Await Future ABM Details

The focus shifted from Moscow to Washington this week as powerful Senate committees prepared to hold hearings on the nuclear arms limitation agreement signed Friday by President Nixon and Leonid L. Brezhnev, Soviet Communist party leader.

Meantime the Army began carrying out orders issued Saturday by Defense Secretary Melvin R. Laird who directed it to take initial action, pending treaty ratification, to implement the intent of the ABM agreement.

Specifically, Laird directed a stop on all construction at the Safeguard anti-ballistic missile site at Malmstrom Air Force Base, Montana, and suspension of work at other sites except the Safeguard facilities nearing completion in North Dakota which, he said, would proceed as planned.

Laird also told the Army "to plan deployment of an ABM defense of the national command, control and communication capabilities at Washington, D.C., within the provisions of the ABM treaty, on the fastest reasonable schedule."

He also directed suspension of "all ABM programs which are prohibited by the treaty," but the brief public statement issued by the Defense Department did not further define those prohibited programs.

"We want to move with prudent speed to abide by the obligations of the historic arms limitations agreement which President Nixon has achieved," Laird said. "We recognize that these actions will cause some temporary economic hardship, but the Defense Department will do everything it can to help alleviate those hardships."

"I feel confident that all Americans support these first steps to control the growth of strategic weapons."

The Army said Saturday that it was studying but could

not yet assess the impact of Secretary Laird's directives.

The Defense Department statement said Laird "will be presenting comprehensive testimony to the Congress on the ABM treaty and the interim agreement on strategic offensive systems, and as much detailed information as possible will be made public at that time."

Presumably that will include details on the future role of the three major Army commands in Huntsville directly involved in the ABM deployment, the Safeguard System Command, the Safeguard Logistics Command and the Huntsville Division of the Army Corps of Engineers. The Advanced Ballistic Missile Defense Agency here supervises R&D on future ABM concepts.

The portion of the accord reached in Moscow effecting ABMs takes the form of a treaty which must be ratified by a two third vote of the U.S. Senate. The Senate Foreign Relations Committee and probably others including the Senate Armed Services Committee will hold hearings before the Senate votes. No date has yet been set for the committee hearings.

A second part of the accord, an executive agreement running five years placed a ceiling on the number of offensive land based and sea based strategic nuclear missiles. The executive agreement does not require Senate approval.

The treaty reportedly limits each nation to two operational ABM sites and set a limit of 200 defensive missile launchers for each. The Safeguard site in North Dakota defending Minuteman ICBM launch sites is approximately 80 percent complete. Delayed by labor disputes for almost a year, the site planned for Montana is less than 10 percent complete.

(See ABM DETAILS on Page 10)

SLIM BUT DEADLY—Looking at the business end of the Army's new Cobra helicopter leaves the impression it's only half finished—but that's the shape of progress. It's a much more advanced gunship than its predecessor, the Huey.

Advanced Helicopter Gunship Tests Here

Missile Command researchers today began a test program to qualify the AH-1G "Cobra" helicopter as a launch ship for laser guided missiles.

"We're planning initially to fire about 15 missiles to qualify the Army's new Cobra gunship as a missile attack helicopter," said Dr. John L. McDaniel, Director of Research, Development, Engineering and Missile Systems Laboratory.

"For openers we fired from a platform on the ground. Later, we'll shoot from the air. Before we're through, we'll fire at a variety of moving and stationary targets."

The Cobra is faster, more maneuverable and presents a smaller silhouette than its predecessor, the UH-1 C "Huey".

"We know laser guidance works. We've hit tanks and other targets firing laser guided missiles off the Huey," McDaniel said.

To certify the Cobra, the MICOM Guidance and Control Directorate has designed launch equipment to accommodate four missiles.

The tests at Redstone are part of a continuing research program to investigate and accumulate technology in missile terminal homing guidance.

The new guidance technique, developed in MICOM laboratories, is called semi-active laser guidance. After the missile is fired, it homes on a target which is illuminated by a laser beam.

Laser terminal homing makes possible weapons which would have direct and indirect fire capabilities and could be utilized in air or ground roles.

Russ Gambill of the G&C Directorate has technical responsibility for the program at Redstone and Lt. Col. Robert Coon is program director. North American Rockwell is supporting the research program.

The Redstone Rocket

The Redstone Rocket is published weekly, on Wednesday. The publisher will receive editorial content for publication in the Rocket through the Information Office, Army Missile Command, Redstone Arsenal, Ala., 35809, Bldg. 5250, Room A-134, Extension 876-1400 or 876-1500.

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, P. O. Box 346, Huntsville, Ala., 35804, telephone 534-4701, as representative of the publisher. Advertising deadline—both display and wanteds—is 10 a.m. Monday before publication.

The Redstone Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$7.42 a year, or \$4.00 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 520, Huntsville, Ala. 35640.

Everything advertised in this publication must be made available for purchase, use, or patronage without regard to the race, creed, color, sex or national origin of the purchaser, user, or patron. A confirmed violation or rejection of this policy of equal opportunity by an advertiser will result in the refusal to print advertising from that source.

Rocket Ruminations

Ah, the clock is always slow; it is later than you think.
—Robert Service

Many citizens take their voting rights for granted. But particularly in this election year, each individual should remember that voting is one of the greatest privileges of our nation and the cornerstone of our democracy.

The following poem about his privilege was written by Major Paul E. Cothran, Deputy Commander of the Unit Training Command, MMCS, and was awarded the 1964 Freedom Foundation Medal.

