EYES FOR SAM-D—Metal framework for a phased array radar antenna in the Army's SAM-D missile system is readied for electronic circuitry at Raytheon Company's Missile Systems Division, Bedford, Mass. Raytheon is prime contractor for the U.S. Army's new air defense system, now in advanced development. SAM-D (for Surface-to-Air-Missile Development) will be designed primarily for a battlefield defense role against high performance aircraft of the 70's but may be adapted for use in continental United States. The system will have a capability against short range missiles. Utilizing phased array radars, the SAM-D system will be capable of simultaneously tracking and acquiring multiple targets and controlling missiles while in flight. Phased array antennas, unlike earlier mechanical types, scan electronically by means of phase shifter elements that shift the direction of beams at the speed of light. Essentially, they look in many directions and perform many functions at once. These functions ordinarily require several radars in other systems. The SAM-D project is managed by the U.S. Army Missile Command, Redstone Arsenal, Alabama. Principal subcontractors on the program are Martin Marietta Corporation for the missile and Thiokol Chemical Corporation for the solid-propellant, single-stage rocket motor.

Some People Stay Home To Pursue Knowledge

People pursuing knowledge to advance their careers are scattered from coast to coast this week, but a sizeable number are staying right here to study.

Raymond Bissell, Elanson A. Douglas, William P. Frye, Keith D. Henson, George C. Hunkler, Winford Patton and Terry Smith are all studying Transition Training of Missile Maintenance Technician Pershing 1-A Weapons at the Army Missile and Munitions Center and School. They are all in the Supply and Maintenance Directorate.

Willis W. Deerman is at the Army Management Engineering Training Agency at Rock Island for two weeks studying Systems and Procedures Analysis while Adrian O. Marine and Leslie Sanders are studying Work Planning and Control Appreciation there for a week. All are from MMCS.

In St. Louis at the Army Aviation Command, two men from Safeguard Logistics Command and four from S and M are taking a week to review Implementation of AR 710-45. They are Ulric G. Phillips, Ray A. Herlston, Raymond J. Barber, Hansel C. Foosee, Irmagene H. Smith and Edna M. Zurbier.

Roy J. Phillips and Robert J. Masucci of the SAM-D Project

and Richard F. Allen of MMCS will be at the Army Logistics Management Center, Ft. Lee, for the next two weeks studying Research and Development Management Orientation.

At the School of Systems and Logistics, Wright Patterson AFB, Martin W. Atchison of the Safeguard Systems Command is studying Management of Value Engineering.

Glenn Ledbetter, Arsenal Support Operations Directorate, is attending a two-day seminar at the Naval Communications Unit of the Marine Corps Supply Center, Albany, Ga.

From MMCS, Vaughn E. Davidson is taking a two week Administration of Public Policy Course at Kingspoint, N.Y., and Robert W. Forgey is attending a one-week class on Principles of Structural Design Criteria at the University of California, Los Angeles.

William D. Hyman is enrolled in an Infrared Radiometry—Instrumentation Calibration and Precision Measurements course at the University of Michigan while Benjie H. Pinckley is enrolled in the Fifteenth Annual Tri-Service Radar Symposium and Billv G. Gibbs (See SOME STAY on Page 2)

NIKE HERCULES TO GET MOBILE HIPAR UNITS

The Army Missile Command has awarded a contract of \$9.1 million to the General Electric Company of Syracuse, N.Y., to produce mobile high power acquisition radar (HIPAR) for the Army's Nike Hercules air defense guided missile system.

Work under the program is to be performed at Syracuse.

The mobile configuration of HIPAR includes five vehicles in place of more than 20 used previously for transporting the radar system.

When HIPAR detects an enemy target as it searches the sky in a 360-degree sweep, target location is transferred to the target tracking radar which pinpoints it for intercept purposes. The missile tracking radar issues guidance and burst orders to the missile, which has a range of more than 75-nautical miles.

Now deployed around key areas in both the United States and overseas, Nike Hercules has proven successful in tests against high per- (See HIPAR on Page 2)

BLOODMOBILE

The Red Cross Bloodmobile will be in Bldg. 7110 today between 8:30 a.m. and 2:30 p.m.

Participation will help alleviate the anticipated need for blood over the long July 4th weekend.

McMorrow Labs Contract Goes

The U.S. Army District Engineer at Mobile announced today the award of a \$1,822,875 contract to D. J. Barclay and Company, Inc., of Gadsden, for the construction of a large addition to the Francis J. McMorrow Laboratories, a complex of laboratories and offices which houses the research and development directorate of the U. S. Army Missile Command.

Bids Asked For Housing

The U.S. Army Corps of Engineers at Mobile has called for bids on a contract to construct housing units at Redstone Arsenal.

Bids will be opened on July 10, the Army said, for construction of 30 additional family housing units for non-commissioned officers.

The three-bedroom units will be contained in 15 one-story duplex buildings of wood frame construction with wood lap and board batten siding. All will be individually air conditioned.

The contract has been set aside for award to small business concerns to assure them a fair share of Government work.

The addition, which is scheduled for completion in December 1970, will serve as an advanced concepts facility, where entire missile concepts will be proven out through the use of mathematical models and hybrid computers without the necessity of building prototypes. It will be a three-story concrete, steel and masonry structure with masonry and protected steel siding, containing 75,000 square feet of floor space.

In order to receive the best possible bid price, the Corps of Engineers (See LABS on Page 2)

Maj. Robert E. Wesson Becomes Troop Commander

Maj. Robert E. Wesson has become the Troop Commander for the Army Missile Command Troops.

The Major is a native of Attalla, Ala., and holds a bachelor's degree in business administration from Jacksonville State College.

He entered the Army in 1954 and has had overseas assignments in Korea and South Vietnam. Maj. Wesson returned from Vietnam in 1967 to join the staff of the Missile Intelligence Directorate here. For his actions in Vietnam, he was awarded the Bronze Star Medal. In 1968 he became executive officer of the National Inventory Control Point in the Supply and Maintenance Directorate.

Mrs. Wesson is the former Miss Frances M. Yates of Gadsden where her mother still lives. The Major's mother, Mrs. Harold Malcolm lives on Route 2, Attalla.

The Wessons have four children, two boys and two girls.

MAJ. ROBERT E. WESSON

TO LITTER IS TO LOSE—Pfc. Robert L. Dodd and Pvt. Michael J. Diorio display a sign which will be enforced by the Military Police. The Post Engineer has posted them at strategically visible points on Redstone Arsenal. Offenders who are apprehended will pay in U.S. Commissioner's Court. The going rate on Alabama highways is \$50 and many States are higher in enforcing anti-litter laws.

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesdays. The publisher will receive editorial content for publication in the Rocket only through the information Office, Army Missile Command, Redstone Arsenal, Ala., 35809, Bldg. 5250, Room A-136, Extension 876-1400 or 876-1500.

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, P. O. Box 346, Huntsville, Ala., 35804, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wanted—is 10 a.m. Monday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$7.42 a year, or \$4.00 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala. 35640.

Rocket Ruminations

Success is a rare paint, hides all the ugliness.

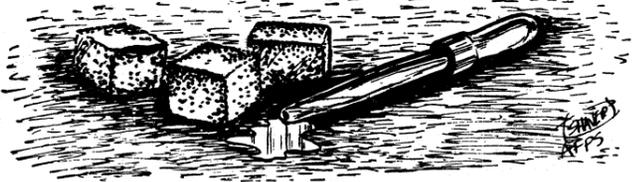

—Sir John Suckling

Lysergic Acid Diethylamide

One of the most popular of the hallucinogenic drugs in use today, especially with the young people, is LSD. The reason for its popularity is the belief that it will "expand the mind" or produce a thrill without the disadvantages of becoming habit forming.

While it is true that LSD itself is physically non-addictive, serious problems can be associated with its usage. The LSD user may go through a stage of panic, during which he is likely to be severely confused, depressed, anxious, or suspicious. The initial reaction to the drug may last from one to 12 hours, but symptoms may reappear spontaneously in a month or two or as long as a year or two after taking the drug. Therefore, the side effects of LSD, it seems, are of far greater danger to the user than the drug itself.

Contrary to the claim that LSD is a "consciousness-expanding" drug, it has been clearly demonstrated that it decreases the conscious functions. It, in fact, reverses the process by causing a decrease in conscious functions, distorts time sense, decreases an individual's ability to select and pay attention, and impairs critical objective judgement. It is true

that LSD does intensify sensations, but the momentary thrills are overshadowed by possible longterm, effects, which can lead to chronic mental derangement.

Legal ban on LSD went into effect in 1966, at which time are overshadowed by possible longterm, effects, which can lead Sandoz Laboratories stopped production. After they discontinued production the only available public source of the drug has been the black market. On this illicit market the drug may be obtained as a small white pill, as a crystalline powder in capsules, or as a colorless, tasteless, or odorless liquid in ampules. It is also quite often offered in the form of impregnated sugar cubes, cookies or crackers. Regardless of how it is acquired it will often contain impurities, and sometimes compounds like belladonna are substituted, which can result in a particularly gruesome form of death.

