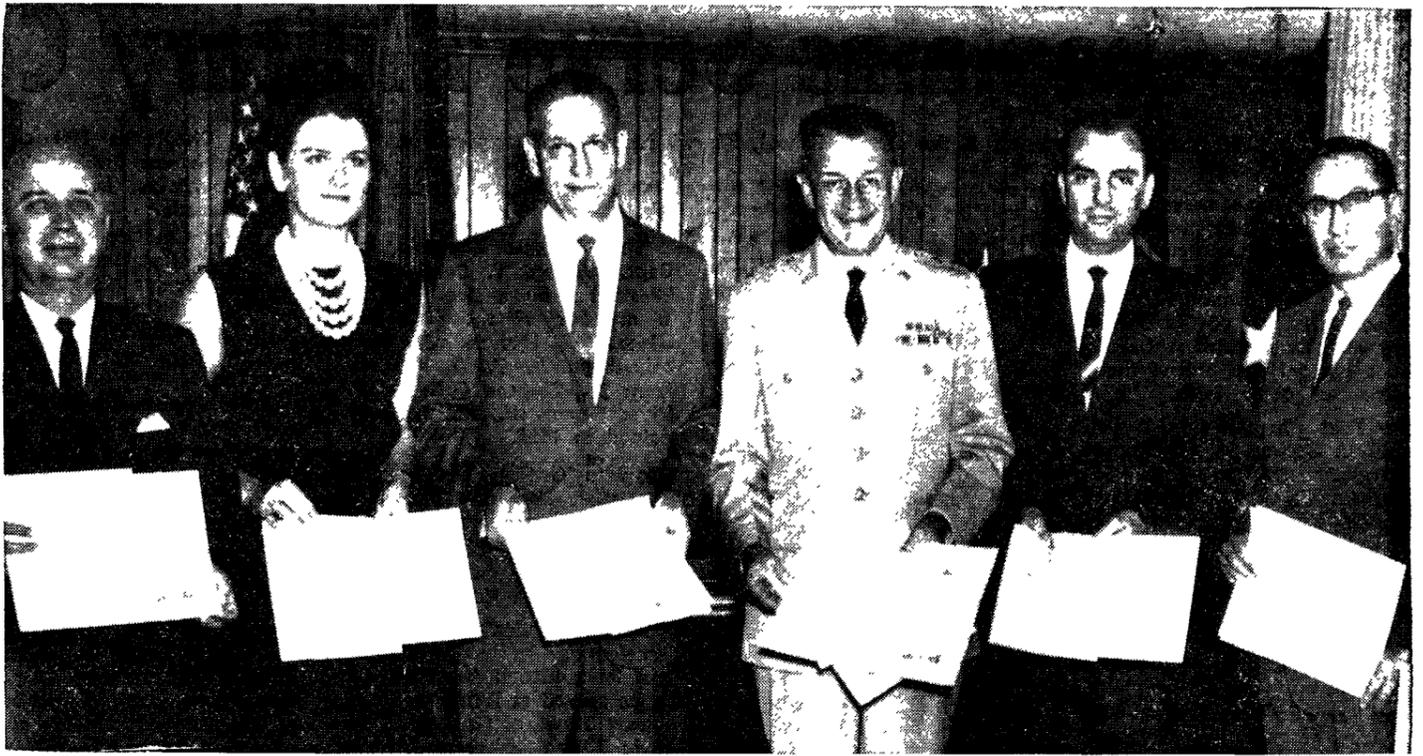

"This campaign will give each citizen of North Alabama a chance to invest wisely and profitably in our community, our people and our institutions."

Lawrence said the executive committee of the Auburn Club unanimously passed a resolution in favor of the drive.

The resolution supporting the action said, in part:

"... the Madison County Auburn Club hereby endorses and supports the Community and the University of Alabama in its efforts to raise the funds that are so vital to the establishment of this four-year college program. And we hereby call upon each citizen, civic group, industrial and business organization, and all other individuals and institutions in this region to contribute generously and willingly to the creation of this educational institution that will inevitably mean so much to the cultural, scientific, social, and educational benefits of this area."

U. S. Savings Bonds Series E and H are redeemable at fixed prices, at any time after initial two-month holding period without possible loss of initial investment.

END OF A SUCCESSFUL CAMPAIGN—Arsenal officials in the recently concluded Joint Fund drive proudly display Certificates of Merit presented to them by the National Health Agencies and the Federal Service Joint Crusade, for whom the drive was conducted. In the picture, from the left, are: Abner C. McNaron, vice-chairman for the drive; Margaret Mohling, key worker for the Office of

the Commanding General; Stanley C. Wilkins, permanent chairman of the Redstone Fund-Raising Coordinating Committee; Maj. Gen. John G. Zierdt, Commanding General, Army Missile Command; Gustavus Brown, Chairman of the 1964 Joint Fund Drive; and Merlin D. Berg, Financial chairman for the drive.

Four Chaplains Serve Military Community

Today is the 189th anniversary of the Chaplain Corps.

Four chaplains serve the religious community at Redstone Arsenal and coordinate with clergymen of other faiths in the community to be sure that all of the military and their families have the opportunity to attend the church of their faith.

The Post Chaplain is Lt. Col. Donald F. Carter, a minister of the Brethren Church.

