VOL. XIII; NO. 47

REDSTONE ARSENAL, HUNTSVILLE, ALABAMA

APRIL 7, 1965

General Is Assigned To ARADCOM

The U. S. Army Missile Command will be losing Brig. Gen. Howard P. Persons, Jr., its Deputy Commanding General for Air Defense Systems, in June.

The Army has announced his reassignment as Assistant Chief of Staff for Operations, Training, Plans and Combat Development, Headquarters, Army Air Defense Command, Ent Air Force Base, Colorado Springs, Colorado.

Assigned at Redstone Arsenal effective Aug. 30, 1962, General Persons was responsible for development and management of missile systems designed for defense of Army field units and American cities against the threat of aerial attack.

Missile systems in this category range from the man-portable Redeye, now in production, to the Nike Hercules and Hawk, deployed in defense and critical areas in the United States and overseas.

Gen. Persons has also directed management of various target missile systems, development of multi-system test equipment, establishment of the Air Defense Fire Distribution Systems Office, and work on such advanced systems as Mauler and SAM-D.

Gen. Persons has assumed the duties of Commanding General at various times during his assignment with the Missile Command, especially during the illness and immediately following the death of Maj. Gen. Francis J. McMorrow in August 1963.

He received a permanent appointment in the rank of brigadier general in February of this year. (See GEN. PERSONS on Page 3)

MAJ. GEN. HOWARD P. PERSONS
Assigned To ARADCOM

Hospitality Group Formed

Backers of the newly established Council for Community Service for International Visitors have secured financial support from Huntsville and Madison County in the amount of \$5,887.50 for six months.

Mrs. Phillip Brooks, vice-president of the Council, has been named temporary executive secretary, and the organization is ready to start serving as host and information bureau for foreign visitors to Huntsville.

The City Council in a special session Friday heard Col. William J. Macpherson, commandant of the U. S. Army Ordnance Guided Missile School, Mrs. Philip Brock, Harry M. Rhett Jr., M. Biene Spragins, T. Pickens Gates, Martin Phillips, Joe Payne and other civic leaders urge support of the program to acquaint foreign visitors with the American way of life.

"The Army Ordnance Guided Missile School is one of the largest centers for foreign training in the entire country. During fiscal 1964, for example, we trained 600 foreign students—which amounts to about three per cent of the national total of 18,000," Col. Macpherson said.

He noted that the school at present has 491 foreign students. Eighty five brought their families. Since 1957, the school has trained

3,700 foreign students and processed 2,000 of their dependents.

"These people are carefully screened, highly intelligent people who have been selected by their governments and approved by ours," Col. Macpherson said.

"Most of them speak passable English; a great many are much more fluent in our language than most of us would be in theirs. These people came to Huntsville and Redstone Arsenal to be trained in some of the most powerful weapons mankind has been able to devise. With our own forces, they form a great circle around all of our potential enemies."

Macpherson said the School does its part to educate the visitors with tours and educational programs, but he told the Council that this is not enough. "How the visitors will feel towards the United States in years to come depends, on the impressions that they gain (See COMMUNITY on Page 3)

HOOVER, HORNER AND MOORE WIN HONORS AT OGMS

Three enlisted men at the Test Branch of the Department of Individual Training at OGMS received seven awards in five weeks.

Andrew Hoover, grandson of the late President Herbert C. Hoover, started the series of recognitions with his promotion to specialist Four. John Horner followed Hoover by winning the OGMS Soldier of the Month title for March, obtaining the rank of specialist and (See TAKES THREE on Page 3)

MAW MADE 10th PROJECT OFFICE

A shoulder-fired anti-tank weapon system called MAW has become the 10th Project Managed Missile System at the Army Missile Command.

Simultaneously with this announcement, the Army said that Lt. Col. John H. Boyes has been named Project Manager of the new tank killer which is now in advanced exploratory development.

A native of Nanticoke, Pa., Col. Boyes is a veteran Ordnance Officer. Prior to coming here, he served at White Sands Missile Range, N.M., as Chief of the Systems Test Division of the Army Missile Test and Evaluation Directorate.

During his career of more than 20 years in the Army, Col. Boyes' assignments have included a World War II tour in Europe and one stretch of duty in Korea.

He is a graduate of Penn State University with a BS Degree in Education and he received his MBA from Babson Institute of Business Administration.

Col. Boyes is holder of the Army Commendation Medal with Oak Leaf Cluster.

Actually, the Army has two concepts of the MAW (Medium Assault Anti-tank Weapon) now under development.

One concept, the McDonnell MAW, which is being developed by the McDonnell Aircraft Co., is a command to line-of-sight guided missile. It is launched from a tube and is automatically guided to the (See MAW on Page 3)

GEN. ZIERDT TO SPEAK

"Tactical Missiles for Land Combat" will be the subject of a speech to be made at China Lake, Calif., Thursday by Maj. Gen. John G. Zierdt, Commanding General of the Army Missile Command.

He will be speaking before a classified meeting of the Missiles and Astronautics Division of the American Ordnance Association at the U.S. Naval Ordnance Test Station.

LT. COL. J. H. BOYES

Symposium Slated

At least four scientists from the U. S. Army Missile Command will be in California this week for the opening tomorrow of the annual NASA/FAA/DOD Guidance and Navigation Symposium.

From the Army Inertial Guidance and Control Laboratory will be William V. Gudaitis, W. F. Baxter, and John P. Leonard. All three will make presentations during the two-day affair.

Joining them will be Harold L. Pastrick, representing the Army Inertial Guidance Management and Technology Center. The IGTC solicited papers and correlated the Army's effort for the symposium.

Instead of a broad review of the whole field of guidance and navigation, the symposium this year will explore in depth just one aspect—"Navigation and Guidance of Maneuverable Entry Vehicles."

The symposium is being held at Ames Research Center, Moffett Field, Calif.

Combat Development Has Two New Liaison Officers

The U.S. Army Combat Developments Command has assigned two new liaison officers to the U.S. Army Missile Command.

They are Maj. Howard Hazlett III, who is responsible for Air Defense Systems, and Capt Wayne Stoller, who heads the Land Combat Systems.

Maj. Hazlett has been stationed at Redstone Arsenal for more than a year as liaison officer to the Mauler and Redeye Project Offices.

Capt. Stoller comes here from Ft. Sill, Okla., where he attended an artillery officer's career course. Prior to that, he was stationed for nearly three years in Germany with the 32nd Artillery Brigade.

A native of Wheeling, W. Va., Maj. Hazlett is a graduate of the U.S. Military Academy. During his more than 12 years of service, he has spent tours in Japan and Korea. Prior to coming to Redstone Arsenal, he attended the Air Defense School at Ft. Bliss, Texas.

Maj. Hazlett is married to the former Carole Riddell of Lakewood, Ohio, and they have two children, Holly, 10, and Heidi, 9. Capt. Stoller, who hails from (See COMBAT on Page 3)

WILLIAM V. GUDAITIS

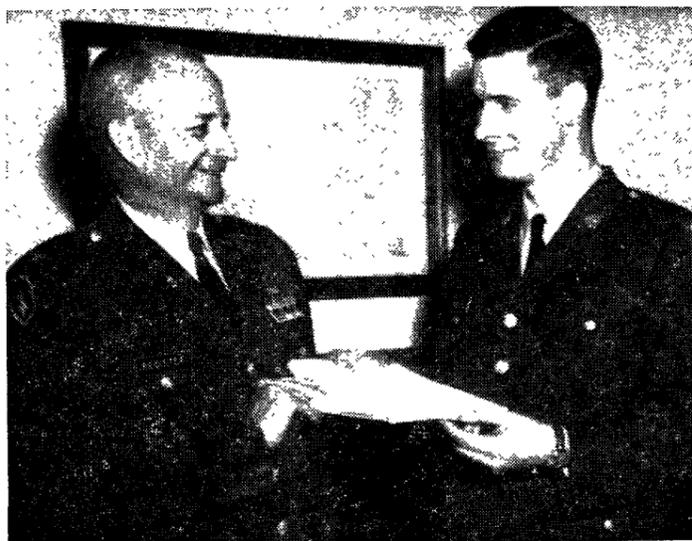

Gudaitis Is Sloan Fellow, Goes To MIT

One of the Army Missile Command's top scientists has been selected for an Alfred P. Sloan Fellowship at the Massachusetts Institute of Technology.