My Vote - Freedom's Privilege

"What does your vote mean to you?" A stranger asked one day;
I mulled the answer o'er and o'er, to figure what to say;
And then the answer came to me, as clear as it could be;
I answered in a quiet voice, "Not much to me, you see
I never take advantage of this privilege Freedom grants
I'm always too busy to vote, I simply say I can't."
Men have died in many wars to give this right to me;
But me, I don't consider them, I say, "Just let it be;"

This stranger was an alien who fled from tyranny,
Risked his life that he might live in this same land as me;
I knew, from the way he looked, he could not understand;
Why I laughed at Freedom's gift, and mocked my country's plan;
The stranger didn't say a word, he didn't have to speak;
I knew that I had thrown away a gift that he would seek;

My vote means more to me today than it e'er has before,
I know a privilege is mine that many men adore;
A right that's bought with sweat and blood and handed down to me;
Free as the air I breathe today, and greater than the sea;
"What does my vote mean to me?" I answer proudly now;
"It's what my fathers left to me, Freedom's privilege," I bow;
"Thank you God for letting me live in a land that's free,
May I always use with pride, Freedom's privilege to me."

Local Scientists Present Papers

A select group of Missile Command and Anti Ballistic Missile Defense Agency scientists and engineers will deliver technical presentations at the 1972 Army Science Conference to be held June 20 thru the 23 at the United States Military Academy at West Point.

Through the Army Incentive awards Program, nine of the best presentations will be recognized by cash honorariums totaling more than \$3,000. The winning authors and coauthors will also receive the Dr. Paul A. Siple Silver Medallion Award, memorializing the world-famed Army cold regions explorer and scientific advisor.

Of nearly 500 proposals submitted for consideration, 125 have been selected for inclusion in special conference sessions. The authors and coauthors of the technical papers selected for presentation from MICOM and the titles of their papers are: Charles Cason and Steven J. Kast, "Theoretical Studies of High Energy Pulsed CO₂ Lasers," Romas A. Shatas, John D. Stettler, Harry C. Meyer and Thomas G. Rogers, "Laser Assisted Low Energy X-Ray Flash Generation", R.L. Hartman, "Radar Arrays with No Phase Shifters," and Barry D. Allan, "A Thixotropic Fuel for Tactical Missiles."

Representing ABMDA are Dr. Larry Atha, "Advanced High Energy Missile Control Systems" and Charles Vick, "Data Processing for System Analysis".

This is the eighth in a series of conferences inaugurated in 1957. More than 400 are expected to attend, including research and development leaders of the Department of Defense, U.S. Navy, U.S. Air Force, and U. S. Marine Corps. Allied delegations will represent Australia, Canada, the Federal Republic of Germany, France and the United Kingdom.

Secretary of the Army Robert F. Froehke has accepted an invitation to give the June 21 banquet address. The Chief of U. S. Army Research and Development, LTG William C. Gribble Jr. is the keynote speaker.

The professional stature of the conference is attested by the expectation that approximately 250 of those planning to attend have doctoral degrees in science and technology.

USAFI Classes Start In June

The United States Armed Forces Institute will offer group study classes for a ten-week period beginning June 5.

Three courses are scheduled. An Economics II class will meet from 6 to 8 p.m. on Tuesdays and Thursdays; an English Composition II class will be held from 6 to 8 p.m. on Tuesdays and Thursdays; and an Intermediate Algebra course is scheduled for Mondays and Wednesdays from 6 to 8 p.m. All classes will be held at the Army Education Center in Building 3484.

USAFI credit is recommended by the American Council on Education and can be transferred to accredited colleges. More information is available at the Army Education Center, which is open from 7:30 a.m. to 9 p.m. Monday through Thursday, and from 7:30 to 4:30 on Friday.

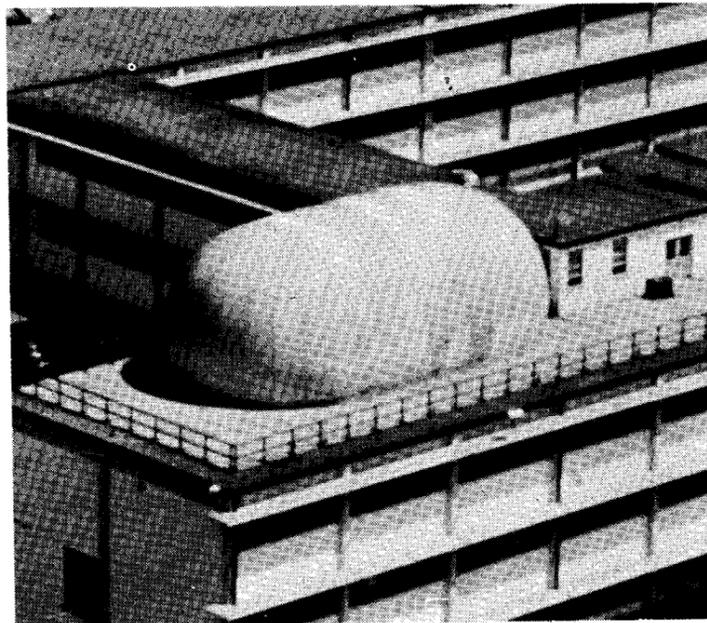

In another educational note, the University of Alabama-Huntsville will offer a course in history on Tuesdays and Thursdays between 6 and 8 p.m. Registration for this course will take place from 7 to 8 p.m. tomorrow in Building 3448. The classes will be held in the same building.

