NOVEMBER 9, 1966

REDSTONE ARSENAL, HUNTSVILLE, ALABAMA

VOL. XV; NO. 26

Golden Knights, Thunderbirds To Demonstrate

36,000 Spectators May See Precision Air Show

WASHINGTON VISITORS GET COMMAND BRIEFING—Maj. Gen. John G. Zierdt, Commanding General of the Army Missile Command, passes on a few words about Army missiles to Russell D. O'Neal, Assistant Secretary for Research and Development, Department of the Army. Looking on from the left are Maj. Gen. Kenneth H. Bayer, Director of Development, Army Materiel Command, and Maj. Gen. William C. Gribble, Jr., the Secretary's Deputy. The visitors were at Redstone Arsenal Monday and Tuesday to receive briefings on air defense and land combat missiles, Missile Intelligence and Research and Development Directorates.

The largest crowd in North Alabama history is expected to assemble at Huntsville's new jetport on Sunday afternoon, when the city's Kiwanis Clubs will present performances by the Army's Golden Knight free-fall parachute team and the Air Force Thunderbirds precision jet flying group.

Upwards of 36,000 persons are expected to view the military double header that will be staged for the benefit of youth welfare activities sponsored by the Metropolitan and Huntsville Kiwanis Clubs.

Col. Erwin M. Graham, commandant of the Army Missile & Munitions Center & School, heads the Kiwanis committee for the event, and he is being assisted by elements of the Army Missile Command and more than 600 individuals and organizations of the Tennessee Valley area.

Arrangements are being made for some 12,000 automobiles to park along the runways and taxi

strips of the new jetport near Madison, to view the daring performances by the stellar Army and Air Force teams, Col. Graham said. A parking fee of \$1 per automobile will be charged, and members of the Kiwanis-sponsored Key Clubs of Butler, Huntsville and Lee High Schools and local Boy Scouts and Boys Club members will serve as ushers and concession stand operators for the event.

All access to the jetport area is from Highway 20 and Triana Road at entrances designated by Alabama State Highway Patrol and Huntsville Police Department.

Urging spectators to be in place by 1 p.m., Col. Graham said the Alabama Air National Guard will open the event with a mass fly-by of jet and propeller-driven aircraft.

The bands of Butler, Huntsville and Lee High Schools of this city will be joined by those from Athens and Decatur High Schools for music throughout the event.

A 30-minute performance by the six Super Sabre jets of the Air Force Thunderbirds is scheduled to begin at 2 p.m. Capt. Henry D. Canterbury, a native of Huntsville, is one of the six pilots who will fly their craft through a series of intricate precision maneuvers ranging from 50 to 15,000 feet above the jet port. At times, the wings of the aircraft overlap by three feet and the planes are only five feet apart at speeds approaching that of sound.

This will be the first local performance of the famous Thunderbird aggregation which was formed as a squadron of the Tactical Air Command in 1953 and has since staged some 500 shows for more than 60,000,000 persons in 45 nations.

The Army Golden Knights will begin their daring demonstration at about 2:30 p.m.

Their group from the Continental Army's Special Warfare Center at Fort Bragg, N. C., will perform a series of aerobatic maneuvers that have won it world champions that have won it world champions that have won it world champions (See KNIGHTS on Page 3)

Secretary Visits Redstone

Briefings on Army Missile Command missions highlighted a two-day visit to Redstone Arsenal this week by Dr. Russell D. O'Neal, new Assistant Secretary of the Army for Research and Development.

Among those accompanying him were his deputy, Maj. Gen. William C. Gribble, Jr., and Maj. Gen. Kenneth H. Bayer, Director of Development, Army Materiel Command.

(See SECRETARY on Page 3)

Aircraft Armaments Study Group Meets Here Today

Nearly 200 government and industrial representatives who are conducting research and development efforts on aircraft armaments have convened here at the U.S. Army Missile Command.

Maj. Gen. John G. Zierdt, Commanding General of the Missile Command, launched the two-day classified affair by welcoming the group this morning at Rocket Auditorium.

Attendees, all members of the newly organized Missiles and Rocket Section, Air Armament Division, of the American Ordnance Association, have scheduled a banquet for 7:15 tonight at the Carriage Inn. Guest speaker will

be Lt. Col. Paul Marriott, Air Force Systems Command, Eglin Air Force Base, Florida.

During today's activities several technical papers were to be presented on current and future rocket and missile programs, the Army said. Weapon systems discussed included the Huey Cobra, Advanced Aerial Fire Support System (AAFSS), XM-26 (the Airborne TOW) the 2.75-inch rocket and the Hornet.

The Huey Cobra is a streamlined version of the UH-1B, which is now being employed as an armed helicopter in Vietnam. AAFSS will be the Army's most advanced (See ARMAMENTS on Page 3)

Display Area To Be Closed Nov. 11-13

The U. S. Army Missile Display Area, located just off Patton Road near the Bob Wallace Avenue intersection, will be closed to the public on Friday, Nov. 11, and Sunday November 13.

The Missile Display Area is normally open to the public daily from 10 a.m. to 5 p.m., Sundays from 1 to 5 p.m., closed on Monday.

The Display Area is designed to tell the story of U. S. Missions assigned to Redstone Arsenal and has proved to be a popular tourist attraction. Admission is without charge.

Culbert Cited For Job Well Done In Vietnam

A man with a high regard for the cheerful willingness of the GI serving his obligation tour of duty in Vietnam was awarded a Certificate of Achievement from Saigon. The citation was for the "meritorious" manner in which he helped set up a storage depot at Cam Rahn Bay.

He is Talmage E. Culbert who recently returned to the Consolidated Supply Division of the Support Operations Directorate, U. S. Army Missile Command, after a six months tour of service in Vietnam.

Maj. Gen. John G. Zierdt, Commanding General of the Missile Command, presented the certificate to Culbert, expressing his own appreciation for a job well done.

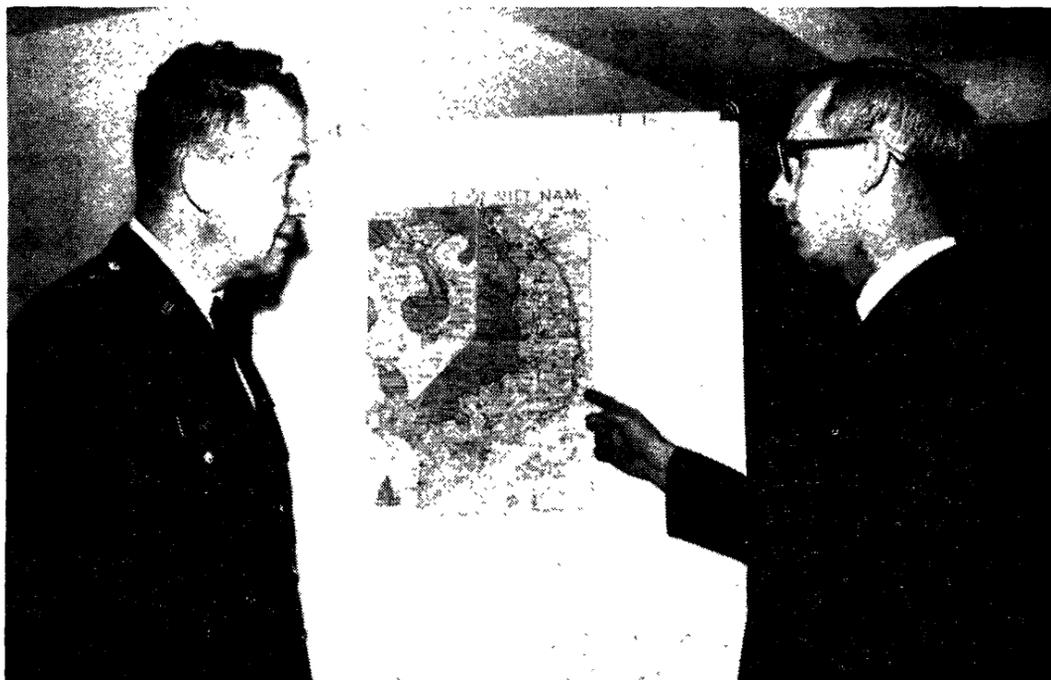

Culbert was a member of the Marine Corps during World War II. A Marshall County native, he and his family live in Guntersville and except for his six month tour in Vietnam, Culbert has worked in supply at Redstone Arsenal since

1951. Much of the time he was an inspector.

He is now the receiving officer for the Department of the Army here.

