DON'T FORGET SUNDAY!—Ellen Hipes isn't jumping the gun—she's merely reminding everyone that Daylight Saving Time begins Sunday. That means all clocks should be moved ahead one hour after midnight April 24th. If you should forget and awaken Sunday morning at 8, remember: it's actually 9! Ellen is a clerk-steno in the Lance Project Office.

Assignment Changes For Three Colonels

Three senior officers of the Army Missile Command assumed new duties this week as the command put greater emphasis on its internal program supporting the Armywide effort to attain an all-volunteer force.

COL Preston B. Cannady was named Special Assistant to the Commanding General for the Modern Volunteer Army and will coordinate and direct all aspects of the command's program to improve service life and enhance a military career. The Army plans to increase both enlistments and reenlistments to end reliance on the draft by mid-1973.

COL A.J. Forsythe, who had been Chief of the Command's Security Office, replaced COL Cannady as Deputy Post Commander and Director of the Redstone Arsenal Support Activity.

An experienced military engineer who had been serving as

Deputy Director of the Support Activity, COL Henry D. Weston, took over as Facilities Engineer, directing the large organization responsible for operation and maintenance of Redstone's buildings, roads, utilities and land management program as well as Command construction and real property at other locations.

In announcing the new assignments, MG Edwin I. Donley, Commanding General, said COL Cannady's 20 months experience as Deputy Post Commander and Director of the Support Activity had given him broad knowledge of operations where the majority of changes are being made to improve service life and the attractiveness of a military career to soldiers and their families.

Most Missile Command operations concerning soldiers assigned to the Arsenal and military families are the
(See Assignment on Page 3)

Carroll Gets Meritorious Civilian Service Award

An unusual display of initiative and engineering skill were recognized here last week in the presentation of the Meritorious Civilian Service Award to Marvin P. Carroll, and electronics engineer in the TOW Project Office.

The Army's second highest commendation for civilian excellence was presented to Carroll by MG. Edwin Donley at a ceremony in the Commanding General's Office.

GEN. Donley commended Carroll highly for his many contributions to the accomplishment

of the Missile Command Mission and cited specifically his work in the modification and redesign of TOW training devices.

He said the adoption of Carroll's proposals resulted in significant cost savings to the government.

The veteran engineer has spent eight years in various phases of the development of missile systems since coming to Redstone in 1963.

He began his career with the Federal government three years earlier with the National Bureau of Standards following his graduation from Howard University in Washington, D.C.

LTC Myers Heads MIA Here

LTC. Joe B. Myers this week assumed control as Director of the Missile Intelligence Agency at the Army Missile Command.

He succeeds COL. Louis W. Haskell who has retired from active military duty.

Born in Greenville Ky., LTC Myers has claimed Birmingham as his home since 1940. He graduated from the University of Alabama in 1950 with a degree in biology.

Since entering the Army in 1951, he has served in Korea, Germany, and Vietnam and has filled a wide variety of stateside assignments. He comes to Redstone from Charlottesville Va., where he was Executive Officer of the U.S. Army Foreign Science and Technology Center.

Among duties as MIA director, LTC. Myers evaluates foreign missile and space trends and provides the army with finished intelligence and forecasts.

Among medals and decorations, he holds the Legion of Merit, Bronze Star, Joint Service Commendation Medal, the Air Medal

BG Hoisington Says Back Your Army

BG Elizabeth P. Hoisington, director of the Women's Army Corps, called on local members of the Association of the U.S. Army to back the Army during the days it is being beset on all sides with criticism.

"Ask your friends not to condemn the whole system because of a few isolated instances," she said.

GEN Hoisington, addressing a meeting of the Tennessee Valley Chapter, AUSA last week, said the Army particularly needed support in its efforts to establish a Modern Volunteer Army to permit the nation to end the draft.

"An all volunteer force is possible," she said. "I know because I direct one. Every woman in the Corps is there because she wants to be."

The general said the Women's Army Auxiliary Corps was established during World War II to replace men for battle but that the word auxiliary was dropped from the title and now the purpose was to work with the men to get the job done.

In making another contrast with

World War II days, she said women volunteered during the war for patriotic reasons but that today they came into the Corps to gain a skill.

GEN Hoisington said about one-third of those who now go into the Corps choose to remain for additional tours after completing their first obligation.

"Almost 70 per cent of those who complete a second tour go ahead for a career in the Army," she said.

She advised parents to encourage daughters to investigate Army programs for women before making a final decision about a career, specifically citing a program whereby a woman who has completed the junior year of college may take one month of military training, and if she likes it and is accepted for the program, will receive \$384 monthly to assist in college expenses for her senior year.

"She obligates herself to serve in the Corps only two years after

(See Volunteer on Page 3)

Chaparral Kills BATS

Chaparral knocked BATS batty. That word comes from Sardinia, Italy, where Chaparral, the Army's low altitude air defense system, just recently completed

annual service practice against aerial targets called BATS (Ballistic Aerial Target System).

Chaparral was so successful that 17 consecutive targets were destroyed during one stretch on the last day which led to several battery officers and NCOs being dumped into the cold Mediterranean by jubilant gunners from the U.S. Army, Europe.

Among observers were several senior NATO officers.

BATS, manufactured by Teledyne-Brown Engineering in Huntsville, also performed flawlessly in their initial fielding. They are realistic "pop-up" targets that simulate enemy

Open Letter

Editors Note: Nell Hankins is an employee at the Redstone Arsenal Medical Department Activities. She recently lost her son in Vietnam. Mrs. Hankins letter (which follows) is self-explanatory.

JOEL RICHARD HANKINS

PFC Joel Richard Hankins was killed in Vietnam March 26, 1971. I want you to know why my Ricky gave his life—

Ricky believed that everybody, regardless of race, color or creed, was our neighbor. He thought, as God commanded, we were to help and love them.

Ricky finished Butler High School in June, volunteered for the Army and was accepted July 24, 1970. He found that because he had been treated for asthma, he would not be allowed to fly a

helicopter, the field he had volunteered for. At this point, he was offered a discharge. Rather than being discharged, he remained in the service and went into the infantry.

After completing his training, Ricky volunteered for Viet Nam and after arriving there, applied for "Ranger" duty. On his first mission, Ricky was killed.

Why did he go, — He loved his country. He loved to help his neighbor. He respected authority. He believed whatever help he could give would be appreciated by those allowed to live here and abroad.

In essence, he did not merely give his life, he exchanged it for the ideal he believed in.

I write this article hoping someone will read it and realize that in order to preserve our heritage of a great country, we must all be willing to do our share.

Ricky's Mother

Secretaries Sponsor Concert For Chris Campbell Fund

The National Secretaries Association will sponsor a concert at Lee High School, Saturday, May 1 for the Chris Campbell Fund.

The program will begin at 7:30 p.m. and will feature Ray Weems singing songs that everybody loves. Admission will be a contribution to the fund for Mrs. Campbell.

Chris Campbell was a secretary at the Army Missile Command for 11 years in the Sergeant Project Office and later in the Land Combat support Systems Management Office. She left work in July 1970 and has since had both kidneys removed. Mrs. Campbell now must travel to Birmingham every three days for treatment on an artificial kidney machine which removes impurities from her system. She lives in Paint Rock, Ala. with her parents and her two children.

Her only source of income is the combination of her parents Social Security check and her medical

allotment—a small sum.

Donations have been coming in for several months, but continual help is needed. The money which has been and is being collected will be used to buy Mrs. Campbell an artificial kidney machine until she can get a suitable donor, and to pay for expenses when the operation is performed.

The money which is received from this concert may be used as a "reward" to entice a donor. The donor must be living and must have compatible blood and tissue characteristics.

Answers

(Editor's Note: The MICOM Information Office accepts job-related questions of general interest to all MICOM personnel, military and/or civilian. Questions may be submitted by telephone, 876-4161 or 876-4400, or by arsenal mail to the Information Office, Rm. A-134, Bldg. 5250. This program is designed for questions of general interest. Personnel questions concerning a specific individual should go directly to the Civilian Personnel Division. Some of the questions and answers of general interest are selected for publication in The Rocket without names.)

