Super Matches

Computer Pairs Commuters

Joe Jones gulped his morning coffee, grabbed his briefcase in one hand and fumbled in his pocket for "man's best friend"—the car keys.

Bounding out the front door and down the sidewalk, he hurried toward his carefully polished automobile parked in the driveway. Sliding under the wheel, Joe felt confident. This little jewel had taken him a long way. She had kept him from the cold icy snow in the winter and hauled him around in air conditioned comfort in the summer. And his ego soared when he zipped past other motorists on the highway.

Turning the key, he waited for that roar of power. And he waited . . .

There would be no roar today, the car was out of gas. As for Joe, he was stuck. Already late for work, he had no alternative means of transportation.

But — Redstone Arsenal employees don't have to be stuck. An alternative is available—"computer rides."

Much emphasis has been put on carpooling practices to help fight the energy crisis. Every effort is being made at Redstone to see that personnel are not inconvenienced, and the normal work flow is maintained.

A new program is being initiated. It's called the Computerized Carpool Matching Program and was developed by the Computer Services Division of the Federal Highway Administration. It is being adapted locally by the Directorate for Management Information Systems.

Eligibility for the program is open to all personnel working on Redstone Arsenal, regardless of their particular organization.

The program operates on a basis of simplicity. Interested participants must submit computer applications to enter telling where they live, where they work, and the times of their work day. The computer then matches individuals whose travel patterns are similar.

The voluntary program then furnishes a listing of individuals who live and work in the same areas. The rest is up to the individual. If he chooses to "call someone on the list and get together for a talk", he may. If he chooses not to participate, there will be no pressure.

The listing of names from the computer printouts will be published in subsequent issues of the Rocket beginning some time in February. Additional lists

(Continued on Page 6)

Matching Program Offers Means To An End

Redstone's Computerized Carpool Matching Program is based on a program developed and used successfully since summer 1972, by employees of the Federal Highway Administration. FHA is furnishing the computer program free to government agencies.

The idea of computerized carpooling for Redstone is not new. Computer experts at Directorate for Management Information Systems have explored the idea off and on in the past, sometimes at the prompting of suggestions submitted under the incentive awards program. They always

reached the same conclusion: Too expensive. This is because the big expense in most computer programs is in designing the program, rather than in the actual execution. Last November the newly-formed Energy Conservation Committee went to the in-

stallation's major organizations for conservation ideas. DMIS, in turn, called on its workers for conservation tips and the computerized carpool concept surfaced anew.

Having heard that FHA's already-designed carpool computer program was available to government agencies, DMIS's Rod Smith, chief of the program management division, talked with DMIS Director Willie N. Calcote about the possibility of utilizing the program at Redstone. Calcote was receptive and suggested that Smith propose computerized carpooling to the Energy Conservation Committee. The Committee gave him the go-ahead to see if the program could be used here.

A blank reel of magnetic tape was sent to FHA, and the program transferred to it. "All we have to do

is adapt it to our equipment," said a DMIS computer programmer, adding that the programming and systems design people have already made some dry runs with it to iron out minor problems.

Thus with a designed, proven program in hand, how well the Computerized Carpool Matching Program works here will depend largely on the accuracy of data respondents furnish on the forms in today's Rocket.

Keypunch operators will transcribe the data onto two cards, tied together by a social security number. The cards will be fed into a computer, instructed by the program to sort and match them according to time, origin and destination. This information goes onto the printout, which is ready in about 15 minutes from the time the computer starts work.

Stop fueling around

Happy will be the day at Redstone Arsenal when it may be said: "My carpool runneth over."

Page 2 THE ROCKET — JANUARY 16, 1974

The Rocket

The Rocket is published weekly, on Wednesday. The publisher will receive editorial content for publication in the Rocket through the Information Office, Army Missile Command, Redstone Arsenal, Ala., 35809, Bldg. 5250, Room A-134. Extension 876-1400 or 876-1500.

All advertising copy and payments therefor are received by Mrs. Vergie Robinson, P. O. Box 346, Huntsville, Ala. 35804, telephone 533-0471, as representative of the publisher. Advertising deadline—both display and wanted—is 10 a.m. Monday before publication.

The Rocket is distributed free of cost to personnel at Redstone Arsenal. Mailing rates off post for the Rocket are \$7.42 a year, or \$4.00 for six months, tax included. Mailing arrangements may be made with the publisher, P. O. Box 930, Hartselle, Ala. 35640.

Everything advertised in this publication must be made available for purchase, use, or patronage without regard to the race, creed, color, sex or national origin of the purchaser, user, or patron. A confirmed violation or rejection of this policy of equal opportunity by an advertiser will result in the refusal to print advertising from that source.

Lynn Parham Talks About Environment

Society for the Advancement of Materials and Process Engineering will meet at Michael's Restaurant Jan. 22 at 5:30 p.m.

Lynn Parham, from the ground equipment and materials directorate of the Missile Command, will talk about "Environmental Compatibility of Fiberglass Composites."

Dinner reservations can be made with Ray Parker, 876-3464.