He said that he reached his decision to work near the battle front when he looked at his children Linda, 15, Laura, 13, and Keith, 11, and thought of the possibility of the spread of communist doctrine. He said he offered his services because he wanted to stop the spread of Communism and was willing to use whatever talents he has to help.

Culbert found conditions under which the seven civilians and the 504th Army Depot soldiers lived to be less than ideal. When he arrived there were no roads, no paved surfaces for storage and equipment, no warehouse, no unloading dock. In fact, he said, he could probably explain more easily what the men didn't lack. Their shelter from the 130 degree heat (See VIETNAM on Page 3)

THAT'S THE SPOT—Talmage E. Culbert, right, points to Cam Rahn Bay on the map of Vietnam, showing Maj. Gen. John G. Zierdt where he worked for six months to help set up an Army supply depot. Culbert's usual duty station is in the Receiving Section of the Redstone Arsenal Support Operations Directorate's Consolidated Supply. Culbert was presented a Certificate of Achievement from the Saigon Command by Gen. Zierdt during the meeting.

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the Information Office, Army Missile Command, Redstone Arsenal, Ala., Bldg. 5250, Room A-136, Extension 876-1430 or 876-1500.

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, Huntsville, Ala., P. O. Box 346, telephone 534-4701, as representative of the publisher. Advertising deadline: both display and wanted—is noon of Friday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$6.36 a year, or \$3.50 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala.

Rocket Ruminations

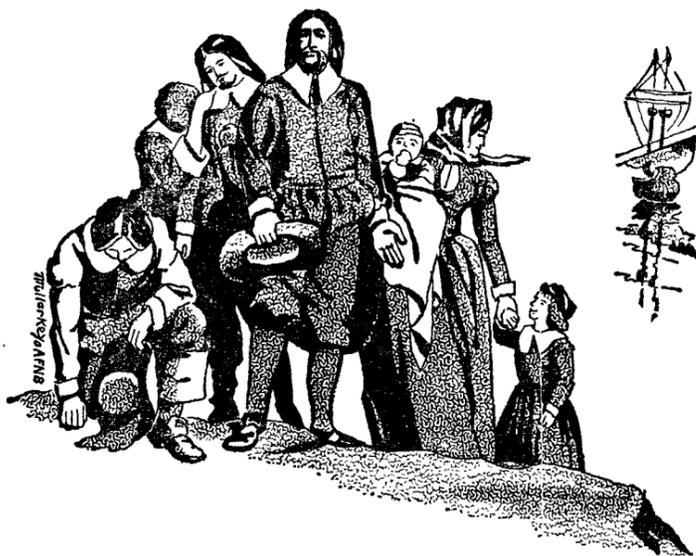

He has achieved success who has lived well, laughed often and loved much.

—Bessie Anderson

Count Your Blessings

Do Americans place too much emphasis on Thanksgiving Day? We think not. Americans traditionally observe this holiday for a number of reasons—and very good ones. They have many things to be thankful for.

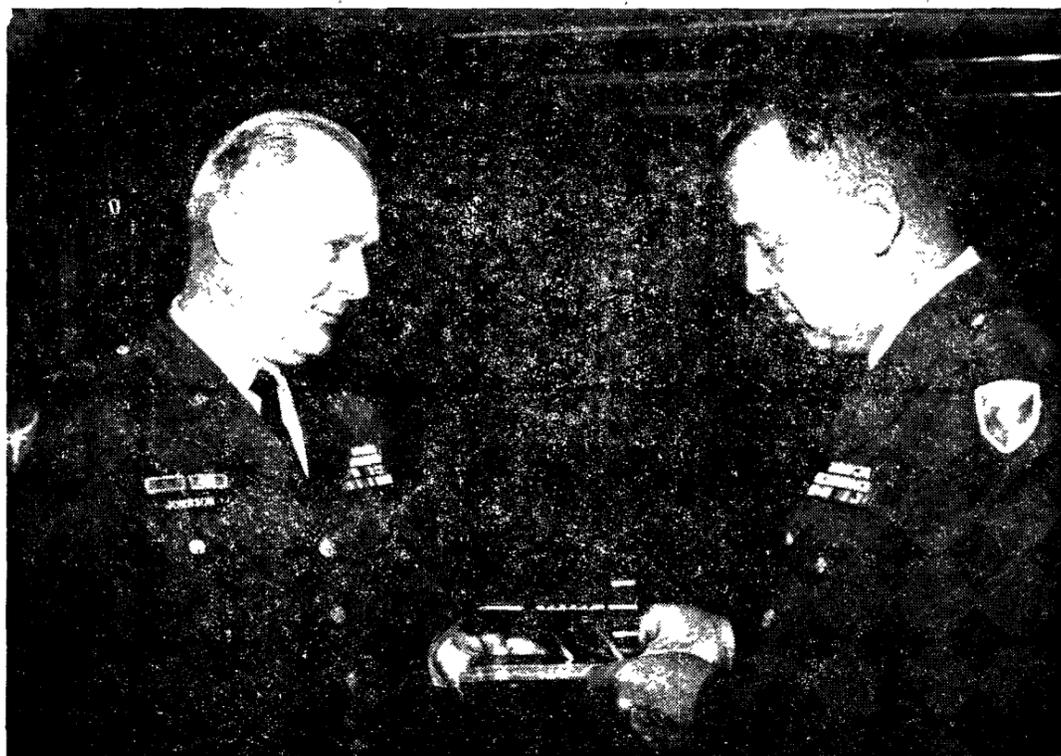

Among these are modern housing, sleek cars, television sets, a wonderland of household appliances and

comforts. We are thankful for these blessings and the free competitive society that puts such miracles within our reach.

But there is more. Our heritage is really our wealth. We give thanks not alone for the good life but for our way of life—a free society. Millions of people on earth do not have these blessings. We wish freedom for all people. That is why we sometimes have to fight to preserve freedom in far-off lands. So, we don't think Thanksgiving Day is overstressed. We are merely registering thanks for our bountiful blessings. Our forefathers first gave thanks for their good fortune at Plymouth, Mass., in 1621. We are still doing it today in a prosperous thriving United States of America that is free.

Enjoy that turkey and all the trimmings, but count your blessings—they are many. (AFNB.)

ADMIRING THE MAW—Maj. Gen. John G. Zierdt, (right) Commanding General of the Army Missile Command, shows a model of the MAW to visiting Maj. Gen. Chester L. Johnson, the Army Deputy Assistant Chief of Staff for Intelligence and Deputy for Foreign Intelligence and Security, Washington, D. C. The MAW is the first Army guided missile system that is light enough to be carried and fired by one man, but having a warhead powerful enough to defeat armor and other infantry targets. Gen. Johnson was at the Missile Command last week where he received briefings presented by personnel of the Command's Missile Intelligence Directorate.

IEEE To Hear MAW Development Dr. MacGuire Contract Awarded

Dr. Hugh C. MacGuire, surgeon and president of Atomedic Research Center at Montgomery will talk to the Institute of Electrical and Electronic Engineers at 8 p.m. Nov. 9 at the Redstone Officers Open Mess.

Dr. MacGuire will discuss "A Philosophy of Medical Electronics", outlining the advances of electronics as applied to medicine and hospitals.

The meeting will be open to nonmembers of IEEE who are interested. Lewis M. Ewing, 883-3661, is handling dinner reservations and can supply information to anyone interested in hearing Dr. MacGuire.

Drive Safely

A \$750,000 U. S. Army contract has been awarded to the McDonnell Company to support work being done on the Medium Anti-tank Assault Weapon System (MAW).

Under the contract, McDonnell will provide for the development of manufacturing methods and technology on two gyroscope designs, delivery of hardware and tooling documentation.

Work will be done at the company's facility at Titusville, Florida.

MAW is the Army's first anti-tank guided missile system light enough to be carried by one man and fired from the shoulder. It weighs about 27 pounds.

The MAW program is managed by the U. S. Army Missile Com-

mand at Redstone Arsenal, Ala. Lt. Col. John H. Boyes is Project Manager. McDonnell Company is prime contractor.

Negotiating the contract for the Army was Systems Contracts, Division B, of the Missile Command's Procurement and Production Directorate, headed by Col. E. J. McGinnis.

KOREAN VISITORS AT REDSTONE—Two general officers of the South Korean Army were at Redstone Arsenal two days last week for a tour of Army facilities and briefing on research and development activity at the U. S. Army Missile Command. From left to right are Brig. Gen. In Kwon Kwang, Director, Military Assistance Program, Deputy Chief of Staff (Logistics), Republic of Korea Army and Brig Gen. Ja Yoll Chun, Assistant Chief of Staff (Supply), Second Republic of Korea Army.