Chaplain Carter is a native of California who was a pastor at Long Beach before he entered the Army in December 1943. He has an A. B. degree in arts from Ashland College at Ashland, Ohio, and a Bachelor of Theology degree from the Ashland Theological Seminary.

The Chaplain has served with the Army across the Northern sector of Europe from England to Germany and in Korea and Japan. In the course of his service he earned a Silver Star Medal and a Bronze Star Medal with the device for Valor in Korea. In Germany he was awarded the Army Commendation Medal.

This is his second tour in Alabama. In 1944 he was assigned at Ft. Rucker. Most of his state-side assignments have been in California.

Chaplain Carter came to Redstone Arsenal in February 1964 from the U. S. Armed Forces Religious Retreat House at Berchtesgaden, Germany.

He is now living with his wife

CHAPLAIN CARTER

and her parents, Mr. and Mrs. Anton Sorensen, at 431 Skinner Drive, Redstone Arsenal. The Carters have a daughter, Mrs. George Martin, in Colorado Springs, Colorado.

The Deputy Post Chaplain, Major John P. Kirkland, Jr., started his military career as a member of the Infantry in April, 1943. He is the son of the Rev. and Mrs. J. P. Kirkland, New Albany, Mississippi. During World War II he served in the Philippines and in Korea.

In 1946 he received a B. S. degree in animal husbandry from Mississippi State College. He was recalled by the Army in June 1951 to serve in Korea after he

trained at the Armor School, Ft. Knox, Ky.

Meantime he had married the former Miss Jean Donahue, daughter of Mr. and Mrs. J. J. Donahue

CHAPLAIN KIRKLAND

of Leland, Mississippi and they had two boys, Steve, now 14, and Joe, 11. Scott, 4 was born after his father decided to become a Southern Baptist minister in 1953.

Chaplain Kirkland received his bachelor of divinity degree in 1956 from the New Orleans Baptist Theological Seminary. Most of his assignments in the United States have been in the South. He has also served in Germany. Before he came to Redstone Arsenal he graduated from the career officer course at the U. S. Army Chaplain School.

The youngest Protestant Chaplain is Capt. Richard L. Andrist who is serving on his first active duty assignment although he has been a member of the Reserve since April 1955. As a member of the Reserve, he served as a battalion Chaplain with the 102nd Infantry Division. Active duty began for him in July 1963.

A June 1961 graduate from the Louisville (Ky.) Presbyterian Seminary, Chaplain Andrist is a native of Colorado. His parents live in Broomfield Colo.

The Chaplain's family includes two daughters: Lauren, 5½; and Lynelle, 6 weeks. They now live on the Circle near Post Headquarters at Redstone Arsenal. This is near Redstone Park Chapel

CHAPLAIN ANDRIST

where he holds services on Sundays and participates in chapel activities scheduled during the week.

The Catholic Chaplain is Capt. William T. Condon, a Westerner by choice. He is a member of the Catholic Diocese of Nevada who received an A. B. A. degree from St. Thomas College at River Forest, Ill., and was ordained in 1929.

Chaplain Condon has been in the Armed Forces twice: from 1943-46 and from September 1955 until now.

He came to Redstone Arsenal from Germany in November 1963.

Chaplain Condon's World War II service was in the West Indies. When he returned to Army service he served at Hanford, Wash.; Dugway Proving Ground, Utah, and in Korea before assignment in Europe.

CHAPLAIN CONDON

The Chaplain's last civilian Parish was St. Mary's of the Mountains in Virginia City, Nevada.

Now, all Catholic religious instruction at Redstone Arsenal is carried out under his guidance.

The Greek Orthodox worshippers meet at the Post Chapel every two weeks for services and instruction.

Two Jewish services are conducted in Huntsville: Conservatives hold Friday services at 1403 Randolph Street; Reform Jewish Services are at Temple B'Nai Shalom.

Christian Scientists in this North Alabama area meet at South White and Wells Avenue in Huntsville.

For other services, the military are encouraged to participate with other members of the same faith in the community outside the military establishment.

The Chaplain is responsible for seeing that men of all faiths have equal opportunity to worship - following the same principles established for the Chaplains Corps when it was founded.

AUSA Awards M-Sgt. Kuzee

M/Sgt. H. Kuzee of the Netherlands received the highest award presented by the Army at OGMS in a graduation ceremony Friday which saw some 28 American and foreign students receive diplomas.

M/Sgt. Kuzee, who was high man in his Nike Acquisition Radar and Computer Repair course, received the Association of the U. S. Army Award for maintaining a course average of 96 per cent.

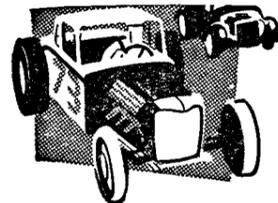

Marine Pfc. "C" Perry Marshall of Salisbury, N. C. and S/Sgt. Ray P. Sandoval of Phoenix, Ariz., were named honor graduates at the ceremony. The graduating group heard a keynote address by Lt. Hardy B. Owen, Jr., technical officer at the New Missile Literature Branch of OGMS.

To Race, Perchance To Win—That Is Question

An equation is required to explain the job of Joel H. Blatt working in reciprocity technique of calibration in the Calibration Center of the Army Missile Support Command.