Upward Mobility Job Slots

More than 575 MICOM employees in lower grades have applied for participation in the MICOM upward mobility program which offers training to help persons to qualify and compete for better jobs as they become available in the future. Deadline for submitting applications was December 14.

When the program was announced in late August, approximately 2000 employees indicated interest and were notified to attend briefings where the intent and plans for the program were explained. About 1500 persons have attended the briefings.

Upward mobility is designed to give employees, in grades GS 7, WG 12, WL 10, and WS 5 and lower, in positions of limited advancement opportunity, a way to improve their skills through training.

Civilian Personnel bulletin No. 108 on upward mobility issued early in November outlined the program and identified 358 various types of jobs which may offer future opportunities during the next five years.

Jim McCright of the Training and Development branch of the MICOM Civilian Personnel Division said that the names of those selected as first participants in the program will be announced in mid or late February.

"If you aren't selected in the first go-around," McCright said, "there are still things you can do to improve your chances for a better job. Also, persons not picked this time will have a chance to reapply when the program reopens later. "I have suggestions for persons who want to better their chances, whether they are selected this time or not."

—Try to excel in your present job.

—Do your best work because management is looking for the most competent people to fill vacancies through merit promotion.

—Find out where future job opportunities are likely to occur in your present organization through discussions with your supervisor.

—If it doesn't appear there will be vacancies in your organization, talk to your supervisor about possible opportunities in other

Big Lounge Scene

Do you believe in magic? If not, you will be in for a treat Sunday evening in the Recreation Center's Big Lounge when the magic Rock Band and Show heads the list of entertainment for enlisted men and their guests.

This Atlanta group has appeared at many functions around the southeast, and is very popular with rock fans.

areas, or with your supervisors' permission, go to the Civilian Personnel Division to find which occupational fields have the greatest turnover of personnel.

—Consider what kinds of jobs would best help you to get into your chosen field, as a bridge between your present job and the ones you'd like. There are various professions that can be entered through the route of being an assistant, aide or technician.

—Find out what it takes to qualify to move into another field.

—Get counseling from your supervisor, or with your supervisor's permission, from the MICOM Training and Development branch as to what training courses are available to help you

gain the necessary skills to qualify in a different field.

—Investigate on your own the courses you can take at local colleges, universities and technical schools. Your initiative for self development will be recognized.

"Persons not selected to participate in the upward mobility program this time shouldn't feel the door is closed," McCright said. "They can follow the above suggestions to improve themselves in the meantime.

"Plans are being made to conduct orientations for employees in other activities served by the MICOM Civilian Personnel Division. Employees in these activities will be notified when to attend these orientations."

Busbice Gets Transfer

C. A. Busbice, supervisory personnel staffing specialist in the Recruitment and Placement branch of the MICOM Civilian Personnel Division, is transfer-

ring next week to the Army Engineer District, Vicksburg, Miss. where he will be the civilian personnel officer.

Except for a few months spent as the personnel officer at Ft. Holabird, Md., in 1967, Busbice has been at Redstone since 1958. He is a native of Louisiana and came to the Arsenal from Ft. Polk, La.

The Vicksburg District directs water resource development covering parts of Arkansas, Louisiana and Mississippi.

C. A. BUSBICE

Gas Limit Hits PX Station

The Redstone post exchange service station is limiting gasoline sales to no more than 10 gallons during each transaction, according to Hillard R. Frey, manager of the local Army-Air Force Exchange Service (AAFES) activities.

Frey said policy guidance from AAFES Headquarters in Dallas, Tex. which reached him last week, brought about the local sales limitation.

AAFES was requested by the Federal Government to observe the sales limitation in its service stations, he said.

National Energy Chief William Simon on Jan. 3, announced that major oil companies and associations of independent distributors had agreed to encourage a limit of 10 gallons.

EEO AWARD WINNER—Mr. and Mrs. Leroy Daniels flash winning smiles shortly after he won the Missile Command's Equal Employment Opportunity Award. Major General Vincent H. Ellis presented the award during a recent ceremony. Daniels, EEO Action Officer for Civilian Personnel Division, was cited for "... personal commitment to the principles of equal opportunity, his involvement in community relations, devotion to duty, and a positive leadership role in his dealings with all levels."

'Work Can Be Fun' Set For Federal Women

The North Alabama Chapter of Federally Employed Women (FEW) plan to discover how "Work Can Be Fun." This will be the topic of guest speaker, Dr. Minnie Miles, at the January 22, meeting to be held at the Carriage Inn.

Dr. Miles is professor of organizational behavior in the

She holds a master's degree in business administration from Northwestern University and a doctorate from Purdue University. She is presently serving as International First Vice President of the Federation of Business and Professional Women's Clubs.

Members are encouraged to attend and visitors are welcome. Dinner will begin at 7 p.m.

For information and reservations, call Osie Neblett, 881-2012 or Virginia Arnold, 876-5989, 837-0309.

