REDSTONE ARSENAL, HUNTSVILLE, ALABAMA

JANUARY 13, 1965

## TWO TOP OFFICIALS TO VISIT TOMORROW

### Maintenance Seminar Is In Progress

More than 100 people are at Redstone Arsenal today and tomorrow attending a maintenance seminar sponsored by the Army Supply and Maintenance Command.

The Army Missile Command is host for the seminar, which is the second in a series. The first seminar was held last October in Washington, D. C.

Brig. Gen. D. E. Breakefield, Director of Maintenance, Supply and Maintenance Command, delivered the keynote address after the group was welcomed to Redstone this morning by Maj. Gen. John G. Zierdt, Commanding General, Missile Command.

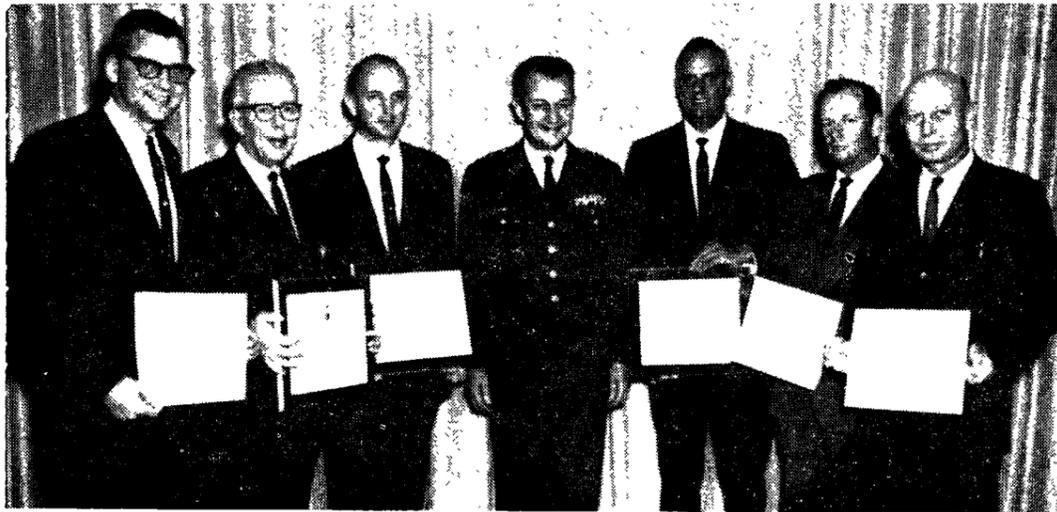

The purpose of the meeting of key maintenance personnel is to exchange ideas and views in the maintenance areas, identify problems related to materiel readiness, and make recommendations for improvement of the Army maintenance system.

Army agencies and commands participating in the seminar are: Materiel Command, Washington, D. C.; Electronics Command, Fort Monmouth, N.J.; Missile Command, Redstone Arsenal; Mobility Command, Warren, Mich.; Munitions Command, Picatinny Arsenal, Dover, N. J.; Weapons Command, (See SEMINAR on Page 3)

### Small Purchases Total \$7 Million During December

It wasn't Christmas shopping that did it, but the Army Missile Command's small purchases rose to more than \$7 million in December contrasted with the \$2.5 million spent in November.

Firms in the Southeast received \$1.6 million worth of business. Those in Alabama were on top with more than \$1.4 million in (See \$7 MILLION on Page 3)

**EXECUTIVE AWARDS FOR 1964**—Six Army Missile Command employees at Redstone Arsenal proudly display Awards they have just received from Maj. Gen. John G. Zierdt, center, Commanding General, Missile Command. From left to right are: Wallace E. Kirkpatrick, Program Specialist in Research and Development Directorate, Honorable Mention, Junior Executive Award; Kenneth E. Joy, Chief of Quality and Reliability Management Office, Meritorious Civilian Service Award; Gregory J. Long, Chief of Program Management Office in Lance Project Office, Junior Executive Award; Maj. Gen. Zierdt; John A. Muller, Assistant Director of Procurement and Production Directorate, Senior Executive Award; Louis L. Aycock, Financial Management Officer in Office of the Comptroller and Director of Programs, Honorable Mention, Senior Executive Award; and John White, Assistant Director of Support Operations in Procurement and Production Directorate, Honorable Mention, Senior Executive Award.

### Muller And Long Receive Command's Junior, Senior Executive Awards

The Army Missile Command has honored two of its civilian employees with awards for outstanding service during 1964. John A. Muller, Assistant Director of the Procurement and Production Directorate, received the Command's Senior Executive Award, and Gregory J. Long, Chief of the Program Management Office, Lance Project Office, the Junior Executive Award.

Plaques were presented to the two men Thursday morning by Maj. Gen. John G. Zierdt, Commanding General, Missile Command.

At the same ceremony, Kenneth E. Joy, Chief of the Quality and Reliability Management Office, received the Meritorious Civilian Service Award. It was announced last December that Joy and two other Missile Command employees had been chosen for the

award, which is the second highest one the Army authorizes for civilians, but he could not be present for the presentation ceremony at that time.

Before coming to Redstone in 1951, Muller worked for General Electric Company in Ft. Bliss, Texas. He has been Assistant Director of the Procurement and Production since 1962. Muller is a native of Warren, Ohio, and attended Purdue University and the University of Indiana.

Long was born in Palmerton, Penn. He has B. S. and M. S. degrees in industrial engineering from Lehigh University. He worked at Roller-Smith Company in Bethlehem, Penn., and Rock Island Arsenal in Illinois before coming to Redstone in 1959.

Receiving Honorable Mention for the Senior Executive Award were John White, Assistant Direc-

tor, Support Operations, Procurement and Production Directorate, and Louis L. Aycock, Financial Management Officer, Office of the Comptroller and Director of Programs. Wallace E. Kirkpatrick, Program Specialist in the Research and Development Directorate, received Honorable Mention for the Junior Executive Award.

This isn't the first award for Joy. For 25 years before coming to work at Redstone in 1959, he served in the Office of the Chief of Ordnance in Washington. In 1945, he received the Outstanding Civilian Meritorious Service decoration for development of weapons manufacturing methods, and in 1959, the Secretary of the Army presented him with the Exceptional Civilian Service decoration for design and development of portable structures. Joy is a native of Kalkaska, Mich.

Two top Department of the Army officials will be at Redstone Arsenal Thursday. They are Daniel M. Luevano, Assistant Secretary of the Army for Installations and Logistics, and John H. Fitch, Deputy Assistant Secretary of the Army for Financial Management.

Luevano will address the annual dinner meeting of the Tennessee Valley Post of the American Ordnance Association at 7:30 p.m. in Squirrel Hill Officers Club. Both officials will tour the Arsenal and be briefed on some operations of the Army Missile Command.

President Johnson appointed Luevano to his present position in June of 1964. For five years before, he was employed by the California state government as consultant to the assembly Interim Committee on Ways and Means of the legislature and Chief Deputy in the Department of Finance.

Luevano, a native of Los Angeles, has a B.A. degree in political science from UCLA, and a law degree from San Francisco Law School. He served two years in the Navy during World War II.

Before going to Washington, Luevano served on the staff of Labor-Management Forum, a magazine of the CIO-California Industrial Union Council, and was election examiner for the National Labor Relations Board and technical instructor for the Department of Commercial. He once was an electoral consultant for industrial clients and covered the Republican and Democratic national conventions of 1952 for fourteen California weekly newspapers.