Answers

(Editor's Note: The MICOM Information Office conducts a question and answer program for job-related questions of general interest. Such questions may be telephoned to 876-4161 or 876-4400, or mailed to AMSMI-G. Some questions are selected for publication in the Rocket. Names are withheld. It is not intended that this program take the place of the usual supervisor-employee relationship which is the proper channel for specific job-related questions.)

QUESTION: What is the base for computing interest earnings on a Series E bond which has reached maturity? Or stated another way, Does the accumulated interest on a matured bond earn interest?

ANSWER: Competitive Interest Rate: E Bonds pay a bonus interest rate of 5-1/2% compounded semi-annually, when held to maturity of 5 years, 10 months. And they can be held beyond maturity at the same bonus rate.

Question: What's inside the plastic bubble on the roof of McMorrow Labs?

ANSWER: The bubble is there to shield men and antennas from weather during tests and evaluations conducted by the Guidance and Control Directorate of RDE&MSL. Its plastic walls allow radio energy to pass through without distortion. A metal weather shield would create reflection that would interfere with antenna measurements. The bubble also protects antennas under test from wind movements which might change the test pattern. The penthouse on the roof houses test equipment.

QUESTION: Why are Gates 2 or 3 not opened during daylight hours on week ends and Holidays. It would make the picnic areas on the Tennessee River much more accessible to residents of South Huntsville, and Morgan and Marshall counties.

ANSWER: Personnel levels and usage have dictated the policy that Gates 2 and 3 be closed except at peak traffic periods in the case of 2, all day in the case of 3.

QUESTION: Most local residents have visited the Alabama Space and Rocket Center. They often do not offer to take out-of-town visitors because of the cost to them of a second visit. The center loses from the standpoint of income and publicity. Is it possible for the Civilian Welfare Council to arrange for reduced rates for employees?

ANSWER: The Alabama Space & Rocket Center offers a privilege pass to any local paying adult customer. This pass, which can be obtained free, will admit the owner free of charge if he brings two paying guests. Guests can be children or adults.

Legal Hassle Involves Arsenal

The Army's refusal to apply for state permits to operate steam plants at Redstone Arsenal and similar facilities at military installations elsewhere in Alabama may be tested in court.

Attorney General Bill Baxley today is considering a recommendation by the staff of the State Air Pollution Control Commission that suit be instituted to compel the Army to apply for the permits. The State Commission referred the matter to Baxley for an opinion last week.

The involvement of Redstone Arsenal in the dispute between federal and state authorities centers around the three coal fired steam plants used to heat buildings on the installation. MICOM has provided, at the state commission's request, information on the plants, acknowledging that they emit fly ash and other pollutants which exceed air pollution standards. It has also advised the state commission, however, that a \$2.5 million conversion program will begin this year to switch the plants to natural gas fired boilers, a method of operation which will cut air pollution levels to well below state standards.

Nevertheless, the staff director of the state commission recently told MICOM that it must apply for a permit to operate the steam plants or be in violation of state regulations. The commission also said it required the Thiokol Chemical Corporation to file for a permit to operate its Huntsville Division, which is housed in Army owned facilities on Redstone.

Frank J. Buckley, MICOM general counsel, told the commission in reply that MICOM will comply with the state's air pollution standards as soon as possible, but added that based on guidance from the Department of the Army, MICOM

would not apply for a permit from the state to operate Army equipment on a federal installation.

Curtis L. Wagner, special assistant to the Army Judge Advocate General, advised the state commission by letter last week that: "The application for a permit by the Commanding General of Redstone Arsenal or by its contractor, the Thiokol Chemical Corporation, will be a direct violation of current Army and Department of Defense directives . . . the Commanding General or anyone else within the Army establishment who makes such application could be subject to sanctions for failure to comply with Army regulations which have the force and effect of law."

Wagner's letter expressed the Army's willingness to voluntarily cooperate with the state in complying with its air pollution standards short of requesting state permission for the Army to operate.

Spokesmen for the state commission last week said that Ft. McClellan and Ft. Rucker also had not complied with the state's requirement that they seek permits to operate.

While the legal dispute continued, MICOM went ahead with long-standing plans to end air pollution at Redstone.

The \$2.5 million project, approved in the last Congressional session, will be advertised for bidding shortly. The Mobile District of the Army Engineers is completing design work on the project. Actual work will begin later this year.

Redstone's two major steam plants, Buildings 4725 and 3624, will be converted, boiler by boiler to gas fired operation. The third plant, Building 5659, will be closed as soon as the conversion is completed.

Bonus Report Spurs Retirement Actions

Planned retirements of civilian personnel at MICOM took a leap upward during the past week following the announcement that a 4.8 per cent bonus would show up in their August pension checks if they are retired on or before June 30. Approximately 20 made the decision during last week to sign up for June 30 retirement.

MICOM civilian retirements for the calendar year stood at 142 by Friday morning with additional ones expected before the close of business.

Every retirement can mean an easing of the overall personnel situation at MICOM. Fewer per-

sonnel on board may be reassigned to other positions or take cuts in grades than had been anticipated.

AER Drive Ends Today

The Army Emergency Relief Fund Drive at Redstone ends with the regular monthly payday today.