National Geographic Man To Talk About Photography

Dean Conger, well-known staff photographer for the National Geographic Society, will be the guest speaker at the Huntsville Electric Auditorium at 8:00 p.m. Tuesday. Conger will relate his experiences in photographing many parts of the world.

The program is being presented under the sponsorship of the Huntsville chapter of the Society of Motion Picture and Television Engineers. The lecture is open to the public.

Conger's program will be of an informative rather than a technical nature. He is expected to report on his photographic experiences in the Middle East and Europe. He will include slides from one of his most recent assignments in the Soviet Union. This was featured in the March 1966 issue of National Geographic.

A graduate of the University of Wyoming, Conger was staff photo-

grapher on the Denver Post for nine years. In 1952, he won the National Newspaper Photographer of the Year Award. That same year he joined the staff of National Geographic where he has achieved international recognition for his work. In 1962, he was named Magazine Photographer of the Year. He now makes his home in Bethesda, Md.

KNIGHTS

(Continued From Page 1)

pionships and contributed to precision parachute operations in Viet Nam and elsewhere.

Concentrating on controlling their jumps into three circles in the middle of the jetport, the Golden Knights will feature one-man cutaway jumps in which the jumper begins a free-fall from a plane at 13,500 feet, opens a parachute for a descent of 2,500 feet, cuts his parachute away, free-falls again to about 1,800 feet then opens another parachute to effect a landing on target.

A picturesque formation finds several Golden Knights free-falling and criss-crossing in the air before they open their chutes.

The Knights also stage a "baton jump" in which free-falling parachutists maneuver to pass a baton from one to another's hands before parachuting into their target circle.

Both the Thunderbirds and Golden Knights use special devices to help spectators follow their precision feats. The aircraft of the Thunderbirds stream smoke trails at times during climbs, dives and rolls. The Knights also use smoke indicators and strips of black and gold crepe paper to mark their positions.

Both the Thunderbirds and the Golden Knights will use the Redstone Arsenal Army Air Field as their base of operations over the Huntsville-Madison County Jetport which is about five miles away and is to open officially early next year.

The Kiwanis Clubs will be hosts to the Air Force and Army teams at a reception after their arrival in Huntsville on Sat. afternoon.

MARS SPACECRAFT CONTRACT under negotiations with Honeywell Co. for design, fabrication and testing of attitude control and scan control subsystems for two mariner spacecraft scheduled for launch to Mars in 1969, according to NASA. Mariners will make fly-by trajectories to investigate Martian atmosphere, photograph surface and gather data for design of capsules to be landed on planet. (AFNB)

SECRETARY

(Continued From Page 1)

Following a welcome by Maj. Gen. John G. Zierdt, Commanding General of the Missile Command, the visitors received detailed briefings on air defense and land combat missile systems and on the Missile Intelligence Directorate.

Tuesday morning was devoted to briefings and tours through laboratories of the Research and Development Directorate.

Others in the party were Charles R. Woodside, Assistant for Programs, Col. Michael J. Strok, Executive and Assistant for Air Mobility, Col. Dale Denman, Assistant for Guided Missiles, and Lt. Col. Harold W. Horne, all in Dr. O'Neal's office.

VIETNAM

(Continued From Page 1)

was a floorless tent. The floor came when crates were unpacked and the lumber became available for flooring. When he arrived at Cam Rahn Bay in February the temperature was only soaring around 95 degrees, a comfortable temperature to Culbert who likes hot weather. The humidity was something else.

"The soldiers were just wonderful," Culbert said. "Most of them were reserves serving near or on the battle lines. Their morale was extremely high and they never thought about hours. They worked in any kind of weather without a grumble or complaint about the rains or whether it was day or night.

"Morale was good most of the time," he said. His own grew a little panicky. All three of his children had birthdays while he was gone and there was nothing to buy at the station at Cam Rahn Bay. He used ingenuity in finding trinkets to send home.

When the work was complete at the Cam Rahn Bay Depot; the seven rejoined the two teammates permanently stationed in Saigon for two weeks before being rotated to their home stations.

Culbert's summation: "I'm glad to be home."

Top Level Japanese Team Visits

Lt. Gen. Kanetoshi Mashita of the Japan Defense Agency led a four man orientation group Monday in a one-day visit to Army elements at Redstone Arsenal.

Touring both the Army Missile Command and the Missile and Munitions Center and School, the visitors were briefed on instruction facilities for Hawk training and research and development activities.

Welcoming them to Redstone was Brig. Gen. Clarence C. Harvey, Jr., Deputy Commanding General for Air Defense Systems.

Included in Gen. Mashita's party were Maj. Gen. Toshio Yamauchi, Chief, Finance Section, Ground Staff Office; Maj. Gen. Fujio Shimoda, Chief, Infantry Department, Fuji Combined Arms School; and Col. Itsuo Ayabe, Chief, Aviation Section, Ground Staff Office, Japan Defense Agency.

University Plans Faculty Art Show

The opening of a Faculty Art Show will be held from 7 p.m. till 10 p.m., Monday, in the lobby of the Research Institute located on the UAH Campus on Sparkman Drive. The exhibit, open to the public, will include a selection of brayer prints by Richard Pope and numerous works in sculpture and drawings by Mrs. Barbara Tapia.

Both Pope, assistant professor of art, and Mrs. Tapia, a sculpture instructor, joined the UAH faculty this year.

The exhibit will be open from 8 a.m. till 8 p.m. through Friday, Nov. 18.

Pope studied advanced design at the Art Academy of Cincinnati and is a specialist in graphic design and advertising arts. Several of his works are in various private collections. He has exhibited in numerous regional shows and in several two-man shows in conjunction with his wife, Mrs. Mary Ann Pope, also a professional artist, who is presently teaching painting at the Art League. Prior to joining the UAH faculty, Pope served as Art Director of an advertising agency in Louisville, Kentucky for nine years.

Mrs. Tapia, the only woman to

Garden Club Getting Ready For Christmas Decorating

The Redstone Officers Wives Garden Club will have a program on Christmas decorations at their meeting from 9:30 a.m. until noon next Tuesday at the Redstone Officers Open Mess. Mrs. John Collier will present the program.

On Monday, Nov. 21, the group will meet from 9:30 to 11:30 a.m. in the Officers Open Mess for a workshop on making Christmas decorations.

No reservations are necessary to attend either meeting.

For further information, call Mrs. T. L. Richards, 877-5767.

receive an MA in Art Sculpture from the University of Alabama, has worked in wood and stone carvings, plaster, and sand mold casting, but sculpture is her speciality. She has exhibited her works, which are non-objective, several times at the Birmingham Festival of Arts and was awarded second prize at one of these. She also won second prize at the National Oil Painting Exhibit in Jackson, Mississippi. Her works have been shown at the Jewish Cultural Center in Birmingham and in Pensacola, Florida.

SNOW IS NOT FOR BIRDS—Pretty Geraldine Crabtree, a secretary at the Army Missile & Munitions Center & School, performs some unusual missile Maintenance. Here Geraldine does her part to keep the MMCS "birds" ready to fly by removing some of the unneeded covering following the recent record-breaking early snowfall in Dixie.

Mrs. Brown Wins Thursday Bridge

Seven tables of players competed at bridge Thursday under the sponsorship of the Redstone Arsenal Officers Wives Club. The Group meets each Thursday morning at the Officers Open Mess and is open to all members of the Wives Club in good standing.

Winners were Mrs. Clark Brown, high; Mrs. Charles McBrearty, second and Mrs. Edna Richardson, third. Mrs. Robert Newell held low cards.

Reservations to play with the group are handled by Mrs. Walter Thomas, 881-8851.

TECH ALUMNI TO MEET

The North Alabama Chapter of the Tennessee Tech Alumni Association will meet at the King's Inn Nov. 11, at 6:30 p.m. The guest speaker will be Sid Hatfield, baseball coach and assistant basketball coach at Tech.

The chapter officers for next year will be elected at this meeting. All former students of Tennessee Tech are invited to attend the meeting. Anyone desiring to attend should send their reservation together with a check for \$2.60 (for meal, tax and tip) to Mr. Don Marion, 312 Spring Valley Court, Huntsville or Bert Perry, 205 Meadow Drive, Madison.