Fitch was sworn into office as Deputy Assistant Secretary of the Army for Financial Management in 1961 after serving six months as Deputy Comptroller for Budget in the Department of Defense. From 1952 to 1960, he was on the staff of the Assistant Secretary of Defense (Comptroller) as Staff Director of the Procurement and Production Division, and Director of Budget for the Air Force and Military Assistance Programs.

A native of New York City, Fitch attended school in New Jersey and received a degree in mechanical engineering from Rutgers University in 1930.

Fitch served in the Army during World War II, with assignments in the offices of the Assistant Secretary and Under Secretary of War, and War Department General Staff. He returned to active duty (See TOP OFFICIALS on Page 3)

### 4 Promoted To Supergrade

The Army Missile Command has promoted four men to supergrade GS-16. They are Dr. Walter W. Wharton, William J. Lindberg, William P. Lloyd and Gregory S. Moshkoff, all employed in the Research and Development Directorate.

Maj. Gen. John G. Zierdt, Commanding General, Missile Command, presented the promotions this week. They were effective Dec. 30.

Dr. Wharton is Chief of the Liquid Propulsion Technology Branch. After coming to Redstone in 1954, he devoted six years to research in combustion kinetics. The Big Bone Lick, Ky., native has led a group conducting research and development on new energy liquid propellants since 1960.

Georgetown College awarded Dr. Wharton a B. A. degree in mathematics and chemistry in 1950, and later he received M. S. and Ph. D. degrees in physical chemistry from the University of Kentucky. He is

an instructor for the University of Alabama Huntsville Campus.

Lloyd began working at Redstone in 1952 as a test engineer. He became a section chief in the Test and Evaluation Laboratory in 1954, and two years later was promoted to branch chief. In 1959, Lloyd was named as chief of the laboratory and is now serving as director.

A native of Alabama, Lloyd received a B. S. degree from Auburn University. He has written several reports on testing and evaluation of rockets, missiles and components, and is a member of the American Institute of Aeronautics and Astronautics, and Institute of Environmental Sciences.

The Army has employed Moshkoff at Redstone since 1952, when he came here from Atlanta, Ga., after serving as an electrical engineer with the Civil Aeronautics Administration for four years. He is now Technical Director of the Development Division.

(See 4 PROMOTED on Page 3)

**PROMOTIONS TO SUPERGRADE GS-16**—Four civilian employees of the Army Missile Command's Directorate of Research and Development are congratulated by Brig. Gen. C. W. Eifler, Deputy Commanding General, Land Combat Systems, after their promotions to supergrade GS-16. Those promoted are, facing the camera from left to right: Dr. Walter W. Wharton, Chief, Liquid Propulsion Technology Branch; William J. Lindberg, Chief, Advanced Research Projects Division; William P. Lloyd, Director, Test and Evaluation Laboratory; and Gregory S. Moshkoff, Technical Director, Development Division.

# The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the Information Office, Army Missile Command, Redstone Arsenal, Ala., Bldg. 5250, Room A-136, Extension 876-1400 or 876-1500.

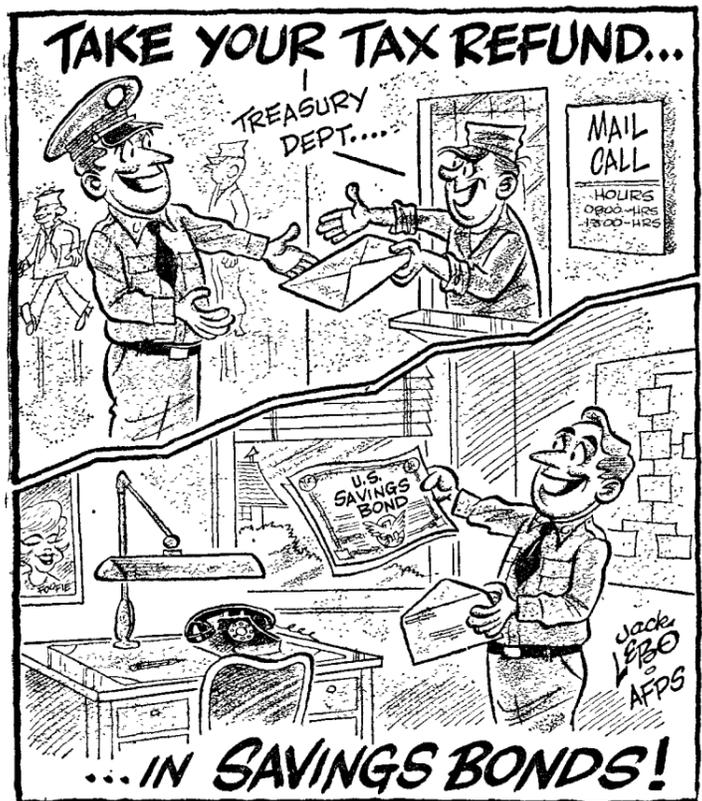

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, Huntsville, Ala., P. O. Box 346, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wanted—is noon of Friday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$6.36 a year, or \$3.50 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala.

## Rocket Ruminations

Editorial—

## Bonds Best Way To Keep 'Save Money' Resolution

One New Year's resolution always seems to get lost in the shuffle—the promise to save money.

Every year people resolve to buckle down and really save money in the New Year. Most of them fail in their promise because they have no substantial plan for saving.

One good solution to the problem is to purchase savings bonds. By using the savings bond allotment program provided by all the armed services, one is able to save money for himself, and also provide the government money to help carry on its functions.

An allotment plan takes the worry and bother out of saving money and assures that one will have a certain amount of money available whenever he needs it.

The beginning of the new year is a good time to start buying bonds by allotment since a person can get his income tax refund in the form of a savings bond.

The tax return you must file before April 15, 1965, contains a line to check if you desire your refund in Series E Savings Bonds. Your refund will consist of a bond of the largest denomination that can be purchased from the total amount of your refund, plus a check for the difference.

Certainly a resolution to save money is a good thing, but unless an orderly, consistent plan of saving is laid out, the resolution is worth nothing. You have such a plan available in the form of a savings bond allotment. (AFPS)

## Electrical Engineers To Hear Boeing Director

Dr. Richard A. Montgomery, Director, Military Systems, of the Boeing Company will speak at tonight's meeting of the Huntsville Section of the Institute of Electrical and Electronics Engineers at 6 p.m. at the Squirrel Hill Officers Club.

Dr. Montgomery's topic will be on "Design Principles and Applications of Security Radar Systems."

Dr. Montgomery was a graduate assistant in Physics at Dartmouth College between 1940-1941. From 1941 to 1943 he was a research physicist for the National Research Council of Canada. In 1943 Dr. Montgomery entered the Royal Canadian Navy and was a Radar Officer until 1945. After leaving military service, Dr. Montgomery went to California Institute of Technology where he received his MS degree in 1946, and PhD in Electrical Engineering and Physics in 1948. From 1948 to 1951, he was with the General Electric Company, General Engineering Laboratory, in the development of overseas warfare and torpedoes.

He joined The Boeing Company in 1951. From 1951 to 1957 he was responsible for the development of guidance, radar, communications systems, and over-all systems engineering from the BO-MARC program. From 1957 to 1962 he served in various management capacities in advanced weapon system development as Weapon Systems Staff Chief; Engineering System Manager-AICBM; Special Assignments; Development Program Manager-Air Defense Systems; Proposal Manager-Navy Typhon Missile System, and Staff Engineer for Ballistic Missile Technology.