DR. MINNIE C. MILES

School of Commerce and Business Administration, University of Alabama, Tuscaloosa. She is a graduate of Mary Hardin-Baylor College in Texas, where she was named as one of the ten most outstanding alumnae and was also awarded an Honorary Doctor of Laws degree.

Optical Society Hears Dr. Smith

The Optical Society of America, Huntsville Section, will meet January 24, at 7:30 p.m., in Room 127, Science and Engineering Building of the University of Alabama in Huntsville.

Guest speaker will be Dr. F. Dow Smith, who's topic will be "O.S.A.—Where It's Been, Where It's Going." He is the author of numerous articles dealing with various aspects of optics. He is vice president and corporate scientist with Itek.

Dr. Smith received his bachelor and master's degrees in physics from Queen's University in Canada following six years service in the Royal Canadian Air Force. He received a Ph.D in optics from the University of Rochester.

GEN. GREIGHTON W. ABRAMS

AUSA Hosts Gen. Abrams

General Creighton W. Abrams, chief of staff of the U.S. Army, will speak in Huntsville to the Tennessee Valley Chapter of the Association of the U.S. Army January 22, at 6:30 p.m. at the Officers Open Mess.

Gen. Abrams became chief of staff in 1972. He received his bachelor's degree from the U.S. Military Academy in 1936. He was commander of the U.S. Military Assistance Command in Vietnam.

After West Point, Gen. Abrams went to Cavalry School at Fort Bliss, Tex. In 1940, he joined the Fourth Armored Division and served there throughout World War II. His battalion led the breakthrough at Normandy, the relief at Bastogne and the dash to the Rhine.

Reservations for the dinner may be made by calling Fred Guest, 895-2355.

SAM-D Flies Right In White Sands Tests

SAM-D, an air defense missile under development by the Army, was tested successfully recently at White Sands Missile Range, N. M.

During a controlled flight test, the missile responded to guidance commands and maneuvered in flight.

"We demonstrated that the missile can be controlled and can maneuver," said Brigadier General Charles F. Means, SAM-D Project Manager at Redstone Arsenal.

"The test was successful." Getting steering commands from an on-board programmer, the 17-foot-long missile responded flawlessly through a variety of flight maneuvers. In the continuation of several planned development hardware tests, SAM-D missiles will undergo severe stress and high angle attack

maneuvers. The current test series of SAM-D follows a development program which successfully tested key components of the weapon system.

Charles Cockrell is SAM-D Deputy Project Manager.

Raytheon Company is SAM-D prime contractor and Martin Marietta Aerospace is principal subcontractor. Thiokol Chemical Corporation is subcontractor for the propulsion system.

Symposium Emphasizes Communication

The Huntsville Chapter of the National Contract Management Association will sponsor a Symposium on Production Technology, January 24, at the Officer's Open Mess.

Registration will start at 12:30 p.m. Guest speaker will be Dr. M. P. Siebel, Director, Process Engineering Laboratories, NASA.

The purpose of the symposium is to emphasize the necessity for communications between government organizations and private industry. Time will be scheduled for special panel discussions on various subjects of current interest.

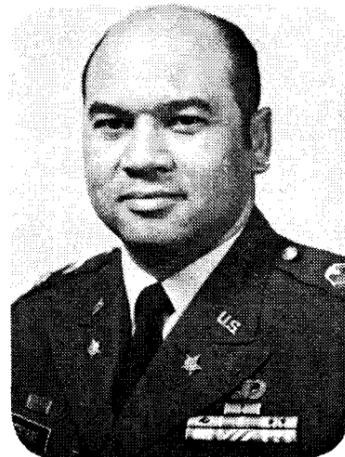

Both afternoon and evening sessions will be held. Dinner will be served at 7 p.m. Reservations should be made before noon, January 23. Contact Phillis Grant, 876-2723, or Peggy Stilman, 837-5830, ext. 313.

Powell Slated As AMS Speaker

The January meeting of the North Alabama Chapter, American Meteorological Society, is scheduled for next Tuesday evening and will be held in the conference room of the Northrop Corp., in Research Park.

The guest speaker will be Dr. Conley Powell of the University of Tennessee Space Institute in Tullahoma. Dr. Powell's presentation will be on "Instellar Flight and Intelligence in the Universe."

All interested persons are invited to attend this open meeting beginning at 7 p.m.

MAJOR TOMMY L. THORNE

Stinger Project Gets Maj. Thorne

Major Tommy L. Thorne, who has served as MICOM Secretary to the General Staff during the past 15 months, has been reassigned to the Program Management Office in the Stinger Project.

He started his new duties Monday.

George Hendrix, the deputy Secretary to the General Staff, is acting head of the office pending assignment of a replacement for Thorne.

Engineers Hear Project Manager

Brigadier General Robert J. Malley, Project Manager for the Modernization and Expansion of Munition Production Facilities will be the guest speaker at the January meeting of the Huntsville Post of the Society of American Military Engineers.

Malley will discuss the overall Munition Modernization and Expansion Program, part of which includes the Huntsville Division, Army Corps of Engineers' recently assigned mission of design and supervision of construction of facilities.