GIRL SCOUT COUNCIL

The second Annual Council Meeting of the Girl Scouts of North Alabama will be held Tuesday, at the Holiday Inn Motel, Decatur. Registration for delegates will begin at 10:45 a.m. Mrs. H. B. Norwood, of Decatur, Council President, will conduct the business meeting which begins at 11:00 o'clock. 250 delegates, alternates, officers, board members and service unit personnel are expected to attend.

People Attend Procurement Fair Despite Ice, Snow

Adverse weather conditions on Wednesday did not discourage contractors from attending the third Army Missile Command Procurement Fair at Redstone Arsenal.

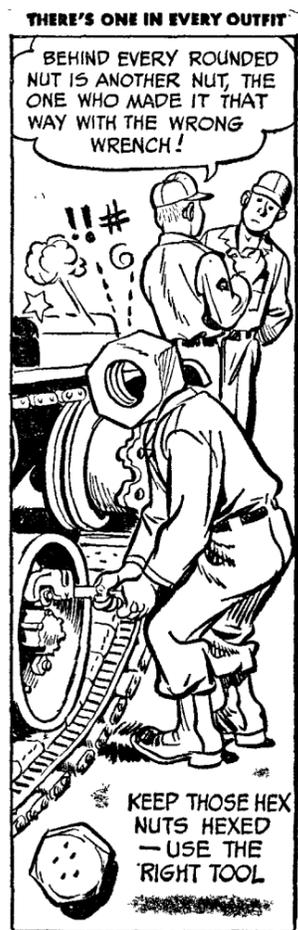

Missile Command Procurement and Production officials said that 106 contractors' representatives from 84 companies in 12 states had registered before noon.

The Fairs are open from 8:30 a.m. until 4 p.m., and are held the first and third Wednesday each month on the Arsenal. Industrialists interested in doing business with the Army are invited to attend and learn of current requirements for Army missile components.

The contractors can take home those on which their companies wish to submit bids or proposals.

MONDAY BRIDGE

Monday night bridge was won by CWO and Mrs. Andrew Garbrant last week and by Mrs. J. Ray and Lella Mullins the week before. Six tables were in play.

OPERATION WE CARE—Employees may participate in the person to person project with members of Huntsville's adopted 93rd Evacuation Hospital. Through this week the Chrysler Women's Club in cooperation with the Post Office are wrapping and mailing packages to the hospital in Viet Nam at The Mall on North Parkway. Ladies who help serve seated left to right are Mrs. Tony Rock and Mrs. R. Ellis. John W. Houtz, Chairman, Operation We Care is seated with them. Standing left to right are R. R. Mosser and D. Pillsbury, President of Chrysler Women's Club.

Gudaitis Moves To New Job In Electromagnetics

The Research and Development Directorate of the Army Missile Command has announced the appointment of William V. Gudaitis as acting deputy director of its Electromagnetics Laboratory.

Before moving to this position last week, Gudaitis was deputy director of the Army Inertial Guidance and Control Laboratory, another of the eight laboratories in the Directorate. He replaces Robert C. Haraway who is heading a task group engaged in advanced radar research in the Electromagnetics Laboratory.

No one has been named yet to fill the post Gudaitis vacated.

He has worked for the Army since 1960, and during the last year was a participant in the Alfred P. Sloan Fellowship program at the Massachusetts Institute of Technology. This program is an intensive one-year study of management which leads to a master's degree in industrial engineering.

Gudaitis did his undergraduate work at the University of Detroit where he received a B. S. degree in Physics, and has done graduate work in Physics at Harvard and M. I. T.

He is a native of Pittston, Pa. Before coming with the Army he was employed by the Chrysler Corporation Missile Division in Huntsville. For more than seven years he worked closely with the Army Ballistic Missile Agency here in the development of the Redstone and Jupiter missile systems while heading the Control Design Department of Chrysler.

The new deputy director is married to the former Miss Helen Yancianas of Brockton, Mass., and the couple are the parents of eight children.

WILLIAM V. GUDAITIS

Job Openings Announced In This Area

The Interagency Board of U. S. Civil Service Examiners for South Georgia announced today an examination to fill Managerial, Administrative, Staff Services and Technical Services positions, GS-9 through GS-12, in Federal agencies in the States of Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, and Fort Campbell, Kentucky. These positions have a starting range in salary from \$7696 per year to \$10,927 per year.

The announcement covers such fields as Personnel Management, Budgeting, Employee Development, Public Information, Program Planning, Education, Digital Computer Systems Analyst, Realty Officer, Loan Specialist, Industrial Specialist, Labor Relations, Administrative Assistant, Commu-

nications Management, and Transportation.

Information concerning qualification requirements, how to apply, location of positions, etc., may be obtained from the examination announcement (number AG-6-02). Application forms and copies of the announcement are available from the Civil Service Examiners at any Post Office. Application forms may also be obtained from the Interagency Board of U. S. Civil Service Examiners for North Alabama, 806 Governors Drive, S. W., Huntsville, Alabama. 35801

Learn to SPEAK EFFECTIVELY

LOWELL THOMAS wrote, "Ability to speak is a short cut to distinction. It puts a man in the limelight. It raises him head and shoulders above the crowd."

No matter how much you may now fear to speak before groups, you can become a poised and effective speaker in just 14 weeks. You can learn how to give a speech of introduction, an impromptu speech, a prepared speech, a "magic formula" talk.

Develop your LEADERSHIP ABILITY

JOHN D. ROCKEFELLER said, "I will pay more for the ability to handle people than for any other ability under the sun."

You can learn how to get other people to cooperate with you gladly, how to use a tested time-saving plan in dealing with group or personal problems, how to lead a conference, how to win people over to your way of thinking.

Develop Your Skill In HUMAN DYNAMICS

"Your success in life depends 85% on your ability to get along with people," according to a Carnegie Foundation survey.

The Dale Carnegie Course can save you years of trial and error in learning to get along happily with other people. It will show you how to conquer fear and worry, how to make people like you, how to develop social assurance and become a more interesting person.

Ramblers, Bombers Tangle With AMC Lead At Stake

The league leadership will be on the line tonight in the AMC League when the Ramblers and the Bombers go at each other at Peany's Lanes. The two teams take identical records of 25 wins and seven losses into the crucial match.

On the other side of the Parkway at about the same time the Bramblett quintet will be trying to protect a two-point lead over the Guided Muscles in the Field Services League at the Parkway Lanes.

After leading the AMC wheel for several weeks the Ramblers came a cropper against the Tow Boys last week and despite turning in the best team game of the season and the second best series total, were only able to get a split. The Bombers took full advantage of the chance and swept into a tie by taking all four points from the Tigers.

Joe Medders fired a 236 game in leading the Ramblers to a 1096 total in the opening game but the Tow Boys grabbed the last two games for the split as the Ramblers ended with a 2973 total.

Medders ended the evening with a league leading 584, Tom Patterson turned in a 550 and Bob Hubbard contributed 543 to the Rambler attack.

Bob Brand was the chief instigator in the Bomber sweep with a 561 total.

Bramblett broke out of a three-way tie for the lead by taking three out of four from the Expeditors, one of their partners in the top spot. The other, the Guided Muscles also lost three out of four.

The Baker and Co. Realtors provided most of the league fireworks by going over 1000 in each game for a 3132 total and a clean sweep over the Wheels. The Realtors turned in games of 1067, 1005 and 1066 for their big total.

Mel Berger was the top gunner in the Baker attack with games of 230 and 202 for a 621 honor roll total. All four of his mates passed the 500 mark.

Theron Sumner was runner up for individual honors with a 579 for the Crackers, Gary Phillips shot a 574 and Ralph Sturgill had one pin less, both for Bramblett, and Curt Wade shot a 571 series for the Keglers.

Rare is the week that at least one bowler in the Supply Management League doesn't make Honor Roll status, and last week was no exception. This time it was Hansel Fooshe of the Auto Center.

Hansel hit games of 220 and 205 and ended the evening with 616 as his team was being held to a split by the Debuggers.

The Huntsville Brick and Tile five took advantage of the split to take over sole possession of the lead by winning three out of four from Pearsall Flowers. Tom Lindsay turned in a 581 and D. B. Smith and Jack Bailey each collected 564 for the Tilers.

Al Perez turned in the best game, a 235 for the 7 Ups and his 555 total led his mates to a sweep over the Manglers.

Don Davis Leads MMCS Bowlers

The top individual effort in the MMCS Officers Bowling league last week almost went for naught when the Swags dropped three out of four to the Squirrel Hill Mob despite a 562 total by Don Davis.

The loss dropped the Swags out of second place with the Rounders moving into the runner up slot by taking three points from the Bad Gnus. Sam Lewis turned in a 559 for the winners and Al Leonard totaled 546.