From January 1962 to July 1964, he was the Deputy Assistant Director (Strategic Weapon) for the Department of Defense and Engineering.

Then in July 1964, Dr. Montgomery rejoined The Boeing Company as Director of Military Systems.

**FIVE MILLION HOURS OF SAFE WORK**—The Thiokol Chemical Corporation, Huntsville Division worked five million hours without a single disabling injury among its employees—a feat that netted each employee a \$15 dividend. In recognition of the record reached in December, others also took note of the accomplishment. At a special ceremony plaques and citations were awarded the company. John H. Goodloe (center), Thiokol manager accepts a citation from Gatewood D. Jackson, representing Travelers Insurance Company, while Maj. Gen. John G. Zierdt watches the presentation.

## -NOTICE-

### To Persons Interested In Becoming Real Estate Salesmen or Brokers

NACC will offer, beginning January 19th, the most sophisticated program ever offered in this field.

Because attorneys handle or supervise the closing of more than 99% of all real estate transactions in Huntsville, an outstanding attorney will head this training program. He will be assisted by a real estate broker.

Our decision to use the most qualified people in this training program is in keeping with our tradition of giving the finest of training to our students.

Our tuition is reasonable and you will be receiving your training in an accredited\* school.

their tills. Huntsville merchants shared approximately half a million; those in Birmingham, \$85,000; other Alabama cities \$920,000; and \$140,000 worth of business went to companies in Georgia and Tennessee. The rest of the money was spread among concerns in numerous other states.

Not included are the awards for a million dollars or more which go to missile contractors supplying the weapons and related equipment.

Contract negotiators for the smaller awards are located in the Army Missile Support Command's Purchasing and Contracting Division and the Procurement and Production Directorate of the Army Missile Command.

The small purchases and awards are for repair parts, paper and pencils, food, clothing, electricity, custodial services, laboratory equipment and varied items.

**Extension Subcourses Offered By Ordnance**

Hundreds of military and civilian personnel at Redstone Arsenal are eligible for extension subcourses available through the Ordnance Extension Course Program, according to Col. William J. Macpherson, commandant at the Ordnance Guided Missile School.

Col. Macpherson recently urged all officers and eligible civilian personnel to look into the program, pointing out that such studies were an excellent opportunity to better prepare individuals to advance to higher ranks.

The program is administered through the U. S. Army Ordnance Center and School at Aberdeen Proving Ground, with material on missile ordnance prepared at the Guided Missile School.

The courses are open to members of all components of the armed services, to ROTC students and to civilian employees of an agency of the federal government whose official duties or prospective duties require knowledge available through the program. Col. Macpherson pointed out.

Interested personnel should select a specific course and submit applications (DA Form 145) to their commanding officer, in the case of military personnel on active duty, or to section, branch or division chief, in the case of civilians. Approved applications then should be mailed to Commanding General, U. S. Army Ordnance Center and School, Aberdeen Proving Ground, Md.

Career courses available are: Ordnance officer basic extension course, 9-A-E20; ordnance officer career extension course, 9-A-E24; ordnance officer career (reserve component) course, 9-A-C24; ordnance officer refresher extension course.

Special extension courses include: Automotive maintenance

wood Arsenal, Md.; Frankford Arsenal, Philadelphia; and Maintenance Board, Fort Knox, Ky.

and repair officer extension course, 9-BE-4805; armament maintenance and repair officer extension course, 9-BE-4808; ordnance service section officer extension course, 9-BE-4813; ordnance ammunition officer extension course, 9-BE-4514; ordnance guided missile officer extension course (FAM), 9-AE-4801; ordnance guided missile officer extension course (ADM), 9-TE-4802; and nuclear safety extension course.

**4 PROMOTED**

(Continued From Page 1)

Moshkoff was born in Dayton, Ohio. He holds a bachelor of electrical engineering degree from Georgia Institute of Technology, and a B. S. degree in commercial science from Georgia State College. He was on active duty with the Navy for two years, attaining the rank of lieutenant.

Lindberg has served as both a civilian and a soldier at Redstone. Soon after graduation from The Citadel with a B. S. degree in electrical engineering in 1950 he was commissioned in the Army and spent nine years in the Ordnance Corps. The latter part of his military career was with the Arsenal's Army Rocket and Guided Missile Agency. Upon resigning his commission, Lindberg accepted a position with the Directorate of Research and Development, where he is now Chief of the Advanced Research Projects Division.

Lindberg is a native of New York City. He has an M. S. degree in electronics from Purdue University, and is a member of the Institute of Electrical and Electronic Engineers.

The Women's Army Auxiliary Corps (WAAC) was established in May 1942. The name was changed to Women's Army Corps (WAC) in July 1943 and became a regular part of the Army.

**WITH PURCHASE OF EACH NEW STATION WAGON SOLD IN JANUARY!**

© 1961 VOLKSWAGEN OF AMERICA, INC.

**Why does this station wagon look like a bus?**

The VW wagon is built for transportation. You will not find a wasted inch in it.

It has no nose because the engine is in the rear. (Which gives it better traction.) It is four feet shorter than the conventional wagon. (Makes it more maneuverable, easier to park.)

It is taller than the conventional wagon and shaped like a box. (This lets it hold more than the biggest conventional wagon.) It loads from the side. (This is the shortest distance to the carrying area.) Its driving seat is raised. (Gives you enormous visibility on hills and curves.)

Then, too, the VW wagon is the only station wagon you can buy with a hole in its roof. (Lets sun warm the passengers, breezes fan them. Also allows room for tall things. Like an 8-ft. wardrobe that stands up through the roof.)

It's a funny thing about the VW wagon. Most people who start out saying it looks like a bus, end up calling it a bus. With great affection.

Note: you can come in and take one of our box-shaped hole-in-the-roof VWs for a drive. At any time. (And don't be surprised if you end up calling it your bus.)

**CIVIL SERVICE WEEK**—Mayor Glenn Hearn presents a proclamation designating the week of January 10-16 as Civil Service Week to Colonel Thomas Cooke, Commander of the Army Missile Support Command at Redstone Arsenal during a ceremony attended by Arsenal and American Federation of Government Employees' officials. In his proclamation, Mayor Hearn called on Huntsville residents to join with our Federal employees in observance of the 82nd anniversary of the Civil Service Act of 1883. Throughout the week Redstone Lodge 1858 of the AFGE will sponsor a series of

special programs and activities to acquaint the public with the history and principles of the merit system. The week will be climaxed with a banquet at the Raymond Jones Armory on Saturday night. Joining in the ceremony held in the Mayor's office are, left to right, L. M. Brockman, Special Assistant to the Post Commander for Labor Relations, Everett Brouillette, President of Redstone Lodge 1858, and Dennis Garrison, National Vice-President of the AFGE.

## Civil Service Week Is Observed Across Nation

This week is Civil Service Week in Huntsville and across the nation. The local observance will be climaxed Saturday night at a banquet sponsored by the American Federation of Government Employees.

Mayor Glenn Hearn of Huntsville has signed a proclamation setting aside the week and calling

on city residents to join with Federal workers in observing the 82nd anniversary of the Civil Service Act of 1883.

The Director of Civilian Personnel for the Department of the Army, Charles F. (Chuck) Mullaly, will be guest speaker at the 7 p.m. banquet in Fort Raymond Jones Armory, Redstone Lodge 1858, AFGE, is the host.

More than 400 Civil Service employees of the Army and National Aeronautics and Space Administration are expected to attend the banquet, according to Dennis Garrison of Huntsville, National Vice President of AFGE, military and civilian employees are invited. Anyone interested in buying a ticket should contact the local AFGE office at 876-5755.