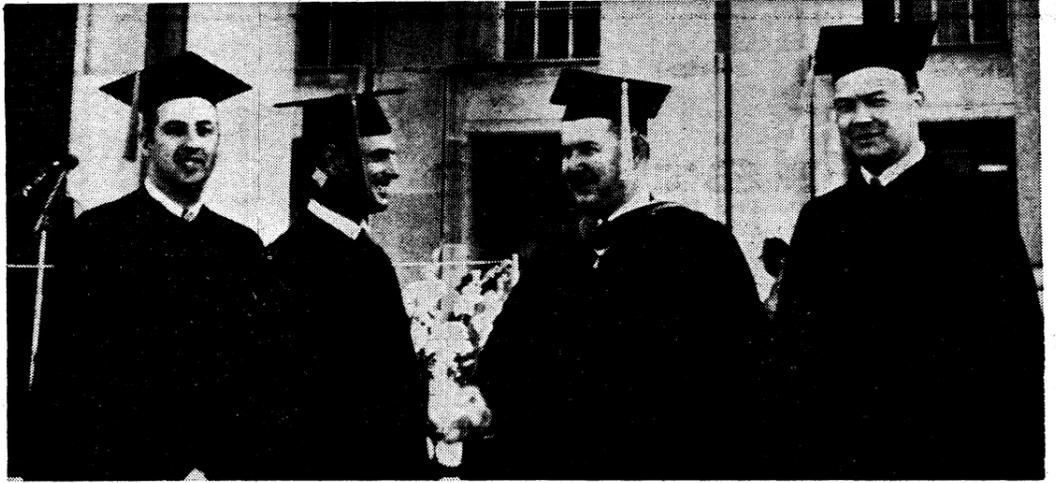

Pushers and users of LSD have made extravagant claims for the drug as a cure-all for alcoholism, frigidity, homosexuality, and many more, yet none of these therapeutic claims have been substantiated. It has been proven that LSD has been responsible for many attempted suicides, and homicides by individuals while under its influence.

Unless you would like to join that elite group of 'acid heads' and end up in some dark, damp gutter, think twice before you take that first trip. (AFPS)

EULOGY

For over six and one-half years, Lt. Gen. William B. Bunker was a principal in shaping the Army Materiel Command and in executing its many missions. His death, just fifty-five days before his scheduled retirement, comes as a grievous shock to all his colleagues and friends.

Gen. Bunker was a brilliant officer. An intellectual, engineer, administrator, and manager, he was admired and respected not only by his brother officers but by his wide circle of associates in the scientific, industrial, and educational communities. His contributions were legion; his dedication total; his love of the Army and his country manifest by his deeds and actions.

I know that every member of the Army Materiel Command is saddened by Gen. Bunker's death. Our prayers go to him and Mrs. Bunker. We can honor him best by carrying on with the same dedication and drive that he displayed so brilliantly throughout the entire life of his command.

MISSILE & MUNITIONS CENTER & SCHOOL

NAMES IN THE NEWS

by SP5 Ted Beattie

An old friend and former student returned to MMCS last week to begin a new assignment.

LTC Hans Seibold replaces LTC Hans-Joachim Behrends as liaison officer for the German Army students. LTC Seibold met with the school's Commandant, Colonel Paul B. Schuppener, Friday morning prior to beginning his duties.

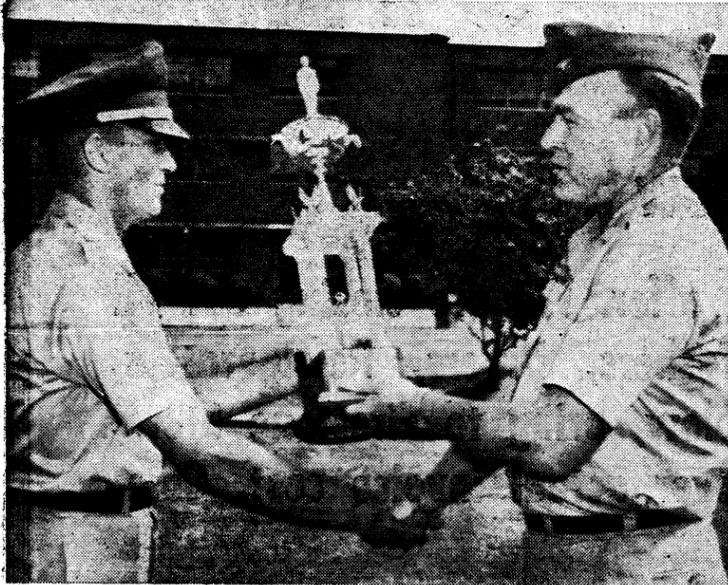

After attending the Guided Missile Staff Officers course at MMCS in 1960, LTC Seibold assumed the position as Director of Operations for a number of large ammunition depots of the U.S. Forces stationed

in Germany.

He entered the German Army in 1936 and has been working in the missile and ammunition field ever since.

BLOOD DRIVE — With overwhelming participation by MMCS soldiers, Redstone Arsenal went past its Bloodmobile goal again in May.

Personnel at the missile school donated 504 pints of blood which was 360 pints over the school's quota. The total number of pints donated by all agencies at the Arsenal was 853.

WINS AGAIN—For the third time in the past four months, Capt. Ronald C. Hale accepts the honor company trophy for the men of Charlie Company. Colonel John Henderson, Assistant Commandant, made the presentation during 1st Battalion Awards ceremony on Thursday.

GIVE BLOOD, WIN TROPHY—D Company's "Top", 1/Sgt Herbert Newell, accepts the 1st Battalion Blood Donor Trophy from Col. John Henderson, Assistant Commandant. Delta captured first place with the highest percentage of donations for the battalion.

American Red Cross monthly best unit participation trophies were won by two MMCS units. The 7th ETC with 138 donors (84.6 per cent participation) and the 5th ETC (36 per cent participation) were presented the Red Cross trophies. Both units are assigned to School Brigade's 2nd Battalion.

AWARDS — 1st Battalion held its monthly awards ceremony Thursday afternoon. For the third time in the past four months, Capt. Ronald C. Hale accepted the honor company plaque for the men of Charlie Company.

B Company won the honor company for April while C Company captured the battalion's top unit award the previous two months.

Delta's Commanding Officer, Capt. D. Brent Pope, and 1st Sgt. Herbert Newell, accepted the Blood Donor Trophy for May. The men of D Company led 1st Battalion in total percentage of donors.

An Army Commendation Medal was presented to SFC Ralph W. Spegal, who is assigned to B Company. Also of Bravo Company, SSG Charles M. Howard was awarded a Certificate of Achievement. SFC James M. Maze of A Company received an NCO Logistics Certificate.

The 1st Battalion Soldier of the Month award went to SP4 John R. Ralls of Charlie Company. SP4 Ralls moves on to MMCS competition.

REENLISTMENT NEWS — It was another active week in the missile school's reenlistment office. MSG Clayton Campbell and SSG Dean Britt completed "re-up" papers on five career men.

A 2nd ETC soldier, SSG Charlie E. Wilson, reenlisted Monday morning for four years. He has completed nine years of active duty. Taking the oath of reenlistment over the weekend were SFC George Allen (D Company), an instructor in the Shillelagh Branch, and SFC James E. Bolan, assigned to the 8th ETC and presently attending a missile course in the Land Combat Department, both took three more years. The two have completed 36 years of active duty between them.

"Re-upping" for four more years, SSG Hubert McGraw (7th ETC) has completed nine years of service. SFC Vernon P. Dorton (C Company) recently passed the 16-year mark in his military career as he signed up for another three. He is an instructor in the Hawk Division.

NCO ACADEMY — Scheduled to leave for the Third Army NCO Academy at Ft. McClellan this week are SSG Donald E. Van Vliet, SSG Thomas W. Miller, SSG Robert L. Morganflash—all of D Company, SSG Robert L. Harris (C Company), SSG Danny O. Lindsey (C Company) and SP5 Bryant McCreary (A Company).

PROMOTIONS — Two student officers were promoted during the past week. Capts. Robert M. Young and Happel D. Terrell received their double bars during ceremonies in Col. Keown's office.

LTC Robert D. Funke pinned CW3 bars on Grover B. Tucker Friday morning. Tucker is assigned to the Improved Hawk Section, Artillery Weapons Branch, in the Office of Doctrine and New Materiel.

Eight U. S. Army Reserve units will conduct their annual summer training at MMCS this year. The

NEW LIAISON OFFICER—Colonel Paul B. Schuppener, Commandant at MMCS, greets the new German Army liaison officer, LTC Hans Seibold. LTC Seibold arrived at MMCS late last week. This is his second tour at the missile school as he attended a three-month course in 1960.

first two of these eight, the 273rd Ordnance Company (Ammo) and 802nd Ordnance Company (Ammo), arrived over the weekend and started work immediately. The units will undergo training for a period of two weeks.

The 273rd's home station is Madison, Fla., while the 802nd comes to Redstone from Gainesville, Fla. A unit from Puerto Rico is slated to arrive the first week in July.

AER DRIVE — Col. Schuppener has designated the period of 15 June through 15 July for the 1969 Joint Annual Fund Campaign for Army Emergency Relief and Army Relief Society for MMCS. Assistance to military personnel Army wide last year reached over 42,000 families or individuals in the amount of almost five and a half million dollars. Forty-seven MMCS families or individuals benefited from AER in the amount of almost \$4,700.