The league leading Black Jacks were only able to get a split with the Rocket Rollers but it was enough to protect their three point margin. Myron Sato paced the Rollers with 537, three maps more than Tom LeLoach was able to get for the Jacks.

The final match on the weekly card saw the Satellites take three from the Hubs despite a 529 put together by Bill Whipple for the losers.

REGION ADDS ADVISOR

An education research adviser will join the U. S. Regional Office of Education, Atlanta, Ga., Nov. 1, to assist and advise college and university officials and State Departments of Education of the Southeastern states with research proposals possible under existing Federal laws.

In announcing the appointment of Mr. Theodore Lee Abell to this new position in the Regional office, Dr. C. J. Martin, Regional Assistant Commissioner, said the Regional office will, henceforth, have authority to approve Federal grants for research up to \$10,000. Previously the requirement was that all proposals be submitted to the U. S. Office in Washington and the grants were made from the Washington office.

WINS FALL GOLF TITLE—Maj. Gen. John G. Zierdt presents the championship award to Col. (ret) D. L. McMillan following the latter's playoff win over Lt. Col. Leonard Carlson (left) in the recently completed Fall Handicap Golf tournament. McMillan holds the first place trophy that he won as champion of the third flight while Carlson was the second flight winner. They ended the regular playoff between the six flight winners all even and had to go an extra 18 holes before McMillan emerged as the tournament champion.

League May Fall For Lack of Gym

Organized basketball competition for civilians this winter is getting to be more doubtful all the time due to the inability to find a gym in which to play the games.

Charlie Williams, the league president, said that efforts have been made to rent just about every available gym in the immediate vicinity of Huntsville but so far the league has drawn a blank.

"We are going to have to find a home for the league within the next week or so," he added, "or drop all of our plans."

Williams said that twelve teams had entered the league that would be sponsored by the Civilian Welfare Fund Council, indicating that interest in basketball is higher than expected.

The Council had agreed to buy uniforms for the teams, provide other necessary equipment and pay a certain amount of the rental fee for the use of a gym. That is, if a gym can be found.

Williams asked that anyone having knowledge of a gym that could be used by the league to call him at 876-6542.

All-Sports Unable To Cut Into Lead

Wayne Spruell and Peggy Rousseau corralled all of the individual honors for the Comp Center Mixed bowling league last week as they led the All-Sports foursome to a three out of four win over the Spares.

The former shot a 225 game on his way to a 584 set for the best single effort among the male contingent and the latter led the gals with a 455 total.

The Skunks, however, were just as effective without the benefit of any top individual efforts and maintained their one game lead over the Sports. Howard Jess led the Skunks to three wins from the Lucky Strikes with 513.

The Hits 'n Misses swept all four points from the Alley Cats and the Squares took a trio from the Bad Gnus in other matches.

ON THE JOB TRAINING with good teacher and course of instruction and well supported visual aids was seen as way to train so-called "low-aptitude" students.

Lou Belt Tops Ladies' League

The Bowling Bags added another point to their lead in the Thursday morning ladies league last week by taking all four points in their match with the Queen Pins.

Lou Belt had a 208 game and a 515 series count in leading the Bags to their sweep while Martha Trump tossed a 182 game for the Queens. The win boosted the lead to a full three points over the Angels.

The latter quartet took three out of four from the Four Hopefuls as Rusty Lossing shot a 496 total and Ann Wiener had a 196 game.

In other matches the Rare Spares swept all four points from the Tipsters with Mary Cramer tossing a 486, and the Splatter Pins won three out of four from the Do Nothings.

DOD believes some may be even brilliant but that their cultural environment is so radically different from test-designers. AFNB

Retired Activities Program Helps Before Retirement

The Retired Activities Program has given pre-retirement counseling to approximately 300 military men since it began operation as a unit of the Arsenal Operation Support Directorate's Administration and Personnel Office last March.

Among the accomplishments the office staff has achieved is to help establish a Junior ROTC program at Sparkman High School in Madi-

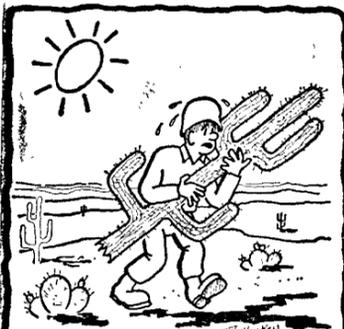

son County. The Retired Activities Program is under J. H. Cranford who works for Lt. Col. C. H. Hansen, Assistant for Personnel and Administration.

In the Retired Activities files are lists of job openings from the Civil Service Interagency Board, universities, high schools and others. When an individual is about to retire, he is welcome to vocational counselling, help in writing his resume of talents and skills and assistance in initiating his benefits under the Veterans Administration program.

A Veterans Administration representative is invited to conduct interviews at pre-retirement counselling sessions at Redstone Arsenal. The next meeting will be at the Redstone Officers Open Mess Nov. 17, beginning at 8:30 a.m. in the Hawk Room.

As an average, about 50 individuals are expected to attend these sessions.

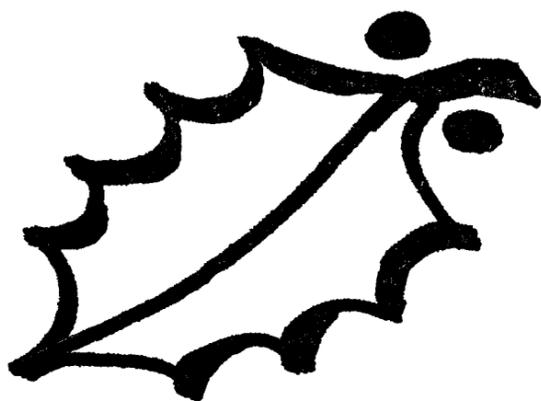

Retired Activities pre-retirement counselling includes evaluation of talent to pursue a new career . . . and aid where an eligibility rating must be acquired before entering a job.

"IF WE DON'T GET OUT OF THIS DESERT PRETTY SOON HONEY, WE'LL BOTH GO NUTS!"

LABORATORY BRIEFING—Students of the Air Force ROTC unit at the University of Alabama spent a day at the Arsenal last week and were given briefings on Research Activity at several of the Missile Command laboratories. Here William Green, a chemical engineer in the Materiel Analysis Laboratory, explains the operation of the X-Ray Spectrograph which is utilized for both qualitative and quantitative analyses of materials.

MAW Undergoes Human Engineering Tests

Quickly now, who knows the meaning of an' thro - pom'e - try? That's right. It's the science of measuring the human body and its parts.

But to the Army, this tongue twister is the name given the human engineering tests now being conducted on its new Medium Anti-tank Assault Weapon (MAW).

At Fort Riley, Kansas, this week about 200 soldiers from every part of the country are taking part in tests aimed at obtaining body measurements to aid in development of the MAW guided missile system. The tests are designed to develop a weapon that is tailored for the man—instead of having to adapt the man to the weapon.

During the anthropometric study, soldiers of all sizes and weights will handle the equipment, simulate firings from a variety of positions and, in a nutshell, supply information that will enable the Army-industry team to develop a weapon that "fits the soldier."

Data from the tests will be incorporated in the MAW engineering model phase hardware.

MAW is the Army's first guided missile system light enough to be carried by one man and fired from the shoulder. It weighs about 27 pounds. Capable of going anywhere the soldier can pack a rifle, MAW will destroy armor or other

infantry targets.

The MAW program is managed by the U. S. Army Missile Command under Lt. Col. John H. Boyes, Project Manager. The McDonnell Company is prime contractor.

Troops and other support for test operations are being provided by the 387th Replacement Company at Fort Ruey.

Members of the test team include Walter Ellis, anthropologist of the McDonnell Company and C.

R. Cox of the MAW Project Office. Working with the team and representing Fort Riley are Maj. G. H. Scherer, G-3 Operations Officer, Maj. G. E. Harris, Commanding Officer of Special Troops and SFC B. L. Ward, troop NCOIC.

Missile Command Awards Contract On Project GLOW

The U. S. Army Missile Command has awarded a \$1,273,000 contract to General Electric Company's Missile and Space Division for additional Research, Development, Test and Evaluation on Project GLOW.