Thus far, slightly more than \$1,000 has been contributed during the campaign with slightly more than half of the agencies reporting. All key men are encouraged to wind up the campaign and turn in their contributions by Friday.

Military personnel who have not

More than 200 persons have received notices of reassignment or downgrading to become effective June 26.

The Retirement Activities officer in the MICOM Civilian Personnel Division is Lester Himes, phone 876-3902.

been contacted and desire to make a contribution may do so by sending their contributions to Major F. D. Haynes, Jr., MICOM Project Officer for the campaign. He is located in Room A116, Bldg. 5250.

Personnel are urged to support this annual drive which provides emergency financial assistance to Army members and their dependents.

Missile Site Radar Test Successful In Intercept

A Sprint missile, launched from a remote site and controlled by a research and development Missile Site Radar successfully intercepted an ICBM-type target nosecone over Kwajalein Atoll in the Pacific Ocean last week.

The purpose of this mission was to test the capability of the MSR and its associated data processor to launch and guide a Sprint missile from a site some distance

from the radar to a medium range, medium altitude point of intercept.

This was the second test launch from Illeginni Island, 18 miles from Meck Island where the MSR is located. Both islands are a part of the Kwajalein Atoll. The target nosecone was launched by a Titan II ICBM from Vandenberg Air Force Base, California.

The Sprint interceptor missile passed close enough to the target,

Top Lee Graduate Wins Scholarships

David Doering has been named Valedictorian of the Class of 1972 at Lee High School.

He is the son of Mr. and Mrs. Lloyd A. Doering, 6020 Trent Drive. His father is an engineer in the Production and Logistics Directorate of the Safeguard System Command.

Doering's scholastic achievements have also brought him two scholarships, a \$1000 scholarship from American Cyanamid Corporation under the National Merit Scholarship program and a four-year Army ROTC scholarship. He will enter Vanderbilt University this fall.

as verified by radar instrumentation, to have successfully accomplished the intercept. Neither the Sprint nor the target carried an explosive warhead.

The MSR and the associated data processor which guided the interceptor missile are similar to equipment planned for use in Safeguard tactical sites now under construction in North Dakota and Montana.

This is the 27th test in the Safeguard system series. Two were partially successful and two were unsuccessful.

AUSA Reporting Slow

The current membership campaign of the Tennessee Valley Chapter, Association, U. S. Army is getting off to a slow start according to first reports.

Last Friday membership reports had been received from the Missile Command, the Safeguard System Command and the Safeguard Logistics Command.

MICOM reported 119 new members, 171 renewals and 625 current active memberships; SAFSCOM, 26 new members, 39 renewals and 34 current active memberships; SAFLOG, three new members, five renewals and 43 current active memberships.

Total prospective membership thus far is approximately 1065.

Lonnie Hightower membership campaign chairman, emphasized that this was based on first reports.

"But, we are going to have to conduct an intensive campaign in June if we reach any where near the peak chapter membership of 4,000 by the middle of the month," he said.

At the beginning of the campaign May 15, the chapter had a membership of 2600 with nearly 1000 coming up for renewal during the campaign period.

GETS DEGREE. John Irvin has joined Redstone's growing alumni chapter of the University of Oklahoma. Irvin received his Bachelor of Liberal Studies degree earlier this month and has already has plans for continuing his education in the graduate program. He is a maintenance planning specialist in the Maintenance Directorate.

Cathedral Caverns On Tour Slate

The Service Club is sponsoring a tour on Saturday to Cathedral Caverns with the bus leaving the club at ten and returning around 5:30.

The Cavern is located near Grant, Alabama, among hills and trails used by the Indians. The floor inside the mouth of the cave holds layers of Indian artifacts, some of which have been excavated by archeologists, seeking clues to buried history.

Redstone Lanes Set Hours, Dress

Summer is here... winter leagues are over... and there is plenty of time for open bowling at the Redstone Lanes, according to Jim Power, the manager.

The Redstone Lanes are open seven days a week and are located convenient to the barracks and troop area.

Personnel who don't have their own bowling ball can borrow a house ball and can rent shoes at the counter.

Summer hours at the bowling lanes are: Mondays, 6 p.m. to 11 p.m.; Tuesdays through Saturdays, 9:00 a.m. until 12 midnight; and Sundays, 1 p.m. to 10 p.m.

Power stressed that there will be open bowling anytime the lanes are open on a first come first served basis. The attendants at the desk will not take phone reservations for alleys.

The Redstone Lanes are open to all active duty military personnel and their dependents and guests and to retired personnel, their dependents and guests.

While there is no prescribed dress for the bowling alleys, Power emphasized that no one will be allowed in the alleys wearing swim suits, cutoff pants, tee shirts or tanks tops.

Anyone wanting to form or join a bowling league can call 876-4666 for additional information.

Two Aces

Last Tuesday was a night of spectacular individual feats in the P&P Golf League with Les Thomas, George Moss, Ed Clark and Bob Wiginton coming in for most of the accolades.

Thomas banged in his tee shot on the Piedmont Par 3 courses' No. 2 hole and Moss went him one better by dropping his drive on No. 16 in the cup on the fly. Their aces were the second and third of the season. Lee Keim aced No. 1 earlier.

THOMAS

Clark and Wiginton made the honor roll as a tandem with a team net total of 101, six strokes under the previous two-man total posted a week ago by Moss and Keim.

A nine-handicapper, Clarke turned in a scratch 54 and his partner shot a 55 with his 11 handicap.