Myers

(Continued From Page 1)

and the Army Commendation Medal.

Myers is married to the former Carolyn Rotton, also of Birmingham, and they have three children, Joe Jr., 16 Stephanie 15 and Carl 5.

Summer Job Open

An excellent opportunity for a retired person to earn extra money during the summer months lies waiting for a qualified man at the Tennessee River Recreation Area.

The Civilian Welfare Fund Council is looking for a caretaker to oversee activities at the Recreation Area from May 1 through October.

While it is not necessary that the person selected be in a retired status, according to Abner McNaron, chairman of the Recreation Area committee, the position provides an excellent chance for such persons to augment their retirement pay.

The incumbent would be in charge of the general policing of the area and with the dispensing of the recreational equipment available for visitors.

Persons interested in filing application for the position, or obtaining additional information may call Mr. McNaron at 876-1129.

THE B'S HAVE IT

SAFLOG Observes Third Birthday

The U.S. Army Safeguard Logistics Command observed its third anniversary Friday night with a party at the Redstone Officers Open Mess attended by more than 130 employees and guests. SAFLOG, commanded by Col.

Cecil W. Hospelhorn, was established in April 1968 in Washington, D.C., and was moved to the Huntsville area in August. SAFLOG plans and provides logistical support for the Safeguard ballistic missile defense system.

BRONZE STAR—CPT Richard E. Tucker, son of Mr. and Mrs. E.P. Tucker of Sylacauga, received the Bronze Star Medal recently for his activities while serving with Military Assistance Advisory Group Team 11 near Na Trang, Vietnam. The Captain spent most of 1970 with the team. Now a member of the Morale and Welfare Division of the Redstone Arsenal Support Activity, the Captain has been in the Army five years. He was studying at Auburn University when he was drafted. He received his commission through Officer Candidate School.

LEARN BY DOING—SP4 George Grau is in Project Transition training with the Facilities Engineer Division where he learns on-the-job welding. For those who qualify, Project Transition provides training courses in many skills. SP4 Grau, of the 227th Ordnance Detachment, Missile and Munitions Center and School, applied for the training with Project Transition in Bldg. 3656.

WHY THE WEATHER?

A solution has been found to the August fogs versus the Winter snows debate between Mrs. J.H. Cranford, a secretary in the Army Missile Command Equal Opportunity Office, and Dr. Oskar M. Essenwager, Chief of the Command's Aerophysics Branch.

The person (she refused to be named) suggested that since the eighth snow of the year came and went in the gloom of night, then the eighth fog just possibly could have occurred one dark night back in August of '70.

H.D. Bagley, where are you now that we need you most?

Volunteer

(Continued from Page 1)

graduation," the WAC director said.

In conducting chapter business prior to GEN Hoisington's address, C.C. Lee, president, announced that a membership campaign would be conducted locally during May.

He said the Tennessee Valley Chapter now had about 2,800 members and was setting a goal to maintain a 3,000 membership after the campaign. He pointed out that a critical factor would be approximately 1,000 memberships due for renewal during the campaign period.

In other business Lee announced that Dr. John L. McDaniel, Director of the Army Missile Command's Directorate for Research, Development, Engineering, and Missile Systems Laboratory, had been named to the National Advisory Board of Directors for AUSA, and that J.A. Muller, Chief of the Procurement Division of the Missile Command's Procurement and Production Directorate, had been nominated for membership on the Association's Resolutions Committee.

Assignment

(Continued from Page 1)

responsibility of elements of the Support Activity which includes all normal post operations and the Troop Command.

In his new assignment, COL Cannady will be charged with instituting improvements and changes directed by the Department of the Army and recommending and implementing others that can be accomplished locally or forwarded to the Department of the Army for adoption Army-wide.

A native of Alabama, COL Cannady will continue to coordinate the Command's contacts and relationships with the civilian community. He will also serve as Acting Chief of the Security Office until an officer, now on orders to the Command to fill that post, reports for duty.

COL Forsythe, a graduate of the U.S. Military Academy, came to Redstone in January and was named Chief of the Security Office, a new staff level office established in the recent reorganization of the Missile Command.

As Director of RASA, COL Forsythe heads an activity of more than 1,750 civilians and 550 military who actually run the installation.

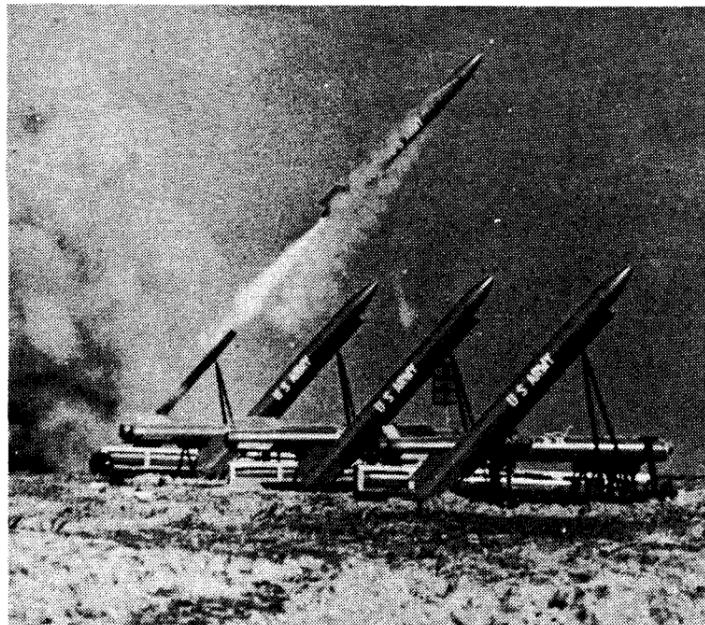

RASA provides such support services as transportation, communications, safety, security, building maintenance, finance and accounting and civilian personnel management. In addition, it operates the troop command as

COL Levy Talks To Lions Club

If the military profession does not receive the respect it deserves, no inducements will attract enough volunteers to maintain our armed forces, said the commandant of the U.S. Army Missile and Munitions Center and School last week.

Addressing the Huntsville Lion's Club, COL Gilbert P. Levy said that defamation of the military is a growing obstacle to recruiting and keeping personnel in the Armed Forces.

"American citizens for whose security the military serves cannot fail to insist that their defenders be treated with decency, dignity and respect throughout our society," COL Levy said.

American college students can't advocate freedom and at the same time deprive others the freedom to choose a military career through ROTC, he said.

"We can't insist that selective service must be abolished and fail to support those measures needed to create a modern volunteer Army," COL Levy said.

The MMCS commandant cited some of the improvements planned and those already made at MMCS to enhance the prospect of military life for young soldiers, but he added that there is one thing the changing Army would not do.

"... we are not going to relax standards to the point where we will jeopardize accomplishing our mission and purpose for being," he said.

said.

