TWO TO RECEIVE STARS

RECEIVES FATHER'S MEDALS—Jerry Ake, son of PFC Homer L. Ake, Jr., who was recently killed in action in Vietnam, receives his father's Silver Star presented by Maj. Gen. Charles W. Eifler, Commanding General of the U.S. Army Missile Command. The medal was awarded posthumously to PFC Ake for gallantry in action when he twice faced enemy fire to bring a wounded comrade to safety. Other awards earned by PFC Ake include the Bronze Star, Army Commendation, Purple Heart, National Defense Service Medal, Viet Nam Service Medal, Viet Nam Campaign Ribbon, Combat Infantry Badge, Expert Badge with Rifle Bar, and Good Conduct.

Col. Edward M. Dooley, Col. Robert C. Marshall Make List For General

Two Army Colonels assigned to top-level posts in the Sentinel System have been nominated for the rank of Brigadier General in a recent list of promotions sent to Congress by the President.

They are Col. Edward M. Dooley, Sentinel Director of Program Control and Management Systems; and Col. Robert C. Marshall, newly appointed Director of the Site Activation Directorate.

Congressional approval of the nominees and subsequent promotion are generally automatic.

Both Col. Dooley and Col. Marshall are well known at Redstone Arsenal. Col. Dooley was associated with the Army's anti-ballistic missile (ABM) program at its inception here. Prior to joining the Sentinel System Command in November of 1967 he was the Army Missile Command's Project Manager for the SAM-D air defense

COL. EDWARD M. DOOLEY

Good Will Ambassador Returns To Homeland

The Missile and Munitions Center and School at Redstone Arsenal bade farewell Friday to an active good will ambassador.

Maj. Hong Koo Lee of the Korean Army returned to his homeland after serving one year at MMCS as senior representative for Korean students undergoing missile training here.

He effectively bettered understanding between his own country and the United States, according to MMCS commandant Col. Paul B. Schuppener, by supervising

many functions and activities which encouraged the Korean visitors to blend into community affairs. Through various field trips, guest speaking engagements, visits to schools and homes, the Koreans under Maj. Lee—usually about 20 at any one time—exchanged culture and ideas with Americans on many academic, social and military matters.

A keen sense of humor and varied interests made Maj. Lee himself a popular speaker at civic (See GOOD WILL on Page 3)

McBride Commands Aviation Materiel

ST. LOUIS, MO.—A native of Birmingham, Ala., has been named Deputy Commanding General of the Army Aviation Materiel Command (AVCOM) here.

He is Brig. Gen. George H. McBride, 47, who prior to his arrival in St. Louis commanded the Army Support Command at Da Nang, Republic of Vietnam.

Gen. McBride's basic branch is the Ordnance Corps and he has served in a wide variety of top staff positions with the Chief of Ordnance, the Ordnance School and Aberdeen Proving Ground, Md. He has served for about six years at Huntsville, with the Army Ballistic Missile Agency Redstone Arsenal, the Army Ordnance Guid-

ed Missile School, and most recently, with the Army Missile Command. In 1964-66, he was Project Manager for the Hawk missile system. (See GEN. McBRIDE on Page 3)

Withholding Will Increase Command Spends \$49.5 Million On Services, Goods

"Don't fret, folks, the cut is only temporary and we will more than make up for it next time," is the advise offered by the MICOM Finance and Accounting Officer for the changes in the pay checks being mailed this week and next week to Class Act civilians.

In explaining the situation, LTC M. A. Jones said that the income tax surcharge voted recently by Congress, will show up in paychecks a pay period before the second increment classified pay raise.

Pay boosts for wage board personnel are included with the surcharge in checks going out this week and next while the July pay vouchers will incorporate both changes for military personnel.

Col. Jones said that the income tax surcharge applies to all wages earned after April 1, 1968. Because of this, he said, it is possible that the total deductions will be insufficient, and some employees may want to voluntarily increase their tax withholdings.

Army Missile Command expenditures for goods and services ran more than \$49.5 million during the last month, with approximately \$1 million spent in Huntsville.

More than \$1 million worth of business was spread among firms throughout Alabama outside of the Huntsville area.

One of the larger awards, \$197,982, went to Brown Engineering in Huntsville to cover a continuing effort to update and add new items to previously generated data in support of the Missile Command Department of Defense standardization mission.

Several local orders were for building material and seasonal repair work on buildings and grounds. Others were for food, dry cleaning, laboratory and office supplies.

The Missile Command Procurement & Production Directorate executed the awards.

PLAQUE AWARDED KOREAN—Col. Paul B. Schuppener, Commandant of the Missile and Munitions Center and School (right) presented Maj. Hong Koo Lee, the Senior Korean representative at the School with a plaque and thanked the major for supervising functions and activities which encouraged the many Korean students to blend into community affairs.

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the information Office, Army Missile Command, Redstone Arsenal, Ala., 35809 Bldg. 5250, Room A-136, Extension 876-1400 or 876-1500.

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, P. O. Box 346, Huntsville, Ala., 35804, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wantads—is noon of Friday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$7.42 a year, or \$4.00 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala. 35640.

Rocket Ruminations

The soul of a journey is liberty, perfect liberty, to think, feel, do just as one pleases.

—William Hazlitt

From The Bottom Up

"Cost Reduction in the military? You're talking to the wrong guy.—I'm just trying to do my job. The people who can do something about cost reduction are the big wheels back in D.C. and the ones up in headquarters. You don't really expect me to save a million dollars a year doing my job, or even close to it.

That's a pretty familiar statement because most of us in the military do think of Cost Reduction as a pretty high-level, multi-million dollar program. Since we're not up in the planning elements of various research and operating programs, we figure we're not really concerned with Cost Reduction.

Sorry about that buddy, but that's not right. Although it's true most of us don't come up with an idea or program that will save four or five million dollars, most of us can be very effective in saving small amounts that over the long haul can add up to a pretty large piece of change.

How? Where? Right in your own office, section, division or squadron. You can do it by making sure that

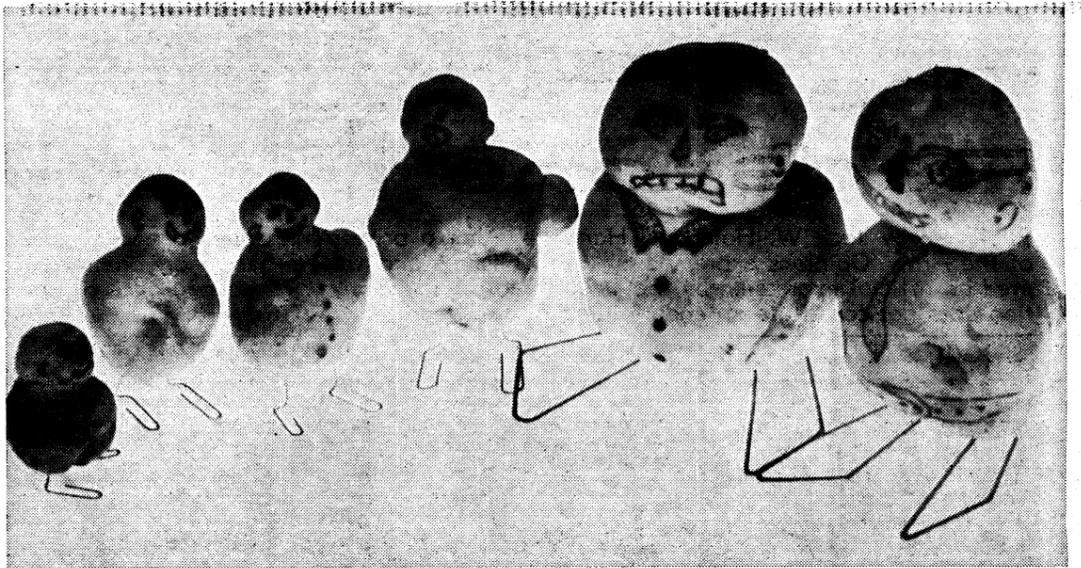

neither time nor materials are wasted by anyone. You can do it by making sure you, or the people that work for you, do the job correctly the first time.