He is William V. Gudaitis, Deputy Director of the Army Inertial Guidance and Control Laboratory, Directorate of Research and Development.

Gudaitis is believed to be the first Army employee ever selected for the honor.

Designed for promising young executives, the fellowship program is an extensive one-year study of management which qualifies the participant for a master's degree (See GUDAITIS on Page 3)

SOLDIER OF THE MONTH — Col. William F. Register, Deputy Commander, Army Missile Support Command, presented Post Soldier of the Month honors to Sp/4 Kenneth R. Mills who has been working as Company Clerk, HQ & HQ Det, USAMSC. Sp/4 Mills is looking forward to a commission after he concludes law school at the University of Houston. Starting toward his objective in June, he will resume studies at the University in the area of economics. Sp/4 Mills entered the Army in 1963, completing his basic training at Fort Polk, La. Since that time, he has been at Redstone Arsenal.

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the information Office, Army Missile Command, Redstone Arsenal, Ala., Bldg. 5250, Room A-136, Extension 376-1400 or 876-1500.

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, Huntsville, Ala., P. O. Box 346, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wantads—is noon of Friday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$6.36 a year, or \$3.50 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala.

Rocket Ruminations

Moderation is best, and to avoid all extremes.

—Plutarch

Honor Reflects Excellence

Many times, we take pleasure in and are honored through rewards received by our fellow workers.

The announcement that an employee of the Army Missile Command has been selected for an Alfred P. Sloan Fellowship is one of those times.

William V. Gudaitis, Deputy Director of the Army Inertial Guidance and Control Laboratory, is one of 45 young executives from industry and government to be named a Sloan Fellow. As far as can be determined, he is the first Army employee ever selected for the honor.

Obviously, selection to this high honor is not through random choice. Since the simple act of nomination calls for an outstanding engineering background, those relatively few who win the Sloan Fellowship are exceptional.

Consequently, it is a reflection of considerable merit on all employees of the Missile Command to have one of their members selected.

The Alfred P. Sloan Fellowship is only one of several special educational funds available for advanced study in various professional areas. We feel that Missile Command employees will continue to be nominated for and win such awards. In doing so, the Army, the Federal government and the National Defense will benefit from the knowledge gained by the individual and returned to Redstone for application on the job.

NATO... 16th Anniversary
April 4

**Promoting Peace...
Resisting Aggression...**

*Quoted
1955*

An Alliance Dedicated To World Peacekeeping

The North Atlantic Treaty Organization (NATO) Will be 16 years old April 4. As one of the keepers of peace in today's tension-riddled world, it deserves a salute from those of us in uniform.

In the four years following World War II before NATO existed, the Free World was sadly convinced of the need for it.

In the United Nations, the Soviet Union repeatedly used its veto power to advance its own world policies and restrain those of the Western powers. It had annexed Estonia, Latvia and Lithuania during the war. Parts of Poland, Finland, Rumania, Germany and Czechoslovakia were added to its empire. Using army-supported internal pressure against existing governments, the USSR reduced Albania, Bulgaria, Rumania, East Germany, Poland, Hungary and Czechoslovakia to the status of Soviet satellites.

The world was divided into two camps: the Communists, led by the Soviet Union, and the Free World, led by the United States.

Greece was in danger of being lost to the Communists, leaving Turkey and the Middle East more exposed to increased Soviet pressure. The Truman Doctrine and the Marshall Plan brought U.S. aid to these countries and to western Europe. Still, the Free World needed more unity in combating the growing Red menace.

In western Europe, Great Britain and France pledged mutual assistance. They were soon joined by Belgium, the

President Is Behind 'Equal Opportunities Program'

Esther Peterson, Special Assistant to the President and Assistant Secretary of Labor, spent Apr. 1-2 at Redstone Arsenal and MSFC after a whirlwind visit to Ft. McClellan's WAC Training Center.

Her visits were in connection with the President's program of equal employment opportunities for women. She visited Dr. Werner von Braun, saw a firing test, toured MSFC facilities, was guest speaker at a banquet Thursday evening, and met with supervisors the following day in order to acquaint them with the President's program for equal employment for women.

Mrs. Peterson observed that the

President is solidly behind the program, trying to speed the progress, and that it is now up to the women to take advantage of their opportunities. If they don't speak up, they cannot progress, she believes. She also stated that women will probably be in the astronaut program as well as the support program for space exploration.

Mrs. Peterson expressed especial interest in being able to do women's work and still be productive in business and industry rather than using the time at the bridge table and other time-marking pursuits.

She touched on the need for re

Netherlands and Luxembourg with the signing of the Brussels Treaty March 17, 1948, forming the Western European Union. The treaty included military assistance and set up a joint military headquarters. President Truman pledged the United States' help, if needed.

To form NATO, treaty negotiations were begun among the five Brussels Treaty nations, the United States and Canada. The powers agreed that the treaty would be within the framework of the United Nations, promote peace while positively resisting aggression, be based on mutual aid and self-help (including non-military features), and be implemented by a formal organization.

On April 4, 1949, the North Atlantic Treaty was signed in Washington. In addition to the original negotiators already mentioned, the signers included Portugal, Denmark, Norway, Italy and Iceland. Greece and Turkey joined in 1952 and West Germany in 1955.

The NATO nations established the Supreme Headquarters of Allied Powers in Europe (SHAPE) near Paris. This act showed the USSR that aggression would be met by NATO's combined military might. General of the Army Dwight D. Eisenhower was the Allied powers' first Supreme Commander.

NATO has had its problems, such as the reduction of French forces and the withdrawal of the French Mediterranean Fleet in 1959, and Greece and Turkey's dispute on the island of Cyprus, climaxing last year.

But even with its problems, NATO continues to be one of the Free World's strongest deterrents to Communist aggression. Without NATO, who knows how many more nations would be under Communist rule today?

(AFPS)

training women when their children leave home for school so that they can perform on the basis of quality of work and receive equal pay for the effort. She pointed out that usually a woman can look forward to 30 productive years when her youngest child goes to school.

The greatest shortage is in sociologically and psychologically trained personnel. She pointed out that without the help the educational dropouts would continue unproductive and asked, "How do you motivate people. How do you bring them back?" In the women's program she observed, "I don't think industry has gone as far as government. LBJ says we're not moving fast enough. "She said he keeps saying "Let's be a show place." "Technology has created new opportunities," she said.

Mrs. Peterson also touched on the impoverished women heads of houses that need training, and added dignity and pride in the work they do.

DON'T FADE AWAY

M/Sgt. Howard R. Wynn, senior instructor at OGMS, retired from the Army last month after 20 years of service, but the Wynn family is still represented at the Missile School.

His son, Pvt. William Wynn, is assigned to the 2nd. ETC and is training in Hawk Missile Control and Launcher Repair course. M/Sgt. Wynn, was senior instructor at the OGMS Air Defense Missile Department.

GEN. PERSONS

(Continued From Page 1)

The 51-year-old general is a native of Monticello, Ga., and graduated from the U. S. Military Academy in 1963. He is married to the former Virginia Lewis of San Francisco, Calif. The couple have a daughter, Nancy, and a son, Lewis.

A combat artilleryman and a qualified parachutist, Gen. Persons commanded the 32nd Artillery Brigade (Air Defense) in Germany immediately prior to his present tour of duty at Redstone.

Other overseas duty with the 7th Army from 1959 to 1962 include: Assistant Chief of Staff for Intelligence, 7th Army; Deputy Chief of Staff, 7th Army and Commanding General, 3rd Infantry Division Artillery, Germany.