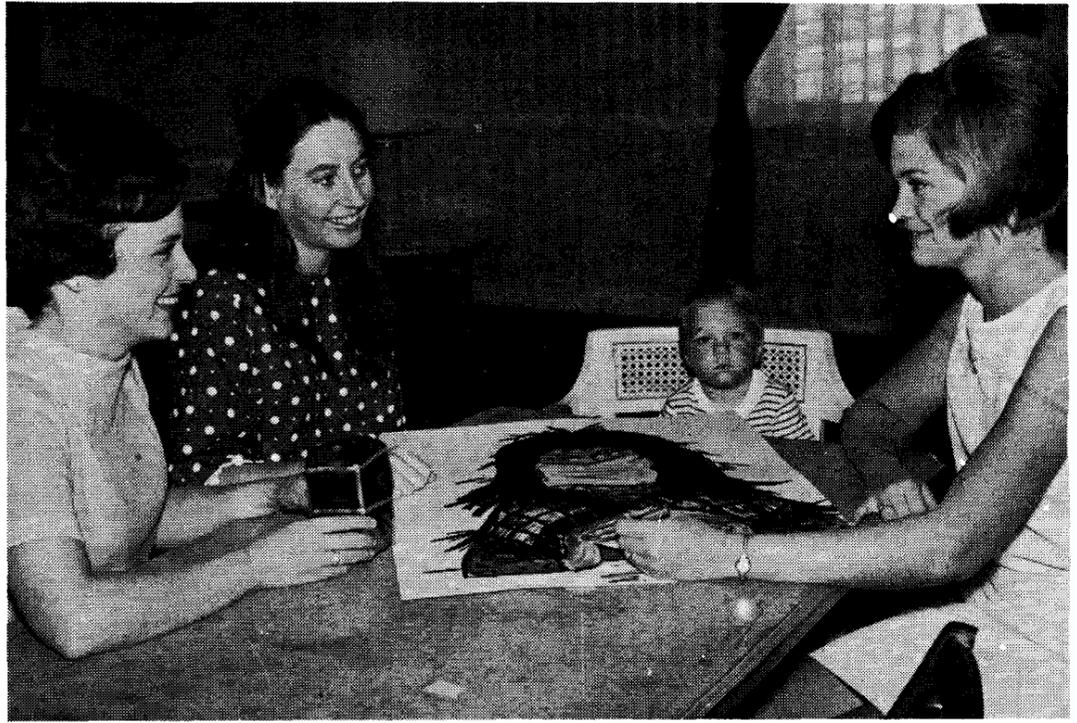

The Army must accomplish several things to avoid betraying its purpose while evolving into a Volunteer Army, he said.

"We must improve the professionalism of the Army. We must make the Army service more attractive and challenging to today's young people and, above all, we must regain public esteem," COL Levy said.

"... Soldiers fight and work hard and well for the sake of intangibles such as pride, spirit and tradition, and these are the items we are addressing when we say we are attempting to make things more attractive and at the same time increase professionalism," he said.

Citing historian Arnold Toynbee, COL Levy said that of 21 notable civilizations, 19 fell from internal causes rather than conquest from the outside.

"... And I believe our country has a choice to make," he said.

COMMITTEE GETS TOGETHER—Members responsible for decorations for the Gold Rush Days benefit May 30, sponsored by the Redstone Officers Wives Club annually, discuss the for-umeteilers ad. From left are Mrs. James Lancaster, Mrs. John Winter and Mrs. Stanley Prevost, the two latter co-chairmen for the committee. The wide-eyed kibitzer is the Prevosts' son, Michael. Profits from the event which includes games and dancing to a live band will be used for charity. Dinner is also on the schedule.

Boss Produces Memory Book

One hard working secretary at the Missile and Munitions Center and School isn't taken for granted.

Colonel Norman L. Holland, Director, Directorate of Individual Training, paid tribute to his secretary, Mrs. Elizabeth H. Reynolds, during National Secretaries Week, April 19-23.

Col Holland presented Mrs. Reynolds a scrapbook of "memoirs." This year's entries included tributes in the form of personal letters and photographs from each of her previous bosses since she began working at the School in 1956.

During National Secretaries Week Mrs. Reynolds will be treated with special lunches and given additional items for her memoirs.

A special highlight will be a special tribute from Helen Steiner Rice along with a presentation of a collection of her poems.

"Too often we fail to convey to our secretaries our awareness of and appreciation for the enormous burdens they bear daily with little thought of their own personal problems in making our jobs easier, in keeping us on schedule after scheduling us so efficiently, in uttering some "white lies" where necessary to keep us out of trouble, in exemplifying the highest ideals of tact, diplomacy, and graciousness under the most trying conditions, in forcing very convincing smiles when tears might well be more appropriate, and in literally running our offices more expertly and efficiently than we could or would ever admit to," said Col. Holland in appreciation of his secretary.

"Mrs. Reynolds is the most outstanding and gracious secretary I have known during my 30 years of military service," said Col. Holland.

APPRECIATION—COL Norman L. Holland, Director of Directorate of Individual Training at the Missile and Munitions Center and School, Redstone Arsenal, presents his secretary, Mrs. Elizabeth H. Reynolds, a scrapbook of memoirs as a token of his appreciation of her work. April 19-23 is National Secretaries Week.

NAMES IN THE NEWS

SP4 Jerry Berg

Soldiers of the Month, arise! It's time once again to go off and fight for the honor and glory of your units! (Not to mention for the many compensations that go with the title of MMCS Soldier of the Month.)

Our four contenders this month range from a student who has just barely finished four months in the Army to an instructor whose three-year enlistment is drawing to an end.

The 1st Battalion's man is SP4 Jeffrey P. Strecker, who teaches in Missile Components Department and comes from the ranks

STRECKER

of Company B. Strecker has been here since completing basic training in September, 1968, and has some experience at being a soldier of the month. Back in August, 1969, he made it all the way to the top of the heap, earning the title of Arsenal SOM. Strecker is from Lake Ronkonkoma, N.Y.

PFC Martin K. Robertson of the 4th ETC will represent 2nd Battalion in the competition. A native of Akron, Ohio, he graduated from United Electronics Institute there. The 22-year-old

ROBERTSON

trooper worked as a digital computer technical representative in

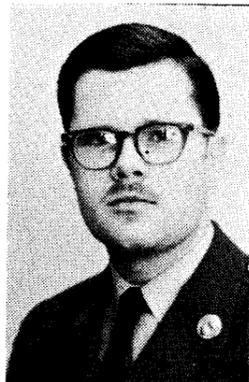

1965 CHEVROLET
CORVAIR, automatic
\$595

Frank Clark
Motors

4302 Gov. Dr. 837-3490

Cleveland before entering the Army in July of last year. At MMCS, Robertson is learning to repair nuclear weapons test equipment.

Another Ohioan will be going before this month's board as 3rd Battalion's standard-bearer. PV2 Raymond P. Wasky from the 9th ETC calls Cleveland home and

WASKY

joined the service the most recently of the four—in December of last year. He's a HAWK missile repair student and should be well-qualified for that specialty, since he earned a Bachelor of Electrical Engineering degree at Cleveland State University.

And, from over UTC way, we have SP4 Edward E. Hook II, 200th Ordnance Detachment.

HOOK

Hook is a HAWK missile and launcher repairman, a skill he acquired here at MMCS. He's been in the Army two years and a couple of months. Another 22-year-old, Hook is from Pontiac, Mich.

Incidentally, all four soldier of the month hopefuls this time are ex-bachelors whose wives are with them here in Huntsville. Could it just be that having a wife to shine one's shoes and polish one's brass makes for a winning soldier?

TEST ACE

Another top man, MOS-wise, has been announced by Department of the Army. He's former SP4 (now civilian) Kenneth F. Smith, who completed his three-year hitch Friday and went home to St. Louis, Mo. He scored highest Army-wide in his MOS during a recent testing period.

Smith came here in May, 1968, completed the Sergeant missile firing set repair course, and in-

structed in that MOS for a year and a half. Up until his ETS,

SMITH

Smith was serving as a clerk in Company C. He plans to return to college (the University of Missouri at St. Louis) and take up where he left off before entering the service.

E-5 STRIPES FOR TURNER

Congratulations are in order for newly-promoted SP5 David W. Turner of Company C. Turner, a computer systems analyst for the Office of the Comptroller, moved up a grade last week. Since he came to MMCS in April of 1969, Turner completed the HAWK continuous wave radar repair course, instructed in HAWK Division for a while, and then took on his present duties in the comptroller's office. A native of Mountain View, Calif., Turner has also been serving as president of the Brigade Enlisted Soldier's Council.