The Center is one of laboratories working directly under the United States Bureau of Standards, qualified to calibrate the super-precise instruments used in measuring missile parts for the Army. The Standards Engineering and Evaluation Laboratory where Blatt is assigned is headed by Robert B. Smock. Col. Thomas W. Cooke commands the Support Command.

Reciprocity techniques are not the only area where Blatt has worked in the laboratory. He has measured with photometry, tested acceleration and designed volt meters among other things since his arrival as a soldier-scientist in April 1962.

Precision on the job is not his only interest. He is a sports car racer—an avocation that requires a good mechanic, skillful driving and topnotch reflexes. His car is a Formula Vee with a standard

OFF THE JOB—Blatt turns his attention to sports cars. The Volvo is his tow car for the Formula Vee he races.

Volkswagen engine. The body is fiberglass. Blatt and his roommate on Bide-A-Wee drive share sportscar racing as a hobby and a garage for the racers.

Blatt's tow car is a poppy-colored Volvo.

A slightly built, bespectacled, redhead, with a bachelor's degree in physics from Harvard University, he developed his avid interest in sportscar racing during his undergraduate days when he worked in a garage to augment his income.

Before this introduction, he swam and sailed and vowed he'd never race on land. Now his vow is that he'll never race in the sky.

To keep his reflexes sharp between races, he uses a motorcycle—a vehicle he declares ideally suited for this in Huntsville traffic where drivers on the multi-laned streets often appear to find the cyclist invisible.

One of the reasons Blatt chose to remain in Huntsville when his enlistment expired is that it is warm. He doesn't long for the cold winters in New York where his father, Albert H. Blatt, Ph. D., is a chemistry professor at Queens College and his mother, Therese, is a stockbroker with Bach & Company.

Among his accomplishments is technical writing. The art of communication, he believes, was imparted by his father who assigned his son the task of proofreading the chemistry books the professor has written and had published.

Another reason that Blatt chose to stay in Alabama is its location on the sports car racing circuit. He has driven on tracks from Spartanburg, N. C. to Courtland, Ala., and he is enthusiastic about the tracks—usually converted air strips modified to the sports car racers needs.

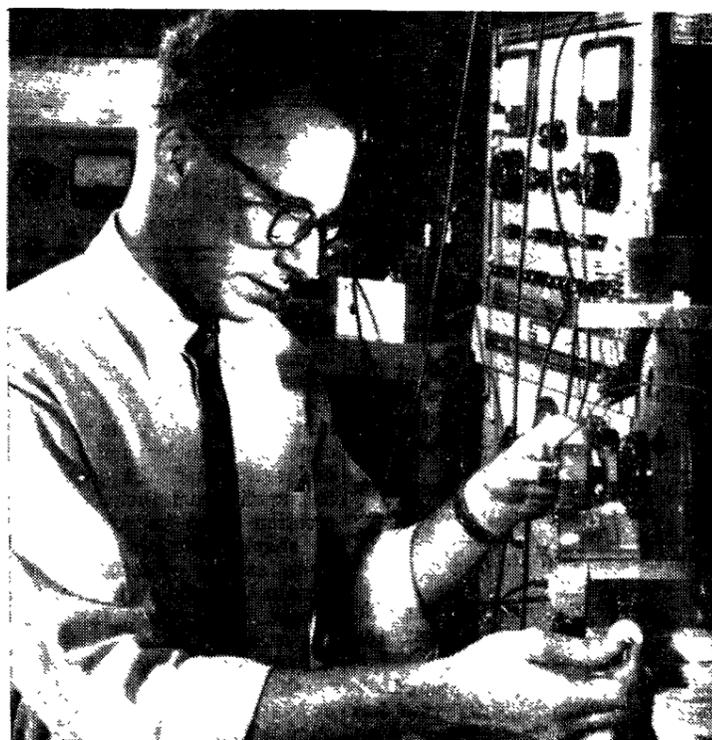

When he arrived in the South he had a Sprite which he traded for an English Berkley, small enough to fit on the bed of a Volkswagen truck. Blatt found a sergeant with a yellow Porsche who introduced him to the sports car world in and around Huntsville.

The proximity of the University of Alabama Extension Center at Huntsville is another inducement. He plans to catch up with his former room mates at Harvard—two of whom are now Ph. D's, one

is a doctor of medicine and the fourth is still studying at the University of North Dakota. Blatt already has earned some graduate credits and expects to enroll in courses at the University this Fall.

While still in the Army, he studied modern Greek in the Army language program and found the instruction superior to his earlier studies in German and French. His praise for the Army doesn't stop there.

When he was drafted, he had an application in the Personnel

ON THE JOB—Joel H. Blatt concentrates on reciprocity techniques in the Calibration Center of the Army Missile Support Command.

Office of the Army Ballistic Missile Agency. By an uncanny quirk of fate, the Army assigned him to the world of missile development at the base he hoped would hire him.

NCO Wives Feature Crazy Hats

Crazy hats were featured at the Non-Commissioned Officers Wives Auxiliary meeting Thursday night in the NCO club at Redstone Arsenal.

Mrs. R. H. Pegittas, a guest won the prize for the prettiest hat, Mrs. Sam Woods had the most original, and Mrs. R. J. Moore the craziest.

Sgts. Ed Waldrop, V. Hammick, Bill Davis and C. Trail were the judges for the hat show.