His World War II Service included participation in six campaigns in England, North Africa, Sicily, Italy and France with the Artillery. Other overseas tours have included service in Korea in 1954-55 with the Eighth Army as Executive Officer, Second Infantry Division Artillery; Executive Officer IX Corps (Group Artillery) and as advisor to the Chief of Artillery, Republic of Korea Army.

Gen. Persons' duty tours in the United States since World War II have included tours at Ft. Bragg, N. C. as Commander, 80th Artillery Battalion, 82nd Airborne Division; and service in the Pentagon on the Army General Staff, most recently as Chief of Technical Intelligence Division, Office Assistant Chief of Staff for Intelligence from July, 1956, until he reported for duty with the 7th Army in Europe in 1959.

He completed the airborne course at the Infantry School, Ft. Benning, Ga., and qualified as a parachutist in September, 1949. The General is a graduate of the Air War College, Maxwell Air Base, Ala., the Armed Forces Staff College, Norfolk, Va.; and the

(Continued From Page 1)

in industrial engineering.

Gudaitis will join about 45 other Sloan fellows, representing a wide variety of industries both here and abroad, when classes begin in June. During the year, one of the highlights will be a field trip to Western Europe.

A native of Pittston, Pennsylvania, Gudaitis joined the Army Ballistic Missile Agency in 1960 as Deputy Director of the Guidance, Control and Aeroballistics Laboratory. At that time, reorganizations of research and development were underway after the departure of Dr. Werhner von Braun and his Development Operations Division to the National Aeronautics and Space Administration.

Prior to coming with the Army, Gudaitis worked for more than seven years in the development of the Redstone and Jupiter ballistic missile systems as head of the Control Design Department for Chrysler Corporation.

He also worked with the Bendix Corporation research laboratory in the field of analog and digital computers.

Gudaitis received his undergraduate degree in physics from the University of Detroit. He has done graduate work at Harvard University and at MIT.

At MIT, the Sloan fellows will study a variety of subjects, including economics, labor relations, law, foreign policy, finance and taxation. In addition to the classroom work, the group will meet with top officials in industry and government throughout the year.

Gudaitis is a member of the American Institute of Aeronautics and Astronautics, the Institute of Electrical and Electronic Engineers and their professional group on electronic computers, the American Ordnance Association and the Association of the U.S. Army.

He is married to the former Helen Yanciunas of Brockton, Massachusetts and they have eight children.

of us while they are here.

"The visitors need to get out into civilian society, into private homes and make friends and see at first hand how we Americans live and why we act as we do," Macpherson said.

Praising the city's civic, social and religious organizations for the efforts they have put into making some 6,700 people from 17 nations welcome in Huntsville since 1957, Macpherson asked the Council's monetary support of the Huntsville COSERV. He said the COSERV program is a wide one—but is not "overly elaborate."

What makes it so effective is that it has rounded up in each locality the people who like hospitality work and are willing on short notice to arrange for tours and visits and personal contact, he declared.

The School commandant said OGMS will continue to help COSERV in terms of transportation, facilities and the like, but, he said, "COSERV needs a permanent office, a staff and a place where this kind of co-operation can be co-ordinated."

Command and General Staff College, Ft. Leavenworth, Kan., where he also served a four-year tour as an instructor.

His awards and decorations include the Legion of Merit; Army Commendation Medal; the French Croix de Guerre Order of the Brigade and Order of the Corps, and the Republic of Korea Distinguished Service Medal.

CAPT. WAYNE STOLLER

COMBAT

(Continued From Page 1)

Sabetha, Kan., graduated from Kansas State University with a BS degree in Geology. In addition to his tour in Europe, he has had tours in Texas and Oklahoma.

Prior to entering the Army in 1954, Capt. Stoller taught school for one year at Holton High School in Holton, Kan.

Capt. Stoller is married to the former Betty Ralston of Sabetha and they have two boys, Michael, 8 and Jeffrey, 4.

Both Maj. Hazlett and Capt Stoller are holders of the Army Commendation Medal.

target.

The Missile Command's Directorate of Research and Development is developing the second concept. Known as the Directional-Control Medium Assault Anti-tank Weapon (DC-MAW) this concept features a unique control system which will be accurate, simple and rugged.

Either concept will provide a weapon that can be carried and fired by one man.

Expected to provide a major boost in firepower for infantry units, the MAW is being developed so that it can be used by regular field troops with very little training. It will also be effective against gun emplacements and field fortifications.

Col. and Mrs. Boyes are living at 420 Hughes Drive at Redstone Arsenal.

Other Army missile systems under project management at the Missile Command include: Lance, Sergeant, Pershing, Hawk, Nike Hercules, Mauler, Redeye, Tow and Shillelagh.

CONDUCTS LECTURES AT REDSTONE—Dr. J. Bruce McLeod (right) is welcomed to Redstone Arsenal where he conducted a series of lectures on "Eigenvalue Problems and Their Applications." Greeting him is Dr. S. H. Lehnigk of the Directorate of Research and Development. Dr. McLeod is a citizen of Britain on leave from his position as Fellow and Lecturer at Oxford University. He is serving at the U. S. Army Mathematics Research Center, Madison, Wis., under the Exchange Visitors Program. About 50 employees of the Army Missile Command and Marshall Space Flight Center attended the course at Redstone.

JOINT FUND LAGS

The 1965 Joint Fund campaign on the Arsenal passed the half way mark this week with the reported participation lagging somewhat behind schedule.

In the third of five weekly progress reports submitted this week, the participation in support of the National Health Agencies had reached 41 per cent with 38 per cent of the personnel having made contributions to the Federal Service Joint Crusade.

The five-week campaign in support of eight National Health Agencies and four international organizations that make up the Federal Service Joint Crusade will be concluded April 16.

The envelopes will be accumu-

agement course is one of 16 offered at the Center. Other courses on the curriculum, are in the areas of supply, surplus property disposal, depot operations and inventory management.

lated here until the conclusion of the drive and forwarded to the state headquarters for the drives. All accounting for the voluntary contributions will be made at that level.

Participation has reached 100 per cent in five reporting organizations, all but one of which are located in Building 4488.

The "perfect" organizations are the Redeye and Mauler Project Offices, Office of the DCG, Air Defense Systems, Quality and Reliability Management Office, and the SAM-D Commodity Office.

The Research and Development Directorate is setting the pace among the large agencies with participation having reached 78 per cent in support of the National Health Agencies and 77 per cent for the Joint Crusade.

Procurement and Production shows 67 and 59 per cent, the Support Command has 59 and 51 per cent respectively and Supply and Maintenance has reached 59 per cent in each of the drives.

Graduates To Hear Col. Cleary

Col. Thomas J. Cleary Jr., Information Officer for the United States Continental Army Command at Fort Monroe, Va., will address 50 U. S., Belgian, French, Greek, Italian and Norwegian graduates Friday at the Army Ordnance Guided Missile School.

Cleary will arrive Thursday by military plane and will be feted that night at a cocktail party by officers of the Tennessee Valley Chapter of the Association of the U. S. Army.

The speaker was a special assistant and later military assistant to the secretary of the Army in

Eight From Arsenal Graduate At Ft. Lee

The Missile Command was well represented recently during graduation ceremonies concluding the Defense Procurement Management course at the U. S. Army Logistics Management Center, Ft. Lee,

the early 50's in both the United States and Europe.

He was also in command of the first battalions of the Sixth Infantry in Berlin and is a graduate of the Army War College. Following graduation, he was appointed a member of the faculty where he served until 1961. During this period he received a master's degree in International Affairs from George Washington University.

Cleary holds the Silver Star with three Oak Leaf Clusters and the Bronze Star Medal with two Oak Leaf Clusters. He received a master's degree from the University of Wisconsin in Journalism.

Va. Eight civilian employees of the Command were among the students who received certificates signifying their successful completion of the five-week course.

All but one of the Redstone personnel are employed by the Directorate of Procurement and Production. The other, Isaac Buchanan, works for the Sergeant Project Office.