You can do it by submitting ideas for better ways of doing things through the Suggestion Program and Cost Reduction Program channels instead of just sitting around griping about how "there must be a better way to do this."

Cost Reduction isn't restricted to the upper echelons. It's **everyone's** job—enlisted, NCO or petty officer, commissioned officer or civilian employee. If every man and woman in uniform and every civilian employee saved 5c a day by effective utilization of time and material, came up with a better way of doing their job or developed an idea for equipment modification and improvement, think what a huge savings this would be at the end of the year.

This savings could then be directed toward improved facilities, equipment and operations and everyone would benefit. You are the right guy to talk about Cost Reduction. You can do it and in the long run, you will benefit. (AFPS)

TATER FACES—The Mamma (second from right) in this picture changed her expression later—when she had admonished the son next to her for his naughtiness, but the expression was caught by the camera before she could compose herself. The Papa and the other youngsters are obviously enjoying the Mamma's performance and the son's defiance probably changed to chagrin before she was through.

AIRCRAFT FACILITY NEAR COMPLETION

Construction of one of the largest aircraft care and preservation facilities on the West Coast is nearing completion at AMC's Sharpe Depot, Lathrop, California.

With its 15,000 square feet of floor space, the new facility will be capable of processing 200 aircraft per month for storage or shipment. Controlled heat, humidity and ventilation give the new facility a year-round capability.

The nearly completed half-million dollar structure also has storage capacity for 2,000 gallons each of aircraft and jet fuel. Sharpe is a major Army supply depot for Southeast Asia.

FORM 57 EXPIRES

The Civil Service Commission reminds all Federal job-seekers that beginning July 1, the new short application Standard Form 170 is being used in lieu of the Standard Form 57 to apply for Federal employment.

UNITED STATES ARMY THE CHIEF OF STAFF

July 1, 1968

Dear Frank:

Before I leave my duties as Chief of Staff, I personally want to express my deep appreciation to you and the members of your command for the magnificent support and understanding given me during the past four years. My job has been made easier by the unstinting assistance from within the leadership of the Army; I know, also, that it has given me a confidence and assurance that I could not otherwise have enjoyed.

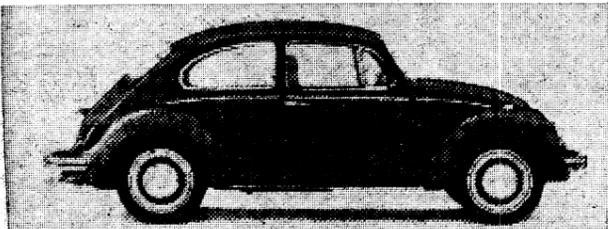

My tenure has been a rich and rewarding four years. I can look back over a period of growth and remarkable performance of a young and eager Army. In the massive buildup to meet the threat of communism in Vietnam, your command has played a key role. The movement of supplies to combat troops has been a logistic miracle of some magnitude. During these same years your command has made noteworthy strides in the management of personnel and materiel resources and has overcome numerous obstacles in accomplishing the task of keeping the flow of supplies and equipment to the soldier in step with the developments in organization and doctrine. The growth of the project-managed items system which has accelerated the rate of delivery of critical hardware from conception to troop use is a unique achievement in the annals of military logistics. The performance, dedication, and selflessness of all members of the United States Army Materiel Command have been most commendable. I am particularly proud of our professional soldier, his sacrifices and contributions to the free world, and the manner in which our Nation is served by these professionals.

Secure in the knowledge that the Army will continue to have the advantage of distinguished leadership such as yours, I request that on my behalf, you extend to all concerned my profound thanks, "well done," and God bless.

Most sincerely,
HAROLD K. JOHNSON
General, United States Army
Chief of Staff

REENLISTMENT AWARD—Lt. Col. Russell Gale (right) and 1st Sgt. Eugene Hooper proudly display the trophy presented by the Army Missile Command, Redstone Arsenal, Ala., to post hospital personnel for having the highest reenlistment rate of any unit in the Command. The hospital unit has won the trophy six times in a year and will now retire the trophy. Col. Gale is the commanding officer of the Army hospital at Redstone Arsenal and Sgt. Hooper was the non-commissioned officer in charge of the reenlistment program for the competition period.

Two Sentinel System Men Receive Promotions Here

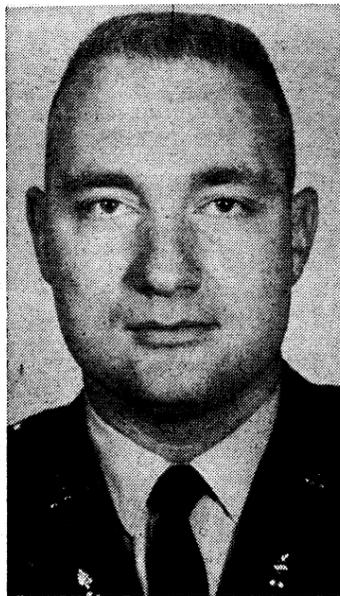

The promotion of two career military men to key positions in the Sentinel System Command as Executive Officer and Sergeant

of the U. S. Army Ordnance Guided Missile School, predecessor of the Missile and Munitions Center and School.

As Executive Officer, Maj. Kuykendall will be responsible for assisting in the administrative operations of the offices of the Commanding General and Chief of Staff.

Sgt. Maj. Campbell is a native of Somerville, Mass., and entered the Army in 1946. He has served in Korea and Japan as well as at the Sentinel System Command operated Kwajalein Missile Range.

He was acting Sergeant Major until his promotion and is the Command's senior enlisted man.

MAJ. GEORGE B. KUYKENDALL, JR.

Major was announced today by Brig. Gen. I. O. Drewry, Commanding General.

Maj. George B. Kuykendall, Jr., formerly acting chief of the Command's Training Office and a recent graduate of the Department of Defense Weapons System Manager Course, was named Executive Officer for the Command.

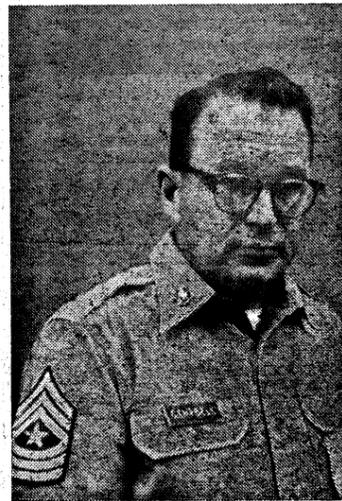

Sgt. Maj. Herbert F. Campbell was promoted from the rank of Master Sergeant on July 10. A veteran of more than 20 years service, he is currently serving his third tour of duty at Redstone Arsenal.

Maj. Kuykendall is a native of San Antonio, Tex. Since being Commissioned in May, 1956, he has held a number of assignments with anti-aircraft missile units both in the United States and in Europe. He also served in Vietnam in the Military Assistance Command.

He was previously assigned at Redstone Arsenal as Chief of the Improved Hercules Section and later as Chief of the Nike Division

D Project Manager and directs the program from headquarters at the U.S. Army Missile Command. Raytheon's Missile Systems Division is prime contractor.

The Command's Procurement and Production Directorate negotiated the contract.

SGT. MAJ. HERBERT F. CAMPBELL

● A Woman's Army Corps major has become the first woman and the first member of the Armed Forces to receive the "Sport Magazine Service Award." The magazine named Maj. Jacquelin J. Kelly, assistant secretary of the staff of the U. S. Army Electronics Command, winner of the award for her volunteer work as swimming coach at Fort Monmouth, N. J. The award is presented for outstanding contributions to the advancement of community sports programs and activities. (ANF)

TWO GENERALS

(Continued From Page 1)

project.

Col. Marshall who will assume his new position as chief of the Site Activation Directorate Friday (July 19) returned from Vietnam last month. In Vietnam he was Commander of the 937th Engineering Combat Group and Corps Engineer, Provisional Corps, Vietnam.