LTC Charles M. Stone is the chairman of this year's campaign.

UNUSUAL ASSIGNMENT — It's not often that DA will assign two members of one family to the same unit—let alone at company level. But right here at MMCS there exists a very unusual group of assignments.

C Company claims the honor . . . SFC Roy Fosnight and his son, SP5 Roy Fosnight, Jr., are both instructors in the Hawk Division and both are assigned to Company C.

But there's more — SFC Fosnight's daughter (and SP5 Fosnight's sister) is married to LTC Charles Chapman's son, SP5 Michael Chapman. LTC Chapman is the chief of the Missile Division in the Officer Training Department while SP5 Chapman is a clerk in the Personnel Division. He is also assigned to C Company.

That makes a father, a son and son-in-law all assigned to the same company. Let's make it more complicated. What would you have with two fathers, two sons and a daughter all a part of MMCS? This would give you (hopefully) two fathers, two sons, one daughter, two fathers-in-law, one son-in-law, one daughter-in-law, one brother-in-law and one sister.

We are all one big happy family!

Two Air Force ballistic missile instructors from Vandenberg Air Force Base, California visited MMCS Tuesday. Capt. Raymond L. Florow and SMSG Dennis R. Owens observed teaching techniques used at the missile school and also received a briefing in the TV Department on the use of TV in training. The two visitors were given briefings on TV application in CONARC training and shown other courses offered to high-ranking officers.

Two new officers, 2Lt. William R. Singiser, Jr. is with the Student Officer Company, and 1Lt. Andrew W. Karlan is an instructor in the Munitions Division of OTD.

SERVICE CLUB

The Service Club has scheduled a tour of Marshall Space Flight Center Museum and Monte Sano State Park Saturday.

A bus will leave the Club at 11 o'clock for the museum. Picnicking and exploring Monte Sano Park are scheduled from 1 to 4 o'clock.

Enlisted men wishing to make the trip are requested to register at the Club.

RECEIVE SCHOLARSHIPS—(Left to right): Mrs. Raymond Hansette, chairman for education and scholarships for the Redstone Officers Wives Club, presents \$250 scholarship checks to James Sternsby who will be attending the University of Alabama, Cynthia Schoen, University of Wyoming, and Glenda Wray, Mary

Washington, all graduates from Butler High School. Kathryn McBride, a graduate from Huntsville High School who plans to attend Vanderbilt University, also received one of the scholarships. The merit awards were presented at the school last week.

Gen. Jones Named AMC Chief Of Staff

Maj. Gen. Leo B. Jones, former Chief of Staff and Commanding General, Support Troops, U.S. Army Vietnam, has been named Chief of Staff, Headquarters, U.S. Army Materiel Command (AMC), Washington, D.C., by Gen. F. J. Chesarek, AMC Commander.

A combat arms veteran of World War II and Korea, Gen. Jones has spent a large portion of his military career in artillery and logistics assignments. He served in both WW II and Korea with Field Artillery units. He has also served in the Pentagon and in Germany.

A 1941 distinguished military graduate from Iowa State University, Ames, Iowa, he later graduated from the Army War College, Carlisle, Pennsylvania, and the National War College, Washington, D. C.

Gen. Jones holds the Distinguished Service Medal, Legion of Merit, Bronze Star Medal, Army Commendation Medal, and a number of Service medals.

He is married to the former Embury P. Wilson of Baton Rouge, La. They reside with their two daughters in Alexandria, Virginia.

Engineers Celebrate 194 Years Service To Nation

The Huntsville Division of the U. S. Army Corps of Engineers celebrated Engineer Day last week, the 194th Anniversary of the Corps.

The Huntsville Division is located in the Huntsville Industrial Research Park and has the mission of the design and construction of the facilities for the nationwide Safeguard Ballistic Missile Defense System.

In addition to conducting an Open House for families of the HND personnel, Brig. Gen. R. P. Young, Division Engineer, presented certificates of service and pins to 32 employees in recognition of over 5 centuries of service to their government.

Heading the group of personnel were 30 year veterans Frederick A. Grazier, Aaron H. Bauman, Walter S. Worthington, George Hatch, and Bernard L. Trawicky.

Receiving 20 year awards were William L. Little, Gene T. Mahoney, Hugh J. Mellen, William R. Major, Wilbur J. Sheehan, Joseph B. Trotter, Dorothy W. Goldston, Geraldine G. Littrell, James A. Thomas, A. J. Mosley, Vernon Oden, and Louis Zingmond.

Recipients of 10 year awards were Mary M. Blalock, Kenneth W. Griggs, Billie W. Kellam, Alfred J. Knittel, Mary E. McKenzie,

David E. Rood, Raymond E. Segelhorst, Winslow C. Shoemaker, William O. Steading, George M. McLaurine, Jr., Doris W. Albright, Robert C. Kelley, Lenora E. Dyar, Neal G. Davis, and Hugh H. Sharp.

In addition to service awards, General Young presented an Outstanding Service Award to Olivine R. Rayburn and a Sustained Superior Performance Award to William N. McCormick, Jr.

In rural Malaya, time is traditionally expressed in picturesque phrases: "Many cocks crow"—3:30 a.m.; "The flies get busy"—8:30 a.m.; "Buffaloes wallow"—11:30 a.m.; "The buffaloes return to the shed"—6 p.m.; "The children are sleepy"—7:30 p.m.

Gen. Redling Becomes Deputy For AMC Logistics

Maj. Gen. W. N. Redling has been named the Army Materiel Command's (AMC) Deputy Commanding General for Logistics Support.

The former Commanding General, Army Transportation Center and Fort Eustis, Va., and Commandant of the Army Transportation School, assumed his new duties June 2 at AMC's headquarters in Washington, D.C. He will concentrate on AMC's support of the Army in the field.

He is a seasoned logistician who has held high command posts throughout his career including Commanding General, 1st Logistical Command, U.S. Army Europe, (USAREUR); Chief of Transporta-

tion, USAREUR; and Chief of Transportation, Department of the Army.

Other key assignments include Assistant Chief of Staff, G-4 and Chief of Staff, U.S. Army, Alaska; and logistical staff officer, Supreme Headquarters, Allied Powers, Europe.

AMC is responsible for the Army's wholesale materiel mission, including research and development, procurement and production, storage and distribution, inventory management and maintenance and disposal. In his new position, Gen. Redling controls the Command's operational readiness functions, distribution, transportation, maintenance, international

logistics, as well as the Army's nationwide depot system. AMC operates with a \$24 billion inventory and an annual expenditure of \$14 billion.

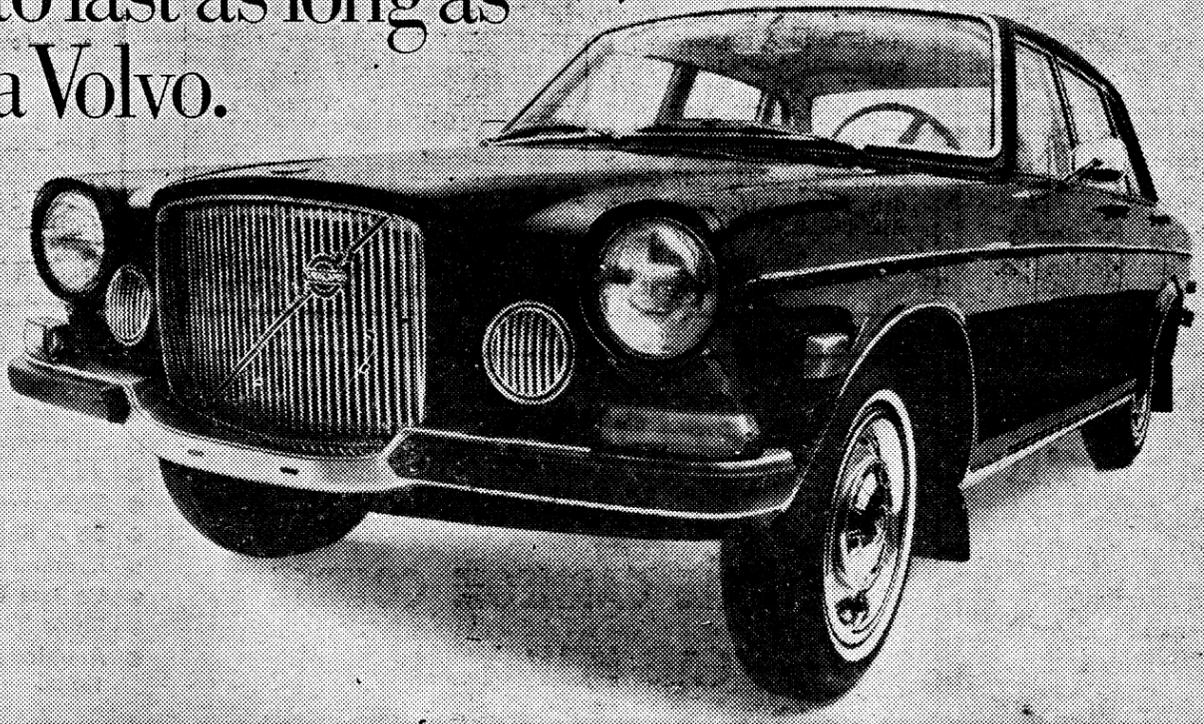

A combat veteran of World War II, General Redling following service in the Aleutian Islands Campaign, served with U.S. Marine Corps as Shore Group and Port Commander during the Iwo Jima Assault in 1945 and later entered Japan with the advance party of occupation forces immediately following the surrender.