Special guests of the Auxiliary were Mrs. J. H. Smith, who has just arrived from Germany, Mrs. H. L. Howell, Mrs. Kermit Ballay, Mrs. G. J. Petracco, Mrs. M. J. D'Aquila, and Mrs. Pegittas.

Each member brought food to the meeting for the needy families the Auxiliary helps every month. Cookbooks were distributed to members to sell on behalf of the scholarship fund. Scholarships were established during the group's business meeting earlier this month, and will be awarded this Fall to children of members.

The next meeting will be at 7:30 p.m. Aug. 13 at the NCO club, and will be a business meeting. New members are welcome. Mrs. J. R. Moore is Auxiliary president.

'Broadway' To Be Garden Club Show Theme In August

"Give My Regards to Broadway" will be the theme of a flower show to be presented by the Redstone Garden Club on Aug. 18 in the Squirrel Hill Officers Club. The show will be open for public viewing from 2 to 6 p.m.

Entries are not limited to members of the Garden Club, and will be accepted from any member of the Redstone Arsenal Officers Wives Club who wishes to participate in the show. The Garden Club is an activity of the Wives Club.

At The Service Club

By: Brenda Hanson

Today we are living in a world in which there is more leisure time for more people than ever before. Whether this leisure will be a burden or a blessing depends on how it is used. That is why it is important for everyone to have the opportunity to learn the attitudes and skills that will enable them to benefit from their leisure. Recreation is an instrumental force in shaping the structure of our lives, and is essential for us to remain a forceful and energetic people. Therefore, the program directress, along with the staff, has planned an exceptionally diversified program offering many opportunities to participate in stimulating and enriching activities.

Mentioning the activities planned for the following week, we begin with bridge. Bridge has proven to be a growing and ever popular game at the club. The weekly meeting of the Bridge Club is Thursday at 7.30 p.m. If you are interested in learning, instructions will be given.

Second on the schedule is a pool contest Friday at 8 p.m.

Saturday starts with coffee hour at 2:30 p.m. As the day progresses the spotlight turns to a card party. The small lounge will be reserved for this. Tid-bits will be served throughout the evening.

Sunday, we begin the day by serving coffee and donuts at 9 a.m. Break away from the slumber, get out of bed, come down to the club, and enjoy a mid-morning breakfast along with the rest. Sunday night Art Hetter will spin your favorite tunes for the record hop throughout the evening. Make it a point to attend.

Monday is game night. We have a nice array of prizes waiting.

MISCELLANEOUS:

Winner of the pool contest at the club was Lawrence Skubie of 1st ETC. From all reports he displayed a remarkable amount of skill. Congratulations Lawrence.

That's all for this week, so until then, see you at the club.

Brenda

Dorothy Hopkins Is An Expert In 'Three C's'

Cats, computers and countries are some of the main interests of Dorothy Hopkins, a digital computer systems analyst and member of the specialist staff in the Data Processing Office of the Army Missile Command's Supply and Maintenance Directorate.

Cats are a hobby and a business, computers are an inherent part of her career, and she recently returned from visiting and working in European countries.

Dorothy was ordered to the U.S. Army Supply and Maintenance Agency, Orleans, France, early in March on a five-woman team to participate in computer systems analysis assistance to the Army personnel at the Communications Zone.

The team's mission was to help develop a system to put supply problems on computers. Where formerly each technical service of the Army had requisitioned items peculiar to its own branch, preparations are underway for an integrated material inventory management system which combines all of the tech services.

Her teammates came from Tooele, Anniston, and Erie Depots and the Philadelphia Office of the Army Electronics Command.

Dorothy took leave and toured Holland, Switzerland, Austria, Italy and Great Britain before returning to the United States this month. She says she was the only member of the tour group who had an official passport. As they crossed each border and had to show their passports, the border guards would examine hers thoroughly, then smile broadly. "I didn't know whether it was because they were relieved when they found it was in order, or they were laughing at my picture," she said.

On arrival in France, Dorothy had no familiarity with the French language. The menus were printed in both English and French, but the waiters spoke only French, so when ordering a meal, one would point to the item desired. Dorothy said she decided on an omelet and pointed to that line. The waiter startled her by saying, "Oh, oeuf, oeuf," (the French word for egg), which comes out sounding like "wuff, wuff!"

The bit of home Dorothy missed most was ice water. The French just don't put ice in water, and in fact, won't serve either water or butter with a meal unless specifically requested. The Americans in France sometimes refer to water as "American champagne." Of course the French usually serve wine with their meals, and use wine in much of their cooking. Dorothy says she is sure their food so prepared is delicious, but it was a drawback for her as she is very allergic to alcohol.

The Missile Command's alert and intelligent system analyst lost no time entering a French class so she could learn as much of the language as possible during her relatively brief stay. When she felt she knew enough French to be understood in a restaurant, she tried to order ham and eggs. She got a hamburger and eggs!

DOROTHY HOPKINS
Computations Systems Analyst

One evening when Dorothy and another member of her team had worked late, they found all American eating facilities closed, and they were reluctant to go to a French restaurant where it takes two hours for a dinner to be served. She said to her companion, "What they need here is a good American drug store with a lunch counter." A young man who had been walking in front of them turned quickly and said "I agree with you." They so seldom heard English spoken on the streets that this comment came as a surprise!