The P and P personnel were, James Anderson, Russell Keeler, Maria McCaslin, Miriam Pullins, Gilbert Radovic, Wendell Self and George Whelen.

They were enrolled for the advanced training under the Command's career development program administered by the Training and Development Division of Civilian Personnel.

The Army Logistics Management Center is the Department of Army's only postgraduate level school for logistics managers. It is a field activity of the Army Materiel Command.

International Beauties Prove Pretty Expensive

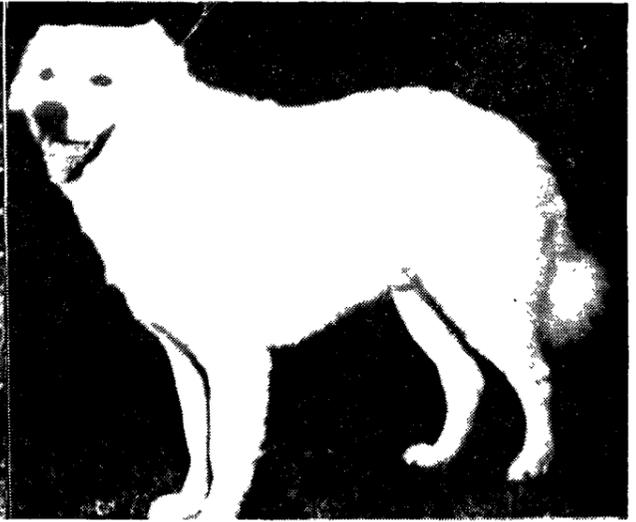

Two international beauties from behind the Iron Curtain were admitted to the Army Ordnance Guided Missile School this week despite the fact that they could not obtain security clearances.

The visitors, Gyapjus Kapitany of Budapest, Hungary and Beyaz Kum of Czechoslovakia, created quite a stir among missilemen from the U. S. and foreign nationals from 17 countries. Security officers at the School weren't the least bit concerned, however, for the beauties are the recently imported Kuvasz puppies of M/Sgt. Clifford E. Rutter, NCOIC of the School's photographic lab.

the Magyar" is a delicate endeavor, "but well worth the effort and expense involved," Rutter said.

The pup from Hungary recently arrived at the Rutter home after a round-a-bout trip from its homeland to Canada to Huntsville. Rutter and his wife, Shirley, purchased the dogs through an agent in Chicago who imports them on a non-profit basis in an effort to aid poverty stricken relatives in Hungary and behind the Iron Curtain.

The breed is not new to Rutter who trained Kuvasz dogs while serving the Army in Turkey. They have been esteemed in Eastern European and Middle Eastern

NEW ARRIVALS IN CITY—These two Kuvasz dogs from behind the Iron Curtain were obtained by M/Sgt. Clifford Rutter, NCOIC of the OGMS photo lab. The breed is not new to Rutter who trained Kuvasz dogs while serving the Army in Turkey.

GO WEST—Lt. Col. and Mrs. Kirwan D. Lee listen to the commendation awarded the Colonel for the manner in which he handled his duties as a special security officer in the Missile Intelligence Directorate, Army Missile Command. The Army Commendation Medal was awarded during retirement ceremonies Wednesday. Col. Lee has been on active duty since March 1942. The Lees are planning a stay in Denver, Colo. They are both Westerners. He is a native of Washington and Mrs. Lee is from California.

countries for over 2,000 years, he said.

"We call our newest arrival "Bundas" for short. It means sheepskin. Their lambs wool coats are beautiful," Rutter said.

Rutter's wife is negotiating for two more Kuvasz dogs. He explained that importing them can become a very expensive task. Import duties set by the dogs' homelands can run from \$350 to well over \$500, she said. In most cases, the import duties are higher than the prices charged for the dogs. Profits from the sales made by Mr. and Mrs. George Culp of Chicago provide food for the couples' re-

latives in Hungary.

The Rutters will raise the international beauties as show dogs for state and local competitions.

"Our main purpose for importing the breed is to popularize Kuvasz in this country. We fell in love with them when the Army assigned us to Turkey," Mrs. Rutter said.

The arrival of "Bundas" created

a number of problems for the Rutters. They believe he was apparently mistreated by someone in uniform. Bundas was ready to battle with Sgt. Rutter while the OGMS man was in uniform, but the dog became friendly when Rutter appeared in civilian clothes. Since his arrival last month, Bundas has lost his fear of the uni-

Dr. Sayles Nominated For Award

Dr. David C. Sayles, of the Propulsion Laboratory, U.S. Army Missile Command, has been nominated for the James T. Grady Award. This award is administered by the American Chemical Society, National Division, and recognizes and honors individual accomplishment.

To qualify for this award, the nominee must have made noteworthy presentations through the medium of public communication, and have resulted in an increase in the American public's understanding of matters pertaining to Chemistry and to chemical progress. These media can be newspapers, radio, television, movies, lectures, or books and pamphlets for the lay public. The award carries with it a stipend of one thousand dollars, and will be made at the national meeting in 1966.

Sayles also recently has been recognized by the American Institute of Chemists since he was accredited for scientific modernism.

Sayles was recently involved in the preparation of a television show which was filmed in the Propulsion Laboratory. He was a narrator on the "Propulsion" Block of "Preventive Maintenance Indicator Presentation" intended for use at Fort Knox.

SOME LIKE IT COLD—It's almost Spring in Alabama but Lt. Dick Rhoades doesn't seem to care much for the prospect. He's pictured at Aspen, Col., where the snows are still deep and the skiing conditions are reportedly excellent. On the job, the Lieutenant is in the Propulsion Laboratory, Directorate of Research and Development. His home is Northampton, Mass.

Women Tie For First Place

The Golf Group sponsored by the Redstone Arsenal Officers Wives Club played blind partners Wednesday on the Arsenal Golf Course and had a tie for first place.

The two top teams were Mrs. E. I. Donley and Mrs. Lewis Dorris and Mrs. A. M. Cobban and Mrs. Gerald Pratt.

In second place were Mrs. R. R. McIntosh and Mrs. W. H. Loomis.

Today the group starts the Spring Ringer tournament. Also, the beginners will attend a clinic under the direction of Pro Mac MacClure.

At the end of the competition, the golfers will be served lunch at the Course Clubhouse.

Rain Doesn't Bother Real Shooters

A steady rain had little effect on the marksmanship of the four-man Redstone Pistol team recently when they dominated the Memphis Invitational meet.

The four pistolers came away from the Tennessee metropolis with 31 trophies, the greatest number ever amassed in one meet by an Arsenal team.

Leading the local assault in the

two-day meet was Lt. Ed Murphy, who captured 12 individual awards in the Sharpshooter class. Lt. Bill Greenlee added another seven trophies in the same class, Lt. Jim Degan captured nine places as a Master, and Sgt. Frank Gurecki placed in three categories of the Expert class.

Murphy, who is assigned to the Marshall Space Flight Center, emerged as the overall aggregate

winner in his category and gives every indication that he will be a serious threat in the National Rifle Matches at Camp Perry late in the summer.

WEATHER UNCOOPERATIVE

The International Soccer Team of Nashville was again denied its chance to avenge an 8-2 loss to the OGMS German Air Force crew as the return match was postponed for the second time.

Rain and soggy fields at both OGMS and Vanderbilt University has caused the games to be cancelled. The match is rescheduled for Saturday at Vanderbilt — weather permitting.

Poe To Talk On Water, Boat Safety

Curtis Poe, a captain in the Alabama State Water Patrol, will talk to the Redstone Arsenal Sportsmen Club Monday at 7 p.m. in the club rooms above the Post Office.

Poe uses props to emphasize his talk on water safety and boating.

Also on the agenda, the nominations committee will present names to replace the third vice president, Lt. Frederick Pinkerton, and treasurer custodian SFC Joe Cormier—both being reassigned.

SFC Ernie Pitts reports progress on the cleanup around the finance pond but says he still needs help to finish the job.

Membership in the Sportsmen's Club is open to active and retired military personnel.