He is a graduate of the Industrial College of the Armed Forces, Washington, D.C.

Gen. Redling resides with his wife, the former Phyllis Thomason of Anchorage, Alaska, in Fairfax County, Va.

At the deepest part of the ocean, the pressure is nearly seven tons per square inch—almost a thousand times the atmospheric pressure on the surface.

F&A Stops Comp Center, Tightens CWF Race

Willis' Hot Bat Sparks Accountants' 18-11 Nod

Finance & Accounting, knocked from the unbeaten ranks two weeks ago after 44 straight victories, came roaring back to spoil Comp Center's win streak by knocking off the league leaders 18-11 last week in the topsy-turvy Civilian Welfare Softball League.

Both F&A and Comp Center now have one loss with two weeks remaining in first round play.

Elsewhere last week, Financial Management nipped SAFSCOM 7-6, Metrology whacked S&M 20-4, F&A also stopped SAFSCOM 8-1 and DPO swept a twin bill, edging Pershing 10-9 and winning over SAFSCOM 13-7.

There will be a meeting of all team managers at the Civilian Recreation area, Tuesday, June 24, at 6:30 p.m.

Jack Willis (remember that name!) wielded a smoking bat for the perennially-powerful F&A softballers. Willis notched a perfect 5-for-5 performance against Comp Center and is now—get this—9-for-9 in his last nine trips to the plate.

Despite Willis' fancy stickwork, F&A wasn't out of the woods until the fifth inning. After spurting to an 11-5 margin in the third inning, F&A watched the hard-hitting Comp Center battle back in the fifth to trail by only one run, 11-10. At that point, F&A bats began booming however, and the money boys pulled away.

Bill Owens gained the victory for F&A although he needed relief help from Charles Amos in the fifth.

Buddy Lewis chipped in with a homer to support F&A.

For Comp Center, Jerry Arszman cracked three safeties in four appearances while Johnny Roberts walloped two homers and Ed Trentham had one blast for the distance.

Financial Management erupted for five runs in the final inning to decision SAFSCOM 7-6.

Don Wood struck a homer for

the victors while Ernest Frix got credit for the win. Bob Smith and Floyd King had homers for the losers.

DPO, in nosing out Pershing 10-9, was sparked by Hunter Horton who clubbed four hits and was credited with driving in the winning run. Sid Sapp, Joe McGough and Joe Stover had two each. Jerry Mullinax countered with two for Pershing.

Against SAFSCOM, Greg Bogue, Sid Sapp and Norm Herndon had three hits each and Jerry Morris a homer to pace DPO's 13-7 decision.

Postpone Spring Golf Tournament

The green's keepers at the Arsenal Golf Course have alternately been closing off the front and back nines which resulted in postponement of the Redstone Officers Wives Club Spring Tournament last week and allowed only nine holes of play on Wednesday for both the 9-hole and 18-hole golfers.

Playing Bingo, Bango, Bongo and Sandies, Edna Hodges tallied 15 points to win. Marian Deppensmith and Margaret McBrearty tied at 14 and Grace Wachslar and Joy Mundy totaled 13 to tie.

Today they are playing in flights against members of area country clubs in the annual Invitational Tournament on the Redstone course. Next week, the group will forego playday to help in the two-day Youth Tournament, also sponsored by the Wives Golf Group.

If you invest in Series H—current income—Savings Bonds, you'll receive semi-annual interest checks, in guaranteed amounts. Series H Bonds mature in 10 years.

Hill, Bogue Star . . . 'Big Orange' Grabs 2nd Half Win

As Gladys goes, so goes the Big Orange.

And right now, Gladys is going like gangbusters!

This told the story last week as Missile Command lassies opened second half play in the Huntsville Industrial Softball League with a convincing 12-11 victory over Computer Science Corporation.

Gladys Hill, talented redhead who is an all-around athlete, tossed a five hitter and hit safely

twice in three appearances, one a homer, to spark the Big Orange triumph.

CSC scored its lone run in the last inning.

Gladys got plenty of support from Frances Bogue and Barbara Furlough. Bogue, a sure-handed first sacker, was the top slugger with three for four while Furlough

chipped in with two hits and made a couple of dazzling defensive plays in left field.

MICOM girls were scheduled to meet SAFCOM last night and will go against NASA tomorrow night.

In other league action, Boeing, the only team to defeat MICOM thus far, fell to MARS last Wednesday night, 6-3.

Dixie Classic To Be Run On Sunday

The Heart of Dixie National Sports Car Races will be run Sunday at Huntsville's old airport beginning at noon.

Drivers will qualify Saturday. Sponsors are the Tennessee Valley Region Sports Car Club.

A bus will leave the Post Service Club at 11 a.m. to accommodate enlisted men who wish to see Sunday's races. Scheduled departure time is 11 a.m. Also on the agenda is a picnic lunch to be furnished by the Club.

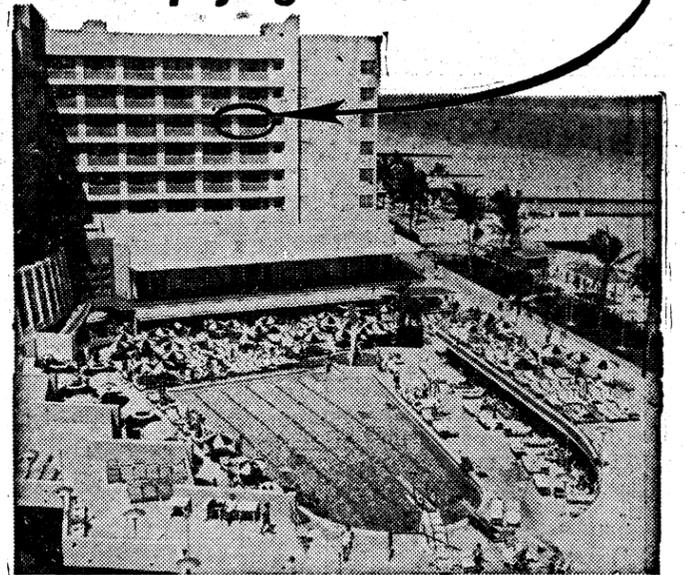

Tickets for the event may be purchased at the Service Club by military personnel.

MICOM Netters Lose 'C' Match

Missile Command netters were blanked by Alverson-Draughon, 9-0, last week, in a C Division match of the Huntsville Industrial Tennis League.

Jim Dailey and John Veeneman both won a set for MICOM but couldn't muster a scoring threat against the formidable opponents.

How Would You Like To Live (TAX FREE) in a luxury apartment like this... without paying rent?

Here's How!

Thousands of trained men and women of every age and background are doing it and having the time of their lives as well-paid management personnel in America's booming opportunity field of hotels, motels, clubs and resorts.

YOU COULD, TOO... and pay no income tax on the dollars-and-cents value of apartment, meals, and other benefits furnished for the convenience of your employer! You could save money TWICE—first on the live-in expenses that could cost you nothing, and second, on the tax this "extra income" represents!

No previous experience required and age is no barrier! Qualify at home in spare time or in only 4 months through resident training at world-famous Lewis Hotel-Motel Schools. Nationwide Placement Assistance helps get you the job you want! Mail coupon or write for FREE 52-page book today.

It's Do Or Die Time In Unit Level Softball

8th ETC Loses 1st Tilt; MICOM Extends Streak

Showdowns were on tap in each division of the Special Services military unit softball league as action headed into the final week.

Undefeated 8th ETC fell from the ranks of the unbeaten, but remained in contention along with the 522nd Ordnance Company in the American loop behind MICOM, while Company D, Student Officer-Headquarters Company, and Headquarters Unit Training Command all stayed undefeated in the National.

SOC and UTC were to play Monday in a battle of unbeaten, and SOC squares off against Co. D tonight on Field 2 at 5:45 p.m. A Monday battle between "Delta" and UTC could then also have a bearing on the first-half championship.

MICOM needs only a win over the 8th ETC Thursday night at 7:30 p.m. on Field 2 to sew up the first half crown, but a loss would result in a tie with the winner of last Monday's 8th-522nd showdown.

SOC/HHC took over temporary lead of the National division last week with two victories, one by forfeit from 5th ETC and the other a 13-2 decision over 7th ETC. It jumped them ahead of Co. D, the leader all season, when a 10-7 victory over the MP's was overruled by Special Services in a disputed suspension of the game.

The game was called in the last of the sixth inning when a coach of the MP's failed to leave the field in a given amount of time after being ejected by the umpire. The policemen had rallied for three runs and had two men on with none out and the score 10-7. The game will be played from that

point Thursday night following the first game on Field 1.

UTC also chalked up two wins to tie "Delta" for second place, whipping Company B 9-3 and 7th ETC 11-0.