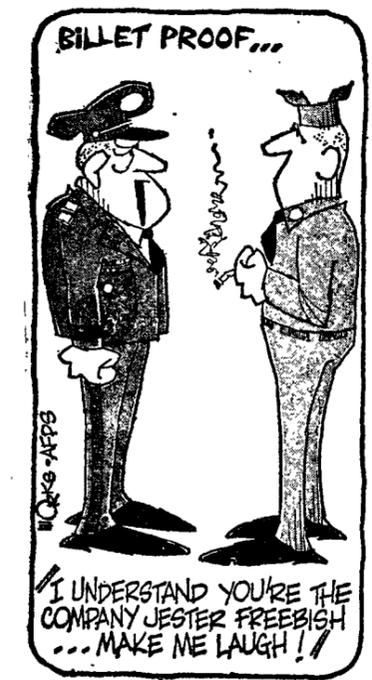

Work will be performed at White Sands Missile Range, New Mexico, and at the Kwajalein Test Site in the Pacific.

GLOW is part of Project DEFENDER, a study of ballistic missile defense systems sponsored by the Advanced Research Projects Agency.

Work on the program is directed by the Re-Entry Physics Branch, ARPA Division, of the Missile Command's Research and Development Directorate. The Command Missile manages the program for ARPA, an agency of the Department of Defense.

Negotiating the contract for the Army was Systems Contracts, Division A, of the Missile Command's Procurement and Production Directorate.

"A PRAYING MANTIS" is the oft-heard description accorded the Army's CH-54 SKYCRANE when someone sees the giant helicopter for the first time. Flown by the men of the 1st Air Cav's 478th Aviation Company, the Sikorsky-built workhorse craft can hoist a sling load of ten tons; that represents enough C-rations to feed a full-strength Infantry battalion for three days. It can also lift a "people-pod" containing 67 fully-equipped combat soldiers. Pods are also being used as communications centers and operating rooms. When not on special missions, the company's SKYCRANE makes daily supply flights between Qui Nhon and the Air Cav base at An Khe. (ANF)

Civilians Training In Nine States To Advance Career

Forty-one Missile Command civilians will leave their duty stations next week to enroll for off-post training courses being offered primarily at Federal installations in nine states and the District of Columbia.

They will be away from their regular assignments for periods ranging from three days to three months under the Command's career development program administered by the Training and Development Division of Civilian Personnel.

Almost half of the total number will take their advanced training at the Arsenal or in Huntsville. Nineteen will study Current Trends in Configuration Management at the University of Alabama in Huntsville, and another will be at the Missile and Munitions Center for three months for the Nike Test Equipment Repair course.

Included in the larger group are, Millard Jernigan and Frank Westmoreland, of the Metrology Center; James Williams and Harold Wright, Pershing; Steve Little and Seymour Gordon, Hercules; Clayton Morgan and Dowe Morlen, Hawk; Wilson Foley, Mgmt Sci; Harlan Judd, Inspector General; Wayne Shaull, Redeye; William Murphy, Patent Center; Robert Vaughn, Msl Intell; William Hagar, Chief counsel; Richard Westrich, Spec Review; Richard Boutillette, Sam-D; George Bailey, Chapparal; Opel Cribbs, ADCCS; and Arthur Johnson, R & D.

Robert Camp, an employee of S & M, will be at the Missile and Munitions School for his training until Jan. 27.

Edward Meehan, S & M, will go to the AMC Ammunition School at Savannah, Ill., for an Air Defense Missile course. Three others, Arthur Green, Prov Mar, Ruth Orr, Transportation, and Freddie Carr, Engineer Div., will be at the same place for Fire Radiation and Explosives Hazards.

The AMC Field Safety Agency at Charleston, Ind., is the destination of J. R. Robison of the Ex-

plosives Div., for a course in Munitions Safety, and Thomas Dowling, Maint Spt, will go to the Southeastern Signal School at Ft. Gordon, Ga., for Radiac Portion of Electronic Devices Repair.

Phillip Boyd, P & P, will study Defense Quality Control Management at the U. S. Army Logistics Management Center, Ft. Lee, Va. and Leo Chamness, S & M, will attend the Middle Management Seminar at the Army Management Engineering Training Agency, Rock Island, Ill.

Three employees of the Assistant for Communications will go to the White Sands Missile Range N. M. for a course in Basic Electronics offered by Frankford Arsenal. They are John Montgomery, Billy Cochran and Larry Huggins.

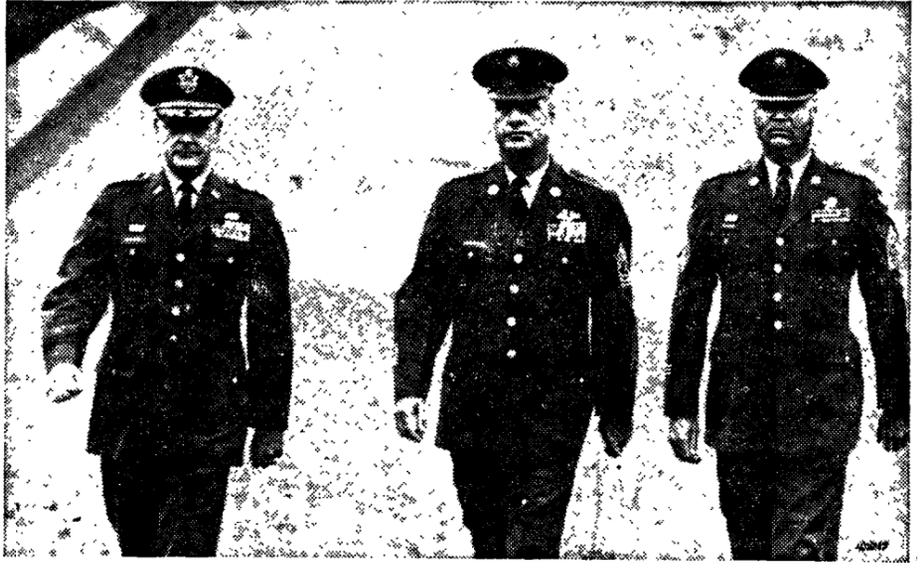

Jack McConaha and James Blackburn of the Civilian Personnel Office will attend a Recruitment Seminar conducted in Atlanta by the Deputy Chief of Staff for Personnel.

Frank Goessling, R&D, will enroll for the Intermediate Executive course at the DOD Computer Institute in Washington and Francis Green, P&P, will take Data Systems Analysis and Design at the Air Training Command, Sheppard Air Force Base, Tex.

Helen Föhner, P&P, will take the Defense Data Managers course at the School of Systems & Logistics, Wright-Patterson AFB, Ohio, and Jesse Rich, Pershing, is enrolled for Industrial Maintenance Management at the Ohio installation.

Another trio of locals will be in Washington next week for the Defense Procurement Executive Refresher course offered by Naval Material. They are Albert Hadlock, Chief Counsel, Edward Foxworthy, Pershing, and Robert Hawkins, P & P.

The Final Command employee on the list is Ferdinand Della Piana of P & P. He will go to Storrs, Conn., for the Quality Control Management Institute at the University of Connecticut.

A MEMORABLE WALK—Sergeant Major William O. Wooldridge, The Army Sergeant Major, center, troops the line during honor guard ceremonies of the 24th Inf Div in Germany. With him are Division Commanding General Maj Gen Roderick Wetherill, left, and Division Sergeant Major James L. Taylor. Wooldridge, former sergeant major of the 24th, visited the unit while on a European tour of Army installations.

Army Observing National Education Week Nov. 6-12

Florida AOA Hears Nike-X Engineer Talk

A description of the Army's Nike-X missile defense system and its Kwajalein Test Site highlighted the Project Chief Engineer's talk last week to the Florida Peninsula Chapter of the American Ordnance Association.

In prefacing his talk in Orlando, Fla., Charles E. Richardson traced the history of the anti-missile defense program from its start 10 years ago. While outlining the Nike-X system concept, he placed particular emphasis on the Sprint short range interceptor missile which is being developed by the Martin Company, in Orlando.

Of special interest to the AOA Ladies Night meeting was Richardson's description of community life on Kwajalein in the Pacific Ocean where more than 3,000 Americans live and work on the receiving end of the Pacific Missile Range. Missiles launched from California are targeted into the lagoon at Kwajalein, which is the world's largest atoll.

The Army Education Center at Redstone Arsenal has never failed to exceed the Department of Army goal of participants in furthering education among the Military here.

In the ten years since Paul R. Fisher took over as chief of the Army Educational Program, the enrollees in all phases of education from the high school level, through technical and vocational, to college have climbed steadily until the level now stands 400 per cent above the 1956 level of participants.

In reporting, each month the Education Center averages 1100 participants furthering educational skills. These include campus and correspondence courses.