7TH ETC TAKES 2 HONORS

Men of the 7th ETC earned two distinctions within the 2nd Battalion during the month of March and were honored for doing so at last week's battalion award ceremony. The assistant commandant, COL Anthony F. Stahelski, presented the company with the battalion's Honor Company and Blood Donor trophies. A Minuteman Award also went to the 2nd Battalion as a whole for achieving a 97 per cent participation in the U. S. Savings Bond program during 1970.

GOODMAN DEPARTS FOR KOREA

A Certificate of Achievement went to MSG Alvin W. Goodman last week as he finished up a nearly three year assignment with MMCS. Goodman served as senior materiel readiness NCO with the Directorate of Logistics. He was cited for providing invaluable technical assistance during the school's changeover to

Fleming Will Speak At Graduation

CPT FLEMING

CPT Harry S. Fleming, chief, Foreign Liaison Division, will address students graduating this Friday from the Missile and Munitions Center and School at 9:30 a.m. in the Post Theater.

The guest speaker holds a Bachelor of Arts degree in general science from the University of Iowa, Iowa City, Iowa. He is presently working toward a Master of Arts degree in administrative sciences at the University of

Alabama—Huntsville. He received his commission through the ROTC program at Iowa.

Fleming has been decorated with the Bronze Star Medal and the Army Commendation Medal with the first Oak Leaf Cluster.

TAMMS — the Army's current maintenance procedure and records system. A change in scenery is in store for the sergeant—he is going across the wide Pacific for a tour in Korea.

GRADUATION STRIPES

Graduating students (RA and US types) who moved up a grade Friday are: Ronald G. Allen, John J. Anderson, Lawrence F. Matheis and John S. Pardee — 3rd ETC; Dock Fowler, Ronald A. Jones, Robert J. Mucha, Leno A. McQuarter, Heleodore G. Granado, Joseph M. Felio, Stephen D. Sievek and George B. Welch—4th ETC; Frankie D. Chan, Michael L. Leary, Dean L. Norton, Guadalupe Picon, Arthur L. Stanley and Ray M. Ellis — 6th ETC; and David L. Foster, Robert J. Richard and William H. Mulder—7th ETC. They all went from PFC to SP4.

Making PFC as they graduated were: Thomas A. Halliburton, Thomas E. Brand, Ray W. Locklear and Richard L. Zierke—4th ETC; and John D. Phillips, Joseph W. Longmire, Darrell E. Whitley and Michael V. Jackson—7th ETC.

WEEKEND ACTIVITIES

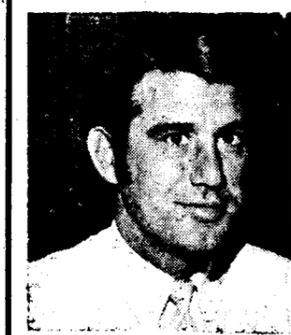

The Service Club has planned a full weekend of entertainment for enlisted men of April 23-24-25.

The first event is the Bob Williams USO Show Friday at 8 p.m. The "Laugh-Out" variety show will be done in the round and will be a new version of TV "Laugh-In" including comedy, folk-rock and novelty songs, jazz and Polynesian dancing plus many novelty acts.

Saturday a tour of Guntersville TVA Dam and a picnic at Little Mountain State Park is scheduled. Enlisted men planning on making the trip must register at the Service Club for lunch.

Sunday at 8 p.m. a party honoring men having birthdays in April will be held in the main lounge of the Club. Gifts and prizes will be awarded and refreshments served.

The Business and Professional Women's Club of Huntsville will sponsor a party for military personnel on Monday evening at 8 o'clock.

P&P Golfers Tee Off In Mid-Season Form

A hole-in-one, an even par round and seven team sweeps featured opening day activity as the P&P Golf League pried the lid off another season at the Piedmont Par 3 course last Tuesday.

LES FISK

Les Fisk, who teamed with Howard Andrews in capturing the league title last year, accounted for the ace when he held out his

tee shot on Piedmont's 17th hole. The defending titleholders opened their bid to become the first duo to win two years in a row by scoring one of the team sweeps. Andrews shot a 55 and posted the low net total among the 44 players with a 52.

Other tandems taking all six of their match points were, Bill Donehoo-Ray Profitt, Bill Perkins-Tim Laird, Dave Renton-Mike Stewart, Ed Kellis-Sam Hardy, Rick Shingler-Paul Greib, and Lloyd Chapman-Paul Spelar.

Lee Keim stroked four birdies in fashioning an even par 54 in reminding all rivals that he has no intention of relinquishing his status as the league's premier shot-maker.

LEE KEIM

Keim has posted the low individual average in each of the past three years and rates as the only no-handicapp player in the league.

Kynerd Reigns In MISD Golf

Organizational golf tournaments are back in season at Redstone and one of the first was staged early this month by the personnel of the Directorate of Management Information Systems.

Fifty-two employees of the newly formed Directorate participated in the first annual tournament at the Colonial Golf Club.

George Kynerd and Eddie Hammons shared individual honors for the day with the former turning in a 68 for low net and the latter shooting 77 to qualify as low medalist.

Trophies were awarded to the winner and runner up in each of four flights with Kynerd and Hammons ruling the first flight.

Joe Hill edged Howard Vaughn in the second flight and Sid Douglas was the third flight ruler with Jim Summer the runner up. Frank Davis topped the fourth flight with Sid Layne close behind.

Special prizes were awarded for closest to the pin on holes 4 and 12 with Howard Vaughn and Max Watson taking the honors.

Bees Draw Bye—

CWF Netters Open Season

Two thirds of the Civilian Welfare Fund tennis brigade swung into action this week for the first round of play in the Huntsville Industrial Tennis league.

The A division netters are meeting the strong Alverson-Draughon outfit in the opening two week match with the C Division pairing sending the Missile Command against Brown Engineering.

The B Division representatives drew an opening round bye and will get their first taste of league competition in the second round against Computer Science Corporation. The second round starts April 26.

Charles Bowden continues to hold down the No. 1 slot on the A team but the rest of the singles lineup has been shuffled from last season.

Chic Avedon, who transferred to Redstone with the Army Pictorial Center last fall, has grabbed the No. 2 spot and will team with Bowden in doubles.

The rest of the singles lineup has George Elrod in No. 3, followed in order by Bob James, Sam Uptain and Don Holder.

James and Uptain make up the second doubles pair with Joe Hiatt joining Holder for the No. 3 two-man event.

Art Jones, an A team regular the past two years, heads the B ladder at this time with Bill Dunlap, Phil Adair, Charles McBrearty Emil Luft and Bob Lindman occupying the next five singles positions.

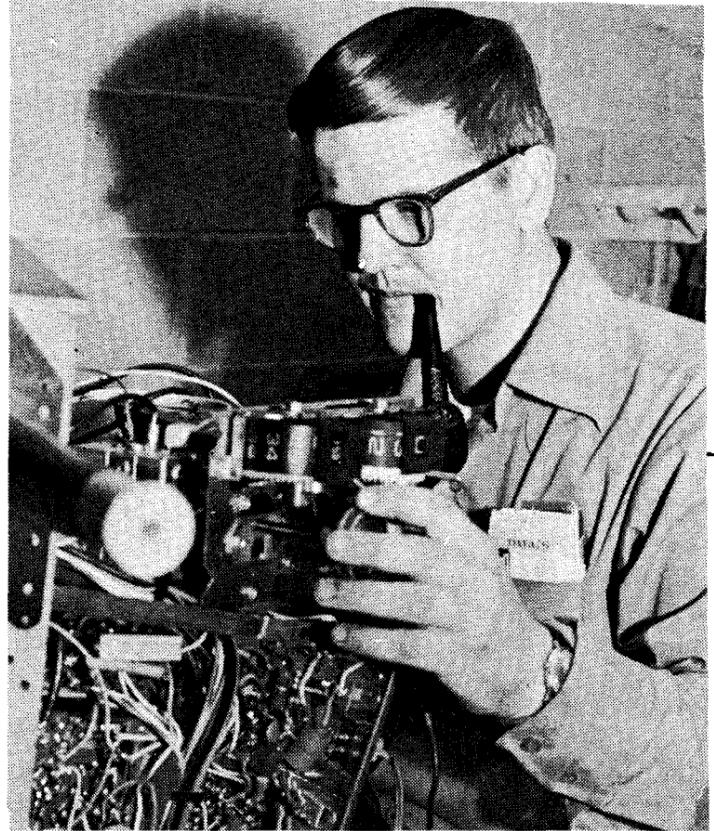

Dunlap and Adair make up the top doubles combine with McBrearty paired with Irv Kellogg as the No. 2 team. Luft and Lindman are presently holding the No. 3 rating, however, all of the B team ladder is subject to change prior to the start of the first match.