MICOM upped its mark to 8-0 with a 19-0 pasting of 1st ETC, then was rained out in the second inning against 8th ETC with the 8th holding a 2-1 lead.

The 8th had been knocked from grace two days earlier by Company C, 3-2, while 522nd closed in on them by beating Co. C 13-10 and 3rd ETC 5-1.

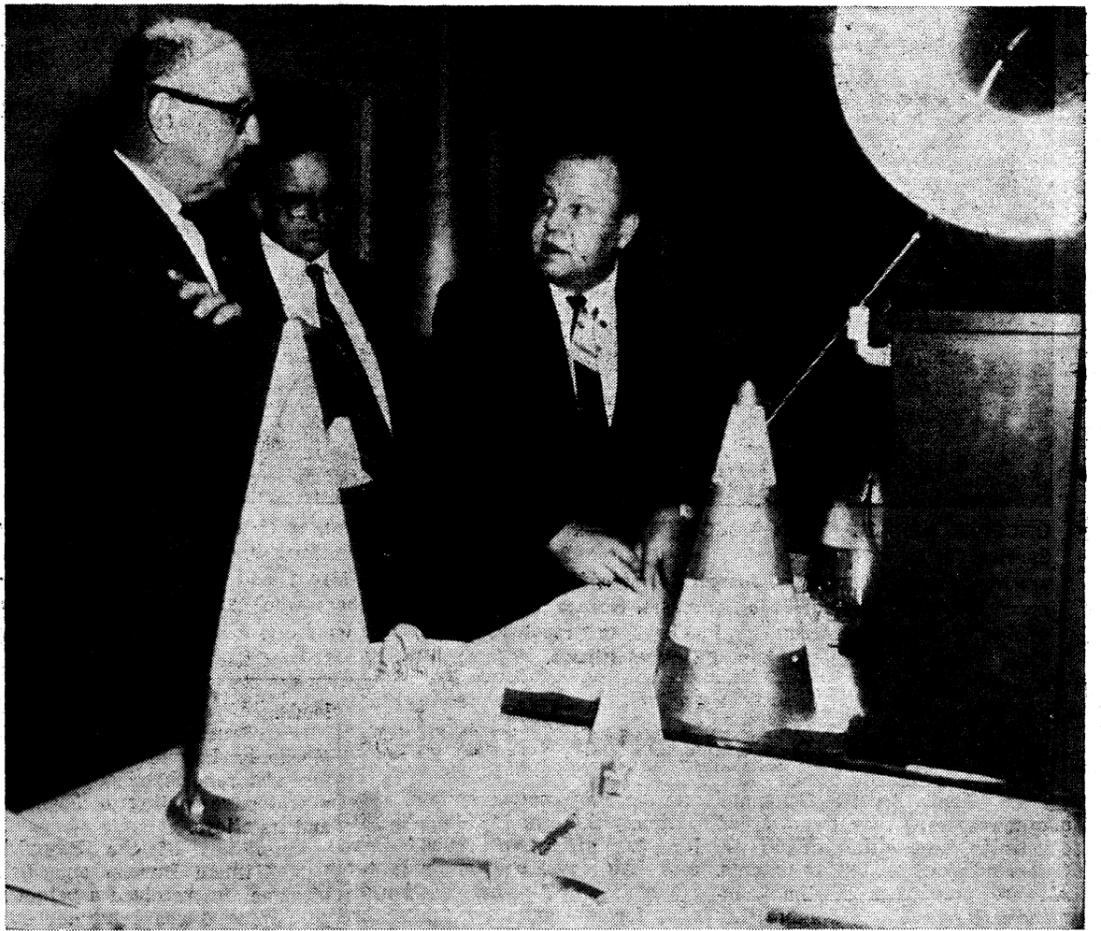

The MP's and 2nd ETC were also rained out and will play the make-up on Monday at Field 2 following the Co. D-UTC affair.

In other developments last week, the 5th ETC was dropped from the league for its remaining three dates in the first half due to forfeiting three times. It will rejoin the competition for the second half of the season, as Co. B, Medics, 2nd ETC and 6th ETC gain wins by their forfeit.

Special services also announced a revamping of the league setup for the second half of play. To increase the competitiveness among the 20 league entries, the two divisions will be shuffled to place the 10 teams with the best first-half records in the same bracket. The lower division teams will compose the National circuit.

This will not affect post-season playoffs, since the first-half winners and second-half winners will clash within each division, then face each other for the post championship.

"This will add more balance, and give more incentive for everybody all the way around," explained SP5 George Montgomery

RESEARCH TALK—Donald G. Fink (left), General Manager of the Institute of Electrical & Electronic Engineers, is briefed on missile research during his recent visit to the Army Missile Command. While here the electronics expert was guest speaker at the Huntsville section meeting of IEEE. Briefing Mr. Fink is James Howell of the Instrumentation Antenna Lab, Army Inertial Guidance and Control Laboratory. In center is Jess B. Huff, Director of the AIG&C Lab.

of Sports Branch.

Last week's individual performances included:

Gene Perrault hit a homer and single to support his own pitching to lift SOC/HHC past the 7th, 13-2; Wendell Moore struck out five and George Himmelright homered in C's upset of the 8th, 3-2; Richard Hailey struck out 11 straight and 13 of the 14 men he faced as a relief pitcher in UTC's 11-0 white-wash of the 7th;

Fred Helmer fanned eight and got homer support from Jack Newnom, Tommy Glynn and Russell in blanking 1st ETC, 19-0; Parris McGhee homered to help 522nd over upstart Co. C, 13-10; Bill Ausmus pitched UTC over Co. B, 9-3; General Viverette clouted a home run and Bill Garner shut out 4th ETC for Company A, 6-0;

Joe Shorts pitched a one-hitter and slammed a homer and double as the Marines whipped 9th ETC, 5-1; and John Dudkowski doubled twice and scored twice as the Medics broke a 5-5 tie in their last at-bat then hung on to nip the 6th, 8-7.

RECEIVE APPRECIATION RECOGNITION—Members of the Volunteer staff in the Army Community Service Office received Certificates of Appreciation at a coffee in the Post Chapel recently. From left are Mrs. Frank Miller, Mrs. Joseph Cormier, Mrs. John Mazikowski, Mrs. David C. Johnson, Mrs. Lawrence Bowen, Mrs. Noel Pujol, and Mrs. Horace Jackson. Three others who earned the award were unable to attend the ceremony, but have now received certificates. They are Mrs. Richard E. LaRossa, Mrs. Stephen Finch, and Mrs. Frank Matthews.

Employees Receive Checks

Eight Army Missile Command employees were recently awarded checks in recognition of Missile Command work leading to patents. All are employees of the Command's Research and Engineering Directorate.

William Garner of the Future Missile Systems Division was recognized for his patent on a mis-

sile steering control system.

Jimmy Duke and Walter E. Miller, Jr., of the Advanced Sensors Lab developed methods for modulating or pulsing injection diodes for maximum optical power.

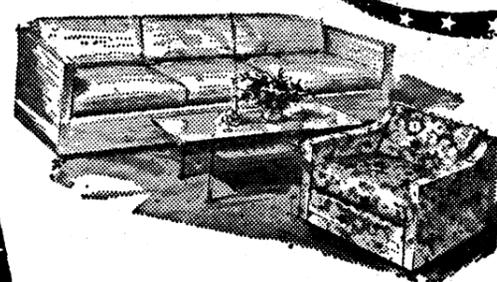

A Physical Sciences Lab employee, Richard Ely, invented a fluid pressure end loading test apparatus for axially testing cylinder specimens under compression

loads.

Oeke Fruchtnicht, Structures and Mechanics Lab, invented a method for electrochemically applying a protective coating to magnesium and its alloys.

Employees of the Propulsion Lab, William Duncan and James Murfree, Jr., received a patent for an improved gas generator structure.

Ben Wilson, also employed in the Propulsion Lab, received a patent for a propellant splash plate having flow directing means.

Steam Operators Average 22 Years On Job

Back in February of 1947 when John F. Jackson reported to work at Redstone, he went to a building that was the tallest on the Arsenal. Its sturdy bulk towered over some sprawling shops and warehouses in the area, and the plumes from its chimneys were ready indications of wind direction.

Now the five-story concrete building, housing the main steam plant run by the Army Missile Command Post Engineer, is dwarfed by surrounding and nearby structures.

This alteration in the landscape scene has increased the demand to keep steam pulsing and hissing at 90 miles per hour through the 41 writhing miles of lines all over the Arsenal, and Jackson's responsibilities have multiplied. He supervises the fuel and ash handler's unit, a position he has held since 1953.

His 16-man crew sees that all of the more than 3,250 truck loads of coal amounting to some 117,000 tons consumed annually is moved to the point of use, and the resulting ash removed. They also see that the furnaces are cleaned and de-slagged. The ashes are hauled to various spots on the Arsenal and used as fill for low places.

The steam generated, rising to more than 14,000 horsepower per hour, goes for heating, for use in leased industrial plants on Redstone, and in laboratories and test areas.

There's more than moving the Alabama-mined coal from one spot to another. It must be inspected,

stockpiled, and samples taken and processed for shipment to the Bureau of Mines for analysis to determine that the BTU comes up to the standards promised by the suppliers. The coal is paid for according to the BTU rating.