The meeting will be held at the Officers Open Mess, Thursday, January 24. Ladies are cordially invited and reservations may be made by calling 895-5800.

Dragon Deputy Named

Laurie V. Atkinson

Laurie V. Atkinson has been named Deputy Project Manager of the Dragon weapon system.

He had been Chief of the Dragon Product Assurance and Test Division since 1971.

A native of Dendron, Va., Atkinson came to Redstone in 1960 as a supervisory general engineer in Firing Operations Division, Pershing Project Office. Later, he served for a short time on a detailed assignment in the Lance Project Office before transferring to Dragon.

A graduate of Virginia Polytechnic Institute, Atkinson in his new job will assist Colonel John M. Shea, Dragon Project Manager, in directing development of the Army's newest tank killer.

Completely man-portable and weighing approximately 30 pounds, Dragon will destroy any known enemy armor or will knock out battlefield targets.

Reserve Unit Submits Civil Affairs Report

FAIR EXCHANGE—Madison County Commission Chairman James Record presents the Seal of Friendship to Colonel Frederick C. Hahn, Jr., commander of the U. S. Army Reserve's 405th Civil Affairs Group, based at Anniston. Also present at the Municipal Building meeting were Mayor Joe Davis, Paul Byrge, C. E. Landrum and Martin Phillips of the Chamber of Commerce, and Huntsville attorney Clem Cartron, an officer in the Anniston unit.

Representatives of Huntsville and Madison County recently accepted copies of a lengthy civil affairs study, one of the products of this summer's two-week stint for the 405th Civil Affairs Group (U.S. Army Reserve) of Anniston.

The 104-page document included the results of studies of Huntsville and Madison County government, economics and politics during the Reserve group's annual training.

During their Huntsville stay, most of the unit's 55 officers and 95 enlisted men worked side by side with local civilians in government agencies, commercial and industrial firms to gain understanding of four categories of civic functions:

General (including government, law, transportation, communications and culture and religion); Economics and Commerce; Public Education, Health and Safety; and Public Works.

Mayor Joe Davis of Huntsville and Madison County Commission Chairman James Record accepted copies of the unit's final report from Colonel Frederick C. Hahn, Jr., commander of the 405th.

AIAA Schedules Local Meetings

The Alabama Section of the American Institute of Aeronautics and Astronautics has announced a section meeting in addition to two noon luncheon meetings for individual panels in the coming weeks. Each will be held at the Officers Open Mess.

The Section meeting is set for Thursday evening, January 24, with dinner at 7:30.

Guest speaker for the evening will be M.E. Kirkpatrick, Director of Energy Studies for TRW Systems. Kirkpatrick will discuss an "Overview of the Energy Situation."

The AIAA's Public Systems and Technology Panel has a January 29, luncheon scheduled with Richard Kramer, Huntsville's Director of Transportation, as the guest speaker.

Kramer will make a presentation on the administration and development of transportation locally.

The Space and Atmospheric Sciences Panel has a luncheon scheduled for February 7, at the Officers Open Mess.

Panel members in attendance will hear a discussion of the "Influence of Solar Activity on Weather and Climate." The guest speaker will be H. Prescott Sleeper who for the past four years has been studying solar activity and the application to NASA space missions.

SURROUNDING AREA

MISSILE & MUNITIONS CENTER & SCHOOL
NAMES IN THE NEWS
 By SFC WILFRED GILEAU

LAWLER STRINGFELLOW

SP5 Isom H. Lawler, a personnel specialist assigned to Company C, was promoted to his present rank recently. The Brooklyn, N.Y. native entered the service in July 1971, and was previously assigned to the Seventh Army Training Center in Germany.

SP5 William D. Stringfellow, an instructor in HAWK Missile Launcher and assigned to Company C, was promoted on January 7. The Arkansas native entered the service in March 1971, and was previously assigned to the 44th Ordnance Company on Okinawa.

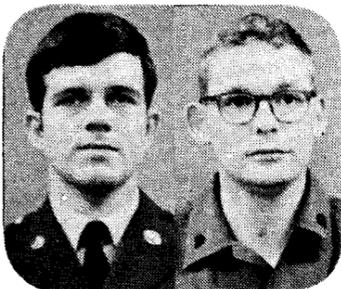

MSgt Robert M. Young, Company B, an instructor in EOD, received his promotion on January 9. Young was previously assigned to HHC, School Battalion, Fort McClellan.

SFC William K. Worsham, Company B, an instructor in EOD, was also promoted on January 9. Worsham entered the service in July 1961.

YOUNG WORSHAM

MSgt Joseph B. Jensen, Company C, Chief Instructor in the HAWK Missile Division, will retire from the Army on February 28, after 26 years of active duty. He was awarded the Meritorious Service Medal in ceremonies Wednesday. Jensen was originally from Tennessee but will retire in the Huntsville area and will be employed by a local firm. Mrs. Jensen is a nurse at the post hospital.