The C team into their match with Brown with John Veeneman

holding the top rung of a 20-man ladder.

The remaining players that Captain Hubert Anderson has lined up for singles are, Ed Falkowski, Jim Dailey, Jack Risse, Bill Bright and Hal Peter-

son. Dailey is paired with Don Bollenbacker for the top doubles match with Risse and Falkowski drawing the nod in the No. 3 match. The second tandem is made up of Frank Fleming and Stan Prosser.

CHECKING THE PICTURE—SP4 William C. Rapp checks a TV set during his Project Transition training. He received on-the-job training with Astro TV Service in Huntsville just prior to his separation from the Army. SP4 Rapp qualified for the training under Project transition, and he expects to work in the skill in his hometown of Rochester, N.Y.

Former Employee Recognized

A former chief of the Policy, Procedures and Systems Office has received recognition for the work he has performed at Bangkok, Thailand.

He is Roy E. Fox, recognized because he devised a means of

internal fund control which helped return \$12 million to USARPAC in fiscal year 1970. His wife, the former Barbara Long, was also an employee in Finance and Accounting and is a native Alabamian from Athens.

Curtain Drops On AMC Season

All but one final position remains in doubt as the 16-team AMC Bowling league takes to the runways at the Parkway Lanes to write the final chapter of the 1970-71 season tonite.

Unfortunately for all but the DeVault Ultraprecisions, that one position not up for grabs is first place. The DeVaults put that beyond reach a couple of weeks ago.

Last year's winning Bandits put in a strong bid for second last week with a 3-1 win over the Tigers. This put them two points ahead of the All-Sports who absorbing a 3-1 setback doled out by the Cobras.

The T-Birds are another half point back in fourth with the Tigers and Cobras all even in fifth and the Sheratons now seventh.

Floyd Clark and Butch Mc-

Dougal shared individual scoring-honors last week, each with a 589 series. Clark got 563 aid from Al Stiles in getting the DeVaults three out of four from the Tow Boys.

McDougal's luck was not so good with the Raiders dropping three points to the Wonnors.

Charley Mount was another hot shooting bowler whose efforts were lost when the Rejectors failed to win a point from the Bombers. Mount swept 575 maples off the Parkway slide while Joe Barnes upended 568 sticks in the winning cause.

The Bandits took their lead from John Goltz who hit for 548 while Bill Davis rapped a 546 to set the pace for the Cobras.

down Maple Lane

By SP5 Bill Hayes

The Student Officer Company apparently got a shot in the arm this week — they rolled into Maple Lanes with blood in their eyes, and walked out after it was over in first place of the MMCS Officers league.

Second to None, who recently regained the lead after brief banishment to the nether regions of the league, toppled again to third place a game behind SOC. "None" still has a chance to pull it out of the fire—they'll roll against SOC this week, so there's a chance for redemption here, folks.

With only three weeks to go in the season, it looks like the top three are the only teams eligible for trophy honors, un-

less the Loggers and Marine Corps Detachment go completely Don Carter on them.

School Brigade bowlers, too, are down to their last three games of the year; and they have just about a triumvirate in the league power struggle. Headquarters Co. and the brown-shoe Retired team each dropped three, while Co. D took advantage of their half-stepping to forge ahead to first place with a four-point win from the Ammo Humpers.

Co. D now holds a half-point lead over HHC, with Retired bowlers another five games behind. Threatening the Retired team for third place is a whole raft of contenders, any of which could salvage third place out of the confusion.

Judging from a combination of past performance and current standings, though, Co. D and HHC may dominate the competition for first and second places for the year.

HIGHS & LOWS

Larry Makanani 223-563, Harry Kretlow 548, Darryl Watson 202-540, Clem Shamus 235-546, Frank Hertzog 233-586, Tom Stryker 557, Bucky Breedlove 524, Harry Fleming 225-579.

94 Graduate

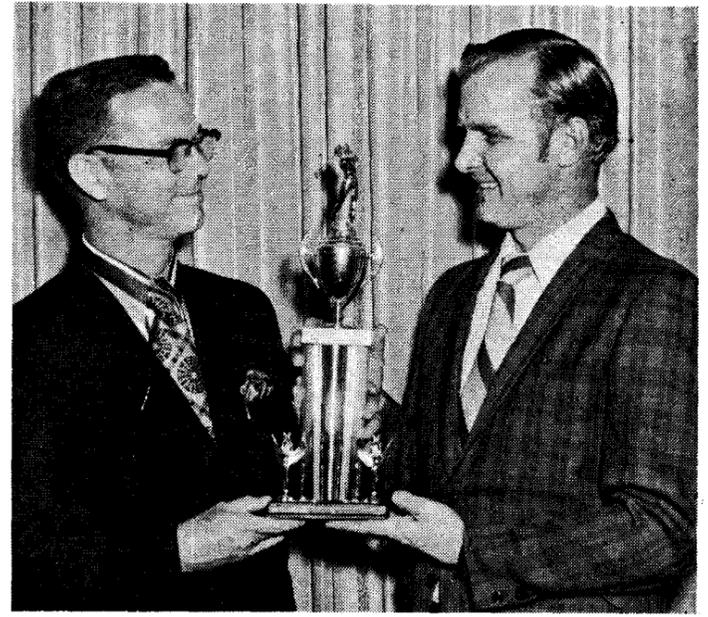

Graduation ceremonies Friday at the Missile and Munitions Center and School, Redstone Arsenal, marked the completion of training for 94 soldiers who have been studying here.

Seven of the graduates received special recognition for outstanding academic performances: SP4 Kenneth W. Smith of Westboro, Mass., with a 95.2 overall average in Nike Radar and Computer Repair; PFC Dean L. Norton of Herkimer, N.Y., with a 93.9 in Light Air Defense Systems Electronic Repair; PFC Ronald A. Jones of Lapeer, Mich., with a 98.7 in Ammunition Storage; SFC Klaus Fischer of Germany with a 95.1 in Pershing Guidance and Control Repair; SP4 Robert J. Richards of Albany, N.Y., with a 96.8 in Guided Missile Propellants and Explosives; and SP4 Steve D. Sievek of Brainerd, Minn., with a 97.3 in Ammunition Renovation.

SP4 Sievek, SP4 Richards, and PFC Jones received the Association of the United States Army (AUSA) award for their academic performance. A graduate must receive an overall score of 96 to qualify for the AUSA award.

MAJ Ronald J. Finkbeiner, chief, Administrative-Operations Division, Directorate of Individual Training, was guest speaker.

The number of veterans taking policemen and firemen on-job-training has risen significantly. According to VA statistics, California leads the nation in the number of trainees. Other leaders: New York, District of Columbia, Connecticut, Ohio, and Pennsylvania. Veterans interested in training for these careers should contact their local police or fire departments.

THE DIRECTORATE'S BEST—W.N. Calcote, director, handles the honors as George Kynerd gets his recognition for having captured first place in the first annual golf tournament staged for employees of the Management Information Systems Directorate. Kynerd edged the tournament medalist, Eddie Hammons, for the title in the tournament that attracted 52 employees of the Directorate. The 18-hole event was held at the Colonial Golf Club.