Jackson's 28 years of experience in the business is backed by a force of men whose average length of service is more than 22 years.

They are Ernest Anderson, Horton L. Boone, Ezell Coonrod, Dave J. Draper, Charley W. Edwards, Leroy Green, Harry Grigsby, Willie J. Jackson, Elijah Joiner, Leroy Peoples, Oliver Ragland, Albert Robinson, Ollie Wade, Roy Williams, John W. Garner and William H. Graham.

Among these men are two ministers, Draper and Joiner, and the man who is second in command Willie J. Jackson, is a graduate of Alabama A&M with a degree in agriculture.

The unit leader, John F. Jackson, is a tall, slender 53-year old Tennessean who conscientiously worries over the smooth operation of his group, but his experience and keen understanding of every facet of his job keeps insuring success.

His present career isn't quite what he envisioned as a young man when he left his family home near Murfreesboro to work in a local hospital. He spent five years in this work, then decided the government might have more to offer, so ap-

plied for a job as a hospital attendant.

After his application had been in awhile, he was offered a job as a coal passer. The man who notified him of this opportunity asked him if he knew what a coal passer was. Jackson didn't know, and his informant didn't either! Nevertheless, Jackson decided to try it, and worked at a couple of government installations in Tennessee before he moved to Redstone.

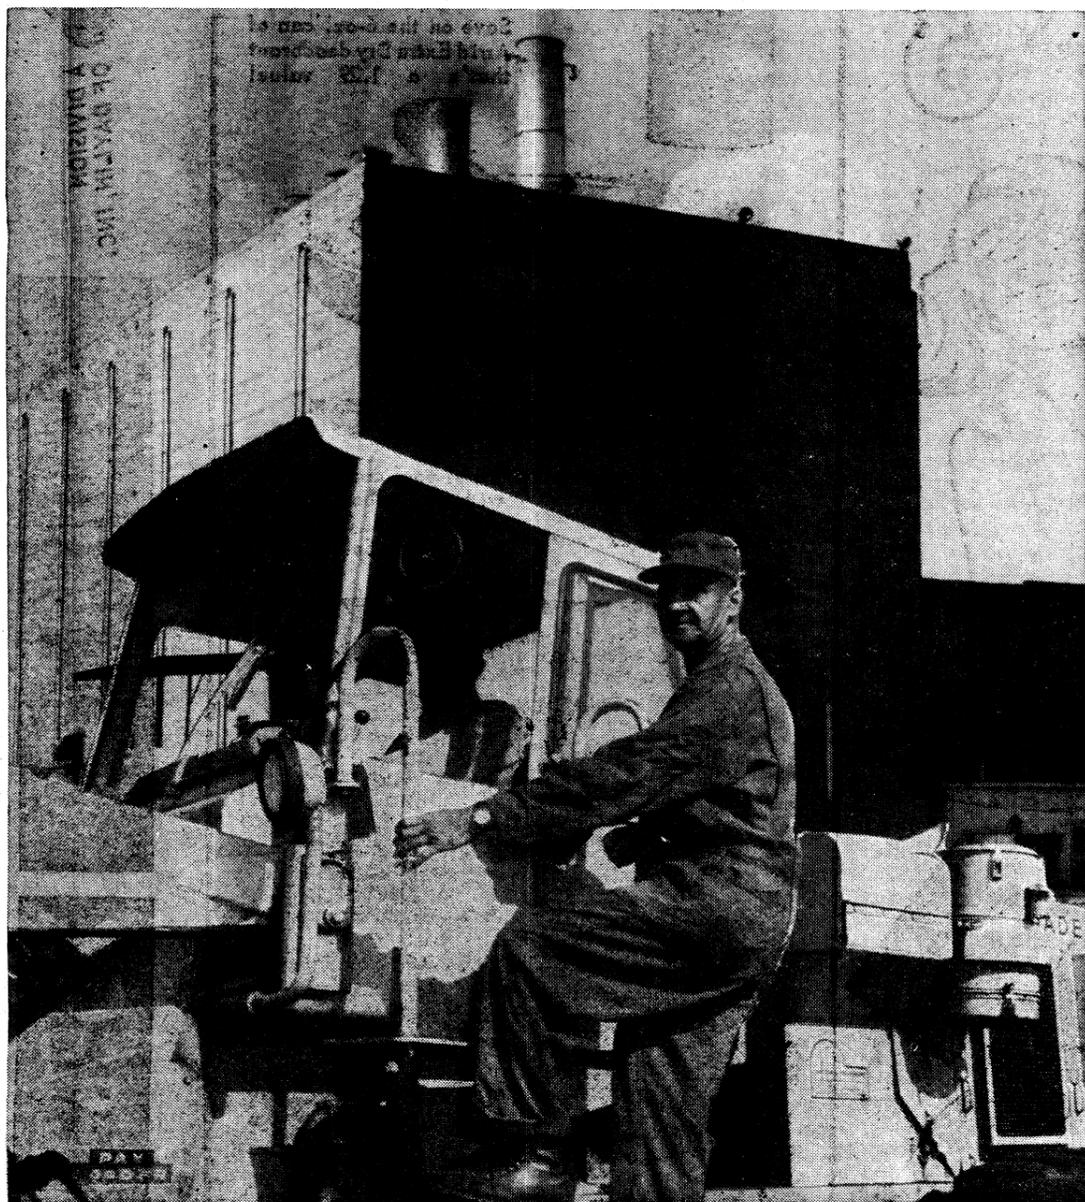

He had graduated from high school in Murfreesboro and has studied steam plant operation through correspondence courses.

Tucked away in his personnel file are three awards for outstanding and sustained superior performance, and a stack of letters of commendation and appreciation.

His family includes two daughters and a son. One daughter is a college graduate and works in Birmingham, the other has attended college and works at Redstone. The son is employed in Nashville and lacks only one quarter to graduate from A&I University there.

Jackson fully understands the advantages of training and education for himself and his family and urges his children to continue their studies.

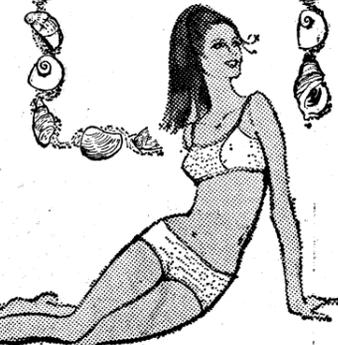

Meanwhile he's the man in charge of getting the coal for the steam plant into the right place at the right time and assuring that ashes are removed, and other materials are on hand and in place for operation of the boiler plants.

LOADING ZONE—John F. Jackson, head of the coal and ash handlers unit at the steam plant run by the Army Missile Command Post Engineers, mounts the steps of the heavy machine used to move coal into place. In the driver's seat is Ernest Anderson, one of the 16 men in Jackson's unit. The massive main steam plant rises in the background.

Maj. McBee Encourages Being A Quality Soldier

Speaking to a group of nearly 80 graduates of technical courses at the Army Missile and Munitions Center and School Friday, Maj. Edell F. McBee outlined the responsibilities of being one of today's quality soldiers.

Maj. McBee is the commanding officer of Second Battalion in the School Brigade at MMCS, in charge of nearly 800 students belonging to the four companies.

He told the graduates, which included many men who served under his jurisdiction while attending courses; "We say that today's soldier is a quality soldier, a versatile soldier. He must be a fight-

ing man and at the same time a teacher, friend, ally, technician, trainer and an advisor."

Thus, he charged, it is the responsibility of each freshly trained soldier to assume a role as an "important link in the strong chain of quality soldiers."

Among the soldiers receiving diplomas in seven technical areas were 10 enlisted men from Thailand who studied the Hawk continuous wave radar.

Honor graduates were named in five of the classes for scoring the highest grade average: SP4 Gary Fagan in Nike radar and computer, PFC Robert Johnson in Nike

Materiel Command Starts Supply Discipline Program

Army Materiel Command Headquarters has begun a program of promoting greater supply awareness throughout AMC, aimed at the most efficient use of AMC's \$24 billion materiel resources.

The program, designated as the "Command Supply Discipline Program" (CSDP) will investigate every aspect of AMC's mammoth supply operation including areas of such as authorizations and requirements, planning, programming, stocking, accounting, requisitioning, and effective use of supply funds.

Maj. Gen. Howard F. Schiltz, Chief of AMC's Distribution and Transportation Directorate and "Senior Logistician" for the program, has been delegated primary responsibility for CSDP, using existing supply review and assistance teams and documenting status and progress.

General Schiltz said the program will assure that there is a scheduled look at all program areas within AMC activities, at least annually.

Gen. F. J. Chesarek, the Commanding General of AMC, is required to address this subject in his annual readiness review for the Army Vice Chief of Staff.

Eleven teams will take part in the program. They will conduct on-site assistance and report on the progress of CSDP, by annually visiting the activities of AMC's depots, major commands, procurement agencies, logistic control offices and overseas AMC logistic management offices.

The Supply Review teams will attempt to answer various questions during their on-site visits, using a comprehensive check list. The preparation of the checklist to cover the mission of each team is the responsibility of the chiefs of three AMC directorates: Distribution and Transportation, Materiel Requirements, and Installations and Services. These directors also have the responsibility for scheduling the visits of the teams.