Scouts Registering For Summer Camps

Hundreds of Madison County Boy Scouts have begun registering for summer camp sessions at Westmoreland Reservation, according to Spencer Ball, Madison County Scout executive.

Ten camping sessions will be sponsored by the County Scouts from June 14 to Aug. 22. Monday through Saturday programs have been mapped by Scout executives, Ball said.

Activities include sports instruction, campfire rallies, family nights, movie showings, troop information programs, and a water carnival.

Thirteen expansive campsites will be utilized to facilitate approximately 232 Scouts.

ARSENAL SCOUTS WIN HONORS AT 1965 EXPOSITION

Boy Scout officials estimate that some 10,000 persons attended the Tennessee Valley Council Boy Scout Exposition held last month at the Madison County Coliseum.

Over 2,000 Scouts participated in the Exposition which features 60 display booths and demonstrations in Scouting techniques. Display booths included outdoor camping methods, judo demonstrations, science and animal shows. Cub Scout, Boy Scout and Explorer divisions participated in the annual event.

Following the event, 47 blue ribbons were awarded to display booths on a "point up to standard" basis, according to Spencer Ball, Madison County Scout executive.

S/Sgt. George Featherston, personnel specialist at the Army Ordnance Guided Missile School, received an award for his Cub Pack 72 which sold over 1500 tickets, an exposition record. Prizes for ticket sale contests included 78 tents, 18 sleeping bags and special recognition patches, Ball said. More than 300 neckerchiefs were also awarded during the sales contest. Some 18,000 tickets were sold during the annual exposition.

OGMS Graduates Smallest Class

Ten American and Italian missile men last Friday were one of the smallest classes ever to graduate at the Ordnance Guided Missile School.

The graduates and OGMS personnel heard an address by 1/Lt. John W. Bowen, instructor at the electronics branch of the School's Missile Components Department.

Bowen told the group that they have gained more than knowledge of missile systems. He said they have been given one of the keys to keep the free world free.

VALUE ANALYSIS OF PROCEDURES—Don I. Hervig, left, Chief of the Calibration Center, discusses the results of the Value Analysis Program on calibrating components of missile and rocket weapon systems with three Center specialists. The program was developed by the Army Missile Support Command to emphasize the application of the Value Engineering technique to all types of procedures, and first fully implemented in the Calibration Center. From left to right are: Hervig; Millard M. Jernigan, Chief, Mobile Transfer Team; Billy Brown, Jr., Chief, Stationary Transfer Team; and Frank Westmoreland, Value Analysis Program Representative.

Col. Nearhoof Is Speaker At School

Hearing graduation speeches need not be a necessary task which is considered part of the price that must be paid for a diploma, according to Lt. Col. Ralph L. Nearhoof, who addressed a class of U.S., German and United Kingdom students at the U.S. Army Ordnance Guided Missile School Friday.

Commencement speeches can contain ideals that will stick with an individual throughout his career, Nearhoof who is chief of the School's Missile Components Department, told the graduates and guests.

Nearhoof, who has nearly 30 years of service in the Army, proved his point by recalling advice given at commencement speeches he has heard during his lifetime. The speaker could not recall the names of the speakers but he remembered at least one thought each of them had left with him.

Maj. James P. Mooney who graduated from the U.S. Army Ordnance Guided Missile School with U. S., German and United Kingdom students wondered what his new boss would be like. He found out in an unexpected turn of events—his boss was the commencement speaker.

Keynote speaker at the exercise was Lt. Col. Ralph L. Nearhoof, chief of the School's Missile Components Department where Mooney is being assigned.

Mooney also got to meet his new boss for the first time on the stage of the post theater. Nearhoof presented him with an honor degree diploma. The student was high man in his Guided Missile and Special Weapons Staff Officer course.

He cautioned the students that what they have learned as missilemen is subject to constant change and that they must keep up with the latest advances in their missile specialties.

"Two years from now," he said, "you will be a 'has been' unless you continue to study and keep up with the new developments in your respective fields."

The speaker presented honor degree diplomas to Maj. James P.

Mooney, and Sgt. Robert E. Murphy. Mooney was high man in his Guided Missile and Special Weapons Staff Officer course. Murphy made the highest percentage in his Ballistic Missile Test Station Repair.

SOCIAL ^{and} CLUB EVENTS

SPORTING LIFE—PFC Ray Kubesch (left) and PFC Ron Fleetwood stand beside a sporty pup in a plaid hat, admiring some of the items that will be displayed during the fashion show at the Post Service Club tomorrow night. Clothes for men will be from Budd's, for women from Marja's.

Tea Scheduled By Wives Club

April's program for the Officers Wives Club at Redstone Arsenal will be a tea from 2-4 p.m. Apr. 13 at the Redstone Officers' Open Mess.

Reservations by noon Apr. 9 will be accepted by Mrs. S. Josephson, 877-4960, Mrs. W. Mehlinger, 877-5250, and Mrs. J. Powell, 877-5647. Mrs. A. McNeil, 877-4364, will accept cancellations until noon Monday.

Sojourners Hear Judge Bloodworth

Judge James N. Bloodworth, Circuit Judge of Lawrence-Limestone-Morgan Counties, will be guest speaker Friday night at a dinner meeting of the Redstone Chapter of National Sojourners.

Judge Bloodworth's topic will be: "A funny thing happened to me the other day in court." The meeting will be held at the Redstone Officer's Club.

A University of Alabama graduate with an LLB in law, Judge Bloodworth has been active for many years in civic projects for the Decatur community.

A social hour at 6:30 p.m. will open the night's activities with dinner to follow at 7:30. Ladies are invited.

Reservations may be made by calling John Dodd at 876-6436, Maj. Neil Hopkins at 876-2724 or Lt. Stanley Tyler 876-4725.

MONDAY BRIDGE WON BY PROVOST, MRS. SAHOLSKY

The Monday Bridge Group last week had nine tables in play at the Redstone Officers Open Mess.

Winner for the men was Robert Provost, for the women, Mrs. B. A. Saholsky.

Second highs were C. McBrearty and Mrs. Donald Morgan.

Reservations to play with the group are handled by Mrs. R. U. Scott, 772-3273.

MRS. JOHNSON WINS AT BRIDGE

Thursday bridge, sponsored by the Redstone Arsenal Officers Wives Club, drew 11 tables of players last week. The group meets at the Officers Open Mess.

Mrs. C. G. Johnson was high with Mrs. Paul McDermott second and Mrs. S. W. Tyler third. Mrs. B. A. Saholsky, who won a week ago, was low during Thursday's play.

Reservations to play with the group are handled by Mrs. A. J. Matthews, 536-9958.

STUDENTS ARE GUESTS

Some 55 Japanese students at the Army Ordnance Guided Missile School here attended the Huntsville Film Forum's showing of "Throne of Blood," a movie based on Macbeth.

According to Maj. A. Q. Woodward, the Film Forum donated 20 tickets to the students. The film was recorded in Japanese with English sub titles accompanying the dialogue.

Fashion Show Planned At Post Service Club

Bridge and a spring fashion show of men's and women's clothes is planned tomorrow night at the Post Service Club.

Bridge and other card games will begin at 6:30 p.m., the show will start at 7:30 p.m.

Buddy Curry will play organ

music. A special feature will be ice skating clothes, modelled by skating pros Edith Kidd and Barbara Eldred.

Other models will be enlisted men and local feminine models.

All military personnel and their families and friends are invited.

At The Service Club

By BETTY HAYES

First on the agenda this week is the Enlisted Men's Council meeting, which begins today at 2 p.m. Come to the meeting with original ideas for future programs.

Tonight try your skill with some of our entertaining small games, at 8 p.m. Monopoly, tactics, strategy, parcheesi, cribbage, and scrabble, are only a few of the games which will be played.

Thursday evening is another game night, but this time card games will be played in the main lounge at 7:30 p.m. Who knows!! You and your partner may leave with the prize for the highest score.