Prior to his assignment to Vietnam, Col. Marshall was District Engineer, Mobile District, Corps of Engineers, and was responsible for military construction at Redstone including Saturn 5 test facilities for Marshall Space Flight Center at both Redstone Arsenal and in Mississippi. Construction on the Army Missile Command's Francis J. McMorro Laboratories at Redstone Arsenal was also carried out under his supervision.

Col. Dooley entered the Army in 1943 and holds a Mechanical Engineering Degree from the University of Cincinnati and a Master of Science Degree from Massachusetts Institute of Technology. He organized the Antimissile Missile Office of the U.S. Army Ordnance Missile Command at Redstone Arsenal in 1958 and was its

GEN. MCBRIDE

(Continued From Page 1)

tem. He has been in Vietnam since January 1967.

A 1942 mechanical engineering graduate of Alabama Polytechnical Institute, Gen. McBride was commissioned from the senior ROTC at his alma mater. He served in several major campaigns in Europe in WW II and returned to civilian life for some 15 months following the war.

Gen. and Mrs. McBride have two daughters; Mrs. Jinnett Williams, whose husband is a Major serving in Vietnam, and Mary Eileen, a senior at Auburn University. The family resides at the Granite City Army Depot.

chief until 1960.

He later became Chief of the Pacific Field Office at Kwajalein, predecessor of the Kwajalein Missile Range which is operated by the Sentinel System Command. He received Legion of Merit Medals for his service at Kwajalein and as SAM-D Project Manager.

Another pioneer in the ABM program, Col. C. J. LeVan, was also nominated for the rank of Brigadier General on the same list as Col. Dooley. Colonel LeVan worked with the ABM program while assigned to the Office of the Army Chief of Research and Development, and visited Redstone frequently.

Col. Marshall was commissioned in 1943 following graduation from the U.S. Army Military Academy at West Point. He also holds a degree in Civil Engineering from Cornell University and is a graduate of the Industrial College of the Armed Forces. Among his decorations he holds the Silver Star, the Legion of Merit, three Air Medals, two Bronze Stars and the Purple Heart.

GOOD WILL

(Continued From Page 1)

group meetings and religious affairs. The 38-year-old major, a Catholic by faith, draws on 17 years military experience which began as a freshly commissioned 2nd Lieutenant in the Korean war.

Maj. Lee had graduated in 1951 from Kuk Hak University in Seoul prior to Army duty, and he has since completed five military schools. This was his second stay in the U.S., for one of the career courses he mastered was the Nike missile supervisor here at MMCS from December, 1963 to May, 1965.

Maj. Lee returned to Seoul where he will live with his wife and three small children.

\$16 Million Award Goes For SAM-D

The U.S. Army has awarded \$16,260,783 to Raytheon Company for continuation of advanced development efforts on the SAM-D (Surface-to-Air-Missile-Development) system.

Work under the award will be performed at Raytheon's Missile Systems Division at Bedford, Mass.

SAM-D is being developed for continental and battlefield air defense against high performance aircraft and short range missiles in the 1970s.

SAM-D will be a highly mobile weapon system, capable of acquiring, tracking, identifying and destroying several targets simultaneously.

Col. James C. Miller, Jr., is SAM-

Redstone Benefit Elects Officers For '68-'69

A computer specialist with prior experience in the independent insurance business, Emmett Boylan has been named to a two-year term as president of the Redstone Benefit Association.

Boylan succeeds William Heflin as head of the 3,000 member organization that administers group life insurance and group accident insurance programs for the benefit of Army personnel at the Arsenal.

Thomas Mizell, an employee of the Supply and Maintenance Directorate, assumed the role of vice-president of the Association at the same time. He succeeds Boyd Bryson, of the Procurement and Production Directorate.

Linda Fulmer, a paid employee of the Association, continues to maintain the Association office in Building T-3159. Her office hours are 9 a.m. until 1 p.m., each work day.

A member of the Association

BPW CHARTERS FAYETTEVILLE CLUB—Officers were installed and the charter presented to the newly organized Business and Professional Women's Club in Fayetteville, Tenn. Four of the principals in Monday night's charter meeting were Missile Command employees. Left to right are: Wanda Jennings, treasurer of the new club and an employee in the Procurement and Production Directorate; Arleta Martin, presiding officer at the charter meet-

ing, Civilian Personnel Office; Wilda Sanders, first vice president, an employee of the Air Defense Command Field Office here; and Sue Carter, president, a member of the Transportation Office staff. Miss Martin is the immediate past president of the sponsoring club at Shelbyville. The Fayetteville club has approximately 40 charter members.

EMMETT BOYLAN

since its inception in 1962, Boylan came to Redstone in 1960 from Lexington, Ky., where he operated an independent insurance agency.

All of his Federal service has been in the data systems and computer fields. He spent eight years with the Missile Command before transferring to the Sentinel Systems Command in April of this year.

The new president noted that the Association has grown considerably in the last two years and he pledged to continue the growth during his term.

Dr. Kalman Conducts Class Covering Filtering Theory

An internationally known authority in the field of automatic control theory, Dr. R. E. Kalman, was the lecturer and discussion leader Monday at the conclusion of a course on the Kalman filtering theory offered for engineers in the Army Missile Command Research and Development Directorate.

The Army Inertial Guidance and Control Laboratory sponsored the course with regular classes held during the last month.

Dr. Kalman's visit culminated the course which was designed to acquaint the students with filtering and prediction problems in engineering and the various methods of solution.

The distinguished lecturer is the Professor of Mathematical Systems Theory and Operations Research, Department of Operations Research, Stanford University.

He is noted for his technical originality and versatility, volume of work published, definiteness of published investigations and the importance of engineering application. While associated with industry in 1954-55, he conceived, designed, built and tested the

world's first explicitly self-adaptive computer controlled system.

In recognition of his original and timely contributions which have been used in every major U.S. space project, Dr. Kalman was named outstanding young scientist of 1962 by the Maryland Academy of Sciences.

He received his bachelors degree in electrical engineering at the Massachusetts Institute of Technology in 1953, his masters degree from M.I.T. in 1954, and a doctorate from Columbia University in 1957.

Youth Band Kicks Off Summer Concert Series

Sunday afternoon band concerts will be a feature at the Army Missile Display Area on Redstone Arsenal.

Beginning last Sunday, the 2:30 to 3:30 p.m. summer concert will feature the Huntsville Youth Band, Huntsville Concert Band and the 55th Army Band, rotating in the order listed.

The Huntsville Youth Band, which began the series, was accompanied by some 30 performing majorettes. Members of the band

are 9 through 17 years of age. The aggregate is sponsored by the City of Huntsville Police Department.

The repertoire Sunday was popular music.

The outdoor concerts will be presented in front of the Army Display Building which is located just South of the intersection of Bob Wallace Avenue and Jordan Lane. A shaded area will be provided for the audience. The display area is open from 1 to 5 p.m. on Sundays.

HALL OF HEROES CEREMONY — President Lyndon B. Johnson talks with the four men presented the Medal of Honor at dedication ceremonies for the "Hall of Heroes" in the Pentagon. The presentations to (l to r) Air Force Captain Gerald O. Young, Boatswain's Mate 1st Class James E. Williams, Marine Sergeant Richard A. Pittman and Army Specialist Five Charles C. Hagemeyer marked the first time that men representing each of the Armed Services had been so honored together.

Commendation Medals Go To 14 Officers, Enlisted

The Army Commendation Medal has been presented to fourteen officers and enlisted personnel in recent awards ceremonies in recognition of their meritorious performances of assigned duties over extended periods of time.

One of the presentations represented the second Oak Leaf Cluster to Maj. Thomas E. Bearden. Maj. Bearden was cited for service as Research and Development Coordinator for the ARPA Division with duty in Quebec, Canada.

Three of the honorees have since left Redstone for overseas tours. CW3 William B. Thomas is now in Vietnam after having been assigned to the Supply and Maintenance Directorate, SSG Hollis L. Jett is also now in Vietnam while SP6 Tommy J. Terry is with the Army in Germany. Both of the latter two were with the Military

Personnel Division while at Redstone.