Providing staff support and serving as the coordination agency for CSDP will rest in the hands of the U.S. Army Maintenance Board at Ft. Knox, Ky. The president of this board will review schedules, checklists, and reports of the Supply Review Teams. He will also submit to the senior logistician periodic summaries of the team's findings.

AMC has also established at headquarters a 15-member Program Advisory Group of top AMC management specialists. The group's main function will be to review the implementation of the Command Supply Discipline Program with regard to scope and adequacy, and to approve actions dealing with major problems and deficiencies.

The Command, through CSDP, has placed increased emphasis on the training and indoctrination of AMC personnel. It will be used to up-date and up-grade supply training courses in the Army Service Schools and management schools systems. The senior logistician will provide the Director of Personnel and Training with CSDP data. In return, the Personnel and Training Director will develop a plan for the training requirements and to insure that CSDP information is included in appropriate training courses.

New Arrivals

LTC and Mrs. James E. Williams, boy, William James, and SGT and Mrs. Wendell Y. Higa, girl, Sherri Lei, June 5.

SP6 and Mrs. Dennis W. Parker, boy, Kenneth Allan, June 6.

missile repair, PFC Emery Mitchamore in combat missile systems, SP4 David Harshman in Pershing guidance and control, and Pvt. Robert Hampton in ammunition storage.

ORIENTATIONS ON DISCHARGE MUST BE HELD

Commanders are reminded that orientations on benefits of an honorable discharge must be conducted in accordance with recently distributed AR-350-21. These briefings (which also should cover the disadvantages of a less-than honorable discharge) are to be given to individuals entering active duty, completing six months service and reenlisting. A new requirement in AR 350-21 calls for a Form 20 entry as to the latest date the soldier received this orientation.

Two Women From Huntsville Tour Tokyo

An escorted shopping tour of Tokyo's famed Ginza . . . a dinner theater featuring Kabuki, the classic Japanese drama . . . gifts of pearls and porcelain . . . a drive along an avenue of 13,000 ancient cedar trees . . . a visit to a solid golden temple . . . the Imperial

WHAT WILL WOMEN DO NEXT?

Who wouldn't agree that women make the best wives and mothers?

But when you read about women jockeys, women who are trying to become astronauts, women who are seeking to invade professional sports such as basketball, you have to wonder: "What's next?"

Isn't a woman's place in the home? Are women taking over? Are there no masculine strongholds left?

According to a recent survey by the U.S. Department of Labor, nearly 30 million women—yep, 30 million—are in the mainstream of the labor force, almost twice as many as there were twenty years ago.

What it boils down to, apparently, is: more women are combining a business career with marriage.

Approximately one woman in 30 is an executive, national statistics reveal. Furthermore, many of the occupations attracting women today were held once almost exclusively by men. One percent of all judges, for example, are women; 4 percent, lawyers; and 7 percent, doctors.

So much for national statistics. What about right here in Alabama? What role do women play in such highly technical areas as missilery and research?

At the U.S. Army Missile Command more than 2,700 women make up about a third of the Command's civilian work force.

Among them are doctors . . . lawyers . . . physicists . . . chemists . . . mathematicians . . . librarians . . . procurement specialists . . . information specialists . . . security specialists . . . intelligence research specialists . . . supply specialists . . . computer programmers . . . and psychologists.

Average age of Missile Command female employees is 37 and 85 percent of them are married. Among 863 career women, GS-5 and above, who are registered in the Missile Command talent bank, 126 hold BS degrees and 26 others have Masters degrees.

One woman, Mrs. Doroathy Stewart, a research physicist, has a PhD in meteorology.

Highest ranking woman at the arsenal is Edith Gibbs, Chief of the Data Processing Office, Supply and Maintenance Directorate, who is a GS-15.

But the Command has more than 680 women who are GS-9 and above, a grade with a starting salary better than \$9,000 per year. Civilian Personnel records show there are 4, GS-14s; 30, GS-13s; 111, GS-12s; 284, GS-11s; and 255, GS-9s.

Grade average for women at Redstone is about GS-6.

Not only do women hold responsible positions but records show they've been doing it for years. One lady, Mrs. Cleo Cason, who perhaps ranks first in seniority, started her career at Redstone back in 1941. Mrs. Cason is Director of the Library Branch, Redstone Scientific Information Center.

Are women taking over?

Of course not. But women at Redstone Arsenal are proving they can do the job. And future Civil Service employment trends look even rosier for the fairer sex in keeping with the Federal Government's policy of equal employment opportunities.

Mines at Sudbury, Ontario, produce 75 percent of the world's nickel supply.

Palace . . . the beautiful Japanese tea ceremony.

These sound like come-ons for a tour of the Orient but they sum up what really happened to two ladies who have been active for several years in the Huntsville Council for International Visitors.

During a recent visit to Japan, Mrs. Ophelia Mitchum and her sister, Miss Rebecca Larkin, found that hospitality to foreigners is a many-splendored thing—especially when the Americans are "foreigners."

Their experiences in Japan write a heart-warming chapter in a story of international friendship that began in Huntsville in 1964 when the sisters began inviting Japanese students at the U.S. Army Missile and Munitions Center and School to a series of social events in their home at 320 Drake Ave., S.W.

Mrs. Mitchum has now retired from the civil service with the Army Missile Command and her sister from the local school system. They notified their Japanese friends that they were planning a trip there—and the Japanese hospitality machinery went into high gear.

When the ladies arrived in Tokyo, they were met by representatives of Lt. Gen. Kengora Tanaka, commander of Japan's Eastern Army, who had also visited the Missile School. Mrs. Mitchum and Miss Larkin were provided with Japanese Army escorts at every point they visited. These included Col. Mikio Kimata, once the Japanese Liaison Officer at MMCS and sev-

COMMENDATIONS

Army Commendation Medals have been awarded the following: Lt. Col. Eugene S. Totri, Maj. Alexander G. Stewart, 1st Lt. Robert E. Carty; Maj. George P. Higdon, 1st Lt. Ansel W. Harris, SP4 Jack D. Stanley, Jaime J. Teran and Maj. Ernest W. Davis.

The First Oak Leaf Cluster to the Medal was presented to Maj. Jerry R. Daily and Maj. William F. Smart.

REUNION IN JAPAN—Miss Rebecca Larkin and Mrs. Ophelia Mitchum of Huntsville are shown at front left and right with a group of Japanese friends in Tokyo where they visited recently and were greeted by former students at the U.S. Army Missile and Munitions Center and School who had been entertained by the two ladies while in Huntsville. In front center is Lt. Gen. Kengora Tanaka, commander of Japan's Eastern Army, who has also visited here. Standing are Lt. Okita, Cpts. Kataoka, Endo, Nishida and Col. Mikio Kinata, the former Japanese Liaison Officer at Redstone Arsenal.

eral former students, including Cpts. Kataoka, Nishida and Endo.

A highlight of their visit was a dinner in the ancestral home of Col. Kimiata followed by a children's concert of Japanese music.

Mrs. Mitchum and Miss Larkin returned home more determined than ever to participate as hosts in the many social activities offered by the Huntsville Council for International Visitors. They've started a new guest list with Cpt. Onishi and Lt. Ozeki, recently arrived students at MMCS.

Help Is Here For Serviceman Turning Civilian

Soldiers completing their terms of enlistment, or retiring and returning to civilian life can participate in the nation-wide Army program called Project Transition.

This project is designed to give the prospective civilian some idea of the jobs available in private industry and what his chances are for employment.

At Redstone Arsenal soldiers who have six months or less left in service are listed on a roster prepared by the Third Army Data Processing Center. Letters are sent to each man requesting that he fill out a Project Transition Questionnaire with J. H. Cranford, Project Officer at the Army Community Services and Retired Activities Office.

Once the questionnaire has been completed, the men are scheduled for counseling if they desire it. Army experience, formal education, special training and background are reviewed along with the individual's plans for a civilian vocation. Efforts are made to match military specialties and experience with corresponding civilian areas and in keeping with the man's desires.

Cranford feels this is an excellent opportunity for the servicemen to avail themselves of a program that will help solve employment problems associated with returning to civilian life.

While explaining Project Transition, Cranford pointed out that it did not affect the Group Separation Orientation, held every other month, and the quarterly Pre-retirement Counseling Orientation. Personnel attending these functions as part of their separation

processing, can still utilize the services of Project Transition.

Basically, the project was evolved to aid the military man who, through no fault of his own, had a job in the service that is not marketable to private industry. An example is the case of the man who has been a light weapons infantry soldier during his military career, and who now faces civilian industry with a strictly military occupation.

Another situation could be a soldier who has changed military jobs to meet the needs of the service and though his present job is an area that can be used by private industry, he does not have enough experience and education to qualify for the civilian job.

Typical of the men now involved in Project Transition at Redstone are a Sergeant First Class due to retire in December and an Sp/6 with a retirement date on September 30.