LAWSON RICKETT

PFC Maxwell C. Lawson, a student in the Pershing Missile Guidance and Repair course, has been selected as the MMCS Soldier of the Month for January. Lawson is assigned to the 7th ETC. The Mississippi native entered the service in February 1973 and is a 1972 graduate of Southwest Mississippi Junior College where he majored in heating, refrigeration and air conditioning.

SP4 Jerry W. Rickett, 8th ETC, has been selected 3rd Battalion's Soldier of the Month for January. He is presently attending the NIKE High Power Acquisition Radar and Radar Simulator Repair course. The New York native entered the service in November 1970 and was honor graduate of the Basic Leadership course and Battalion Soldier of the Month in August and September 1973 while assigned to Fort Eustis, Virginia.

Inmates Manufacture . . .

Missile Parts In Prison

Sometimes the quest for missile hardware leads to unlikely places. There are of course the missile industry giants with virtually unmatched technological and production capabilities.

And there are the many small businessmen who are also a vital part of the industry, some of whom operate from basement and backyard workshops.

Then, there are the prisons. Prisoners too are a part of the missile industry, through an arrangement between the Missile Command and Federal Prison Industries Inc. (FPI), a government corporation.

Under the arrangement, factories in federal prisons are manufacturing wiring assemblies for Army missiles.

The prisoners turn out a good product, according to R.M. Hooker of MICOM's Product Assurance Directorate, the organization that controls acceptance of all Army missile hardware. Hooker is chief of the quality operations division, which acts as a watchdog agency responsible for overall quality and acceptability of the FPI wiring assemblies. This responsibility includes having tough acceptability tests run on the product, and making sure that prescribed manufacturing processes are followed.

About six years ago the Missile Command contracted repair of some damaged missile cables to FPI. The product proved out in acceptability tests—in the missile business a lot of products don't—and it was low priced.

Acceptability testing is handled by Product Assurance Directorate's product test and failure analysis division headed by Mark Wheat, and for test purposes, Wheat said, FPI is "treated just like any other contractor."

Working with the product assurance people here FPI has expanded its electronics facilities, notably at the Federal Reformatory in Petersburg, Va., to include manufacture of wiring assemblies, in addition to repair. With Product Assurance Directorate's help, FPI has developed the capability to do high-reliability parts assembly, Wheat said, noting that it requires skills and equipment not offered by many manufacturers. "This kind of talent is in demand—these guys get jobs when they leave prison," he added.

Certain aspects of the prison environment present a unique set of problems to the Missile Command and FPI alike. Finding solutions to these problems is, in a word, challenging, according to Hooker.

Most problems center on balancing the Command's technical requirements against prison security. In this area, Hooker said, representatives from the Product Assurance Directorate work closely with FPI management and technical people to make their respective requirements compatible. By way of example, Hooker noted that manufacturing processes prescribed by the Command must take into account prison prohibitions on the use of certain tools and solvents. Also, plans for controlling human traffic in the factories have to be worked out so that prison security requirements are served along with Missile Command requirements for cleanliness and environmental controls in workshops doing high-reliability parts assembly.

Vietnam Veterans

(ANF)—President Nixon has designated March 29 as Vietnam Veterans Day.

This date is the first anniversary of the day when the last American troops were withdrawn from Vietnam and the last American prisoners of war were freed.

The prison electronics factories—there are four—are part of a national FPI industrial system with a total 50 factories in 20 prisons with some 20 product lines. One objective of the system is to "Provide a system of wage incentives and a program of industrial and vocational training, so that inmates returning to society may be able to become economically self-sustaining and productive citizens," as FPI puts it.

According to C.R. Sammons, superintendent of industries at the Federal Reformatory in Petersburg, each year 500 inmates are formally trained in electronics, becoming certified solderers. They are paid for their work, from \$.21 to .51 an hour, depending on skill level. Production and training facilities at Petersburg have just been expanded and modernized,

and the number of prisoners being trained in electronics has more than doubled recently, now numbering 95.

On release, the electronics-trained prisoners usually can get jobs easily; sometimes there are more requests from prospective employers than the Reformatory's placement program can fill, Sammons said.

Training and employment placement costs, \$5 million a year roughly, are paid with FPI earnings. FPI pays a yearly dividend of several million dollars to the United States Treasury, through which money for FPI products passes.

Over the past six years FPI products have saved the Missile Command an estimated \$6-8 million. This year's contracts are worth more than \$4.2 million, FPI sells to government agencies only.

Dr. Freeman To Give Talk

Dr. Herbert Freeman will be for development of the Speedac guest speaker at the Institute of computer. He is with New York Electrical and Electronic University. Engineers, Friday. His subject will be Line Structure Representation Schemes in Digital Image Processing. Interested persons are invited to attend the presentation. The speech is scheduled to begin at noon. Tickets are \$2.00. Reservations can be made until noon today through Tom Gismondi, 533-3700 ext. 314 or Robert Trenkle, 536-9611. Tickets will be sold at the door.