The American group was fortunate to be in Orleans during the annual Joan of Arc festival which commemorates the date in 1429 when this national heroine liberated the city from the English. The celebration continues for a week with events taking place on the exact hours of the days that they happened in 1429.

Of all the countries visited, Dorothy liked Holland the best, partly she says, because almost everyone could speak English, and because the people are unusually friendly. The fact that it was tulip time added considerably to the attractiveness of the visit.

The beautiful mountain passes in Switzerland and Austria were the most impressive sights there. In Austria there are stone markers to trace the route taken by the Romans when they were conquering countries in Europe.

Oklahoma-born Dorothy Hopkins has a bachelor of science degree in home economics from the State University at Stillwater. She had studied to be a home demonstration agent and she had a teacher's certificate, but there were no jobs available in either field when she graduated during the depression of the 1930's.

She worked several places including the University where she was selected to be a member of a class one of the professors was starting in use of business machines. As a result of this training, she received a Civil Service rating.

Then came World War II, and Dorothy was given a job at the St.

Louis Ordnance Depot. From there she transferred to Lordstown Ordnance Depot, Warren, Ohio, then Rossford Ordnance Depot in Ohio, and thence to Redstone in 1952.

Dorothy and Mary Jayne Eaton, Supervisor, Guidance Services, Madison County Board of Education live together at Route 2, Madison, in the Monrovia community.

They both like cats and established the JANDO cattery two years ago. At the present time, they have three Siamese and two Burmese cats. The sale of kittens has been to other breeders as their cats are from champion stock, and they have had only enough kittens to fill such orders.

They hope eventually to have enough kittens available for the local market. There are no Burmese cats, to their knowledge, any nearer than Birmingham.

Each year, they enter their cats in several shows, and this year their little Burmese, Roger Heights Pixi of JANDO won points as the best kitten at the Dallas, Texas show. Burmese are blocky, dark brown cats with less raucous voices than the Siamese have. They are also friendlier.

Dorothy said they started the cattery because they wanted to have a hobby they could turn into a business when they retire. The

Atlanta, Louisville, Memphis, Dallas, Oklahoma City and New Orleans cat shows are among those they attend.

She observed that the standards by which Siamese cats are judges have changed radically over the years. A kitten they bought recently is long and lean with a narrow wedge shaped face, and looks almost like a caricature of a cat. She and her partner in business are interested in breeding for a blue eyed solid black Siamese, possibly by crossing the blue eyed Siamese with the Burmese strain.

Another interest of Dorothy's is the Mt. Zion Baptist Church where

she is an active member and president of the Woman's Missionary Union.

Being a digital computer systems analyst may sound like a far cry from the home ec field, but Dorothy feels her education is still and always will be an advantage. If nothing else, she says, it gives her a feeling of self confidence to know she does have that bachelor of science degree no matter what her major was.

Small Bore Riflemen To Fire At Akron Before Camp Perry

The Redstone small bore rifle team will journey out of the southeast for the first time this year

LYLES, COLBERT WIN HANDBALL TOURNAMENT

Irv Lyles and Bill Colbert copped first place in a post doubles handball tournament with nine team entrants when they downed Tony Johnson and Wilson Miles in the finals.

Recapping from the quarter finals, it was Lyles and Colbert against Johnson and Miles. After splitting the first two games, Johnson and Miles overcame a 20-12 lead by Lyles and Colbert in the third game to go on to win 21-20. This loss sent Lyles and Colbert into the losers bracket against Bernard Fearon and Roger Lavigne who also had one loss.

Lyles and Colbert took two straight in this semi-final match and thereby earned another shot at Johnson and Miles. Since Johnson and Miles had no losses to Lyles and Colbert's one, it would take two separate meet victories for Lyles and Colbert to win the championship and only one for Johnson and Miles to win it.

In their first meet Johnson and Miles took the first of three games 21-19, but Lyles and Colbert took the second and third games 21-17, 21-16. This gave each team a loss. In their final meet to determine the championship, it was Lyles and Colbert in two straight games winning by scores of 21-17 and 21-16.

when they go to Akron, Ohio, to compete in the Positional Regional tournament being fired in the Rubber City this weekend.

It will be the last tune up match for the local riflemen prior to their entrance in the National Rifle Matches which open Aug. 9 at Camp Perry, Ohio.

Last week the Arsenal team enjoyed one of their most productive meets when they participated in the South Central Regional Prone championships at Asheville, N. C. The seven-man team captured 17 first place and four second place awards.

Team captain Irv Tarbox once more set the pace with six firsts, one more than Keith Robson was able to win. Tarbox qualified for the "400 Club" in the Dewar course and Robson shot perfect 400s in both the 50-yd Iron and 50-yd. Any Sight matches.

Together Tarbox and Robson added the two-man team match to their individual laurels. The two, both firing in the Expert Class, have been reclassified as Masters and will be firing in that category in future matches.

Ray Waldron captured four firsts and a second in the Marksman class, Jim Maloney took a pair of firsts firing as a Sharpshooter, and Jim Rooney took three seconds in the Marksman class.