The league leading duo of Les Fisk and Howard Andrews finally dropped a couple of points but their 4-2 win over Jim Laird and Bill Perkins was enough to protect a six point margin at the top.

The Moss-Keim pair were forced to share the runner up slot after taking a 4-2 edge over Lloyd Jackson and Lou Snyder. The Hawk Engineering Troupe, with J. D. Kirkland and Mickey Moore handling the honors, won all six points in forging the second place tie.

TWO POINTS. Ed Clarke (left) and Bob Wiginton take a look at the hole-in-one on a fly that George Moss scored in the P&P League last week.

Rolls To Fifth Straight Win

Kathy Leeth turned out to be a one-girl wrecking crew last week when the Missile Command routed Sperry Rand for a 29-1 conquest in Huntsville Women's Softball League play last week.

It was the fifth straight victory for the Civilian Welfare Fund girls in their drive for their fourth consecutive league title. On Wednesday MICOM led Brown Engineering, 10-2, in the third inning when rain washed the contest off the books.

Five home runs were among the 31 safeties that the MICOM girls used to demolish Sperry Rand. Sara Fisk chalked up her fifth win

and contributed one of the circuit clouts.

But the real hitting star was Kathy who went to the plate five times and connected for three home runs, a double and a single. The star outfielder who won most valuable player honors a year ago, scored four runs and drove in nine.

Barbara Ikard hit the other four-baser, her third of the year, and added a double, while Donna Hudson, Ruth Crisp and Pat Shipp each hit safely four times in five tries.

PAGE 6 THE REDSTONE ROCKET — MAY 31, 1972

Indy Veteran

Former "Indy 500" race car driver Johnny Boyd is coming to Redstone on June 16 to tell why "highway safety is no accident".

Boyd, now an auto safety expert, will present programs at 9:00 am and 1:30 pm in the Post Theater. All NASA and MICOM government drivers are invited to attend.

Tight Three-Team Race Looms In Softball

MISD added two more wins to their unbeaten string while the Corps of Engineers and Material Management posted dual victories to highlight CWF slo-pitch softball action, last week.

Tuesday's card saw COE throttle Missile Systems 22-7 on Hamil Martin's trio of four baggers and Norman Levine's single round tripper. Hall Hayes banded four singles to help the winning cause. Stu Frederick came across with three hits for the losers.

In other action Tuesday, Missile Intelligence ran roughshod over Metrology 25-4 while MISD pounded SAFLOG 12-3, and MM got by GEM 6-4.

MIAOS Lynn Stuckey slammed two homers and Jim Gamble added another to secure an easy win for pitcher Bill Self. Larry Kimmons contributed two hits for the opposition.

MISD laid down a home run barrage in destoring SAFLOG. Homerun hitters were Jerry Arszman, "Big John" Roberts, Buddy Lewis, Bruce Coker, and Doug Wise. Coker picked up his fifth win as Graham Hall was the loser.

MM's Dave Blackwood broke a 3-3 deadlock in the seventh with a three run homer that turned out to be the game winner. GEM came back in their half of the inning with a run but it was not enough. Stan Heck and Dewey Wilson chipped in two hits to spark the winners. Mike Fahey led GEM with three singles.

Norman Levine and Fred Tayler blasted four hits each in COE's 21-5 romp over SAFLOG Thursday.

Cassady was the winning hurler. Walter Roehmer came up with the only four bagger of the contest in a losing effort. MM raced past MIA 16-11, MISD humbled MSL Systems 40-6 and Metrology won an extra inning affair from GEM 13-12 to complete Thursday's docket of games.

MM overcame an 8-0 deficit to beat MIA going away. Bishop Arnold had two round trippers and David Blackwood hit two doubles and two singles to boost the winning effort, as Lindon Calvert picked up his fifth win of the season. Mel Thomas with four hits and Gary James with three led the losers.

George Lillard got his first pitching assignment and got ample battery support in MISD's rout of MSL Systems. John Roberts hit his sixth round tripper of the season

and Bruce Coker added three inside the park homers to lead the assault. Hal Jacobs and Buddy Lewis both banded five hits in the win.

Metrology built an 8-0 lead and then had to go nine innings before finally beating GEM. Fred Amaran hit a routine fly that got lost in the lights and dropped in as the winning run came across the plate. Medlock sparked the winners with a four bagger and three doubles. Bob Fletcher smashed three hits for Gem.

FIRST CLASS FCC LICENSE IN 18 WEEKS
 Step up to opportunity, good jobs, excellent pay, security and a bright future. We teach you the step by step method necessary to pass the FCC exams and qualify you for the first class license in 18 weeks, or for a period not to exceed one year at no additional cost to you.

WHY GET AN FCC LICENSE?
 In many fields of Electronics and Communications, key personnel are required by law to hold a first class license. Good paying jobs are open in Television, and Radio Broadcasting. The FCC license is necessary for the men who want to operate and service transmitting equipment used in aviation, broadcasting, marine microwave, mobile communications, or citizens band. Successful completion of this course will enable you to pass the **First Class FCC Examination**.

COLE

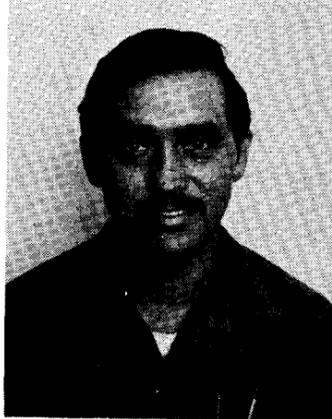

LACCALADE

Who Said This Test Is Tough?