Other enlisted personnel recognized for outstanding performances were, SP5 James L. Swigert, SP4 Dennis C. Van Landuyt, and SP4 Robert A. Szabados. All were cited for service with the Research and Development Directorate.

LTC Robert T. Ash, Jr., and Maj. Bernice L. Vaughn have retired from active service while Capt. James N. Mitchell and 1 Lt. Robert C. Allen, Jr., have been released from active duty.

Col. Ash was cited for service as Chief of the International Logistics Office in the Supply and Maintenance Directorate while Maj. Vaughn was with the System Support Division of the SAM-D Project Office. Capt. Mitchell, a research physicist, was with the Metrology and Calibration Center and Lt. Allen served with the National Inventory Control Point.

Three other officers cited for their performances are still with Missile Command organizations.

CPT Richard Sklenar is with the Maintenance Engineering Division of S&M, CPT Armand T. Kelly, III, is assigned to the Missile Intelligence Directorate, and 1 Lt David E. Miller, is an R&D Coordinator in the Lance Project Office.

ONLY THREE TO GO!—SFC Anthony Passero (left) reenlists for three more years in a ceremony at the Army Missile Command. A medical specialist at the Redstone Army hospital, SFC Passero already has served more than 27 years in the Army. Administering the oath is Maj. Sarah E. Perkins, Chief of Nursing Services. Looking on are members of the medical detachment team, Sp/5 Rodney Thrasher and Sp/5 Walter Wicker.

Civilian Hitting Stars On Enforced Vacation

Peavey And Alongi Tough On Averages

Between the rain and the stout efforts of a couple of opposing pitchers, hitting became almost a lost art in CWF Hi-Pitch Softball league action last week.

All four of the games scheduled for Tuesday evening had to be cancelled while Doug Peavey and Bob Alongi extended the batting silence through the rest of the week with sterling mound jobs on Thursday.

The first half winning Finance and Accounting crew was the only team that refused to follow the script as they banged out 24 hits good for a 16-12 win over the Comp Center.

Peavey limited Pershing to four well-scattered hits in pitching Data Processing to a 5-0 shutout win, and Alongi blanked all but one of the Metrology hitters in hanging up a 4-2 win.

George Williams matched Peavey for two innings before surrendering a run on Bob Hall's double in the third. Hunter Horton doubled home a pair of fourth inning scores and Ken Beam drove in another to give Peavey all the working margin he needed.

Beam, Horton and Hall each contributed a pair of safeties to the DPO attack while Gary Mann protected the shutout with a sterling defensive game at shortstop.

But for Jim Parker, Alongi might have duplicated the shutout feat for the G&C Lab as he and Bill Burrin locked up in a duel, each permitting just six hits.

Parker got half of the Metrology hits and scored both of the runs while Dick Roberson delivered a pair of solo home runs to the G&C attack. Roberson also singled in the first run of the game.

Hal Jacobs and Russ Ward were almost as productive as the rest of the league by collecting nine hits between them. The former connected for singles in each of his five trips while the latter had three doubles and a grand slam homer in his five trips.

Johnny Johnson was the recipient of all the offensive support and he made good use of it in hurling the Accountants to their eleventh straight win. Roberts and Smith kept the game interesting with three out of four apiece and between them, they drove in six runs.

CARRY REDSTONE COLORS—The Redstone Arsenal All-Stars are in South Carolina this week where they are participating in the Third Army championships at Ft. Jackson. The local players, selected from their performances in the Unit Level league, made their first start in the double elimination meet last evening. Team

members are, left to right, (front row) Chuck Graeber, Parris McGhee, Jerry Knapp, Walt Brandon, Jim Keppy, Bob Powell and Shelly Berryman; (Back Row) Ben Shelton, Mike McKenzie, Dick Tetzlaff, Tom Kaminski, Fred Helmer, trainer Stan Dorff and manager Gene Cagle.

MAN WITH MANY HATS—J. H. Cranford, Chief of the Community Services Office, the Retired Activities Office, coordinator for the Veterans Administration counselling service on post, and soon the Army Emergency Relief, is quartered in the same building as the lending closet—one of the Community Services activities—Bldg. 3656. The move from the Arsenal Support Directorate's Headquarters building was designed to place these services nearer the center of other troop activities. The building in which these services are now housed is right behind the Rod and Rake Shop. Much of Mr. Cranford's work is counselling both dependents of military men serving overseas, and active and retired military members of the community.

G.I. Bill Requests Now Help Student Avoid Rush

Apply now for your Veterans Administration Certificate of Eligibility and avoid the fall rush.

So Neil R. Smart, Manager, Montgomery VA Regional Office, advises veterans who plan to enter school this fall under the G. I. Bill.

Veterans already in training under the G. I. Bill who plan to change programs or schools this fall must obtain new Certificates of Eligibility from the VA.

The principal advantage to the veteran of heeding advice to apply now is that he can be certain that his G. I. Bill education allowance will be dated from the day school begins. If he fails to apply for the certificate until after school has started, there may be a delay in payment of his allowance, according to the VA.

To obtain a Certificate of Eligibility, a veteran planning to enter school or training for the first time under the G. I. Bill should get in touch with his nearest Veterans Administration office.

A veteran who requires another certificate because of a change in program or school should contact the VA Regional Office which maintains his records on file.

A veteran who is not changing programs or schools need not obtain another certificate.

Promotions To E-8, E-9 To Be Centralized Soon

WASHINGTON (ANF)—The selection of enlisted men for promotion to grades E-8 and E-9 will be centralized at Department of the Army Headquarters.

DA Message 871517, sent to the field July 9, announced that the centralized system was approved to assure the most equitable system for the selection and promotion of the best qualified individuals to the top enlisted grades in the Army.

Promotions to the grade of E-9 under the new system are scheduled to begin on or about Jan. 1, 1969. Promotions to E-8 under this plan are scheduled to begin on or about March 1.

Enlisted promotion selection boards will not be convened after July 31 for the purpose of selecting individuals for first-time inclusion on a standing promotion list to the grade of E-9. For E-8, the cut off date will be September 30.

Individuals who now have promotion list status to those grades, or who gain it before the respective cut off dates, will retain that status and upon transfer will continue to be integrated on existing promotion lists of gaining commands until further notice.

The first zone of consideration for centralized promotions to E-8 and E-9 will be comprised of only those E-8s and E-7s who have attained promotion list status on or

before the cutoff dates.

Enlisted personnel who are not promoted before the new program begins and who are not selected for promotion by the initial boards convened at DA will no longer retain a recommended list status. They will, however, be considered by future selection boards under the same criteria as all other E-8s and E-7s.

As vacancies occur and quotas are received, promotions to grades E-8 and E-9 will continue to be made on a monthly basis from current standing promotion lists until further notice. It is now planned that this notice will be given on or about the dates on which the new centralized system will go into effect.

rent standing promotion lists until further notice. It is now planned that this notice will be given on or about the dates on which the new centralized system will go into effect.

Training Device Cuts Costs, Simulates LAW

Army military and civilian weapon experts are enthusiastic about a new training device developed by the Army Missile Command which simulates the performance of the M-72-A-1 weapon system, better known as the LAW (Light Anti-tank).

They saw the miniature training device in action at the Missile Command last week during an In-Process Review in which the Army reviewed the system prototype. What they saw was a series of firings with the trainer in which direct hits were scored against stationary targets at 200 meters range.

Larry Nicastro, Chief of the Small Rockets and Aircraft Armaments Branch, fired the first shot during the demonstration and scored the first hit. Later, Capt. Richard McKinnon of the Infantry School at Ft. Benning, scored direct hits in a display of precision shooting.