Dr. Freeman holds a Doctorate engineering from Columbia University. He has specialized in computer work and is responsible

JAPANESE RECOGNITION—Wesley R. Swift receives a letter of commendation from Colonel Paul A. Pencola, director of the Procurement and Production Directorate. Col. Pencola presented the award on behalf of Major General Taro Hokota of the Japan Air Self-Defense Force. Swift was cited for his outstanding work in the development of the JASDF while serving as the U.S.-Japan Nike-J Production Project Officer of the Missile Command.

Hardware Sale Set At Marshall

The General Services Administration has announced the sale of 13 lots of surplus government owned valves and related hardware through sealed bids. The material is located in Building 7245 at the Marshall Space Flight Center.

Prospective bidders may inspect the material between 7:30 a.m. and 3 p.m., Mon. through Fri., until Jan. 18th. Bids will be opened Jan. 24, at 10 a.m.

Material must be paid for and removed within 25 calendar days from the date of award. For further information contact James W. Bass, 453-5397.

Junior College Graduates And College Sophomores Eligible For ROTC By Taking 6 Weeks Training

Junior college graduates and Alabama A&M University students completing their sophomore years can become eligible for the advanced Army ROTC course by attending a special six-week program at Fort Knox, Ky., it was announced today by Lieutenant Colonel John H. Redd, Jr., Professor of Military Science.

Colonel Redd explained that under the ROTC Vitalization Act of 1964, junior college students and others who have not taken the basic ROTC by attending the six-week course commencing June 14, 1974. Those who complete the Advanced Course are commissioned as second lieutenants.

"The ROTC Basic Camp emphasizes leadership development and is designed to bring the student to a level of military training and education which will qualify him for enrollment in the Advanced Course Senior ROTC Program," Colonel Redd said. "Only students who have successfully completed either the Basic Course of the Basic Camp, and certain armed forces veterans, are eligible for the Advanced Course.

Students taking the summer program will be paid at the rate of \$163.05 per month for the six weeks of training. In addition, they will receive free room and board and reimbursement for transportation to and from Fort Knox. If they successfully complete the accelerated summer program and are admitted to the Advanced Course, they will receive an allowance of \$100.00 a month.

At the Basic Camp, students receive instruction in military drill, tactics, history, weapons, communication and leadership techniques.

"The experience of former cadets has shown that the leadership education the ROTC program provides is an invaluable aid in the building of their post-college careers whether they decide to remain in the military or choose a civilian occupation," Colonel Redd said. "Almost 50 percent of the Army's officers are ROTC graduates, including about 150 general officers. You'll also find ROTC graduates in high positions in government, industry and in virtually every other walk of civilian life."

Those interested in enrolling for the summer program should call Colonel Redd at 859-2650/0390, or write him at the Military Science Building, Alabama A&M University, Normal, Alabama 35762. He and his staff will be interviewing prospective candidates for the summer program until 31 January, 1974.

Co. B Knocks A Out Of Unbeaten Ranks

Pillpushers First Over Century Mark In Scoring

A bizarre situation has engulfed the National division of the Men's Basketball league at the Arsenal for more than half the season. The players and fans have been tense and restless—understandably so.

Three teams were undefeated going into last week's action (the Meddacs, Company A and Company B) and everyone knew it couldn't last much longer.

The moment came when the ice was broken, but to the surprise of many. Company A and B, both with unblemished records, collided last Tuesday night. In basketball as in hockey—there are no ties.

In a wild game, Company B edged the perpetual "A" dwellers, 63-57, although league-leading scorer, Marvin Williams of Company A, displayed a fantastic 33-point performance.

In basketball, however, a squad which has learned to earn everything it gets with balanced contributions from the front, backcourt, and pivot has the edge, and in this case it was Company B. The permanent party was led by Mike Fields, followed by Frederick Harris, Frank Olmstead and Marwillis Cunningham with 17, 14, 12 and 10 points respectively. The only other double-figure scorer for Company A was Oney Van Landingham with 12 tallies.

Company B took a 20-18 halftime lead, but the turning point of the game came in the second half when three of four double scorers for Company B gathered all of their points while Company A's Williams nabbed 24, followed by

Charles Reese with six.

In other action, the 5th ETC nipped the 9th, 51-48, and the MPs whipped the 6th ETC, 62-50.

The 5th ETC moved to within one-half game of the league leaders with their win over the 9th. The 5th started off cold, trailing the 9th, 14-2 in the first quarter. But in the second quarter, the 5th outshot their opponents 18-9, trailing 23-20 at halftime.

Paced by Ed Clark and Joe Canada with 16 and 11, the 5th took a 35-33 lead in the third quarter, and then held the advantage in the final stanza for the win. Billy Lewis, Kermit Crawford and Randy Chalmers led the 9th students with 19, nine and eight points.

The cops increased their record to 3-2 with a victory over the 6th ETC. Charles Sanders paced the MPs with 18, followed by Bob Zehner, Bob Zelenak and Robin Sheets with 16, 13 and 12 points. The student's trio were Winston Stephens, Mike Smith and Larry Denson with 16, 13 and 10 tallies respectively.

Thursday
The National division action continued last Thursday night at the Post gym with Company A downing the 6th ETC, 68-63; while the Meddacs blasted SSG, 107-24; and the 9th ETC topped the Marines, 75-56.