100 Cars to Select From
At All Times
Located Just East of Stone Jr. High

A Volkswagen guarantee doesn't have to guarantee a Volkswagen.

Any used car that's tough enough to pass VW's 16-point inspection deserves a VW guarantee. No matter how big it is.

You see, a VW guarantee isn't a 50/50 deal, but our full 100% guarantee to repair or replace all major mechanical working parts* for 30 days or 1000 miles. Whichever comes first.

So before we guarantee a big used car, we make sure it's as tough as our little car.

Here are some big cars who are tough enough:

*engine, transmission, rear axle, front axle assemblies, brake system, electrical system.

CHECK POINT—SFC Robert L. Harris consults his pocket-sized Ammunition Handbook for latest recommendations on setting up an ammunition storage point. Harris is an instructor with the Ammunition Department, Missile and Munitions Center and School.

School Revises Its Ammunition Handbook

Imagine for a minute that you're about to take on your first assignment as an ammunition sergeant with an operational ordnance unit in the field.

To do your job effectively, you'll need to know things like the proper sequence of shipping procedures for an Ammunition Storage Point (ASP), the safest way to set up an ASP in a new location, the maximum payloads of different Army trucks, and countless other bits of information.

Then too, you'd better be familiar with a bewildering number of two-tone and three-tone color schemes used to identify artillery rounds. And, it could be very helpful if you knew a few basic characteristics of the more common items of foreign ordnance.

All this and much more was crystal clear in your mind when you graduated from that ammunition course at the Missile and Munitions Center and School, Redstone Arsenal, Ala. Time, unfortunately, draws a misty

shroud over all knowledge.

Where do you turn for quick, practical, field-tested answers to such problems or to refresh your memory on points you should remember?

You don't have to go any further than the pocket of your field jacket if you've got a copy of the "Ammunition Handbook" with you. Like Fibber McGee's closet, this miniature encyclopedia practically overflows on you when it's opened. Instead of running over with forgotten and useless paraphernalia, though, the handbook overwhelms you with the latest facts, figures, "how-to" diagrams and practical tips—the sort of information an ammunition sergeant or officer can refer to on a day-to-day basis.

Prepared, printed and recently brought up to date at the Missile and Munitions Center and School, the handbook is intended mainly for distribution to students who will

be actually working with ammunition in units scattered around the world. And, since word went out that the new revised edition is off the presses, requests from the field have been coming in to MMCS's Publications Division at a brisk rate.

Known officially as "Special Text 9-170", the current Ammo Handbook represents months of effort on the part of writers and editors in the Literature Branch, Office of Doctrine Development, Literature and Plans, MMCS.

At a hefty 276 pages, it's nearly twice as large as the edition it replaces. More important than size, though, are the many ways in which the book has been revised to reflect changes in the type of ammunition being used by the Army, new methods of ammo handling, and lessons which have been gained in Southeast Asian operations.

Richard W. Jones, a project officer with DDL&P and one of the men whose efforts went into the new book, said that several sections were written with special emphasis on experience gained in Vietnam.

"We've interviewed people who came back from over there and have veterans of ammo service in Vietnam assigned right here who have helped us make the book relevant for that type of combat situation," he explained.

Two other men who played major parts in the revision were CPT Bruce M. Garnett, chief of Literature Branch, and CPT Alexander E. Davidoff, who served in the Nonresident Instruction Department of MMCS.

"We've also eliminated quite a few antiquated terms from the book," Jones added, "and we tried to look at it from a human factors standpoint. We wanted to make it

FIRST WEATHERMAN
The North Alabama Chapter of the American Meteorological Society will meet Thursday, April 22 at 7:15 p.m. in the large conference room of the Lockheed Missile and Space Company, 4800 Bradford Boulevard Research Park. Dr. C. E. Buell of the Kaman Nuclear Company, Colorado Springs Colorado, Colorado, will present a program entitled "Admiral FitzRoy—The First Weatherman".

easier to use, to facilitate finding information faster, and to make the material more retainable."

Response to the new handbook has been so enthusiastic, Jones noted, that the idea of converting it into a Field Manual is being considered. Such a move would require authorization from Department of the Army—which has been requested, Jones said—and would shift responsibility for distributing the book from MMCS to DA.

About 175,000 widows of veterans who died of service-connected disabilities and 65,000 wives of veterans totally disabled in service are eligible for educational benefits. Individuals interested in these benefits are urged to contact the nearest VA office or local veterans service organization representative.

PRACTICE MAKES PROFICIENCY—Hugh E. Nunnelley of Huntsville instructs these two nuclear weapons electronics students as they troubleshoot a model circuit on a training device. Privates Walter J. Dec (foreground) and L. Kevin McMichael near their graduation ceremony as they become proficient in coupling circuits under Nunnelley's instruction.

Hallgren Receives 1st Star

BG Hal E. Hallgren, Army Materiel Command (AMC) Comptroller, received his new rank at an AMC ceremony attended by top Army officials. GEN H.A. Miley, Jr., AMC Commanding General, and Mrs. Hallgren pinned on the new star.

Though the MCD has no direct contact with Sandia Base schools, they do have correspondence through channels, enabling them to make modifications in their schooling program to meet the needs at Sandia.

One such modification in the school was the addition of one week of classes in the electrical branch. With the help of training devices designed by Clyde A. Guiou, branch chief, the 11th week of school was tacked onto the end of the old ten-week course. As a result, the students are more proficient at correlating electrical schematic diagrams with real circuits and electronic troubleshooting, so they are most prepared for their Phase II schooling in New Mexico.

Not all innovations are the add-it-to-the-end type. Some of the course content is changed as a result of field experience evaluated by appropriate agencies, newly-adopted procedures or recently-approved changes in doctrine.

The result is an up-to-date course of study for the fledgling foxtrot, free of outdated or untried procedure and theory.

It's a lot of work to keep the program current.

"It's worth it," said Cherry. "The students are bright, hard-working and motivated enough to make the most of the program for the 35F20 course — it's a great experience to work with the students in this program."

And, judging from their diligence in class, it's a great experience for the students as well.

Assigned to AMC in September 1969 as Assistant Comptroller for Cost Analysis, GEN Hallgren was named the Comptroller in July, 1970.

GEN Hallgren served as a division chief in the Safeguard System Office in Arlington, Va., before reporting to AMC. During 1967-68 he was Commander of the 52nd Artillery Group in Vietnam. Before that, he served as a 4th Armored Division Artillery battalion commander in Germany.

A former Assistant Secretary of the General Staff, Office of the Army Chief of Staff, he has also served as a staff officer with the Office, Chief of Research and Development, Department of the Army.

Foxtrots Work Hard To Stay On Top

The instructors and staff call them "Foxtrots," an abbreviation of their Military Occupational Specialty (MOS) code, but they're really nuclear weapons electronics specialists. They study for 11 weeks at the U. S. Army Missile and Munitions Center and School, before they move out to Sandia Base, N. M. for further study.

There is no radioactive material at Missile Components Department in spite of the title of the course.

While they're here, the students make the sometimes rocky

transition from confused basic trainees to skilled specialists versed in fundamentals of electronics.

The students may not know it, but they're special — the only way to get into the "foxtrot" course of MCD (with a few exceptions) is to enlist for it specifically. The men in the course are all volunteers, meeting high standards set by Department of the Army and exhibiting high electrical and mechanical aptitudes.

They're special in other ways, too. Like being the only MOS

students at MMCS with a commissioned officer as a counselor. The 120 students who go through the course during the average fiscal year since 1968 receive the first six months of training here.

"Ours is a prerequisite for the course at Sandia Base," said Mr. Benny J. Rogers, Educational Specialist for MCD. When they leave Redstone, the men are ready for further training in electrical and electronic components and test equipment associated with Army nuclear weapons.