The Civil Service Act was signed January 16, 1883, and observance of the anniversary started in 1934. This Jan. 16 also is the

third anniversary of President Kennedy's signing of an executive order setting up a labor-management cooperative program for Federal employees.

## Joint Meeting Scheduled By TV, Motion Picture And Instrument Societies

The Ranger VII mission will be the topic presented to a joint meeting of the Huntsville Sections of the Instrument Society of America and the Society of Motion Picture and Television Engineers Tuesday evening at the Southern Cafeteria.

The Ranger VII mission will be described in detail, including a history of the program, the spacecraft configuration, and design and performance data on the television subsystem. A sound motion picture on the Ranger program will also be shown.

The presentation will be given jointly by Bernard P. Miller, manager of the Ranger project for the Radio Corporation of America, and Donald H. Kindt, Ranger TV subsystem project engineer for the Jet Propulsion Laboratory.

The mission of the NASA Ranger project was to obtain pictures of the moon's surface. In July 1964, Ranger VII successfully transmitted over 4,300 excellent quality pictures of the surface of the moon. The Ranger TV subsystem has the capability of obtaining lunar pictures with a definition at least 1,000 times better than those obtained with earth based telescopes. The last pictures were transmitted from an altitude approximately 1,700 feet above the lunar surface and gave recognizable resolution of objects 3 feet in diameter.

The Ranger TV subsystem project is being performed for the Jet Propulsion Laboratory of the California Institute of Technology by the RCA Astro-Electronics Division.

Bernard Mollberg and Lew Wright are handling reservations.

The United States Marines raised the American Flag on Mount Suribachi, Iwo Jima, Feb. 23, 1945, after some of the bitterest fighting in U.S. military history.

## Fluid Coordination Men Plan Two-Day Meeting

The U.S. Army Missile Command next week will host a two-day meeting of the Fluid Amplification Co-

ordination Group. This group, made up of more than 30 specialists doing research in fluid amplifier development, will convene at Redstone Arsenal Jan. 19-20. All branches of the armed forces will be represented as well as the National Aeronautics and Space Administration and the Atomic Energy Commission.

ordination Group.

One application for fluid amplifiers is the control of missile systems. By using streams of air, or gas, which are directed by tiny channeled plates carried inside the

missile, control functions can be performed.

Development of the fluid control system for possible missile use is managed by the Army Materiel Guidance and Control Laboratory of the Missile Command's Directorate of Research and Development.

Joe Kirshner of the Army Materiel Command's Harry Diamond Laboratories is chairman of the group.

# SOCIAL <sup>and</sup> CLUB EVENTS

## Reception Planned For Meme Warren

The Civilian Personnel Office staff of the Army Missile Support Command is honoring a retiring Personnel Management Analyst Friday night with a reception at the Squirrel Hill Officers Club.

She is Meme Warren who has been with the Federal Government since the country's mobilization before the outbreak of World War II.

Friends of Mrs. Warren who wish to attend can still get tickets through Mrs. Louise Turner or Mrs. Jan Scott, 877-4108 or 877-4216, until the close of business today.

## Mrs. Shupput Is Winner

Nine tables of players were in competition Thursday at the meeting of the Bridge Group sponsored by the Redstone Arsenal Officers Wives Club. The Group meets at the Squirrel Hill Officers Club.

Winners were Mrs. M. M. Shupput, high; Mrs. R. W. Washburn, second; and Mrs. J. H. Hellmers, third. Mrs. B. A. Saholsky was low.

Reservations to play with the group are handled by Mrs. A. J. Matthews.

## MRS. SAM CLARK, CAPT. MUTLUER WIN AT BRIDGE

Monday night bridge winners at the Squirrel Hill Officers Club last week were Capt. N. Mutluer for the men and Mrs. Sam J. Clark for the women.

Second high were Robert Van Roo and Mrs. R. U. Scott.

Ten tables were in play. Individuals wishing to join the group can make reservations with Mrs. Scott, telephone 772-8273.

### PLANNED PARENTHOOD

Charles Zukoski, a member of the Alabama Board of the Planned Parenthood League, will deliver a talk on population problems at the Huntsville Utilities Building Auditorium Jan. 19 at 7:30 p.m.

The meeting will be free and open to the public.

Backers of a Huntsville Planned Parenthood League plan an organizational meeting at the temporary Civic Arts Center Jan. 28.

Mr. and Mrs. Zukoski helped organize the League in Alabama in

## GREENE TO SPEAK AT AIAA MEETING

L. P. Greene, vice president for marketing and advanced program plans, North American Aviation, Inc., Los Angeles Division, will be featured speaker at the Jan. 19 meeting of the Alabama Section of the American Institute of Aeronautics and Astronautics. His topic will be "Winged Vehicles—Current and Future."

The meeting will be held at the Huntsville Country Club at 6 p.m. Tickets may be obtained from M. D. Murray, or Ann Clark, 881-0711.

## Chemical Engineers Plan Symposium Next Tues.

The seventh annual symposium of the North Alabama Section of the American Institute of Chemical Engineers will be Tuesday, January 19 at 4:00 p.m. at the Pavilion Inn in Decatur.

Topics discussed will be: "Project Control," by Joseph W. Campbell, Chemstrand; "Integral Foam Mandrels for the Production of Solid Propellant Motors," by Roger Comer, Thiokol; "Differential Pressure Viscometer," by Hunter Woodberry, Chemstrand; "Applications of Flow Reactor Models to Process Simulation," by T. J. Dwyer and D. A. Willoughby, Rohm & Haas; "Completely Remote Evaluation of Experimental Propellants," by B. K. Nipp, Rohm & Haas; "Sizing Rotary Vacuum Filters for High Efficiency Washing," by Dudley Cheape, Chemstrand.

The group will meet at 6:00 p.m. Reservations in Huntsville must be made no later than noon today, with J. L. Murphy, Jr., Thiokol Chemical Corp., 876-9292.

### MEETING PLACE CHANGES

Bill Fiser, president of the Huntsville Georgia Tech Alumni Club announces that Bobby Dodd, head coach and athletic director at Georgia Tech will be the guest speaker at a dinner meeting to be held on Thursday, January 21, at the American Legion Post instead of the Huntsville Country Club. Tech Alumni and their guests are invited. Reservations may be made by calling J. C. McKinney, secretary or Bill Fiser.

the 1930s and have been active in educating civic and state leaders about population problems both in the U. S. and in other countries, traveling as field representatives for a foundation in Massachusetts.

## Panel Discussion Planned Friday

The Engineering Management group of Huntsville Section of the Institute of Electrical and Electronics Engineers will sponsor a panel discussion: "The Use of Time-Cost Planning and Control Techniques as Engineering Management Tools," at 7:30 p.m. Tuesday in the Azalea Room of the Albert Pick Motel.

The panel members will be Dr. Marvin A. Griffin, University of Alabama; Gen. John Barclay, (Ret.) Manager, Northrop Space Laboratory; A. V. Pilling, vice-president, Hayes International; Joe Moquin, executive vice-president, Brown Engineering, G. Long, chief, Program Management Office, Lance Project Office, and Col. S. Fellows, Chief, Cost Reduction and Value Engineering Office, MSFC.

Engineers interested in this discussion are cordially invited to attend. For further information contact M. F. Sedlazeck, 876-3272.