Company A bounced back from their earlier loss last week with a win over the 6th. Again, Marvin Williams was the story for the "A" dwellers, dumping in 32 biggies, followed by Oney Van Landingham

and Sylvester Walker with 12 and 10 points. For the students, Winstone Stephens had a fine 28-point performance in a losing effort.

Page 12 THE ROCKET — JANUARY 16, 1974

The pillpushers set a new high-scoring record this season in a lopsided victory over SSG. The Meddacs remained tied with Company B with identical 4-0 marks.

Scrappy guard Bob Moore paced the pillpushers with 33 points.

Rounding out the scoring were Vic Malucci, Ray Buggs, Randy Hoerth and Wynn Hoffman with 21, 20, 14 and 11 tallies respectively. Jim Kennedy and Ed Odom led the SSG cagers with 12 and eight points.

In the finale, the 9th ETC won their second contest against three losses, drubbing the Marines, 75-56. The students were paced by Kermit Crawford and Jerry Starks with 21 and 20 points, followed by Mitch Coleman and Harry Bryant with 12 tallies each. For the Marines, who have dropped five straight, the big guns were R.G. Grant, W.E. Tibbs and R.L. Johnson with 15, 14 and 10.

MICOM Captures Six In A Row

The old adage "the sky is the limit" is becoming a reality with the missilemen from MICOM as they chalked up their sixth straight win in the RSA Men's Basketball League last week at the Post gym.

On Monday, the Missilemen blasted 1st ETC, 66-28, paced by Arthur Perrin with 19 points, followed by Ron Castine, Ray Smith and Gene Howey with 16, 14 and 10 points. John Hall scored 15 points for the losers.

Although the two wins marked their sixth victory against no losses, MICOM's scoring is the headliner. They have racked up an amazing 72.3 points per game through their first six contests—highest in the entire league.

Seemingly sure of a championship, the missilemen, however, are still baffled over the surging 8th ETC team. The students, whose players are about as stable as current gas prices, won their fifth straight game last Monday night in defeating the 4th ETC, 70-42.

Oddly, with personnel coming and going, the students have maintained their poise and also have produced a leader in each game. Against the 4th ETC, the big gun was Clifford Boler with 16, followed by Floyd Tenzly and Milton Grubbs with eight tallies each. Steve Scott was the only double-figure scorer for the 4th with 15 points.

In other American League action, Company C outlasted the Marines, 38-30. For Company C, it was a "must" game as they remained tied with the 4th ETC

with identical 3-2 records. Perhaps sporting their worse roundball season at the Arsenal, the Marines dropped to the cellar position with a dismal 0-6 mark.

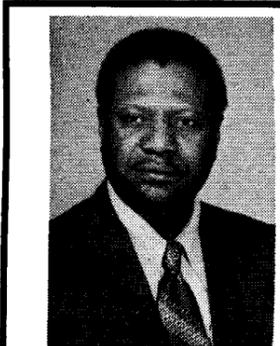

Gene Hatfield and Roger Greene sparked the permanent party with 12 and 10 points, while C. B. Foutz, fifth highest scorer in the American division, nabbed 13 for the Leathernecks.

Wednesday
In Wednesday night action, MICOM routed Company C, 75-38; the 4th outscored the 1st ETC, 76-54; and the 7th ETC hounded the Marines, 40-24.

The missilemen continued their torrid pace in the American division with a lopsided win over Company C. Gene Howey led the MICOM contingent with 20, followed by Ray Smith and Arthur Perrin with 17 and 13 points respectively. The Company C scoring came from Roger Greene and Harry Ross with 11 and 10 tallies.

The 4th ETC victory over the 1st gave them a split for the week and a 3-2 mark. The 4th were sparked by trio Steve Scott, Willie Banks and Dave Vansleet with 24, 23 and 16 points, while in a losing effort, the 1st students had a trio of John Hall, Jim Matatall and Aaron Small with 15, 14 and 13 tallies respectively.

The students from the 7th ETC finally escaped the cellar of the league with a win over the Marines. Frederick Fuller paced the students with 11, while C. B. Foutz again led the Marines with 18 points.

HIGHLIGHTS

Julio Lugo received his "Big Four" patch for his recent conversion of the 4-7-6-10 split, and that's the first time that monster has been picked up in the last six years, according to league secretary Doris Burke.

Kevin Lyons, holding a 155 average, got his ABC 225 Game patch Friday night.

 High team scratch: Outhouse Gang, 667 and 1924.

Alley, Hill Lead Match

Pete Alley and Frank Hill led the Redstone pistol team to a team aggregate total of 1065-20x in the monthly indoor .22 caliber match against teams from the Marshall Space Flight Center. Reports on other competing teams are not yet in.

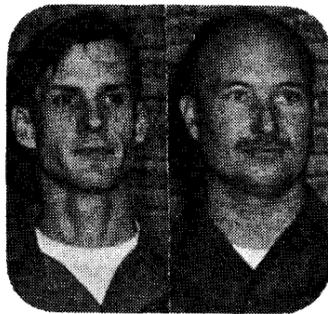

Alley totaled a score of 805-14x, while Hill shot 809-13x. They were supported by Danny Alexander with 793-8x and Ray Martin's 746-10x.