In the May 24 issue of *The Rocket* recognition was given to members of the USMC Administrative Detachment for excelling in the Physical Fitness program. This week's honors go to the 7th ETC. Private Ralph E. Hackney, a member of the Kansas Army National Guard in training as Ammunition Storage Specialist, scored the maximum 500 points on the Advanced Physical Fitness Test and is the first to do so since the School Brigade started administering the test in January. The time limit for the two mile

run was 20 minutes and 33 seconds. Hackney completed the run in 14 minutes and 41 seconds and scored 100 points.

He scored the maximum 100 points for 86 rungs on the horizontal ladder in the required time of one minute. Another 100 points was maxed for 50 bent-leg sit-ups in one minute.

GONZALEZ

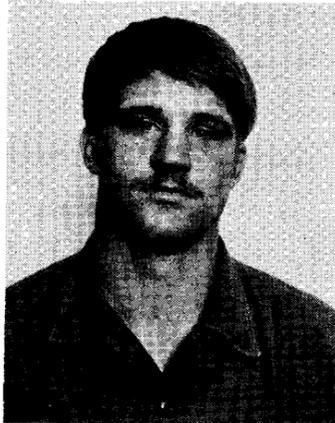

He completed the inverted crawl of 40 yards in 16 seconds with a second time limit for 100 points and finally the run, dodge, and jump in 20.5 seconds with a time limit of 24.5 seconds for a final tally of 500 points.

The runner-up in the competition was Private Antonio Gonzalez with an outstanding 497 points. Gonzalez is an RA from Puerto Rico and a swimming instructor in civilian life. He hopes some day to be a marathon swimmer.

LETTER OF COMMENDATION
SSgt. Jimmie R. Cole, Assistant Mess Sergeant, Mess 2, 9th ETC, recently received a Letter of Commendation from Maj. J. P. Coppens, CO, 2nd Bn., School Brigade. During one of Major Coppens' sessions with the Junior Enlisted Advisory Council, the Council spontaneously stated how, when they were on KP, Sergeant Cole handled them with dignity and made them feel that they were doing a worthwhile job and they wanted to somehow show their appreciation to him. As a result of this unusual suggestion, Sergeant Cole was awarded the Letter of Commendation.

HONOR GRADUATE
Cpt. Charles L. Lacallade, HHC, School Brigade, was a recent honor graduate of the MOI course. He is presently assigned as an instructor in the Nuclear Weapons Division. His last duty assignment was with the 833rd Ordnance Co., Republic of Korea.

ABM DETAILS

(Continued from Page 1)

The United States would be permitted to build a second site defending Washington to match the ABM system the Soviets have operational around Moscow. Washington deployment would require Congressional approval. The Soviets, under the treaty, could build a second ABM site to defend a portion of their ICBM force to match our North Dakota Safeguard installation.

The Moscow accord set the stage for further talks between the United States and the Soviet Union on arms control and U.S. spokesmen said the new phase of diplomacy may begin later this year.

In the preface to the treaty, both nations declared their intention "to achieve at the earliest possible date, the cessation of the nuclear arms race and to take effective measures toward reductions in strategic arms, nuclear disarmament and general and complete disarmament."

Youth Band Has Some Openings

The Huntsville Youth Band is accepting new members aged 9 through 18 for a special summer program.

Summer band trainees will replace present members who have qualified for their junior high or high school bands. No previous musical training is required and there are no membership fees. Use of band instruments and music lessons are provided without charge.

A limited number of applicants will be accepted for the Youth Band's championship corps of majorettes and twirlers.

The band meets twice each week from 6:30 to 8:30 p.m. on Tuesday and from 9 to 11:30 a.m. Saturday at the band hall, 4710 Bob Wallace Avenue.

Further information and registration can be obtained by phoning 837-6524.

GET ARMY AWARDS—James K. Fowler and Normal L. Bell received Meritorious Civilian Service Awards during a recent ceremony. Maj. Gen. Edwin I. Donley presented the awards. Fowler, (right) Deputy Chief of Procurement and Production, was cited for his contributions to MICOM procurement operations. Bell was honored for his efforts in new missile system development.

ASPE Convention Starts On Friday

The Alabama Society of Professional Engineers will convene their annual convention in Huntsville this weekend with the local chapter hosting the two-day affair at the Carriage Inn.

Mayor Joe Davis will welcome the engineers to Huntsville on Friday morning with a series of seminars on the agenda.

Highlighting the convention will be the annual banquet with Dr.

Ernst Stuhlinger of the Marshall Center delivering the main address. Other banquet speakers include Bruce Bryce and Gordon Park of the Tennessee Valley Authority, and Gordon Dykes of the Safeguard System Command.

The convention will close with a Saturday luncheon at which time the officers for coming ASPE administrative year will be installed.

Role Playing And Effective Listening, Emphasized

The first basic Non-Commissioned Officer educational course held at MMCS is now in progress.

The nine-week course is divided into two sections. The first three weeks are devoted primarily to administrative subjects (soft skills) which are normally encountered in all units. There are also subjects on military leadership, drill practice, map reading and "MAPTOE," (Motivate All Personnel To Operate Efficiently and Effectively.)

When the students first arrived for the course they were given an indoctrination on what they could expect. They were told that the course was probably different from most other courses they had attended in that the exams were of the open book type and consisted of short answers and essays. There were to be very few multiple choice questions.