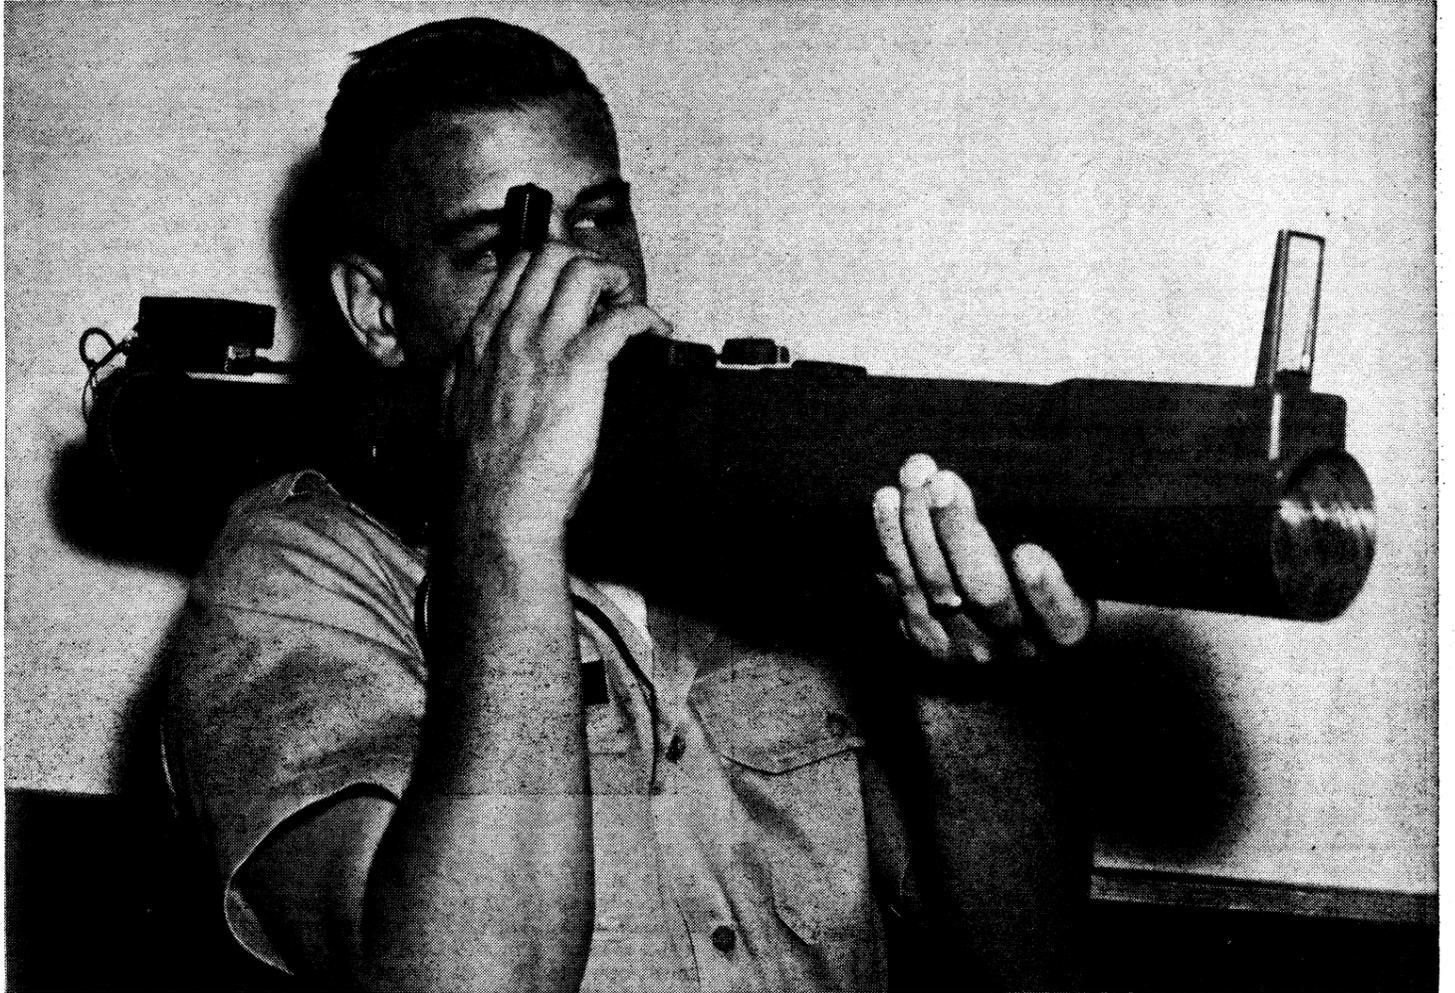

All firings were conducted under direction of the Missile Command's Test and Reliability Evaluation Laboratory.

Army officials said the trainer is being delivered to the Test and Evaluation Command for Engineering-Service Tests.

The trainer consists of a kit, installed in the basic LAW launcher, which can fire a miniature training rocket. The tiny rocket, about eight inches long and one-half inch in diameter, simulates the performances of the LAW rocket and carries a spotting head which flashes on impact to mark the target hit.

Once fielded, the device will give soldiers realistic training experience at considerably less expense than normal rounds cost, the Army said.

The M-72 itself is a highly versatile weapon which weighs less than five-pounds, is shoulder-fired and

SCORES DIRECT HITS!—Capt. Richard McKinnon shows the correct firing position for the M-72-A1 weapon system, called the LAW (Light Anti-tank weapon). Using a training kit which fits in this launcher and fires a miniature rocket, the Fort Benning soldier

last week fired several shots and scored direct hits against targets on a Missile Command range. The training device was developed by the Missile Command "to give soldiers realistic experience at considerably less expense than normal rounds cost."

can be used against bunkers, snipers or field fortifications. It is deployed in Vietnam and with Army units elsewhere.

LAW was developed and deploy-

ed under Missile Command management and subsequently turned over to the Army Munitions Command. Hesse-Eastern, division of Norris Industries, was the development contractor and is also doing work on the new training device.

Management of the training device program is being directed under Howard Cox of the Land Combat Commodity Office at the Missile Command. Project Engineer is Jim Howison of the Small Rockets and Aircraft Armaments Branch, Development Division, of the Missile Command's Research and Development Directorate.

Photos Limited Only By Imagination Of Men

"What can be done in photography is limited only by the imagination."

So says Jim Clayton, whose crew in the photo branch at the Missile and Munitions Center and School has 85 years of experience to draw from when exercising their imagination.

The photo lab, part of the graphic arts division of Training Aids Department, is charged with providing visual communication in support of training devices to be used in the classrooms of MMCS. This requires a wide variety of assignments, some routine and some highly unusual or demanding.

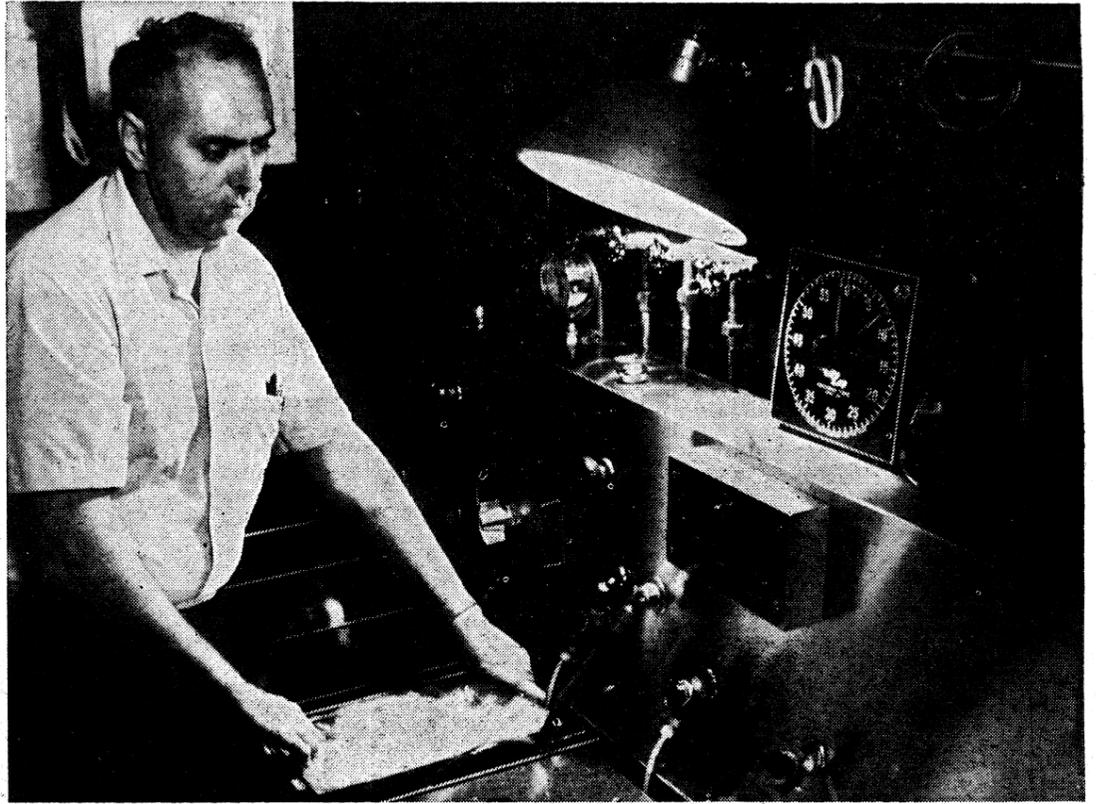

About 90 per cent of the workload for Clayton and his four technicians is color photography and