Ladies' and Men's spring fashions will be modeled on Friday at 8:15 p.m. Ladies from Huntsville will show the latest spring apparel in women's clothing while several Enlisted Men will be attired in the fashionable men's wardrobe of the season.

Card games will be played prior to the show. Refreshments will be served; door prizes will be given away; and organ music will be played throughout the evening. For an evening of enjoyable entertainment don't miss the event on Friday evening.

Enjoy your favorite card game, TV program, and magazine with a hot cup of coffee on Saturday afternoon at 3:30 p.m.

Saturday evening at 8:15 p.m. the University of Alabama will present their production of "LOOSEBOUGH THE FIRST." This comedy, which is about the colonization of the moon, should bring to you lots of laughs.

Coffee and donuts will be served on Sunday morning at 9:00 a.m.

On Sunday evening at 8:00 p.m. Swinging Spring is the theme for the dance, which features the Showmen. The group promises to play some swinging numbers for

Loosebough Is Coming

"Loosebough the First," a science fiction comedy, will be presented at the Redstone Service Club April 10 at 8:15 p.m. by the University Players from the University of Alabama.

The presentation is the opening

Professional Engineers Plan Meeting Tomorrow

The Northeast Alabama Chapter of the Society of Professional Engineers will meet tomorrow at the Huntsville Industrial Center (H.I.C.) Cafeteria at 6:00 p.m.

Guest speaker will be Mr. Lewis C. Pattillo, Member of the Board of Registration for Professional Engineers and Land Surveyors, State of Alabama. He is presently with G. W. Jones & Sons, Civil Engineers, Huntsville. Pattillo is a retired Brig. General in the U.S. Army Reserves and a member of Reserve Officers Association. Mr. Pattillo will give the functions of the State Registration Board and the requirement necessary to become a registered engineer in the State of Alabama.

All members and engineers interested in becoming registered in Alabama are urged to attend. Reservations can be made by calling Bennie Shultz at 881-4588.

Let's hope that you are the winner for an evening of games on Monday at 8:00 p.m.

Would you like to try your luck on the ice? If this is true, sign up at the Service Club office for the ice skating party on Tuesday at 7:00 p.m.

Congratulations to Paul Powers, Co A, the winner of the post-wide table tennis tournament in March.

Attention Pinochle players! You won't want to miss our post-wide tournament on April 22 and 23. Sign up now for the event. See you at the Service Club.

of an April tour of major installations in the U.S. Third Army. The title role portrays a gung-ho Army Lieutenant whose unauthorized landing of a space probe vehicle on the moon kicks off all manner of national and international difficulties.

Two groups of space brides, one Russian and the other American, arrive on the scene and the discovery of moon brew adds to the comical confusion.

Author of the comedy is Joseph Baldwin, professor of speech and dramatic art, University of Nebraska.

Nike-X Radar Research Contract Let

The Nike-X Project Office at Redstone Arsenal, Ala., said Friday it had signed a \$4 million contract with the Western Electric Co., for radar research and development work in connection with its test site on Kwajalein Island in the Pacific.

Western Electric Co., is the Nike-X prime contractor. However, according to the Project, most of the work will be performed by Bell Telephone Laboratories which is responsible for Nike-X design and development and by the Sperry Gyroscope Co., a radar subcontractor.

The Nike-X system is being developed under the management of the Army's Nike-X Project Office as a defense against ICBMs and submarine launched missiles.

Col. I. O. Drewry is the Nike-X Project Manager.

The Kwajalein Test Site, located some 2,000 miles southwest of Hawaii, is used by the Project for testing of the system against target missiles as well as for study of missile flight characteristics.

Federal Career Information Centers Open

Federal agencies in the Huntsville area are sponsoring Federal Career Information Centers at Oakwood and Alabama A&M Colleges this week. The career consultation will take place at Oakwood on April 6 and at A&M on April 8.

Dr. Frank R. Albert, Chief of Equal Employment Coordination Office, of Marshall Space Flight Center, and William R. Blackard, Personnel Staffing Specialist, Army Missile Support Command, served as coordinating chairmen for the agencies.

Throughout each day students

can discuss possibilities of a federal government employment with representatives of eight agencies. Those participating include U.S. Army Missile Command; George C. Marshall Space Flight Center, NASA; Wage Hour and Public Contracts Division, Department of Labor; Internal Revenue Service, Treasury Department; U.S. Post Office Department; Soil Conservation Service, Agriculture Department; Farmer's Home Administration, Agriculture Department; Social Security Administration, Health, Education, and Welfare; and Atlanta Region Representative, U.S. Civil Service Commission and the Federal Career Information Center.

Want to put prudent, practical patriotism to work? Buy U.S. Savings Bonds where you work or bank — increase your own and your country's future security.

Ground Support Equipment Contract Goes To Martin

The Department of the Army announced Thursday the award of an \$18.6 million contract to Martin Company for improved Pershing weapon system ground support equipment.

Only \$1,957,000 was obligated by today's award. Other funds will

be authorized later.

The work will involve design, development and fabrication of prototypes of an improved programmer test station (IPTS) for the Army's highly-mobile surface-to-surface missile. It will be performed at Martin's Orlando Division in Florida over the next two-

and-a-half years.

Pershing has been in the hands of U.S. Seventh Army troops in Europe for a year. These artillery battalions use the programmer test station (PTS) to perform test, checkout and fire control functions at the firing site prior to launch. The IPTS, with a new integrated system concept, will allow a single component to perform several functions in the test and checkout operations, thus reducing the total number of components and assuring higher reliability.

The two-stage, solid-propellant Pershing can carry a nuclear warhead up to 400 nautical miles under any weather or terrain conditions. The programmer test station is one of four major units of the weapon system, all of which are mounted on tracked vehicles for overland movement. The other three units are the missile round on an erector-launcher, the warhead section and the tropospheric-scatter radio terminal communications station.

Pershing is managed from the Army Missile Command, where Col. Edwin I. Donley is Project Manager.

Preliminary work on the IPTS project was authorized by the Army last December in a limited \$2 million "letter" contract. Today's contract expands that work.

The IPTS, designed by Martin engineers, is controlled by a new digital computer and is completely automatic. The computer will be developed by the Burroughs Corporation of Paoli, Penn., under subcontract to Martin-Orlando, Pershing prime contractor.

The latest contract was negotiated and signed by the Procurement

and Production Directorate of the Missile Command, and will be administered by that agency's Orlando Branch Office under the supervision of Lt. Col. William H. Boze.

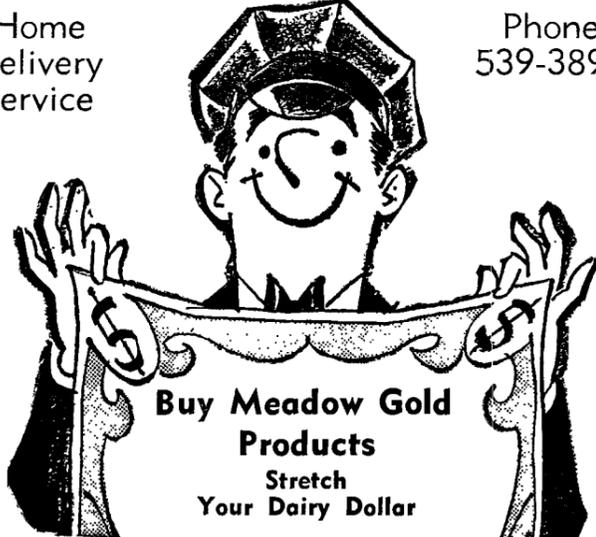

General Grant was given command of all the armies of the United States, March 9, 1864.

SONIC SPEED

When an object travels in air or other medium at the same speed as that of sound in the same medium, it has reached sonic speed; supersonic refers to the speed of an object moving at a speed greater than that of sound; hypersonic pertains to speeds faster than speed of sound. (NNS)

Hale Bros. presents . . .

SAGA By Broyhill Premier

BEAUTY . . . Disciplined to the realities of practical, every day living.