An important part of the curriculum is the subject "Effective Listening". It was stressed that much emphasis was placed on this subject because if an individual did not listen to the problems his subordinates were discussing, he would not be able to effectively arrive at a sound conclusion.

In the course on military justice, "role playing" is utilized to the maximum to arrive at solutions to hypothetical situations that a unit commander must solve and take appropriate action on. Each individual plays a separate role, e.g., accused, prosecution, CO, witnesses, etc., until all matters have been covered and a solution arrived at.

The present NCOES class consists of 31 students in three

separate MOS's — all ammunition related. It was pointed out that future classes would probably be limited to approximately 10-12 students. Most of the students in the present class are Specialists 4 and 5.

The last six weeks of the Basic NCOES course will be conducted by the Ammunition Department. This will mainly consist of hard skills and the students will have the opportunity to put into effect what they have been taught.

Busy Summer Youth Schedule On Tap

Military dependent youngsters on the Arsenal are going to have a busy and happy summer according to the schedule set up by the Youth Sports Program staff.

This year marks the first time the YSP has been conducted by an all-volunteer staff, but enlisted and officer personnel and their wives have set up an ambitious sports schedule that will provide something for everybody.

According to Captain W.T. Roberts, SAFLOG, Chairman of the YSP: "We have planned a sports program that will appeal to the maximum number young dependents living on post. At the present time we have approximately 400 boys and girls who have signed up to participate in the various programs."

With school out and the program shifting into high gear, the YSP staff is interested in any young adults or parents who want to volunteer their services to work with the youngsters.

The baseball program is already underway with teams and leagues for the boys ranging from T ball for the 6 year olds up to and including

Babe Ruth ball for the 15 year olds. Anyone wanting to volunteer their services in this area can call Captain F.J. Valentine at 837-3452.

Swimming enthusiasts can learn more about the program by calling Lieutenant J.T. Toenes at 895-3063 or 837-4375, and Greg Woods at 876-3316 or 852-6142.

Mrs. C.B. Young is in charge of the softball program and young ladies who want to participate can get information by calling 837-4651.

Registration for the YSP Junior Golf Program is already underway and will continue through June 2. Persons wanting to register can go to the YSP building outside the Goss Road gate between the hours of 5 and 7 p.m.

According to Lieutenant Colonel D.W. Clark: "The program will include a golf clinic followed by seven weeks of play at the Arsenal Golf Course. The clinic will be held

CORRECTION

All of Dene Boles sick leave was taken at the beginning of her employment 17 years ago, not 12 as was reported in last week's Redstone Rocket.

in the morning for one hour on June 6, 8, 13 and 15. Regular play will be each Thursday morning from June 22 through August 3. Dependent children, 10 years old and above are eligible. The clinic will be conducted by Norman Renaud, the course pro and assisted by Mrs. Billie Shuput and Mrs. Donna Manna."

Additional information on the golf program can be obtained by calling Clark at 876-1647 or 881-2614.

Youngsters interested in the tennis program can call Captain Philip Thon at 876-7409 or 837-7491.

Thomas E. Wilkerson is in charge of bowling and additional information on participation can be obtained by calling 881-2376.

While it is a little early for football, Major J.P. Coppens is making plans and the number to call is 876-7932 or 837-0954.

Those persons interested in gymnastics can call Mrs. R.F. Sullivan at 837-1609 for details about the program.

Since the YSP is now being administered by volunteers, there is always a need for more help. CPT Roberts is leaving in June and the staff is looking for someone who would like to volunteer to be the new chairman.

Current officers of the YSP are: CPT Roberts, chairman; SFC J.D. Kennedy, vice chairman; SFC C.A. Desrosier, treasurer; Major D.H. Barclay, budget planner; Mrs. R.F. Sullivan, secretary; Major R.W. Pilcher, publicity; Mrs. Inge McCool, concessionaire; CW 3 M.N. Bradford, property; and Mrs. Blanche Moore, membership.

Seventh Controls RSA Blood Trophy

Since January 1969, the 7th ETC, MMCS, has won the MMCS

Category I (monthly) Blood Trophy every other month for a total of 21 times.

The 7th ETC also won the retention of the MMCS Blood Trophy for Category I for the years 1969, 1970 and 1971.

The highest participation recorded at Redstone for Category I is 91.1 percent which was set by the 7th in September 1969.

The May 1972 issue of Soldiers magazine paid tribute to MMCS and UTC for 105 pints of blood donated to a New Jersey boy suffering from hemophilia. The 7th ETC donated 86 pints of blood that month.

Fun And Songs On Show Card

Enlisted Men at Redstone will be entertained at the Service Club with a unique stage show of folk songs, satire and humor by Donna Emerick and her cast of beautiful exotic dancers on Sunday evening.

Miss Emerick will feature audience participation with songs of love, folk and traditional ballads. Her dancers will render exotic dances from many countries including China, British Isles, Poland, Nigeria and Hawaii. Show time is eight.

The Reading Center

Announces

SUMMER SESSIONS

We are presently accepting students for testing and evaluation.

We offer:

- Reading Readiness—Kindergarten
- Remedial Reading—Kindergarten-12
- Handwriting—Kindergarten-12
- Study Skills—4-12
- Math—Grades 1-12
- Tutoring—All areas
- Special Testing and Counseling Services

Each session will be five weeks in length with four to six students per group. Each child is placed according to age, grade, and skills needed.