Fisher attributes much of the success to the top echelons of command. He says he has never asked for time for a man to take a test and had the request disapproved.

Under the Army Education Program, the men and women have one year to complete a correspondence course. Each works at his own pace and requests the test when he is ready. The program is administered by the Arsenal Support Operations Directorate, Assistant for Personnel and Administration.

1966 American Education Week is being observed throughout the Army, this week. In the United States, Army units are cooperating with civilian educators in this observance through exhibits and special programs at Army

Education Centers.

One of the educational opportunities available to soldiers today is the General Educational Development (GED) Program, which allows them to raise their educational level while on active duty and, at the same time, prepares them to perform their military duties more efficiently. This can be done through academic, vocational, technical, and scientific courses at the elementary school, high school, undergraduate, and graduate college levels. Instruction is available at Army Education Centers on-post or through the facilities of accredited civilian schools and other educational institutions.

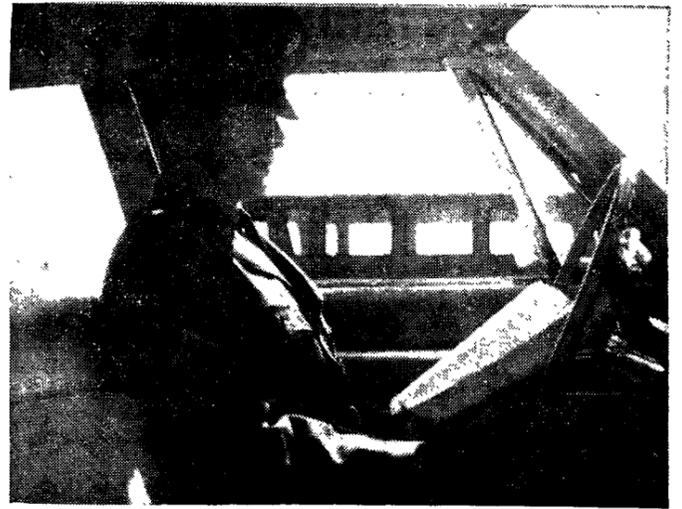

At Army Education Centers—the focal point for GED services—soldiers are offered free professional assistance which includes testing, counselling, registration, and instruction in their educational development. There are 86 Army Education Centers in the Continental United States; they have 147 directors and GED advisors and more than 700 teachers.

GED Program statistics are impressive. Nearly 250,000 soldiers in the Continental United States have earned high school diplomas or certificates through the program in the past ten years. Army personnel have completed more than half-a-million academic courses, primarily at the college level; and more than 5,000 officers and enlisted personnel have earned baccalaureate and graduate degrees during the same period.

The Army's GED Program is based on the philosophy that an individual can improve himself through learning and that the process of learning is a life-long one.

The American soldier today is required to master new skills related to new weapons and new ways of using them. He often must know and practice skills once thought to be outside the soldier's line of duty. In addition, he is now required to serve in parts of the world that would have seemed strange to Americans a generation ago.

In war and peace the individual

EVERY MINUTE COUNTS—Every minute of study time is important to PFC William Gilligan, a vehicle driver at the U. S. Army Missile & Munitions Center & School. The soldier-student utilizes time between trips to study an extension course he is taking through the Army Education Center at Redstone Arsenal. With the week of Nov. 6 through Nov. 12 designated American Education Week PFC Gilligan's efforts, and those of thousands of other soldiers are being emphasized to help maintain their military effectiveness and strengthen our national defense. For further information on Army educational opportunities, contact the Army Education Center.

soldier must be prepared to perform his assigned duties in the most efficient manner possible—the Army's General Educational Development Program is geared to help him achieve this goal.

Army Increases Number Of ROTC Scholarships

At least 1,000 additional ROTC Scholarships will be awarded by the Army to outstanding high school graduates and to selected college students who have completed two years of Army ROTC training beginning with the 1967-68 school year.

Applications for the scholarships can be made beginning on December 1, 1966 and the application packets must be completed and returned with a postmark not later than January 15, 1967.

Detailed information and application forms on the four-year scholarship program may be obtained from the commanding general of any of the five armies in the United States or from major United States Army overseas commands in which the applicant resides. Students applying for the two-year awards should contact the Professor of Military Science at their present college or university.

Students winning an Army ROTC Scholarship may attend any of the 247 colleges and universities offering the four-year Army ROTC program. After graduating from college and successfully completing his Army ROTC studies, the scholarship student is required to accept a regular Army or Reserve commission, whichever is offered, as a Second Lieutenant and to serve at least four years on active duty with the Army.

To be eligible for a scholarship applicant must be a male United States citizen who meets the prescribed physical standards. Applicants for the four-year awards must not have reached their 21st birthday by June 30, 1967 and

they must be 17 by Oct. 1, 1967.

Two-year award applicants must be under 23 years of age on June 30, 1967 and must be a cadet in good standing in the second year of ROTC training.

Residents of Alabama, Florida, Georgia, Mississippi, North Carolina, and Tennessee should apply to the Commanding General, Third U. S. Army, Attention—AJAAG-R, Fort McPherson, Georgia 30330.

Approximately 2,000 students are now attending colleges and universities on Army ROTC Scholarships which began during the 1965-66 and 1966-67 school years.

Authorized by the ROTC Vitalization Act of 1964, the scholarships provide financial assistance to students interested in obtaining a regular officers commission through the Army ROTC program.

Each award pays for the student's tuition, text books and laboratory fees and provides \$50 per month subsistence allowance for the duration of the scholarship, except for a six week summer camp during which the student is paid \$151.95 per month.

Additional Army ROTC Scholarships are authorized by the ROTC Vitalization Act each year until a maximum of 5,500 are in effect by school year 1970-71.

SERVICE CLUB SHOW

Sunday night Harry King Cole will present a show at the Redstone Arsenal Service Club, beginning at 8:15 p.m.

Cole is a comedian, singer, musician who highlights the show with a comedy routine as Weeping Willie.

Shop with cash—Get an HFC Shopper's Loan

Shopping with cash can save you money. And if you're short of money for your holiday needs, apply for an HFC Shopper's Loan. It'll let you make the best selection at any store for the things you want, even at stores where you don't have a charge account. And you'll avoid big first-of-the-year bills, too. Then you repay HFC conveniently. Buy those holiday things with cash now. Apply for an HFC Shopper's Loan.

LOANS UP TO \$2000 —with up to 30 mos. to repay

Cash You Get	MONTHLY PAYMENT PLANS

Graduation Is Initial Success Speaker Says

The guest speaker for graduation ceremonies at the U. S. Army Missile and Munitions Center and School, recently told students from three countries to regard graduation as "your initial success."

The speaker was Maj. James P. Mooney, Technical Officer, Material and Doctrine Review Department at MMCS. His audience included graduates from the U. S., Germany and Italy.

Stressing that graduation was only the beginning, Maj. Mooney said, . . . "The process of learning has just begun."

He continued, "You are now entering the next phase of your training—that of building upon these

basic skills by living and doing until true competence is achieved."

Three students scored a 96 average or above in their studies and received the outstanding service school achievement plaque from the Association of the United States Army. Making the presentation was Reavis O'Neal, Tennessee Valley Chapter representative of the AUSA. The three outstanding students were: 2/Lt August L. Lena, 96.0; PFC Kenneth B. Robinson, 98.0; and Pvt. Douglas R. Staples, 97.7.

Other honor graduates included SSG Don L. Ehrenberg (USMC), PFC Charles L. Harper, PFC Henry L. Penia, Jr., and PFC Charles C. Goddard.

OUTSTANDING STUDENT—Lt. Col. John McCarthy, chief of the National Inventory Control Point, presents the Defense Supply Association plaque to Wilford Brisendine, an inventory management specialist in the Supply and Maintenance directorate. Brisendine earned the recognition by being named the outstanding student in a recent class of the Defense Inventory Management course at the Army Logistics Management Center, Ft. Lee, Va. He is the second Missile Command personnel to earn the outstanding student rating at the school.

Army To Expand Training At Fort Dix, Fort Lewis

FORT MONROE, VA.— Further expansion of the Army training base was announced today at Headquarters, US Continental Army Command.

Additional 227 man Advanced Individual Training companies will be organized. One each week at the Army Training Center, Fort Dix, NJ and another each week at the Army Training Center, Fort Lewis, Wash.

The eight-week Advanced Individual Training course provides trainees with Military Occupational Specialty training and follows immediately after the eight-week Basic Combat Training Course.