Keep Freedom In Your Future

With U. S. Savings Bonds

Rockets Clout Arab Knights

Redstone Rockets pitcher, George Downing, hurled a three hitter Friday night and thus carried his team to a 9-3 victory over the Arab Knights. Downing was a little cold when he started out, issuing three successive walks in the second inning, but he got stronger as he went along.

It was two-all going into the sixth and seventh innings and a lone run in the eighth, ringing the score up to 9-3.

Dave "Rosy" Rosado and Melvin "Andy" Anderson both 500 for the night for Redstone, when each of them picked up a pair of singles on four attempts at the plate.

Rockets Bombard Mets

In another exhibition game played at Linton Field on Tuesday, July 14, the Redstone Rockets walloped the Huntsville Mets 17-3, as they boosted their record to 5 and 0.

What had started out as a close game soon blossomed into a Rocket walloping as the Rockets pulled away from a 3-2 lead in the fourth to score a total of fourteen runs in the fifth, sixth, seventh and eighth innings. Walks were one of the factors that contributed to this bad defeat for the Mets., as they

issued a total of twelve in the game.

Tony Cerna got the win for the Rockets, after going seven complete innings, giving up only three runs on six hits and an error. He was relieved in the eighth by Dan Durant who finished up. John Paul suffered the loss for the Mets, after allowing seventeen runs on eleven hits and six errors.

Palm To Present Paper In London

Eugene J. Palm, an Aerospace Research Engineer with the Propulsion Laboratory of the Army Missile Command, has been selected to present a paper in London, England, during the first week in August.

The paper, entitled "The Effects of Acceleration on Combustion of Propellants," will be part of the Interior and Intermediate Ballistics Panel of the Tripartite Technical Coordination Program (TTCP).

This will be the fourth meeting of the group which consists of gun and rocket experts from the United States, Canada and the United Kingdom. It is one of several international groups established by the three governments for the purpose of exchanging technical data and know-how.

Palm is a graduate of the University of Cincinnati holding a BS degree in Chemical Engineering. He has been associated with the Missile Command's Research and Development Directorate for 8 years in the fields of propulsion, design and development.

School Adds Lance Missile

The Army Ordnance Guided Missile School at Redstone Arsenal, has been given its second new major mission within two weeks, according to Col. William J. Macpherson, commandant.

The "Missile Academy" has been assigned the maintenance training function for the Lance ballistic guided missile system. The School also was charged recently with training for the new TOW missile.

The Lance is a highly mobile forward ground combat support

weapon that has shown tremendous possibilities for support of such combat movements as airborne operations.

The missile is carried on a self-propelled launcher and the entire firing unit is transported on two self contained, self sustaining, tracked vehicles capable of quick maneuver on almost any terrain. The surface-to-surface weapon is a low-cost, rugged, highly effective answer to the Army's need for mobility in the field. The light-weight

SEMINAR FOR MISSILE MEN

"How do you know it's clean?" is the theme of two educational seminars scheduled for aerospace industry scientists Monday, Aug. 3 in the Holiday Inn-West, by

launcher and missile can be carried into battle zones by helicopter and be quickly set up to support forward assault or defense positions.

Training of firing units and organizational maintenance has been assigned to the U. S. Army Artillery and Missile School at Fort Sill, Okla.

special request of the Huntsville chapter, American Association of Contamination Control.

Dealing mainly with air sampling filters, instruments and clean rooms, the seminar will begin at 9 a.m. and again at 1 p.m. It will last about two hours each time.

President Charles Gelman and Industrial Manager Jerry Moons of the Gelman Instrument Company, Ann Arbor, Michigan, will conduct the seminars, according to Travis Day of Brown Engineering (Huntsville) who arranged the meetings.

ROCKET MOUNDSMAN — Tony Cerna is expected to be on the hill on one of the two games that the Redstone Rockets play at Ft. McPherson this weekend. The two teams split a pair of games played at Linton Field last week. The Rockets, after winning their first five games have dropped two of the last three and will be out to regain their winning stride when they travel to Georgia.

Missile School Will Be Realigned To Fit Pattern

Major realignments of staff functions at the Ordnance Guided Missile School will be effective Aug. 1 to bring the School more in line with the staffing pattern established by the Continental Army Command, which controls 25 Army schools, Col. William J.

Macpherson, Missile School commandant, has announced.

Included will be reorganization of some departments and the awarding of departmental status to one division of the Department of Individual Training. There will be no reduction in personnel, he pointed out.

The New Missile and Literature Division will be upgraded to a department, responsible directly to the commandant, Macpherson said. With a new generation of missiles being prepared for training and new testing methods requiring advanced teaching techniques, the new division can more efficiently use the personnel assigned to it, he explained.

The Unit Training Command will be reorganized into the Department of Unit Training. Missile Maintenance Support Units formerly in UTC have been assigned to the School Troop Command.

Another major realignment will be the upgrading of Academic Operations Division into the Office of Academic Operations. The Security Office, presently part of the Office of Operations and Security, will be transferred to the Secretary's Office and will become the Security Division. Academic Operations will consolidate the functions of the present Operations Division and the Academic Operations Division of DIT.

Other significant changes in the School's organization include:

Up grading the Personnel and Foreign Liaison branches to divisions. This, Col. Macpherson said, will help to accommodate the increased foreign student load which will reach a peak later in the summer of 900.

The Television Branch will also be transferred to the Office of Logistical Support from DIT.