### ACCOUNTANTS TO MEET

J. L. Thompson, Jr. Assistant Director for Administration, U.S. Coast and Geodetic Survey will be the guest speaker at the meeting of Federal Government Accountants Association tonight.

The group will meet at 6 p.m. at the Squirrel Hill Officers Club.

## At The Service Club

By BETTY HAYES

The days in January are passing rapidly. The Snowfall Serenade; the Winter Wonderland Swing featuring our talented Showmen; and the Pot Luck Supper are events that can be remembered as good times spent at the Service Club this month, but let's stop reminiscing and take a look at the activities for this week.

Attention EM Council Members!! Come to the meeting today at 2 p.m. with ideas for better Service Club programs. Your voice in the EM Council is important. We need your suggestions in order that we can plan the activities that you and the men in your companies will enjoy.

Do you have a birthday this month? If you do, come down and celebrate it with us tonight at 8 p.m.

Tomorrow evening join the other card players in the main lounge for your favorite card games, at 7:30 p.m. Prizes will be awarded to the winners, and refreshments will be served.

If you enjoy playing table tennis—why not enter the contest on Friday, January 15, at 8 p.m.

Saturday afternoon, at 3:30 p.m. has been designated as coffee time. Maybe you need to brush up on

a certain dance step!! Saturday evening, at 8 p.m., will be your chance to do so at the practice dance session. While you are learning the special technique to the step, you can help your friends with a dance step which you have mastered.

Hot coffee and donuts will be served to you on Sunday, January 17, at 9 a.m.

Sunday evening your favorite records will begin at 8 p.m. for your dancing pleasure at the Jingle Bell Hop.

Join us on Monday, January 18, at 8 for an evening of games.

For a delightful evening of entertainment attend the Winter Showcase, the first variety show of 1965, on Tuesday, at 8.

Congratulations to Sgt. Han, 4th ETC, the winner of the shuffleboard contest on January 5.

Don't forget to check this column each week for our events. See you at the Service Club.

Bying U. S. Savings Bonds is an excellent way to prepare for that time when you start taking it easy. Buy one a month at \$37.50, and you'll have \$50.00 a month coming back when the bonds mature.

1964 TAX TIP: Taxpayers in line for 1964 Federal income tax refunds have opportunity to get their refund dollars in U. S. Savings Bonds. Make your refund grow—take it in Bonds.

## SPEAKING OF BEAUTY

by Evelyn Quick

Mrs. Evelyn Quick, of Quick's Beauty Salon, a member of Official Hair Fashion Committee of the National Hairdressers and Cosmetologist Association, is in Oklahoma City, Okla., participating in the previewing and presentation of the New Spring and Summer Hair Style and presents to you . . .

You'll Swing Into Spring With A "Swingheart" Hair Fashion by Constance Charm

That the hair can swing and swan at the sides, while the crown hair remains in perfect placement.

For daytime, the new collection features soft curves on smooth and airy coiffures of simplicity and casualness. Evening calls for more dramatic exaggeration with more voluptuous combing into waves and curls. The postiche is used frequently as a hair accessory in the crown area. An important consideration always, but particularly when coiffures are being exaggerated for evening, is the stature and daintiness of a woman, so that the result is a picture of total harmony.

The new hair styles are decidedly ladylike, but with a flair of chic that has a dash, rather than prettiness, the word the hairdressers are using for this chic with a dash is "raffine," so get prepared to hear it at your salon. It is according to the official hair fashion committee of the National Hairdressers and Cosmetologists Association.

The new "Swingheart" hair fashions will be shown throughout the nation in observance of the 15th anniversary of National Beauty Salon Week, February 14-20, which is dedicated to more beautiful women.

You'll be glad to hear that the new styles really make good sense, aside from being wonderfully feminine, they are refreshingly easy to wear, holding their lovely form under a gentle caress, as easily as in a soft breeze.

The secret of this easy wear is an absolutely perfect haircut, the new and aptly named "Breeze Cut," which gives your hair controlled swing movement without displacement of the lines of the hair style. Action is in the hair ends, so also a term used in current couture-circles, indicating the close harmony between clothing and hair fashions for the season.

All coiffures emphasize a little head, and feature either a short-short look, or a long-short look. Hair length for the short-short look varies from zero at the nape to three inch layers all over the head. The long-short look has hair lengths from one and a half inches or two inches at the nape to six inches at the crown and sides. Actual hair lengths for the "Breeze Cut" depend upon individual needs, since the cut must be perfectly executed for each person.

Greatest width in the coiffures is at the eye level, and all indicate a soft and airy rise at the crown area. The clean, open face look is important for spring, but bangs and soft fringes are used whenever hairline or facial features indicate a need. Many of the coiffures also expose the ear lobe, whenever ears are attractive.

Of vital importance to the season's new hair styles is a softly controlled professional permanent wave, particularly for this season. The seemingly

simple lines of the new styles and the action they feature, make it imperative that your hair has the soft but necessary foundation needed to hold the memory of every wave line confidently. To be sure that you have the perfect-permanent wave for your hairdo consult Quick's Beauty Salon.

Another suggestion, consult us also about any hair conditioning you may need. Highly important in the spring hair fashion pictures is the lustre of shining hair. Even the slightest hint of winter drabness must go. The elegant simplicity and swing action of the new coiffures depend upon the supple softness of healthy hair.

Hair coloring for the season reaches a fine art. Soft butterfly colors in natural shades are blended into several harmonious tones, and beautifully interlaced throughout the coiffure. Among the fashion colors, a medley of soft blonde shades will be important, as will be the ladylike brownettes and feminine reds.

In make-up too, the lady-like and natural look will prevail. New emphasis will be placed upon the lips with clear soft colors. Eyes will be softer with eye shadow tones selected to match dress and eye color. A new feature, eyebrows of the same color as your hair. All for a wonderful swing into a spring of natural beauty.

## 'Busy Americans' Addressed In \$1,000 First Prize Letter

Washington (AFPS)—Air Force Staff Sergeant Carl E. Carr's \$1,000 award winning letter in the 1964 Freedoms Foundation letter writing contest, is directed to "Those Americans who are 'too busy' to vote."

"How valid is your share of Freedom if you fail to vote?" he asked. "What is the price tag on your share of liberty?"

"Not for sale? Yet you compromise your voting duty as an American, trying to justify that position with 'I have to work' or 'The poll tax is too high' or a hundred other such illogical, inadequate and downright appalling, open admissions of apathy."

Citing the amount of money an American citizen earns per hour, SSgt. Carr pointed out that it "... is the SSgt. C. E. Carr price tag you place on your share of freedom—IF you fail to vote."

Drawing a similarity between our freedoms and the lack of them in a Communist-dominated government, he pointed out that the sign in a store window "Closed—See You At The Polls" is insurance for being able to display the "Closed—See You In Church" sign in a shop window.

The Chanute AFB, Ill., airman reminded his readers that the American concept of democracy is controlled by the government's operation as dictated by consent of the government.

"This power of each American is expressed at the voting booth," SSgt. Carr wrote. "There begins the government—the strength of the Union."

"America is only as strong as the American voter and power exists only where it is exercised," he stated.

## JAPANESE ENTER SECOND TRAINING CYCLE AT SCHOOL

A second high-ranking Japanese officer has arrived here to initiate another phase of missile training for the Asiatic nation.

Lt. Col. Mikio Kimata of the Japanese Ground Self Defense Force has been assigned to the U. S. Army Ordnance Guided Missile School and will become Japanese liaison officer after completion of a class in which he presently is enrolled.