The course is demanding. Foxtrots must maintain an academic average of at least 80%, the highest requirement at MMCS. The foxtrot course is also the only one at Redstone that does not recycle a man for academic reasons if a student's academic average is too low, he washes out of the course—he can't go back to an earlier stage of schooling for remedial work. He can, however, be placed in another course at MMCS.

"We proceed at a more rapid rate than many other courses here," said SFC Homer O. Cherry, operations sergeant for the department. Cherry is in a position to know. He holds a Bachelor of Science in Electrical Engineering from the Milwaukee School of Engineering.

Should a student find himself falling close to the 80% mark or if he wants to polish up his skills even if they are satisfactory, he can request additional evening instruction.

Instructors will go out of their way to help him. If just one student requests additional help, an

Ideas Explored At Conference

The semi-annual conference of the Missile and Munitions Center Team was held April 15.

The objective of the team is coordination and interchange of ideas between agencies of the Combat Developments Command, the Army Materiel Command, and the Continental Army Command.

The Center Team is composed of 6 Redstone Arsenal elements: The Missile and Munitions Center and School, the Missile Command, Safeguard Logistics Command, Safeguard Systems Command, Huntsville Division Corps of Engineers, Air Defense Command (Field Office), and the Combat

Developments Command Maintenance Agency.

Col. Gilbert P. Levy Commandant of MMCS, is chairman of the team.

The conference received reports on the Logistics Officer Program and the Combat Developments Command's Combat Service Support Studies, on Conceptual Design for the Army in the Field and the Standard Army Intermediate Level System.

Other topics included the formation of the Munitions Command Field Service Office, logistical support for toxic and incapacitating chemical munitions,

the reorganization of the Missile Command Supply and Maintenance Directorate; the reorganization of the Missile and Munitions Center and School, and the Missile and Munitions Evaluation-71.

In addition the conference received reports on the quality assurance-quality control of missile maintenance and on the conduct of the logistical exercise for this year to be held at Fort Lee.

The Office of Doctrine, Development Literature and Plans of MMCS has the action responsibility for planning and coordinating team meetings and ac-

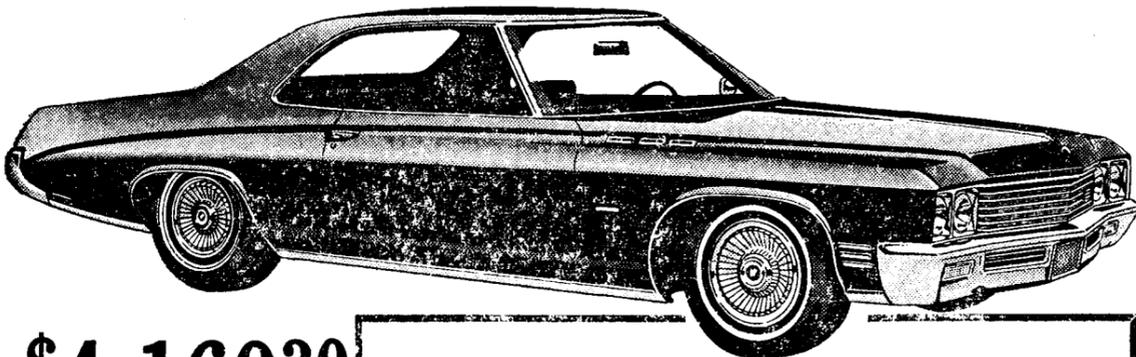

LTC Rory O. L. More addresses the Center Team conference.

tivities. The next team meeting will be held after the Missile and Munitions Evaluation report has been completed.

THIS SALE IS BIG

Helping People His Goal

The Red Cross said 'thank you' to SSG Douglas Pruitt of the 200th Ordnance Detachment the other day when he donated his 24th pint of blood during the visit of the Bloodmobile with the Missile and Munitions Center and School, at the Service Club.

"One of my goals in life is to help people who really need help," said SSG Pruitt, as he waited in line to donate blood recently.

"I gave my first pint of blood at the age of 15 when my employer's wife needed it for an operation, when I learned of the constant need for blood donors I became a regular donor at the local hospital," he said.

He has been a regular donor ever since. Last Wednesday he gave his third gallon to become a lifetime member of the Red Cross Blood donor program. Being a lifetime member means that all future blood needs of SSG Pruitt or any member of his family are covered for as long as he lives.

When asked if any of his immediate family ever needed blood he replied, "Yes, several years ago my mother needed blood, but that is not the reason I continue to donate. I donate blood

because the Red Cross needs it." The Red Cross requires that a donor wait two months between donations.

Not only does he donate blood regularly, but he is also the coordinator for the 200th Ordnance Detachment's volunteers who work with Project Hope (the Huntsville Opportunity Program for the Elderly) in the distribution of food each month. The word coordinator doesn't do him justice—he does more than co-ordinate.

Each month he is at the food commodity distribution center carrying baskets of food and is actively involved in the program of delivering food baskets to those people who are unable to make it to the distribution point on commodity day.

Pruitt has been at Redstone since September 1965 when he first arrived here for his advanced individual training in the Continuous Wave Radar Repair course.

He and his wife Beverly have two children, a girl named Tabatha, age 2½, and a son Doug, Jr., a year old.

SSG DOUGLAS PRUITT looks over three gallons of blood, representing the amount he has donated to the Red Cross program over the past nine years.

Junior ROTC Symposium Begins Friday

The second annual seminar for Junior Air Force ROTC cadets and their guests will be sponsored by the Tennessee Valley Chapter Air Force Association Friday at the Redstone Officers Open Mess.

This year Army and Navy Junior ROTC units have been invited to participate with the Air Force Junior ROTC. The morning program will be on the Air Force Academy aircraft systems and bombers.

COL Jack Watkins, vice commander to the Commandant of the USAF ROTC program, will be the luncheon speaker. The afternoon will be spent on space flights and aerospace medicine. The day will end with dinner and dancing at the Open Mess.

Saturday's schedule lists static displays at the Huntsville-Madison

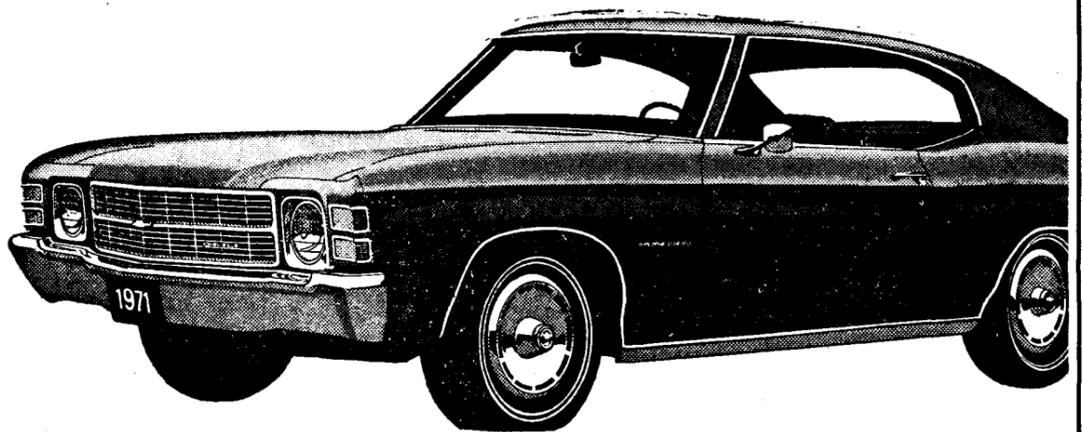

NEW LIAISON—Welcoming Maj. Horst Zumkley of the German Air Force to Huntsville, Mayor Joe W. Davis received a pictorial introduction to Germany in return. Maj. Zumkley is the recently-assigned liaison officer for the German Air Force detachment at the U.S. Army Missile and Munitions Center and School. He, his wife and their two children will live in Huntsville during his assignment here.