Last month, the NASA Blue team, consisting entirely of sharpshooters, edged the Redstone group 1117 to 1108. NASA has two other teams in the indoor competition.

"We'll hold our last indoor match of the season next month," said Pete Alley, team spokesman, "and then resume our outdoor schedule February 24, at the new range on Buxton Road."

The RSA pistol team is looking

for new members, Alley said. Persons interested in joining a competitive pistol team may reach Alley at 876-1545.

PETE ALLEY FRANK HILL

CFW-Girls Try To Halt Realtors

The Missile Command girls will be trying to turn the tables on the Mary Sullivan Realtors when the third round of play in the Huntsville Womens basketball league gets underway this week.

The Civilian Welfare Fund-sponsored Arsenal girls have won four league contests, losing only to the unbeaten Realtors twice.

Last week MICOM got back into

action following the Christmas break with a resounding 69-33 scalping of Alverson-Draughon.

Anita Wingard set the scoring pace with 22 points and Janice McGee was close behind. The other member of the starting front line, Gladys Hill, hit for 14, Carole Bissinger collected an even dozen and Gretchen Bigham completed the scoring with a single field goal.

Mail Clerk Opens Eyes For Rarities

Sometimes a hobby can be fun and still have a practical purpose too. Mrs. Helen Pierce, SAFSCOM Mail Clerk, collects coins and already knows what she is going to use the coins for when the time comes.

When her son, Scott, was born in 1964, Mrs. Pierce and her husband wanted to start a fund to send him

to college. It was difficult to set a certain amount aside and put it in the bank each month, so they decided to start collecting coins.

They started out saving silver half dollars, but when the silver content in coins was reduced they decided to branch out into other coins. Pierce runs a service station and little grocery store, so the family started picking out pennies with the wheat design on the back and saving them.

Some of their customers come in with rolls of coins and they buy them to check dates and designs. Sometimes they come across coins that have already been given the rare designation. In one batch of coins they found a 1909 wheat penny that is valued at over \$60 now and will probably increase in value as time goes on.

By the time he was five years old, Scott was checking through the change along with the grownups and picking out coins for his college fund.

Pretty soon Mrs. Pierce had to start mounting the coins in folders to keep track of them. Then she decided to start keeping the collection in a safe deposit box, because it wasn't a good idea to keep so many coins laying around the house.

The hobby has almost become a reflex action . . . whenever any of the family gets some change they immediately start checking the dates and mint marks.

In about eight years Scott should be ready for college and the Pierces' figure they will have enough coins in the collection to start him in college. Whether they will keep up the coin collecting after Scott goes to college is a question they will decide when the time comes, however, in the meantime everyone is having an enjoyable hobby just collecting.

"We enjoy looking through the change and checking coins we get in the store. Actually I think we have saved more money collecting coins than we would have if we had put a certain amount in the bank each month," Mrs. Pierce said.

RRG Wives

The Redstone Readiness Group Officer's Wives will meet at the home of Mrs. R. C. Ponder, 359 Crowell Circle, on Tuesday, February 5. Co-hostess for the day will be Mrs. Jimmy D. Bright.

Bridge is set for Tuesday, January 29, at the home of Mrs. Charles Hearn, 211-B Dyer Circle.

GOT ANY CHANGE?—Mrs. Helen Pierce, SAFSCOM Mail Clerk, always checks her change for rare or unusual coins. The family coin collection will be used to put their son Scott, 10, through college when he's ready to go.

Extra care in engineering...it makes a big difference in small cars.

Where's the only place in town to find a small car that...

1. ...is priced less than Volkswagen's most popular model.

You'll be surprised how little it costs to own one of our small cars. The suggested retail price is less* than Volkswagen's most popular model, believe it or not.

2. ...can go farther on a gallon of gas than Nova.

Recently published test results by *Popular Science* show our "Slant Six" engine can go farther on a gallon of gas than Nova, and you get a "Slant Six" engine standard in all our small cars, which means you can get more miles per gallon than comparable size small cars like Maverick, Comet, Ventura and Apollo.**

3. ...has more trunk space than 3 Pintos.

Plymouth Duster and Valiant have the largest luggage capacity by far in the small car field. More than Nova and Maverick, up to twice as much as Vega and up to three times as much as Pinto.

4. ...has up to 20" more total hiproom than a Maverick.

Valiant seats 6 and Duster seats 5 comfortably. And they have more hiproom—front and rear—than Nova, Hornet and, of course, Mustang II, Gremlin, Vega and Pinto.

5. ...can save you as much as \$62 in ignition maintenance alone.

Electronic Ignition is standard on all our small cars. In recommended ignition maintenance alone, you can save up to \$62 every 24,000 miles over competitive 6-cylinder engines and up to \$27 over competitive 4-cylinder engines.†

The answer is at your