Upgrading several divisions to departmental status.

Col. Macpherson said that by following the CONARC staffing patterns each level of the School's operation can better handle the expanding missions of the School and increased student enrollment, which will reach a record monthly average of 1,750 in individual and unit training during the current fiscal year.

February 2, 1954 — President Eisenhower announced that first "hydrogen bomb" was exploded at Eniwetok in 1952.

All officers and men who need money report to C.I.T.

That's not an order, just good advice. At C.I.T. we're experts at dealing with your special money problems. Need a loan to pay bills? To travel? Money to meet personal problems or emergencies? You can find a C.I.T. office just about anywhere you happen to be. We've got over 400 C.I.T. offices from coast to coast. For your convenience, you may apply by mail or by phone. The Army Ordnance Guided Missile School has announced renewal of a contract for operation of one of the nation's pioneer military educational television facilities to a New York City firm.

Col. William J. Macpherson, commandant, announced the signing of the contract on a competitive basis to TelePrompTer Corp. of 50 W. 44th St. in New York. This is the seventh year that the firm has been engaged to aid the Missile School in the annual training of some 5,000 missile maintenance students from all branches of the U. S. forces and 17 Allied nations.

Since 1958, use of the video medium has expanded to 58,000 student viewing hours per year, Col. Macpherson said. In addition to dozens of daily transmissions to its own classrooms, the Missile School also has sent special programs by leased lines and microwave to other military installations such as the U. S. Military Academy at West Point, N. Y., and the Quartermaster School at Fort Lee, Va. For several years it has regularly transmitted a two-hour missile orientation course to the Armor School at Fort Knox, Ky.

Col. Macpherson pointed out that the Missile School has pioneered several unusual uses of the video medium to save time and money in missile maintenance training.

Its camera and videotape crews have made complete recordings of historic space and missile launchings at Cape Kennedy, Fla., and of the recovery of capsules off the Army's Kwajalein Island base in the Pacific.

Another innovation came with use of the second audio channel on videotape to record commentary in languages other than English. This technique has resulted in an extensive library of missile maintenance courses in Turkish, Chinese, Greek, Japanese, Korean and most of the European languages.

This enables the Missile School to make certain through replaying of the tapes at will in foreign languages, that Allied students have grasped necessary fundamentals of missile technology.

With its network now extending throughout its classrooms and into troops barracks, the Missile School uses educational television to carry out the Army's Command Information program designed to keep its soldiers informed on a variety of topics ranging from voting regulations to the latest domestic and international events.

Col. Macpherson noted a number of other educational advantages offered by the new technique.

"More important, from the standpoint of the free world's military preparedness," he said, "television used in conjunction with live instruction has enabled us to reduce the time required to train missile technicians, and we have established that it materially in-

creases the impact of the course material."

Among advantages offered by the use of closed-circuit TV, videotape and associated audio-visual equipment, Col. Macpherson cited: Simultaneous availability of costly equipment and skilled instructors to students at several different locations — a valuable asset if a national emergency required

overnight expansion of training. Giant-screen magnification of small components of missile systems, so that hundreds of students can view them at the same time.

Rapid recording, editing and retransmission of material on videotape—in seconds as contrasted to

days and even weeks for standard training films.

Opportunity to use and reuse lectures by top instructors for classes sometimes running in three "shifts" per day — and to translate the course material into other languages.

HALE BROS. *Emphasis*

Rich in Character | Simple in Line

The emphasis is on character of design. Lines are clean, free and sophisticated. Imported, hand carved solid walnut pulls and incised carvings on door panels are boldly distinctive. Mitered mouldings on cabinet fronts are handsomely sculptured. The finish is a rich brown walnut veneer, emphasizing grain and depth. EMPHASIS is versatile, harmonizing with either modern or traditional decor, and functional, offering a wide variety of handsome pieces built for storage as well as appeal. Superb craftsmanship puts the emphasis on Premier quality at moderate prices.

Missile Command Ranks 4th In Joint Fund Support

Just like the missile systems they manage, contributions by personnel of the U. S. Army Missile Command are "going up" every year. In fact, the Joint Fund Drive for 1964 was the most successful ever conducted on the Arsenal. Contributions rose by more than 50 per cent.

Redstone Arsenal ranked fourth in contributions this year from among all Federal installations throughout a five-state area which

comprises the Southern District. More than 8,000 individual contributions totaling more than \$18,000 were made to the Joint Fund Drive at the Army's missile and Rocket Center. Seven National Health Agencies and four organizations in the Federal Service Joint Crusade are included in the Joint Fund Drive.

In a letter to Maj. Gen. John G. Zierdt, Commanding General of

Industrial Purchasing Course Offered By UA

The University of Alabama in Huntsville announces a course in Industrial Purchasing. This basic course with advance methods and practices will begin Sept. 17 at the University of Alabama in Huntsville.

Each Thursday evening from 6:00-8:00 the class will meet for lectures by prominent members of the purchasing profession. All persons interested in attending the series of lectures and discussions must make application by September 4, 1964. These forms are available at the University office of Student Records, Room 106, Huntsville.

Attendance will be limited to forty individuals who should be engaged in some phase of procurement. The purpose of the course is to improve knowledge and technique of persons now engaged in purchasing.