He will succeed Lt. Col. Yoshisuke Hirai, the present Japanese liaison officer, who is to return to his homeland in the near future.

Lt. Col. Kimata is a graduate of the Japanese Ordnance and Intelligence Schools and was assigned to the First Advanced Weapons

# Basketball Champs Are Still Anybody's Guess

Showing little affect from the two-week layoff in their schedule, Unit Level basketball teams got back to business last week with a pair of triple-headers at the Post Gym.

Highlighting the return to action was a battle for first place between the MPs and the Officers. The front running MPs staved of the Officers bid for a share of the lead with a 79-70 conquest.

In hanging up their eighth straight win, the unbeaten Police used their well-balanced attack to build up an early lead and then successfully hold off every threat by the upset-minded Officers.

Viking Stuart was once more the guiding light in the MP offense as he ended the evening with 30 points. He got Tony Cerna and Ron Percifield who tossed in 17 and 14 respectively. Johnny Bowen accounted for 29 and Bill Pollard added 13 in the losing cause.

The league leading individual scorer, Frank McMillan went on another of his patented sprees when he poured 40 markers through the nets in leading his 1st ETC mates to a 59-31 win over the Marines.

The tall marksman hit on 15 of 18 shots from the field and added 10 straight charity tosses in his near perfect evening.

With a chance to take over sole possession of second place, Hq STC ran into the recently revived Support Command five and came away with their second loss instead, 60-33.

The slow-starting AMSC crew

has come back strong and is now rated as one of the strongest teams in the league, and one which could give the MPs a lot to consider through the remainder of the season.

Another team with a great deal of potential despite their present standing is the MICOM five. Last week they gave further indication of their ability when they pounded out a convincing 55-27 win over the strong C Company five.

Bernie Bell set the MICOM pace with 27 points while his mates were limiting the high scoring Ed Logan to just 13.

4th ETC had the better of their duel with the 3rd ETC and came away with a 59-45 win. The game developed into an individual duel with Ron Davis tossing in 20 for the winners and Cy Blanton cashing 22 in the losing cause.

The last game on the card turned into a defensive duel with 2nd ETC outlasting A Company to take a 39-38 decision. Ray Wolf took game honors with 17 while Bill Huber scored 12 for the losers.

## Mr. Harrison Dies

Col. William J. Macpherson, commandant of the Ordnance Guided Missile School, and Mrs. Macpherson were called Friday to West Point, Ga., after the death of Mrs. Macpherson's father, William T. Harrison, 76, in a West Palm Beach, Fla., hospital.

Mr. Harrison was a native of West Point where he served 35 years as superintendent of schools and was a former president of the Rotary Club. He was a graduate of Young Harris College and Auburn University.

Survivors include: Mrs. Macpherson, Mrs. William A. Moore, Atlanta; Mrs. Jack Proffitt Jr., Dalton, Ga.; Mrs. John McCullough Jr., Kerrville, Texas; and Mrs. Jack Schuessler, West Palm Beach.

Services were held Sunday in the First Methodist Church at West Point.

## Col. Zacarias Rael Returns To School

Col. Zacarias F. Rael has returned to the Army Ordnance Guided Missile School for a second tour of duty and has been assigned as Director of Individual Training, it was announced Monday.

Col. Rael first served here from 1958 to 1962 and was then transferred to the 5th Mechanized Division at Fort Carson, Colo. In 1961 he received the degree of bachelor of science from the University of Omaha under the Army's "Bootstrap" program. A veteran of 26 years in the Army, he is also a graduate of the Command and General Staff College.

Col. Rael will reside in the BOQ until his family, now in Colorado Springs, joins him later in the year.

## German Officers Examine School

A group of four high-ranking German Army officers, including the chief of the Army education and training division, will visit the Ordnance Guided Missile School tomorrow in part of a tour of U. S. installations.

Brig Gen. Heinrich Schaefer will lead the German group and will be accompanied by Col. Hans Georg von Schlicht, of the office of personnel affairs (training) in

the Defense Ministry; Col. Alfons Gerner, officer in charge of the instructor group at the Army Officer School III; and Lt. Col. Lothar Paul Georg Domroese, officer in charge of the Army officers education program in the Defense Ministry.

The group will meet Lt. Col. Hans Finck, German liaison officer at OGMS, and with German students training at the school and will visit several classes and labs in key training areas.

There will be dinner at the Redstone Officers Club at 6:30 Thursday evening in their honor.

"SHAKEDOWN" NOT A DICE GAME—Sixteen Army Missile Command supply specialists are attending orientation classes before going to Norton Air Force Base in California to take part in the Department of Defense's Project Shakedown on guided missiles. Here, W. C. Rasnake, Chief of the Shakedown Control Office of the Supply and Maintenance Directorate, points out to four of the men that Project Shakedown is a joint Army-Navy-Air Force undertaking to reduce the number of items in the federal supply system. From left to right are: Carlos E. Matthews, Gary Lee Turner, Carl D. Sullivan and Glenn A. Stephens, all members of the Supply and Maintenance Directorate.

## 'Shakedown' To Be Held In California

Sixteen Army Missile Command civilian employees are set to go to Norton Air Force Base in San Bernardino, Calif., on Feb. 1 to take part in the Department of Defense's Project Shakedown.

They will join 42 Navy and Air Force employees in reviewing and analyzing each item in the supply class of guided missile repair, checkout and specialized equipment.

Project Shakedown is a joint

Army-Navy-Air Force undertaking. Its purpose is to reduce the number of items in the federal supply system through disclosure of duplication and identification of items that are interchangeable between the three branches of service.

The Redstone Arsenal group will return here after their tour of duty in California is completed in approximately two years. The Missile Command presently has four employees at the Air Force San

Bernardino Air Materiel Area, where they are doing Shakedown work on two other supply classes.

The Department of Defense recently picked the Missile Command as host activity for Project Shakedown on guided missile com-

ponents and guided missile remote control systems.

The Army's part of the upcoming project in California is coordinated through the Shakedown Control Office of the Missile Command's Supply and Maintenance Directorate. W. C. Rasnake is Office chief.

The 16 employees, all of the Directorate of Supply and Maintenance, are: Edgar L. Zeone, Alvin V. Camp, Glenn A. Stephens, Carlos E. Matthews, Harry Hardin, Carl D. Sullivan, Milton P. Crawford, Donald W. Morris, Kenneth E. Cantrell, John L. Gray, Paul K. Thompson, Eschol A. Hendrix, James W. Neely, Gary Lee Turner, Thomas W. Millward, Jr., and Bobby Canup.

# Reserve Officers To Hear Gen. Rich Saturday Night

Members of the Huntsville Chapter, Reserve Officers' Association, and their guests will be addressed Saturday night by the Commanding General of the U. S. Third Army.

Lt. Gen. Charles W. G. Rich will fly from his headquarters at Ft. McPherson, Ga., to speak at the association's dinner meeting to be held in the Redstone Officers Club.

Maj. Gen. John G. Zierdt, Commanding General of the Army Missile Command, will make the welcome address.

A native of Virginia, Gen. Rich is a 1935 graduate of the U.S. Military Academy.

During World War II he served in both the Pacific and European theaters of operation, later being assigned to the staff of the Armed Forces Staff College, Norfolk, Va.

Gen. Rich served in Korea in 1953-54, then returned to Washington for assignment in the Office of the Deputy Chief of Staff for Personnel. In 1958 he was assigned as Assistant Division Commander of the 101st Airborne Division, and in 1959 became Commandant of Cadets at the U. S. Military Academy.