Reading machines and taped programs help—we have them, but our professional teachers make the difference, so that your child is assured of maximum improvement.

Call 883-2910 for further information!

Why are you staying in?

- I like my job.
- The bonus helps.
- I'd like to live in Europe for a while.
- I've made some great friends in the Army.
- I can go back to school. Even get a degree.
- The PX and Commissary discounts save me money.
- I'm allergic to doctor and dentist bills.
- I like the free housing. No real estate tax. No monthly bills.
- I'd like to take the Hawaiian tour.
- I want a chance to do something different.
- The service clubs are getting livelier these days.
- I like the recreation facilities.
- I like the tax break.
- I like the idea of retiring at 38.
- There are never any moving expenses.
- I like the low-cost travel, especially when it's free.
- It's a chance to do my bit for my Country.
- The 30 days vacation with pay.
- I get the best life insurance deal anywhere.
- It's easy to get a VA and FHA housing loan.
- I like staying close to home.
- I like Army life.

Missiles Just One of Redstone Products

Should an order reminiscent of Redstone Arsenal linger at the end of a long day on the job, your nose may not be playing tricks on you.

Oil made from cedar trees cut on the Arsenal eventually winds up in cosmetics and aromatic soaps at the end of a cycle that begins in a cedar mill in Maysville where the oil is extracted and shipped to perfume factories in France and Belgium.

But that's not the only use made of the trees harvested here by Giles and Kendall of Maysville, now making their fourth cutting on the installation under a contract with

the Facilities Engineer.

Redstone Cedar also is converted into cedar flake board marketed to line clothes closets and chests.

Bigger trees are sawed into lumber that goes into furniture. The mill puts together kits for the do-it-yourselfer who wants a cedar chest or book case, an end table or a cabinet. Their kits include the materials to completely finish the piece, including stains and hardware.

Cedar oil is a by-product from the waste material and is distilled in a giant still built like those used in making mountain dew: thump

jug and worm included. When the distillery burned in 1945, the headline in the Huntsville Times read: "Big Still at Giles and Kendall Burns."

The president, Nancy McCorkle, sat on her front porch and watched it burn. The business was started by her father in Decatur about 1938, and moved to Maysville in 1945. When her father died, Nancy took over the million dollar a year enterprise.

There is a cedar tree farm from which a harvest is taken when the trees reach a maturity of about seven years. The Arsenal and the farm are not the only source—much cedar grows in North Alabama and Southern Tennessee.

Before the flake board operation was introduced in 1966, the plant used Redstone trees to make tongue and groove cedar lining. They also went into pet caskets and dog bedding.

There is practically no waste in the operation. The sawdust is used to fire the boilers that distill the oil. Logs that in an earlier era would have been used as poles now go into the flake board.

Harvest of the trees on the Arsenal under supervision of David M. Bryant, the post forester, is another business that is carried out with as little waste as possible. The felled trees are sawed into lengths that fit the truck width. Mules are used to snake the logs from the cutting site to the hardtop roads or fields where the trucks are loaded.

Selection of the trees is made with care. They must be six inches in diameter breast high, or four and one-half feet from the ground. Size, according to the forester, is not the only consideration. Mules are used to avoid disturbing the

other forest growth as little as possible instead of bulldozers or wheeled vehicles which would break the growth of underbrush, skin trees not meant for harvest and otherwise disturb the ecology. Another part of the harvesting

agreement is to leave a buffer zone, this for the benefit of hikers, bikers and other sightseers who admire the artwork of Nature. It also benefits the small animals and birds that make their home in the woods.

Heads New Graphics Society

Mary Jane Hearn, visual information specialist with the Maintenance Directorate, was elected president of Industrial Graphics International at a recent meeting in Boston.

IGI is a new professional organization of graphic communicators resulting from a merger of four individual art organizations: Association of Technical Artists, National Association of Industrial Artists, Society of Engineering Illustrators and Technical Illustrators Management Association.

Mary Jane began her career with the Army as a general illustrator at the Chemical Corps School at Ft. McClellan. She transferred to Redstone in 1955 as a technical illustrator with the publications division of the then Supply and Maintenance Directorate. She has had a series of

promotions which placed her in a supervisory position in 1956.

She is currently working toward

Three Day Seminar

The University of Alabama in Huntsville is offering a three-day seminar, Mathematical Theory of Finite Element Approximations, June 6-8.

Isaac Fried, professor of Mathematics at Boston University will conduct the seminar.

Participants will be required to have the B.S. degree in engineering, physics, or mathematics, with knowledge of introductory analysis and algebra.

Individuals interested in obtaining additional information concerning the seminar should contact the Division of Continuous Education, 895-6010; or Professor J.T. Oden, Department of Engineering Mechanics, 895-6394.

a masters degree in public administration from the University of Oklahoma. She holds undergraduate degrees in applied art and illustration from Auburn University and Jacksonville College.

An ardent promoter of the illustrator discipline, Mary Jane was instrumental in founding the International Technical Art Exhibit and the graphic stem of the conference program sponsored annually by the Society for Technical Communication.

She has been active in the Association of Technical Artists, having served as national president for two terms. As vice president of the National Council of Scientific and Technical Art Societies, she has been actively engaged in the planned merger. There are approximately 750 members in the new organization.

INTERNATIONAL PRESIDENT—Mary Jane Hearn accepts congratulations from her Division chief, Barney Kemp.