Here is a vigor of design, and simplicity that will please as much tomorrow as today. Detailing is unobtrusive, with ornamentation that serves only to accent the loveliness of the fine grained Walnut. Lines are refined, soft and gently molded. And in scaling, Saga is graceful

and light . . . appropriate to today's room sizes. Complete dustproof construction. Nylon center drawer guides. Silver drawers fully lined with Pacific cloth. And all yours for very little.

Army Aids Cancer Research

Results of investigations on internal tumors (cancers) which had been implanted within experimental animals have been described in a technical paper prepared by a surgical investigator of the National Cancer Institute assisted by laser experts from the U.S. Army Missile Command.

Dr. John Peter Minton, a surgical investigator in the Surgery Branch, National Cancer Institute, National Institute of Health, Bethesda, Md., presented the paper recently at a meeting of the Society of University Surgeons in Philadelphia, Pa.

The experiments have been performed at Redstone Arsenal, through use of a laser designed and developed in the Directorate of Research and Development of the Missile Command.

Importance of the experiments lies in the possibility that: (1) Tumor implants of the liver, which are not normally removed in standard surgery when multiple lobes are involved, could be safely destroyed through use of pulsed laser energy; (2) That pulsed laser energy may be a safe, effective surgical tool for the rapid and precise destruction of intra-abdominal tumor implants; (3) The time required to simply cut the liver over the tumor implant, expose the growth to a pulse of laser energy and then close the site was notably less than the time required to perform an excision and closure of the liver with standard surgical procedures; and (4) by utilizing accepted principles of adequate cancer surgery and the precise devitalization of multiple tumor implants by laser energy, it may be shown by future studies that it is possible to produce prolonged survival of some cancer patients.

Dr. Minton was assisted in his research and in preparation of the paper by Dr. Alfred S. Ketcham, also of the National Cancer Institute, and James R. Dearman

Arsenal Speakers Have Busy Season

Three widely scattered sections of the country will hear reports during April covering various phases of research activity presently being performed by the Missile Command.

The reports will be presented through papers prepared by scientists assigned to the Directorate of Research and Development before conferences of national professional societies.

On Friday Dr. Thomas Barr and Romas Shatas, both research physicists in the Physical Sciences Laboratory, will attend the Alabama Academy of Science which will convene at Florence State College.

Dr. Tin Boo Yee, a chemist assigned to the Propulsion Laboratory, will attend the national meeting of the American Chemical Society in Detroit, Michigan next week.

John McDaniel is one of five nationally known scientists who will present papers to the annual meeting of the Missiles and Astronautics Division of the American Ordnance Association at China Lake, Cal., Apr. 8.

The presentation by the Deputy R & D Director will deal with "Experimental Techniques for Testing Tactical Weapons."

COMBAT READY

Mission of the U.S. Army Air Defense Command is to provide combat-ready Army forces to the commander-in-chief, NORAD, for air defense of critical locations. USARADCOM's contribution includes surface-to-air missile units which shield major target centers. (NNS)

of infrared laser radiation.

The continuing research program is conducted under the principles of laboratory animal care promulgated by the National Society for Medical Research.

A graduate of Ohio State University, Dr. Minton is a commissioned officer serving in the U.S. Public Health Service. Dr. Ketcham is Chief of the Surgery Branch, National Cancer Institute.

The close association between the Army Missile Command and National Cancer Institute dates back to 1963 when the experiments first began. Since that time, between 800 and 1000 animals have been used in the research program. Experiments have been conducted on an average of every six weeks.

and William B. McKnight of the Applied Physics Branch of the Missile Command's Electromagnetics Laboratory.

In earlier experiments announced last year, the same team of researchers had confirmed that certain external malignant tumors in mice could be destroyed by the use

Project Flat Top Is New Logistics Concept

A unique concept of logistics back-up for the new breed of American soldier in the field is being explored by the Army, and the Missile Command at Redstone Arsenal is taking part.

Tagged Project Flat-Top, it calls for the conversion of a Navy seaplane tender to a floating maintenance facility to support operating helicopters. The project was started in 1962 by the Army Materiel Command and the ship is expected to be in operation by January 1966.

Last year, the Missile Command was assigned the mission of developing a system for storage and retrieval of technical information about the Whirlybirds, and quickly disseminating it to the 32 repair shops aboard the ship. The Department of Defense and International Standardization Office of the Procurement and Production Directorate has overall responsibility for this mission, which Roland L. Guard heads.

Space aboard the ship is greatly limited, even though the tender is 500 feet long, and more than 1.2 million documents must be stored in the Technical Data Library. To meet this problem, the documents, which include 2,500 250-page manuals and 500,000 drawings will be microfilmed. This job is to be completed by October 1, 1965.

Once the information is stored in the library, there's the matter of getting it to the 32 different machine shops located on five decks of the ship when it is needed. Closed-circuit TV, facsimile transmitters and receivers, and an intercom system will be used for this.

Brown Engineering Company of Huntsville, Ala., has a \$355,906 contract to provide services in setting up the technical data system for Project Flat-Top.

Here's an example of how the data system will work: Flat-Top is at sea off a coast where Army helicopters are flying missions. A helicopter needing repairs has come in from the front lines, and a technician in the aviation engine shop needs a particular engineering drawing in a hurry. He gets on the intercom and calls the library. The microfilm of the coded document is retrieved automatically from the file and put in front of a closed-circuit TV camera.

Back in the aviation engine shop, the technician sees the drawing on a TV monitor. If he decides that it would be better if he had a copy, the clerk in the library places the microfilmed drawing in a scanner. Within a matter of minutes, the technician can tear off the hard copy from a facsimile recorder in his shop area.

The communications setup will allow radio facsimile transmission between Corpus Christi, Texas, where the Project Flat-Top Office is located at the Army Aeronauti-

cal Depot Maintenance Center, and the ship anywhere on the high seas.

The Missile Command's other job in connection with Project Flat-Top is one which it already is doing, but not aboard a ship—support of the XM-3 armament subsystem which mounts 2.75 inch rockets on the UH-1B helicopter now flying missions overseas. The

Supply and Maintenance Directorate is responsible for this mission, and Robert W. Emrick is in charge of it on Flat-Top.

Other armament systems managed from Redstone may be considered later for the project.

The ship, which is being modified at the Naval Shipyard in Charleston, S.C., is the U.S.S. ALBERMARLE (AV-5). She was in

mothballs from 1960 to 1963, when picked for Project Flat-Top. The ex-Navy vessel is being equipped with a flight deck much like one found on an aircraft carrier. After landing under their own power or being ferried to the ship, helicopters will be taken below the flight deck on an elevator for maintenance work by the various

shops.

Flat-Top will be manned by Military Sea Transportation Service civilian personnel, who will perform all duties connected with running the ship. The helicopter maintenance work will be done by Army Personnel of the 1st. Aircraft Maintenance Battalion (Depot) (Seaborne).

German Graduates Hear Gen. Fischer

Brig. Gen. Kurt H. Fischer, director of German Air Force missile units, addressed 300 German missile students at the U.S. Army Ordnance Guided Missile School Friday.

Fischer was the first German officer to be graduated from the Artillery Officers Advanced Course at the Army Air Defense Center at Fort Bliss, Tex.

The visitor spent all day Friday inspecting training facilities in the Department of Individual Training and observed four German Air Force units in training in the Department of Unit Training. He also visited classrooms, laboratories and outdoor training sites of the Hawk, Nike-Hercules and Pershing missiles.

Fischer told the 300 men that he was very impressed with the work they are doing here and he reminded them that, as missile men, they have a responsibility which involves the defense of the entire free world.

Services Cost \$1.1 Million In February

Huntsville business concerns again received the largest share of the Army Missile Command's \$1.1 million worth of awards going to the Southeast during February. The \$761,600 spent in Huntsville was for goods and services and some items related to the missile. The largest awards placed were to cover renewal of business ma-

chines. Many smaller, local purchases totaled less than \$10 each. Most of the larger awards negotiated by the Procurement and Production Directorate at the Missile Command went to firms outside the Southeast for missile hardware and the mission related items. The service-type contracts such as business machine rental, office supplies, books, groceries, and repairs are handled by the Purchasing and Contracting Division of the Army Missile Support Command.