commonly involves projectionable slide material to be used in the classroom instruction block.

The men behind the equipment are Clayton, Dave McKee, Bob Nichols, Zane Hathcock and William Anderton. Also assigned to the branch are SP5 James Denton, who is currently serving temporary duty as a lifeguard, and SP5 Ray Harp, a still photo lab specialist on leave to the NCO academy.

"If it's photographic, we can handle it," insists Clayton about his outfit. "It just takes hard work and extensive study to achieve a professional end product."

Their skills are backed by the very latest in modern equipment, including three fully equipped laboratories—one exclusively for

BOB NICHOLS

color. A \$7,000 automatic optical printer is capable of producing animation, microfilm, or slides from masters ranging in size from eight millimeters to 30-by-40 inches.

"In fact," says the chief, "we're the first known Army photo lab to have the capability to produce color wall chart of that size (30-by-40)."

Also, the MMCS photo branch is listed as a qualified source of advice on visual communications by the Professional Photographers of America, (PPA), which maintains a directory for the exchange of professional information.

"Due to our extensive technical library and combined experience, we can provide assistance for amateur or professional photographers anywhere," explains Jim. "We get calls from all over

... here on post, and also from people all around the United States wanting to know what techniques we might employ in various situations."

The workload at MMCS has brought some interesting assignments for members of the photo lab. "We've had the privilege of 'hedge-hopping' before," chuckles McKee, as he recalls the helicopter flights required once on a study of camouflage methods in support of unit training.

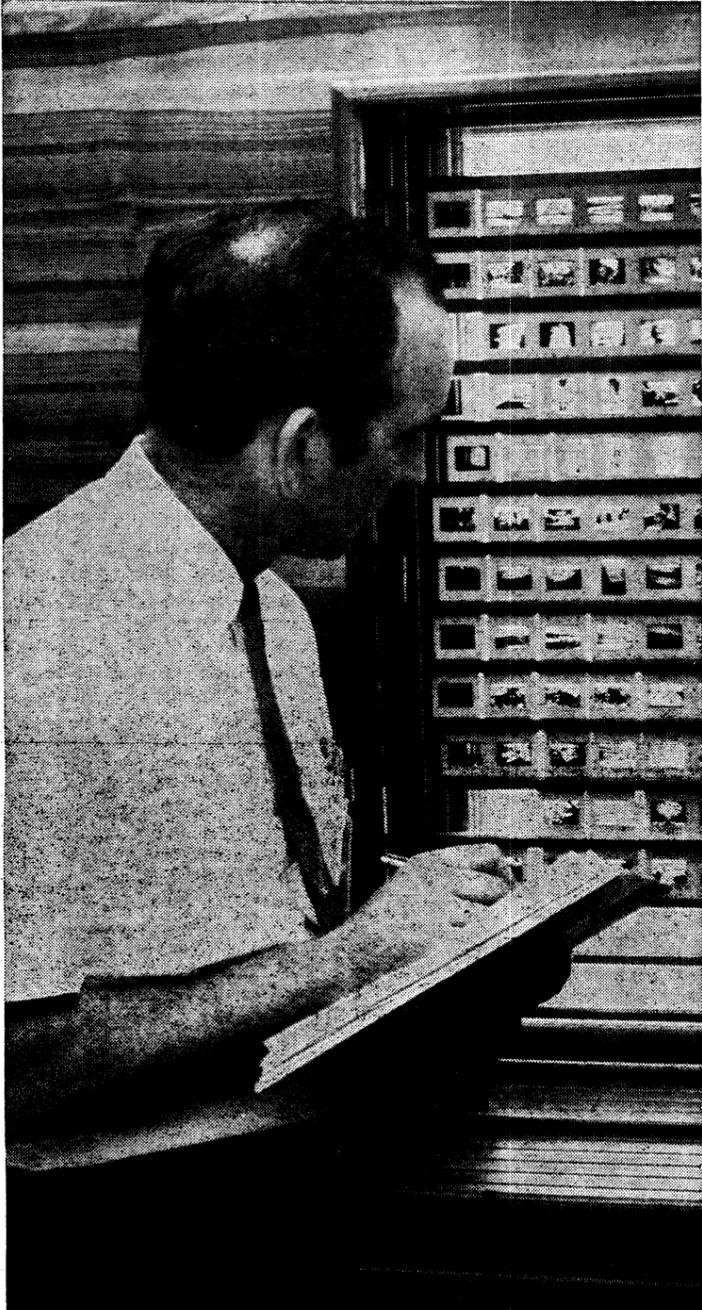

The opportunity has arisen several times to photograph well-known public figures such as President John F. Kennedy, President Johnson when he was vice-president, Vice-president Hubert Humphrey, former Alabama governor George Wallace, and Huntsville-born celebrity Tallulah Bankhead.

Another assignment remembered well by Anderton and Clayton was at a chemical warfare training site when they returned to the scene of shooting too quickly and got a big dose of tear gas. "You might say our work sometimes makes us cry," quips Anderton.

Clayton, who proudly possesses an outstanding performance rating, began his shutter career 23 years ago as a "hypo-boy" (developing) in a local portrait studio in Tupelo, Miss. Married by the time he graduated from high school, he began his career in government photography at Keesler Air Force Base in nearby Biloxi, then shifted to Fort Bragg, N.C., to film for the 82nd Airborne.

There he had the most fantastic experience of his career while

(Continued From Page 8)

doing aerial shooting of a troop drop; one of the planes crashed and Clayton was one of two men with a camera to record the tragic

results on film.

After returning to Biloxi, Jim came to Redstone in 1958 when the Ordnance Guided Missile School (now MMCS) was founded and the photo lab established. Now a resident of Arab, he has done his own studio work and worked

actively with professional organizations toward a masters' degree in photography.

One of the highlights of his career came last year when he was selected to lecture on the program of the annual conference of the Southeastern PPA in Atlanta. His talk on methods of improving communication through variety in visual aids earned him two merits toward his master's diploma.

Anderton, known by all as "Andy," came to Redstone in 1956 as a motion picture photographer in the main post photo department. He shifted to the MMCS branch three years ago, and is in his twelfth year in the field since starting it as a high school hobby at Arab.

McKee obtained training in Denver, Colo., and at the Leica school in Germany as an Air Force photographer for six and one-half years. Through a 14-year photo career, he has progressed from Dayton, Ohio (Wright-Patterson AFB) to his own studio in Elkhart, Ind., then to a Huntsville-based engineering company. After a year at the Marshall Space Flight Center, Dave joined the MMCS staff two years ago.

Hathcock—whose middle name is Gray and nickname "Shotgun"—looks back on 16 years since

schooling under the auspices of the Department of Agriculture in Washington, D.C. He undertook such work as murals and aerial photography for the U.S. Forest Service before coming here in 1960.