At Fort Dix, the first of the new companies will start training on April 3. At Fort Lewis, the first new companies will start training on Feb. 13.

This new program will require

495 military and 155 civilian personnel to be added to the permanent party garrison at Fort Dix.

At Fort Lewis, about 451 military and 141 civilian personnel will be added to the permanent party garrison.

The average daily strength of each post will also be increased by about 2000 trainees when the program is in full operation.

The US Continental Army Command has been expanding its Army training capacity at a rapid pace since the announcement of the military buildup in the fall of 1964.

With 16 training centers now in operation. CONARC has expanded its basic combat training capacity from 330,000 in FY 65 to approximately 700,000 annually.

Superior-Subordinate Relations Are Important Captain Tells Graduates

The guest speaker for the U. S. Army Missile & Munitions Center & School graduation ceremony, Friday, stressed the necessity for good superior-subordinate relations in accomplishing the Army mission.

Capt. Donald C. Fisher, Jr., ammo service instructor, logistical management division, officer training department in the Directorate of Individual Training at MMCS, addressed 113 graduates from the U. S. and Germany at the Arsenal's post theatre.

CPT. Fisches told the graduates to sometimes expect long, hard work hours, especially when stationed overseas. To get the job done effectively he urged the graduates to promptly carry out the decisions of their superiors. He said, "They (the superiors) evidently have already convinced

someone of their abilities."

Then, directing his remarks to the leaders among the graduates Fischer said, "The most important thing to remember is to recognize subordinates for their work." He cited commendation medals, certificates of achievement and letters of appreciation as means of giving this recognition.

Special awards went to seven graduates who, as honor students, lead their classes in grade average.

They were: 2/lt. John W. Yarbrough, PFC James Jacobs, PFC Philip J. Butt, Jr., Pvt. Larry W. Pearce, Pvt. Steven P. Baeyens, PFC Alan P. Schlutmeyer, and Pvt.'s Randolph R. Roper and Nathaniel Williams.

Drive Defensively

93rd EVAC MODEL TO BE DISPLAYED

A replica of the 93rd Evacuation Hospital, Viet Nam, will be on display in Huntsville November 9 to 19 at Dunnivant Mall. Also a person to person letter and gift mailing to hospital members has begun in Huntsville. The 93rd Evacuation Hospital was adopted by Huntsville and Madison County, and the support of the unit is under the name of Operation We Care.

The field hospital on display belongs to the office of Civil Defense, and was scheduled to Huntsville by Mrs. Harris Mitchel, local director.

Appearing with the hospital at Dunnivant Mall will be a display

by the 20th Special Forces. Dunnivant Mall Teen Board is sponsoring Operation Wash Cloth, a program to collect wash cloths at the Mall for the hospital and mail them.

The Person to Person emphasis for gifts and letters to members of the 93rd has been begun by the Chrysler Women's Club. They have name lists of servicemen assigned to the unit, and individuals may pick up an address at the Chrysler Women's Club booth at the Mall on North Parkway.

Packages to Viet Nam will be weighed and posted by the Post Office Department at the booth.

AIR FORCE's OFFICE of Aerospace Research (OAR) has received the Air Force Outstanding Unit Award, Award, given to all units of OAR, was for "vigorous and dynamic research program . . . which resulted in a vastly improved research capability to meet the technological requirements of the Air Force in the years ahead." Mistakes Bug You? Try This Formula

Do you fear making a mistake? We pay a heavy price for fear of failure. It is a powerful obstacle to growth. It assures the progressive narrowing of the personality and prevents exploration and experimentation. There is no learning without some difficulty and some fumbling. If you want to keep learning, you must keep risking failure—all your life. Fear of failure breeds timidity. It makes employees hesitate. It encourages them to turn their backs

on challenge and innovation. The issue at stake is not failure itself. It is a question of attitude. An employee's attitude can strengthen or destroy him. If he regards each mistake as a setback in his struggles for achievement, this is exactly what it will become—a setback. If he looks on mistakes as building blocks instead of fumbling blocks, his failures will strengthen him. The successful employee appreciates the fact that failure is nothing more than a state of mind. He believes that the way to greet failure is not with fear, but with curiosity. Why did the mistake happen? How can I best avoid it

again? Mistakes for this employee are guideposts, direction finders in the endless search for the most elusive of all goals—perfection. The sobering truth is that there is more to be feared in not making mistakes than in making them. Sound paradoxical? It's not. The employee who fears making mistakes too much to risk making them, obviously won't make any. But neither will he learn or grow. He will stand still, or slide backward. The status of the employee who plays it too safe will be in greater jeopardy than his more venturesome counterpart. Theodore Roosevelt said. "Show me a man who makes no mistakes and I will show you a man who doesn't do things." Man will always make mistakes so long as he continues to strive for some goal.

COMPLETE DISPERSAL AUCTION Thursday, November 10 At 10:10½ A.M.

The 9 room modern home and 99 acres of farmland, two building lots and household furnishings belonging to the estate of the Rev. Cullen T. Carter, located 4 miles south of Pulaski, Tennessee, on Highway 31 or only 36 miles north of Huntsville, Ala., and only 15 miles from Ardmore, Alabama, and 5 miles from the new I-65.

This farm located only four miles from Pulaski on Highway 31, the main federal north-south highway has large frontage on the highway. There are 58 acres in cropland, the balance in permanent pasture. This farm is blessed with plenty of everlasting water furnished by three wells and two large ponds. The modern 9 room home is one of the finest country homes located south of Pulaski. It consists of 4 bedrooms, 2 baths, living room with a beautiful fireplace, dining room, kitchen, breakfast room and part basement. There are hardwood floors throughout, plenty of closet space. Can be used for two apartments. The outbuildings on this farm are in excellent condition, having large garage, large barn and other outbuildings necessary to operate this farm.

The farm has approximately 58 acres of bottom land that is as fine as any land you will find on any farm in Giles County. It will grow any kind of row crop, hay crop or any kind of crop you wish to plant. It has permanent pasture and plenty of water for any kind of livestock farm. This is one of the most modern farms we have ever sold. The farm is in the Tarpley Shop Water District and taps are available.

The house with the beautiful front lawn is in a picturesque setting, just the right distance off the highway, nestled in a beautiful grove of shade trees. The flowers and shrubbery add greatly to the appeal of this home.

Sale No. 2 and 3 will be two nice shaded lots facing Highway 31. These lots are south of the farm. They have 100 or more feet frontage on Highway 31 and are in the Tarpley Shop Water District.

Possession of land as crops are gathered and removed, possession of the house with delivery of deed. Taxes will be paid by owners.

We will sell this property for one-fourth down sale day, the balance on or before 30 days, giving the purchaser plenty of time to make his arrangements.

The personal property will be sold first and then the real estate at 12:30. Lunch will be served.

Shillelagh Instructors Will Graduate This Week

Technical training courses for key instructors and maintenance personnel on the Army Missile Command's Shillelagh missile system are scheduled for completion here this week.

Fourteen students are enrolled in the Shillelagh New Equipment Training Program which is utilizing facilities at the Army Missile and Munitions Center and School. This brings to 97 the number of students who have undergone training since last May.

These students later will serve as instructors in field maintenance when Shillelagh becomes fully operational with using units.

Training is being conducted by the New Equipment Training Division of the Missile Commands' Supply and Maintenance Directorate. Students who have completed the training will be qualified to instruct others in field-type maintenance on Shillelagh missiles and guidance and control equipment. Shillelagh is a gun-launched guided missile system being de-

veloped for Army armored vehicles. The system's 152 mm gun-launcher can fire either missiles or conventional rounds of ammunition.

The program is managed by the U. S. Army Missile Command at Redstone Arsenal, Ala., under Col. Spencer R. Baen, Project Manager. The Aeronutronic Division of Philco-Ford Corporation is prime contractor.

WORLD WAR II ACE Col. Herbert Zemke has retired from Air Force, winding up his career as commander of Reno, Nev., Air Defense Sector. 52-year-old air leader commanded 56th and 479th Fighter Groups in England from 1942-1944 and personally downed 18 aircraft. AFNB

NEW IDEA—Soldiers direct the unrolling operation of a hasty storage reservoir available for storing petroleum products in Vietnam. Developed by the Army's Engineer Research and Development Laboratories, the 420,000-gallon capacity reservoir is easy to handle, transport and install since it can be folded into a 14-foot roll, five feet in diameter. Two of the units, fabricated from synthetic rubber coated on nylon cloth, have been sent to Vietnam. A trapezoidal-shaped pit supports the reservoir.