He returned to Fort Campbell, Ky., in 1961 to assume Command of the 101st Airborne Division and in 1963 was named Commanding General of the U. S. Army Infantry Center at Fort Benning, Ga., and Commandant of the Infantry

School. He assumed command of the Third Army in August, 1964.

Tickets to Saturday's dinner meeting may be purchased by calling John L. Edgar, 876-7014, J. V. Klima, 876-0264 or Pete Redding, 876-1410.

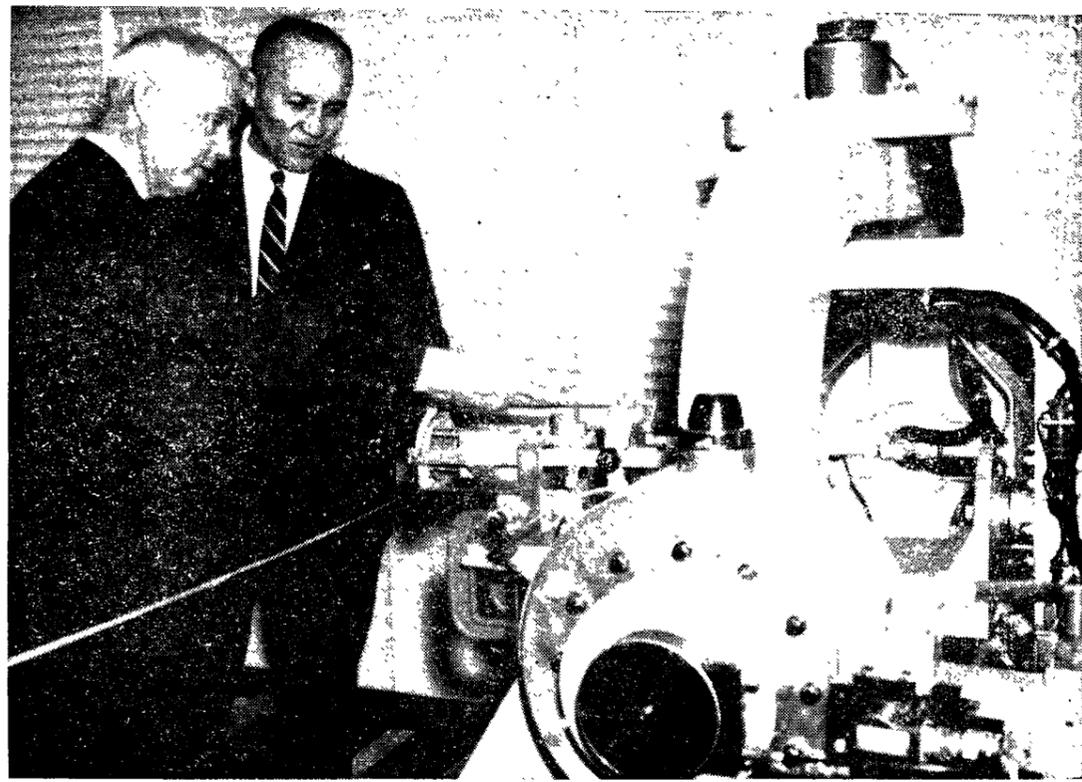

## School Now Carries 600 Foreign Students On Roll

The U. S. Army Ordnance Guided Missile School is beginning the new calendar year with over 600 foreign students and expects more in the near future.

Arrival of a high-ranking Japanese officer signals another build-up of students from that country in the coming months. Several hundred others are expected from most of the 17 countries that have adopted U. S. missile systems.

The largest detachment now at the School is the German Army and Air Force group that numbers more than 275 officers and enlisted men who are here either as students, interpreters or liaison personnel.

Koreans and Greeks have the

**FLIGHT SIMULATOR EXPLAINED**—Delman E. Rowe (left), director of the Electromagnetics Laboratory in the Army Missile Command's Directorate of Research and Development, briefs Brig. Gen. Kenneth E. Fields (U. S. Army, Ret.) on the operation of a three-axis flight simulator used by the laboratory in the development of optical and electronic methods for missile guidance.

next largest detachments with about 70 each.

Students are at the School presently from Belgium, Nationalist China, Denmark, France, Germany, Greece, Italy, Japan, Korea, The Netherlands, Norway, Spain and Turkey. A new group of

Canadians is expected soon.

Canada already has two warrant officers stationed at the School as instructors in the Hawk air defense missile system. They are the only non-U. S. instructors on the Missile School faculty.

The foreign students are accompanied by almost 100 wives and children.

Surest way to make your tax refund really mean something—check U. S. Savings Bond Line 21, Page 1, Form 1040 or Item 11, Form 1040A.

World War II ended in Europe, May 7, 1945, when the Germans signed surrender terms at Rheims.

## Examiners Announce Civil Service Jobs

The first three announcements for job openings in 1965 at the Missile Command were made by the U.S. Board of Civil Service Examiners last week.

Announcement AT-35-1(65) calls for patent advisers with qualifications ranging from the GS-5 level through GS-13 with salaries ranging from \$5990 to \$12,075 a year.

AT-35-2(65) is for teletypists and offers grade positions of GS-3 and GS-4. The annual salaries begin at \$4005 and \$4480. Unlike many competitive examinations, applicants for either category must specify on their applications because the examinations will be given at different times.

AT-35-3(65) offers technical publications and manuals writer-editors in physical sciences and engineering grade levels ranging from GS-9 through GS-11. It has the effect of closing earlier examinations so individuals on an earlier register who wish to remain eligible will need to reapply under the new announcement in order to remain on the list.

Spicer who recently was promoted to lieutenant colonel at the School. Col. Spicer is chief of the new missile department at the School. He is a native of Maryland and has attended the University of Baltimore. Col. Spicer came to the Missile School in August 1964.

## TRACKERS SCORE MISS DISTANCE

"... five ... four ... three ... two ... one. Fire!"

As the final second ticked off, the slim missile thundered from its launcher and streaked toward the target. Even before the deafening roar had subsided, an engineer sat hunched over his equipment, a short distance away, gazing intently at scientific data that was spouted out.

"Hey Mac," the engineer bellowed a short while later, "it was a good firing. We missed the target by five feet."

This scene didn't take place in the blockhouse at Cape Kennedy. In fact, it wasn't even near a launch pad. This shot took place on one of the test ranges at Redstone Arsenal. And the gunner was trying to miss!

Engineers at the U.S. Army Missile Command this week are testing a piece of equipment called a Miss Distance Indicator. As the name implies, the MDI is designed to tell how far an attacking mis-

sile is off target. The "attacking missile" being used in these tests is an artillery shell fired from a 105-millimeter cannon. The equipment itself is designed to be carried on target guided missiles and eventually will be used in the scoring of missilemen who are being trained in the operation of air defense missile systems.

Another big advantage of such a piece of equipment is its cost saving potential. Target missiles cost money. But with this system, gunners can intentionally fire off target, gain experience in shooting and do it without having to destroy their targets.

It can also be used to determine miss distance information during early stages of missile development.

"This information can be invaluable to us," one engineer said. "If miss distances vary or are consistently erratic, we

might know, for example, that our guidance system is basically unsound. On the other hand, if we repeatedly notch near hits we know we are on the right track."

Joe Smith, test engineer of the Missile Command's Test and Reliability Evaluation Laboratory, explained how the MDI works.

"It radiates a signal, much like radar, that will bounce off an attacking missile and return to the unit," Smith said. "This returning signal is changed to telemetry frequency and picked up by a ground station. The information is then assembled and studied by a data reduction system which interprets the miss distance."