Sgt. John F. Keeler, a supplyman with Headquarters Company, Army Missile Command, is now working and training as a cabinet maker with the Post Engineers as part of Project Transition. With permission from his supervisor, the Sergeant is working eight hours a day with the Engineers though he is still in the military and not due to retire until December. He is getting an opportunity to train into a profession of his choice and to make contact that could assist him in obtaining employment upon retirement. His parents are Mr. and Mrs. John S. Keeler, 121 Front Street, Schenectady, N.Y.

The Specialist, a calibration specialist with a limited educational

PROJECT TRANSITION IN ACTION—Sergeant First Class John F. Keeler, Headquarters Company, Army Missile Command, concentrates on cutting the board straight under the watchful eyes of Clint C. McElyea, carpenter with the Post Engineers. Sgt. Keeler, due to retire soon, is learning the trade of cabinetmaking under the Army's Project Transition, which helps men leaving the service train into vocations useful and salable to civilian industry.

background, displayed a keen interest in real estate and selling. He is now working eight hours daily for a local real estate firm. Under this arrangement the man is training into a job, the company is able to evaluate his abilities and potential and both benefit from the association. By the time he becomes a civilian, he will know what chances he has for success in this area, and the company will have assessed his abilities and decided whether or not they will employ him.

Though the project is open to interested personnel, Cranford was quick to note that sometimes approval is withheld and an individual request can be disapproved by a field grade officer.

Project Transition has been in effect at Redstone Arsenal on a limited basis since February, 1968. Fort Benning, Fort McClellan, Fort Rucker and Fort Bragg already have successful programs in effect.

For personnel interested in Project Transition, Cranford had these suggestions: "Have an idea of the vocation you want training in, have some knowledge of the firms in the area that might provide you with training, have approval of your commanding officer, and come to the Project Office in Building 3656 for counseling."

This project is covered by CON Regulation 621-4, Headquarters, Continental Army Command, dated 6 March 1969, and qualifications for the project will be spelled out in counseling.

Qualification System Places Emphasis On Ability and Potential

One of the newer developments in Federal personnel administration is the U.S. Civil Service Commission's job qualification system for trades and labor occupations. Under this system, the basic skills, knowledges, and abilities needed to be able to do the work in trades and labor jobs are matched with the qualifications of candidates. Emphasis is placed on how much ability or potential candidates have for the job to be filled rather than how long the candidates have performed in a line of work.

The job qualification system evolved after more than ten years of job-element examining research, and was first used by Interagency Boards of Examiners in recruiting to fill trades and labor jobs in the various agencies. Since then, a number of agencies have adopted the system in considering employees for promotion. By July 1, 1970, all Federal trades and labor jobs will be filled using the job-element approach.

The Job Qualification System for Trades and Labor Occupations being published by the U. S. Civil Service Commission in June 1969, describes this job-element examining methods. It may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

For a condensed, easy-to-understand explanation of what the system is and how it works, employees may obtain a copy of the pamphlet "The Job Element Method" (PS 14) at most Federal personnel offices.

Ft. McClellan, Ala., is the home of the U. S. Women's Army Corps (WAC) School.

BONANZA AUCTION SALE

SATURDAY, JUNE 28 AT 1:08 21/30 P.M.

234 ACRES OF THE MOST SOUGHT AFTER LAND IN HUNTSVILLE, ALABAMA, PART ZONED HEAVY INDUSTRY, PART NOT ZONED, SOLD IN 21 TRACTS, COMBINATIONS, THEN AS A WHOLE; HIGHEST PRICE DETERMINING SALE. LOCATED IN THE CITY LIMITS OF HUNTSVILLE ON GREEN COVE ROAD, 3/8 MILE OFF MEMORIAL PARKWAY OR HIGHWAY 431. BELONGING TO THE HALL ESTATE, BEING SOLD FOR DIVISION.

The Chancery division of the Circuit Court of Madison County has ordered the BOB KELLER REALTY & AUCTION COMPANY to sell on the premises the 234 acres, more or less, belonging to the Hall Estate. This property fronts 3,520' on Green Cove Road, soon to be a four lane road, and is some of the finest land for heavy industry to be found in Madison County. It is located only a short distance from the Tennessee River, within 3/4 mile from the Automatic Electric Company's new plant that is working 1,000 to 1,500 now and will soon hire between 3,000 and 5,000. There is approximately 2,600' of N&C&St. L railroad track on the property and a spur line already on one tract. THE PROPERTY HAS CITY WATER, GAS, SEWER, IS LEVEL AND READY TO BUILD ANY KIND OF INDUSTRIAL PLANT. Since Huntsville has become an industrial city, rather than depending on one industry to keep the prosperity going, it has an announcement this week of two more large industries moving to Madison County and Huntsville.

AN INVESTMENT OPPORTUNITY!

This tract of land located within the city limits of Huntsville, just off a major highway offers the investor or speculator a certain appreciation. With increasing demands for industrial sites, home sites or for small acreage and with the influx of industry, these 234 acres are directly in the path of this city's growth. With its excellent commutability it represents an opportunity for developers or individuals to acquire land that is not only exceptional and desirable at present but will increase in value with the logical growth of the city in this direction.

THE TRACTS WILL BE OFFERED AS FOLLOWS:

- TRACT NO. 1: Fronts 200' on Green Cove Road and is an exceptional tract for any kind of industry. It has a spur tract on the west side and there are several farm buildings on the tract. It consists of 6 acres, more or less, with excellent building sites.
- TRACTS 2-9: Each front 200' on Green Cove Road and consists of 6 acres. Tract No. 2 has a building and has several good building sites. All of these tracts are zoned heavy industry. Water, sewer, gas and all utilities are available.
- TRACT NO. 10: Fronts 490' — on Green Cove Road and consists of 7.5 acres, more or less, having Aldridge Creek as one boundary. This is an ideal tract having everything desired to build any kind of heavy industry.
- TRACT NO. 11: Fronts 430' plus — on Green Cove Road and has for the west boundary Aldridge Creek. It consists of 20.6 plus acres, all level, and is 940' plus—across the back.
- TRACTS 12, 14, 15 All front 200' on Green Cove Road and consist of 6 acres and have excellent sites for any kind of heavy industry.
- TRACTS 16 and 17: Each consists of 12 acres, more or less, with 200' frontage on the highway and going back 2,600'. The back of these tracts has not been zoned and can be used for residential or commercial property.
- TRACT NO. 18: Consists of 12 acres, more or less, with N.C. & St. L. Railroad as the east boundary. Also running through this tract is a spur of N.C. & St. L. Railroad. There is one small building on this tract.
- TRACT NO. 19: Consists of 19.6 plus — acres having a 30' egress and ingress from Green Cove Road. This is one of the finest tracts for heavy industry to be found in Huntsville. It has the N.C. & St. L. Railroad as the west boundary.
- TRACT NO. 20: Consists of 19.1 acres, more or less, with 990' plus — on the north side, 250' on the south side, 1300' on west side and Aldridge Creek as the east boundary. There is a 30' egress and ingress from Green Cove Road on the tract.
- TRACT NO. 21: Consists of 38.5 acres, more or less, having Aldridge Creek as the west boundary, is 1,950' on north side, 1,300' deep and 1,660' across back. There is a 30' egress and ingress from Green Cove Road.
- TRACT NO. 22: Consists of 18 plus — acres, 600' x 1300' with a 20' egress and ingress from Green Cove Road. There are several good building locations on this tract.

THIS 234 ACRES OFFERS A WIDE CHOICE FOR HOME BUILDERS. FOR HEAVY INDUSTRY SEEKERS AND DEVELOPERS TO SELECT THE AREA THEY PREFER. MOST OF THIS LAND IS OPEN, BUT THERE IS A SMALL AMOUNT OF WOODED AREA WHICH WILL PROVIDE SHADY HOME SITES. ALL THE LAND IS LEVEL AND WELL DRAINED AND CAN BE DEVELOPED EASILY WITHOUT THE EXPENSE OF A LOT OF GRADING. ALL CITY UTILITIES ARE AVAILABLE WITH A 20' UTILITY EASEMENT AT THE BACK OF ALL TRACTS.

This property will sell for division among the heirs and your price will be our price. So be with us under the big tent on June 28.

TRACTS 1-17 ARE ZONED HEAVY INDUSTRY. TRACTS 18-22 HAVE NOT BEEN ZONED. TRACTS 1-17 ARE INSIDE CITY LIMITS OF HUNTSVILLE, TRACTS 18-22 ARE OUTSIDE CITY LIMITS.

TERMS: 25% down sale day. To be deposited with the Register in Chancery of the Circuit Court of Madison County, Alabama. Balance due and payable upon approval of the sale by the Court. Warranty deed to be issued by the Court on its approval.

POSSESSION: With delivery of deed.

**THE IMPACT OF THE PRO'S ---
THERE'S NOTHING QUITE LIKE IT ---**

Football time will be here before you know it, your ALABAMA HAWKS will be ready...will you?

There are NO DISCOUNTS this year, EXCEPT through the Season Ticket and Family Tickets Plans. And remember, there are only 7000 reserved seats this year, and it looks like they will all be season ticket sales, thanks to the convenience of the FIRST CHARGE and MASTER-CHARGE Cards.

Don't be left behind staring at the tube this fall. Become a part of the excitement. This year a HAWK fan will be a happy fan.