None of the awards mentioned here are those for a million dollars or more which are buys of Army missile and rocket weapons and related equipment.

Approximately \$3 million went to companies outside the Southeast. In Alabama, awards totaling more than \$100,000 were placed in Birmingham, and Tennessee and Georgia companies received approximately \$200,000.

IMPORTANT DATE TO REMEMBER—May 1 is the start of "Star-Spangled Security Month" for U.S. Savings Bonds. Sign up to buy an extra bond.

Welcome Mat

The ROCKET extends a welcome to the following named civilian employees who have recently accepted positions with the Army at Redstone Arsenal.

ARMY MISSILE COMMAND
Procurement and Production: Louise H. Bostic, Nancy C. Cox, William R. Faust, Robert D. Ford, Patricia A. Freeman, Robert C. Greene, Jeanne T. Harley, James A. Kennedy, Peggy E. Massey, Margaret E. Melton, Mary J. Merrill, Genevieve B. Redpath, Carolyn A. Spray and Helena B. Ttate.
Supply & Maintenance: Kenneth R. Beam, Jerry C. Brasher, Hazel E. Hafer, Madeline J. Raifsnider, Jessie G. Roden and Patricia A. Rotz.

Others: Grace G. Morgan, Land Combat Systems; and Lybia H. Starkey, and Sarah L. Thomas, Shillelagh Project Office.

ANTICIPATE EASTER SUNRISE—Easter morning thousands are anticipated at the Easter Sunrise Service to be conducted jointly by Huntsville ministers and the Post Chaplain. Beside one of the three crosses on the hill behind the Post Chapel are: Lauren Andrist, daughter of Chaplain and Mrs. R. L. Andrist, Joe and Scott Kirkland, sons of Chaplain and Mrs. J. P. Kirkland, Jr. Sunrise services on post are a well-established tradition in the Huntsville-Madison County community.

Pre-Easter Services Are Scheduled By Chaplains

Chapel services during Holy Week have been announced by Chaplain (Lt. Col.) Donald Carter.

The Protestant staff is planning Communion on Thursday and will present the "seven last words" between 1 and 3 p.m. on Friday.

Chaplain Carter will open the services with (1) "Father Forgive them for they know not what they do" and (2) "Today they shall be with me in Paradise."

He will be followed by Chaplain (Capt.) Richard L. Andrist with (3) "Woman behold thy son and son Behold thy mother" and (4) "My God, my God! Why hast thou forsaken me?"

The third chaplain will be Maj. John R. Kirkland with the words (5) "I thirst." and (6) "It is finished!"

Chaplain Carter will conduct the final section of the service around

(7) "Father into Thy hands I commend my spirit."

Chaplain (Capt.) George C. Kahl will conduct services at Redstone Park at 7:30 p.m. both Thursday and Friday.

The religious observance will be climaxed with a Sunrise Service behind the Post Chapel at 6 a.m. Easter morning. The Huntsville Ministerial Association and the Post Chaplain are sponsors.

Catholic personnel will hold an extra Mass at 5 p.m. weekdays during the last two weeks of Lent, according to Chaplain (Maj.) John Condon.

Maundy Thursday Evening Mass and observance of the Last Supper will be at 5 p.m.

Good Friday Services will be at 7:30 p.m. with Holy Communion distributed at this service. Confessions will be heard immediately following the service.

Saturday at 11 p.m. Easter Vigil Services and Mass will be celebrated. Confessions will be heard Saturday between 6-8 p.m.

Civil Service Board Has Openings In Three Areas

The U. S. Board of Civil Service Examiners has issued three announcements for openings and an amendment to close a position classification.

AT-35-5(65) calls for industrial equipment mechanics with salaries ranging from \$2.56 an hour to \$3.07 an hour.

AT-35-6(65) is an examination of PBX equipment installer and repairer at \$2.91 an hour, and for telephone installer and repairer with salaries ranging from \$2.05 and hour to \$2.74 an hour.

AT-35-7(35) is for central office telephone installer and repairer at \$2.95 an hour to \$3.07 an hour.

The amendment is to announcement AT-35-6(62) for equipment specialist general with a salary range of GS-5 to GS-11 (\$5000-\$8650 a year).

C.I.T. knows that you don't enjoy borrowing money.

(That's why we give you such fast service.)

Don't ever think we're rushing you through when you stop in at C.I.T. for a loan to pay bills . . . to travel . . . or meet personal problems. The reason you'll find us handling your application so fast is this: We've learned that people don't come to us when they need sympathy. They come to us when they need money. So expect speedy money service when you come to see us about your loan. (There are over 400 C.I.T. offices from coast to coast where you'll get the same zippy service.)

MIRACLE WORKER

Fantasy Playhouse Children's Theatre will present "The Miracle Worker" the story of Helen Keller. Micki Knowe will be the young Helen Keller; Jo Linger portrays Annie Sullivan, Helen's patient and understanding teacher; Tom Melton and Florence Goodrich, her parents and John Purdy, the brother James, An excerpt won acclaim at the Alabama Theatre Conference last February. Tickets are on sale at the temporary Arts Center, date April 16-17 at Lee High School.

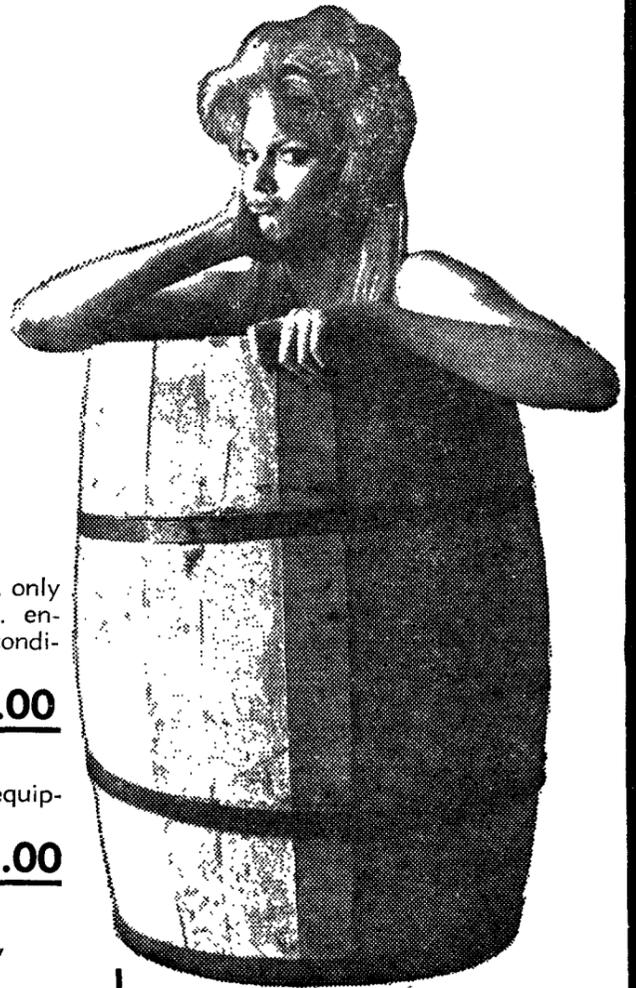

BOOM

Sonic boom is an explosion-like sound heard when a shock wave generated by an aircraft flying at supersonic speed reaches the ear.

RETIREES—Maj. H. T. E. Tolley, a native of Birmingham, retired Mar. 31 after 20 years of Army Service. At Redstone since August, 1963, the Major has had a variety of assignments including Chief, Liaison and Maintenance Support Branch of the Systems Support Division for the Sergeant Project. Among his papers at the retirement ceremony was the award of the Army Commendation Ribbon for outstanding service during his assignment here. Maj. and Mrs. Tolley plan to remain in Huntsville.