**MDI can test all surface-to-air or air-to-air weapons, Smith pointed out.**

"As a matter of fact, we have been able to test the equipment with a bow and arrow. We merely wrapped aluminum foil around the shaft of the arrow and fired it near the equipment."

To test the unique system, the MDI unit is suspended high in the air between two wooden poles — some 80-85 feet off the ground. The poles are guyed with nylon ropes and the unit is suspended on a nylon rope which links the poles. Nylon is used to eliminate any unnecessary metal which could give a measurable signal.

Artillery rounds are fired close to the unit. Shooting from a distance of about 500 feet from the target, "we can check the accuracy of the MDI against what we know to be the actual miss distance," Smith says.

The Flight Operations Branch of T&RE is conducting the tests for the Target Missiles Branch of the Research and Development Directorate.

## Veterans Dependents Need To File Income Questions

Veterans and dependents of deceased veterans on the Veterans Administration's nonservice-connected pension rolls who fail to return their income questionnaires by Jan. 31 run the risk of having their monthly payments discontinued, VA officials said.

Neil R. Smart, Manager of the VA Regional Office in Montgomery, said that those not returning the questionnaires may even have to pay back the money received in 1964.

Smart pointed out that the questionnaires have been mailed before the close of November to allow the

recipient plenty of time but the return deadline date remains Jan. 31 as in former years.

The questionnaire carries a printed warning, reading "Important. Failure to return this card before January 31 will result in discontinuance of payment. You would also be required to pay back all the pension you received last year."

Since these benefits are paid only to those veterans, their widows or minor children whose incomes are below certain limits, the VA is required by law to receive an income report each year to support the payments.

Smart asked that the card be fully completed and signed before it is sent back to the Veterans Administration.

**PARTICIPATION REACHES 90 PER CENT**—Employees participation in the Savings Bond program reached 90 per cent recently when Betty Wooster, of the Supply and Maintenance Directorate, signed a payroll deduction authorization. Jim Hammond, savings bond solicitor for the Publications Illustration Branch, lends his assistance to Mrs. Wooster in making out the authorization. The Supply and Maintenance Directorate is one of the five organizational components of the Arsenal authorized to fly the Treasury Department's Minuteman Flag. The Directorate has an assigned strength of 1554, with 1414 of them listed as Savings Bond participants.

## Arsenal Personnel Attain Army Savings Bond Goal

Substantial increases on every front has boosted personnel participation in the U.S. Savings Bonds program at Redstone to over 90 per cent in the year-ending statistics.

In reaching the Department of Defense objective for participation in the program, Arsenal personnel climaxed a year which saw the presentation of Treasury Department Minuteman flags to five organizations.

The Minuteman flag is awarded to organizations of 1,000 or more personnel who attain 90 per cent

participation in the payroll deduction plan for buying U.S. Savings Bonds.

They are displayed by the Missile Support Command, the Ordnance Guided Missile School, and the three large Directorates of the Army Missile Command, Supply and Maintenance, Research and Development, and Procurement and Production.

Each of the organizations earned the right to fly the flag as long as they maintain the minimum participation requirement. Each of the units maintained their partici-

## GRADUATES HEAR TALK ON FREEDOM

Missile graduates from five nations training at the Army Ordnance Guided Missile School were told Friday that as missilemen they must remember that "we are living in a time where certain countries are dedicated to the principle of destroying the Free World's way of life."

Lt. Donald W. Burlage, chief of the School's Pershing Computer branch, issued this reminder Friday at an informal graduation ceremony. Burlage is a graduate of the Missouri School of Mines in

Rolla, Mo.

participation above 90 percent through the last half of the year. In announcing the year ending participation figures, Col. David Marcelle, Savings Bond coordinator for the Arsenal, commended the entire Arsenal work force for maintaining their interest in the program throughout the year.

He was referring to the fact that in previous years the participation has risen sharply during a month-long canvass in the spring, only to fall just as rapidly soon after the conclusion of the drive.

Col. Marcelle instituted a continuing program this year in which the Savings Bond program is kept before the people throughout the year. Under this program the participation percentages have continued to rise rather than decreasing.

He stated that the results attained so far indicate that it may not be necessary to conduct a costly and time consuming person-to-person canvass this year.

The year-ending statistics show that there are 10,739 regular buyers of Savings Bonds through the payroll deduction plan among the 11,916 military and civilian personnel. At the start of the year there were 41 less personnel on the rolls but 2,590 less participants.

The increase was even greater over a two-year period. At the end of 1962 there were 6,672 participants among the 11,886 Arsenal personnel.

"By the present system of defensive missilery in national alliances," he said, "free countries of the world have been able to maintain their common goal—FREEDOM. You, who are graduating today, represent one reason why these alliances will succeed."

Graduates received 23 weeks of classroom training in the maintenance of Nike radar and computer. The ceremony was highlighted by a presentation of an honor degree certificate to Sgt. Gregers Kristian Jensen of Herminge,

Rudme, Denmark, maintained a grade point average of 93.9 per cent in the course.

Other nations represented included China, France, Italy and Japan.

## 'Open Season' Declared For Medical Benefit Plan

Next month people enrolled in the Federal Employees Health Benefits program will be able to change enrollments from one type of plan to another.

The announcement was made through the Employment and Ser-

The greatest Naval engagement of World War I, the Battle of Jutland, was fought off the entrance of Skagerrak, May 31, 1916.

vices Division of the Missile Support Command's Civilian Personnel Office. The 'Open Season' is scheduled between Feb. 1-15.

Employees will be able to choose a different plan, a different option in the same or a different plan, or change from self only to self and family or the reverse.

Since current information about all of the plans was distributed last Fall, new brochures will not be distributed during this open season but anyone interested in making a change to an unfamiliar plan, may contact Mrs. Judy Moore at Civilian Personnel. Her extension is 877-4224.

If an employee is satisfied with the Health Benefit plan in which he is enrolled, he need take no action and he will continue to be carried on the rolls.

Everyone will receive notice of the open season.

**STAR SERGEANT**—Newly promoted sergeant major, Joseph M. Sloan Jr. of 1308 B Jupiter St., has been assigned sergeant major of the Department of Individual Training. He is shown receiving his new chevrons from Lt. Col. C. E. Chapman, director of individual training (left) and Col. William J. Macpherson, commandant of the Ordnance Guided Missile School. Sloan is a veteran of the Second World War and the Korean conflict and has more than 21 years active service in the Army. He has been assigned to OGMS since August 1961.

**Help Keep America Strong**  
Save regularly with U.S. SAVINGS BONDS

Your gift speaks for America when you feed hungry people by sending dollar-per-package contributions to CARE Food Crusade, New York, N.Y. 10016, or your local office.

### In Memory

Many persons remember loved ones and friends by making Memorial Gifts to the American Cancer Society, Inc. The Society sends an acknowledgment card both to the giver and the family of the loved one memorialized.

These funds are used to fight cancer through research, education and service. Contributions may be mailed to the American Cancer Society, Alabama Division, Inc., 2029 Warrior Road, Birmingham, Ala. 35208.

#### Cancer's 7 Danger Signals

1. Unusual bleeding or discharge.
2. A lump or thickening in the breast or elsewhere.
3. A sore that does not heal.
4. Change in bowel or bladder habits.
5. Hoarseness or cough.
6. Indigestion or difficulty in swallowing.
7. Change in a wart or mole.