NATIONAL LIBRARY WEEK—"Good libraries are essential to an educated and informed people," Maj. Gen. Edwin Donley said last week in urging every citizen to become better acquainted with the services offered by libraries, both at the Arsenal in their home communities. The Commanding General of the Missile Command is serving as honorary chairman of the national week in Huntsville. In the above picture, Gen. Donley and Dr. Eberhard Rees, director of the Marshall Space Flight Center, get assistance from Joyce Kelly in signing out books at the Redstone Scientific Information Center, where Mrs. Kelly is employed as a library assistant.

Mrs. Guyton Will Retire

This week Mrs. Blanche Guyton will retire after 20 years of food service management. Since August 1967, she has managed Arsenal cafeterias serving over 1,000 customers a day.

She won the Army Missile Command's Cafeteria of the Month Award five times to capture the Command's plaque's, now permanently on display in the 5250 cafeteria. Mrs. Guyton, a former elementary teacher, entered food service management in 1947 when she agreed to manage a school

lunch room on a temporary basis. From 1949 to 1951 she was of the Alabama School Food Association.

In the summer of 1952, Mrs. Guyton accepted a temporary position with the Army and Air Force Exchange Service at Ft. McClellan, Alabama. In 1964, when her husband transferred to the Missile Command, Mrs. Guyton came to Redstone Arsenal.

There was no food management job open; so she worked as assistant retail manager of the Post Exchange. In April 1965 she became the manager of the cafeteria in building 4488. By August of 1967 Mrs. Guyton transferred to her present position.

"Looking back, as we all must, I realize that most of my pleasure and satisfaction came from liking my work and working with people," said the retiring cafeteria manager. "People really do make the difference. Without the dedicated staff that I have had over the years, I couldn't have done it."

"I know it sounds crazy, but if I could turn back the clock a few million meals, I would jump at the chance to start all over again."

Mrs. Guyton

CHRISTIAN WOMEN

Huntsville Christian Business and Professional Women will witness a fashion review and hear an area representative of the organization from Buffalo, N.Y., Monday at 6:30 p.m. at the Carriage Inn.

The meeting is open to all Christian women. However reservations are necessary and the deadline is Saturday. Janice Neuffer, 539-3582, and Betty Lashley, 859-1968, are handling the reservations. This is a dinner meeting.

HOW TO GET A BETTER JOB (Without Quitting)

It may take no longer to find that better job than it does to take the Dale Carnegie Course. Dale Carnegie training may help you get a better position right where you are.

STONEHENGE LECTURE

The Rocket City Astronomical Association is inviting the public to participate in Sunday's program at the Planetarium on Monte Sano, the program to be presented twice, at 2 p. m. and again at 4 p. m.

Legends and history of "Stonehenge, Ancient Astronomical Observatory" will be presented by William Scott before using the planetarium to transport the audience to the center of Stonehenge and demonstrating the method the ancients used to predict a lunar eclipse.

All ages are invited.

Grisham Flies By Remote Control

CPT J. R. "Pete" Grisham of the Dragon Project Office at the Army Missile Command, has a hobby of building and flying his own aircraft . . . in fact he has been pursuing his hobby since he was 7 years old.

During the past 21 years, CPT Grisham (who likes to be called Pete) has graduated from the little balsa airplane models with the rubber bands of his earlier days to the complex and complicated radio controlled models of today.

Pete's latest creation is a sleek monoplane "Dragon Fly Too" that is 48 inches long, has a wingspan of 63 inches, is powered by a .60 cubic inch Glo engine capable of flying speeds between 60 and 80 miles per hour.

From the little \$1.25 balsa model of his grade school days,

Pete has progressed to the radio controlled stage where a model complete with transmitting equipment costs between \$550 and \$650.

Back in the old days all Pete had to do to fly his plane was find a vacant lot, but with the new radio equipment all that has changed. He is now a member of the Rocket City Radio Controlled Model Airplane Club and on weekends he and other model enthusiasts fly their planes at the old Huntsville-Madison County Airport.

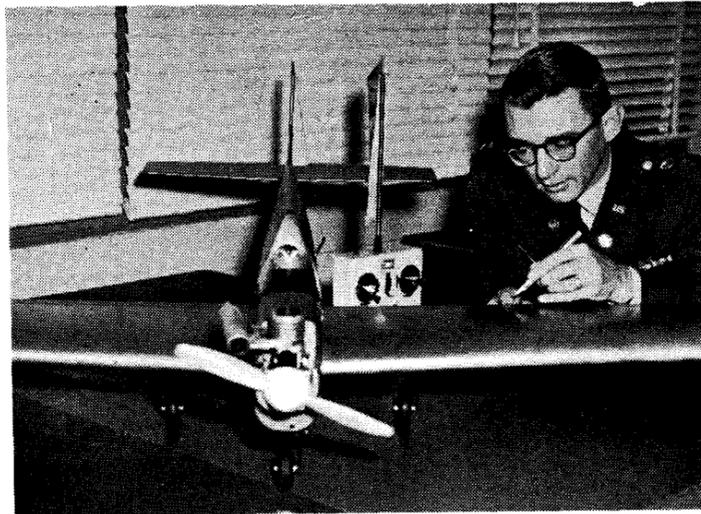

Qualifications have changed too . . . now Pete is required to have a Federal Communications Commission (FCC) Class C license to operate transmitters over 100 MW, when he flies his plane.

He also has an additional license from the Academy of

Model Aeronautics which provides him with \$300,000 worth of insurance and subscription to a national magazine.

Discussing his latest model, Pete talked more like an engineer than a model plane enthusiast. He estimated that it took him over two months (working evenings) to build. He can rig it to drop a parachute, simulated bombs, rockets, smoke trails and most everything a real plane can do.

Much of Pete's experience with model airplanes has been right here in Alabama. He lists Birmingham as his home of record now, but he graduated from Sidney Lanier High School, Montgomery, in 1960. From 1960 to 1964 he attended the University of Alabama at Tuscaloosa and received his BS degree in Commerce and Business Administration prior to entering the Army.

MODEL AIRPLANE HOBBYIST—CPT. J.R. "Pete" Grisham, Dragon Project Office, U.S. Army Missile Command, puts a finishing touch on "Dragon Fly Too" the 63 foot wingspan monoplane that he designed and built. Pete is a member of the Rocket City Radio Controlled Model Airplane Club and flew his new plane for the first time recently at the old Huntsville-Madison County Airport.

Some of his Army assignments include tours in Vietnam, Germany, Fort Benning, Ga.; Fort Eustis, Va.; and Fort Jackson, S. C.

Since his arrival at Redstone Arsenal in December 1969, Pete has been an enthusiastic supporter of the Rocket City Radio Con-

trolled Model Airplane Club.

He is such an ardent hobbyist that he will talk model airplanes with anyone who will listen. Anyone interested in radio controlled model airplanes can contact Pete Grisham at 837-5337 or Club President Bob Klineyoung at 453-4496 or 852-7655.

Management Class Will Graduate

A class of 40 individuals, including 38 who are or have recently been Army Materiel Command interns, and two officers, will graduate tomorrow from a five week course in Defense Procurement Management. All are stationed at the Army Missile Command.

The graduation exercises will be held at the Redstone Officers Open Mess.

This is the first time the course, normally presented at the Army Logistic Management Center, Ft. Lee, Va., has been brought to

Redstone. Instructors from Ft. Lee taught to course. Ethel Morris, Training and Development Branch of the Missile Command Civilian Personnel Division, coordinated arrangements to bring the course to the arsenal.

Guest speaker at the graduation will be Charles T. Patterson, deputy director of the Defense Contract Administration Supply Agency, Atlanta.

The Defense Procurement Management course provides a detailed study of procurement regulations, and is offered to persons who have demonstrated high potential for managerial development.

HOME AND GARDEN

The Home and Garden Group of the Officer Wives Club will meet on Tuesday, April 27 at 9:45 a.m. in the Patio Room of the Redstone Officers Open Mess. Mrs. J.F. Harbarger will speak on "Basic Landscaping".