Zane also served in the Marine Corps during WWII, earning a personal letter of commendation from Secretary of the Navy James Forrestal and a Presidential Unit Citation in the South Pacific. He was recalled during the Korean conflict, which brought another Presidential Unit Citation and a Purple Heart.

Nichols' career dates back 20 years, from the time he began shooting weddings "on my own" in Omaha, Neb. He accepted subsequent posts at an ammunition

post in Meade, Neb., at Fork Crook (now part of Offutt AFB) in Omaha, as lab chief at White Sands missile site in New Mexico, and in the University of Arkansas public relations department before starting at MMCS in 1965. An interesting recollection for Bob is the still shooting of many famed actors in road shows which appeared live in Omaha.

This award-winning staff is proud of its achievements and production abilities. The control chart shows them one month turning out 11,083 units, well above their average of 7,000 and the Army-wide norm of 3,000 per month.

It's amazing what the imagination, put to hard work, can do—especially in photography.

House Armed Services Unit Approves Courts Martial Bill

A bill which proposes the creation of single-officer general and special courts-martial, among other changes to the Uniform Code of Military Justice, has been approved by a House Armed Services subcommittee.

Enactment of the proposed legislation, supported by the Department of Defense, would permit the procedure for trials by special and general courts-martial "to conform more closely with the procedure used in the trial of criminal cases in the U.S. district courts."

This would "enhance the prestige and effectiveness of the law officer so that his judicial stature and authority in the courtroom would more closely approximate that of a civilian trial judge," according to Maj. Gen. Kenneth J. Hodson, Judge Advocate General of the Army, who appeared before the subcommittee for the Defense Department.

Designed to speed up military trials, the bill has also gained the support of the American Bar Association and the Federal Bar Association.

Other amendments to Chapter 47 of the Uniform Code of Military Justice contained in the legislation call for:

- Granting authority for the accused to waive a hearing before court members and be tried by the law officer alone—comparable to jury-waived trial in federal district courts;

- Providing the law officer with authority to make final rulings on matters customarily determined by the judge, not the jury, as in civilian proceedings;

- Providing for pretrial open recorded sessions by a law officer to consider and dispose of any procedural matters before members assemble;

- Permitting the law officer to hold an open recorded post trial session without members to act upon such matters as remands issued by appellate military courts;

- Requiring that the accused in a bad-conduct discharge trial be represented or afforded the opportunity to be represented at the trial by legally qualified counsel before a special court-martial may adjudge a bad conduct discharge;

- Permitting the appointment of law officers to special courts-martial;

- Extending from one to two years the time within which a new trial may be granted in cases reviewed by a board of review.

According to Gen. Hodson's testimony, the new powers for law officers in the proposed legislation would assure "there will always be a court open just as there is in the federal civil system. Every convening authority will be a 'courthouse' and we will always be able to designate a judge to act on interlocutory matters that are remanded by an appellate military court."

The general said the need for the proposed amendments developed in part "from a series of decisions by the United States Court of Military Appeals which have expanded the role of the law officer and placed upon him responsibilities virtually as great as the responsibilities borne by federal district judges in conducting criminal trials."

MAIDS OF COTTON—The Maid of Cotton for Madison County, Kathy Davis (right) and the runner-up, Linda Hardenburgh (left) are both daughters of Army employees at the Arsenal. Linda Petri (center) is the County's Maid of Cotton for 1967. Miss Davis, an 18-year-old architecture major at the University of Tennessee, will compete Oct. 11-12 with other Maid of Cotton winners from Alabama counties in a televised program in Mobile for the State title. Miss Hardenburgh is a language major at Emory University.

Miss Davis is the daughter of Mr. and Mrs. Martin Davis. Her father works in Civilian Personnel for the Army Missile Command. Linda Hardenburgh's mother works in the Secretary Office at the Missile and Munitions Center and School, and her father, Miles Hardenburgh, is in the Quality and Reliability Management Office, Missile Command.

"GOTTA HAND IT TO THOSE RE-FUELING BOYS, GORGAN - SERVICE WITH A SMILE!"

YOU CAN'T KEEP A GOOD MAN DOWN! SFC Grady W. McDaniel takes the reenlistment oath for the fifth time June 28 while lying in the hospital with a case of pneumonia. Administering the oath is commanding officer of MMCS Company D, Lt. Henry Levy, while 1st Sgt. Malcolm Carr and nurse Jean Grady witness.

Not Rain, Nor Sleet Nor Pneumonia Defer Re-Up

Just like the mail, some things must go on.

So, a little case of pneumonia didn't stop Sgt. 1st Class Grady McDaniel from carrying out his reenlistment exercise recently. He took the oath from Lt. Henry Levy, commanding officer of Company D at the Missile and Munitions Center and School, while in bed at the Redstone Army hospital!

A 38-year-old intelligence NCO in the MMCS Security Division, Sgt. McDaniel added the fifth extension—and last, he says—onto an 18-year career. His service has carried him around the world to such assignments as Korea three times, Germany, Puerto Rico and Panama. He came to MMCS last year after duty with Headquarters Company of the 8th Army G-2 in Korea.

Sgt. McDaniel has earned the combat infantryman's badge, Army Commendation medal, purple heart (Korean Conflict) and Good Conduct medal, along with various service ribbons and decorations. A native of Atlanta, Ga., he belongs to the Shriner's India Temple in Oklahoma City, Okla., and Blue Lodge 540 of Lawton, Okla.

University To Build New Student Union Building

Construction of interim student union facilities at the University of Alabama in Huntsville is expected to begin in about six weeks, according to Philip M. Mason, assistant to the executive vice president. Estimated cost of construction is \$384,000.

The building was designed for maximum functional flexibility. Most of the ground floor is separated into four areas by moveable, soundproof partitions which can be opened and closed electrically. This entire area can be opened up for dining, seating a maximum of 700 people, or for a play or an assembly, seating approximately 800 persons.

Likewise, the partitions can be closed to provide separate areas in which dining, volley ball, basket ball, gymnastics, art exhibits, and various other activities can be carried on at the same time. A book store, showers for men and women, and a snack bar are located on the first floor.

On the second floor, space has

been allotted for the student news-

paper, Student Government Association, meeting rooms and offices.

The new building will be located south of Morton Hall adjacent to the present student parking lot, and near the new library and science and engineering building now under construction.

Spending your leave in the airport?

Sometimes it seems that way. But with TWA's 1/3 off reserved-seat plan, there's no more waiting around for a flight. Just wear your uniform and have your leave papers with you when you buy your ticket and when you travel. The 1/3 discount is yours along with a guaranteed seat.

If you still want the 50% standby, TWA has plenty of jets from where you are to hometowns all over the U.S. And if you are on emergency leave, you get confirmed round-trip reservations for the 50% fare.

TWA knows you've got more important things to do with your leave than hang around airports. TWA information is available at your Joint Airlines Military Traffic Office (JAMTO). Building 3684, Post Transportation Office. Tel.: 876-5851.

Advanced Training Takes Thirty-Five Off Of Jobs

Thirty-five Department of Army civilians at Redstone have been named to take advanced courses of study under the Command's career development program administered by the Training and Development Division of Civilian Personnel.

They will be away from their normal duty stations for periods of time ranging up to four weeks.

A large majority of the local personnel will be taking courses offered by the University of Oklahoma at the campus in Norman, Okla., and in Washington, D.C.

Of these James Richard and Bill Pales (Msl Intel) are enrolled for Problems in Public Administration, and Conrad Eadon (Msl Intel) and William Marr (C&DP) are attending the Seminar in Problems of Motivation. All four will be at the campus in Norman this week.

A group of six will spend three weeks in Norman for the Natural Science Seminar and seven others will be there the same time for the Social Science Seminar.

In the former group are Dewey Rusk and Leo Oliver (DASO), Jerry Brookshire (Mgt Sc), Robert Mercer (P&P), William Murray (Dragon) and Solomon Luna (S&M).

Attending the Social Science Seminar are, Glen Riggs, James Hodges, and John Spenik (S&M), John Irvin (Pershing), Kenneth Hunsicker (DASO), Dawson White (C&DP) and William Burney (Sergeant).