As coordinator for the course, Harlan E. Cross will be assisted by other outstanding members of the purchasing field. Cross, now a Purchasing Consultant, is retired after forty-one years of purchasing service for the United States Pipe and Foundry Company in Birmingham.

of the National Association of Purchasing Agents. In 1939, he was president of the Alabama group and, in 1956, he was made National Chairman of the National Standardization Committee. He has written numerous articles on the use of Standards and on the techniques of Value Analysis as a tool.

During war periods he taught Seminars on Government Priority Regulations. As a coordinator and a lecturer, Cross has served in programs both at the University Center in Birmingham and at the Campus in Tuscaloosa. At present, Cross, who is an alumnus of Howard College in Birmingham and Loyola University School of Law, is engaged in Purchasing Consultant Service.

The following topics will be discussed during the course: Functions and Tools of Purchasing, Supplier Relationship, Pricing Considerations, Purchasing Quality, Analyzing Value, Inventory Control and Legal Aspects of Purchasing.

Further information on this course may be obtained by calling the Graduate Office at the University. All interested persons are urged to apply early. Only forty applications will be accepted and the deadline is September 4, 1964.

the Army Missile Command, Mrs. Ruth Ferrari, Regional Director of the Joint Crusade, said:

"We are so very grateful for the splendid contribution from Redstone this year. I know how much credit is due Mr. Gustavus Brown (chairman of the Redstone campaign) and the gentlemen who assisted him. They did a very

thorough job of organization and promotion and were delightful to work with. But I also know that without your wholehearted support our drive would not have been such a success".

"A large percentage of our

money comes from the large installations and we are very dependent on your cooperation. The Army Missile Command, of course, leads in Alabama. I feel sure that with your continued interest it will remain at the top of the list".

Two More Colonels Will Join Guided Missile School

The Army has authorized the the Ordnance Guided Missile School to add two more colonels to its staff, Col. William J. Macpherson, commandant, announced today.

This action by the Continental Army Command at Fort Monroe, Va. gives the Missile School five "eagle" colonels on the staff for the first time in its 11-year history.

Welcome Mat

The ROCKET extends a welcome to the following named civilian employees who have started work with Army organizations at Redstone.

ORDNANCE GUIDED MISSILE
 Myra D. Brown and Delbert G. Hicks.

ARMY MISSILE SUPPORT COMMAND

Jerry L. Bridges, Billie A. Carroll, Patricia J. Forrester, Ida A. Keel, Wanda C. Nelson and Dorothy P. Tyrrell, all of F & A; Gwendolyn L. Bradford and Bernice G. Lightsey, Civilian Personnel, Edith A. Chambers, Post Qtm; Malcolm E. Eells and Hans W. Palaoro, Post Engineer;

Betty J. Glenn, Cons Supply; Patricia G. Kramer, Donald S. Peckham, Annie L. Steenson and Robert P. Zmudzinski, Asst for Communications; Navace C. Lee and Joseph D. McClure, Maint Sup; Thomas A. Monroe, Control Office; and Fred E. Paxton, Compu-tation Center.

Col. Macpherson said the Missile School is highly gratified at the approval of the new high-ranking officers for staff positions here.

"It is well-deserved recognition of the high priority of the Missile School's international training mission and is a significant step toward equalizing our status with that of other Army service schools," he said.

The Missile School is currently training 5,000 students per year from the U. S. Army and Marine Corps and 17 foreign nations, he noted.

The Missile School now has three colonels. In addition to the Commandant, Col. George H. McBride is Assistant Commandant and Col. Hobart V. Smith who is reporting next week to become Director of Individual Training.

FIRING PERSHING GERMAN TROOPS HIT THE BULLSEYE

The second successful troop firing by German Missile Group 13 was accomplished when a Pershing ballistic missile was fired from near Blanding, Utah, to an impact point on WSMR, N. M.

The launch completed a two shot series by FRG (Federal Republic of Germany) troops and climaxed their U. S. training on the Pershing system.

Elements of the U. S. First Field Artillery Brigade from Ft. Sill, Okla., provided administrative and logistic support to the

Upon arrival, one of the new colonels will become commanding officer of the School Troop Command which has 2,600 officers and men. The other will head the New Missile and Literature Department which prepares programs of instruction for current and future missile systems.

Movie Schedule

 WEDNESDAY, 29 July
 "Escape by Night" (M-YP)
 THURSDAY-FRIDAY, 30-31 July
 "The Manchurian Candidate" (M-YP)
 SATURDAY, 1 August
 "A Ticklish Affair" (F)
 SUNDAY-MONDAY, 2-3 August

German graduation firings. The highly-mobile Pershing, a two-stage, solid-propellant ballistic missile with a range of 100 to 400 nautical miles, was developed for the Army by Martin Company's Orlando, Fla., Division.

The 34-foot long missile, the artillery's most devastating weapon, was deployed the past April to the U. S. Seventh Army in Europe, where it is scheduled to replace the Redstone.

The Pershing program is managed by Col. Edwin I. Donley, Project Manager for the U. S. Army Missile Command.

"Looking for Love" (F)
 TUESDAY, 4 August
 "The Prize" (M-YP)
 Two shows nightly at 6:00 and 8:30 p.m., Saturday matinee at 1:00 p.m. and Sunday matinee at 2:00 p.m.