Nine Arsenal personnel will go to Washington for the University's Computer Systems in Public Administration course.

They are, Raye Stanley and Jere Ducote (R&D), George Martin and Joseph Powell (S&M), Darrell Albert (Msl Intel), Sammie Hardy (Lance), Ronald Wicks (SAM-D), William Anderson (P&P), and Donald Jackson (SENSCOM).

TWO SHOWS SET

Two big Stage Shows are on program at the Service Club for the coming week.

Sunday at 8 p.m. Tani and her Variety Show will return for their monthly engagement with new performers being added each month.

Tuesday at 6:30 p.m. "The Spider Web" an all girl rock 'n roll band will present a show. This lively group of girl musicians will feature a male vocalist, John T. Thunder, who has traveled with the girls overseas and throughout the United States.

at Ohio State University while Joe Hunter and George Dezenberg (R&D), and Milton Hawie (SENSCOM) are at the University of California in Los Angeles for Theory and Applications in Modern Optics.

Jerry Hagood (R&D) is taking Modern Theory of Communication

The remaining five locals are taking their advanced training in individual missile systems at con-

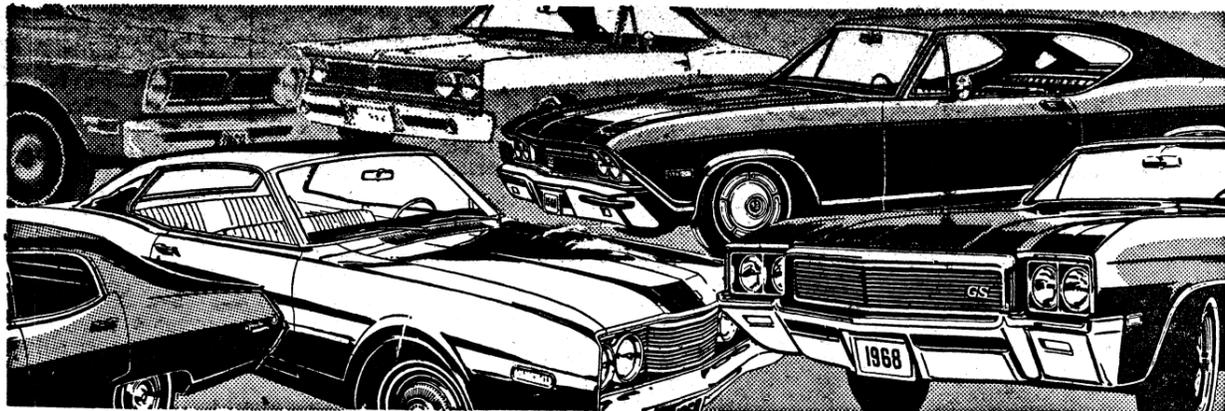

tractor plants.

Arthur Scheren (MMCS) and Robert Emrick, Carl Perry and Billy Lay (S&M) are taking the Ballistic Missile Electro Mechanical Repairman (Pershing) course at the Martin Company plant in Or-

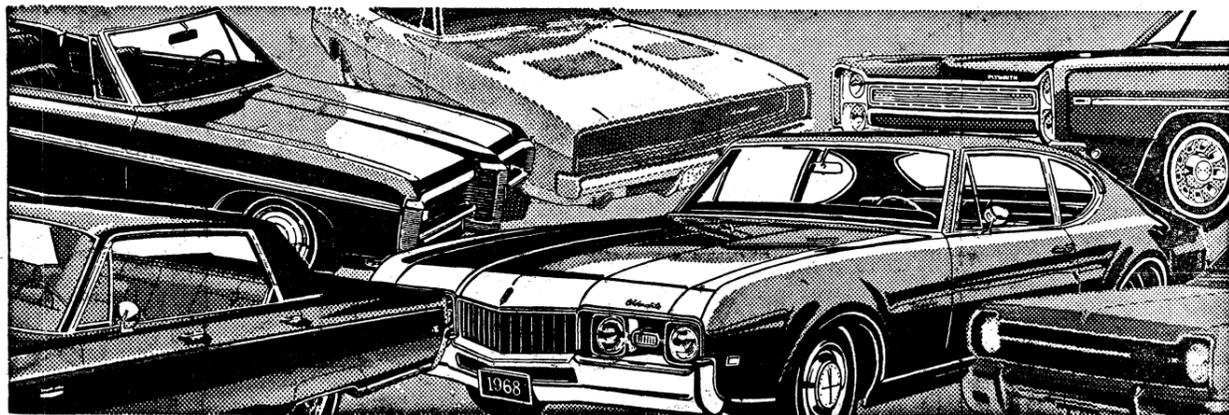

lando, Fla.

Completing the list is James Hinkle (Hawk) who is taking the New Equipment Training course on the Improved Hawk with the Raytheon Company at the White Sands Missile Range.

MAKE YOUR CHOICE . . .

And Finance It At Your Credit Union

The news is out! New '68 models, in local dealers' showrooms, are really something special. Now . . . wouldn't you like to be in the driver's seat of a brand new car? We make it easy!

Look them over . . . take your choice of those great new '68s. Then, ask your Credit Union to finance your car. For fast service and money-saving convenience, our Auto Loans are something special, too. You pay only 8/10% per month on the unpaid balance. Get rolling in a new '68 . . . see us, soon.

Borrower's Insurance is afforded eligible members at no additional cost . . .

Welders Needed At Anniston Depot

The Interagency Board of U.S. Civil Service Examiners for North Alabama is accepting applications, effective immediately, for the position of Welder, \$3.02 to \$3.36 an hour.

Acceptance of applications for these positions will be until further notice.

Persons who are interested in employment and are qualified as journeymen welders are urged to submit applications for an evaluation of qualifying experience.

Most of these positions are located at the Anniston Army Depot, Anniston, Alabama. Vacancies in other Federal agencies and installations in the North Alabama area may also be filled from this register.

All qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

File Application Form 171 (or SF-57) with the Interagency Board of U.S. Civil Service Examiners for North Alabama, 806 Governors Drive, S.W., Huntsville, Alabama, 35801.

• The Department of the Army has established April 23, 1908, as the official birth date of the U. S. Army Reserve. Congress created the Medical Reserve Corps on that date as part of the Medical Department of the U. S. Army, Providing a reservoir of trained officer personnel in a reserve status. This was the first Congressional recognition of the Army Reserve, although its civilian-soldier tradition began in the early days of United States history. (ANF)

● DIRECTIONS ●
SHERBROOKE PARK is located just across the river from Redstone Arsenal. Go over the bridge and take the 1st right, then take the next left and that will take you to Sherbrooke Park. Use map at left.

WINS TOP SOLDIER—Sp4 Walter Krueger smilingly receives the Post Soldier of the Month award from Col. Anders O. Wiklund, Acting Deputy Director, Arsenal Support Operations Directorate. Sp4 Krueger, recently completing training in the area of Nike equipment repair at the Missile & Munitions Center & School will be a guest of Huntsville Chamber of Commerce this weekend. His civilian education includes two years at Wenatchee Junior College, Wenatchee, Wash., and a year of attendance at Gonzaga University, Spokane, Wash.

For the first time since World War II, AMC's Watervliet Arsenal is manufacturing production quantities of naval guns.

Receipt of more than \$3 million in U.S. Navy orders has made Watervliet recall World War II days when Arsenalites turned out hundreds of naval weapons—ranging

from four-to-16-inch monsters which armed the Navy's mightiest battleships.

The Arsenal, a Weapons Command installation, is now making 100 tubes for the 22 ft. long 5-inch guns which provide main and secondary armament for destroyers and 36 liners for the 37 ft. Mark

16 8-inch weapons used aboard heavy cruisers.

Drive Safely

DISTINGUISHED GRADUATE—Maj. Jerry V. Marshall, right, receives the Baltimore Chapter of the Association of the U.S. Army medallion plaque, upon his selection as distinguished graduate of the Ordnance officer advance course, from Major General Charles W. Eifler, commanding general, U.S. Army Missile Command.
