Fire delays completion of millimeter wave facility

BY SKIP VAUGHN

Army investigation reports are expected by April 1 on the origin of a Redstone Arsenal construction fire that caused an estimated \$5 million in damage.

The Feb. 26 fire damaged part of the Millimeter/Microwave Simulation Facility which is being constructed under a \$19.5 million contract. Harbert International, the prime contractor, is expected to repair the damage, according to Jimmy Stevens, area engineer for the Army Corps of Engineers, Mobile District.

Investigations have been conducted by a five-member team from the Mobile district, and two fire specialists from the Army Materiel Command. The contractor is also conducting an investigation into the fire that occurred at the construction site inside the high bay of the Research, Development and Engineering Center.

Stevens declined to speculate on the cause but did say the fire began on a wall where welding was under way.

"It was about 80 to 85 percent complete at the time of the fire; we're probably now 60 percent."

"Both Army reports will be available in about two weeks," he said Friday. "They've interviewed the construction workers down at the site, all the witnesses, and made some tests trying to determine the cause. They've made an exhaustive investigation."

He estimated the damage to be from \$4-6 million, but said that won't be known for sure until there is a thorough check of the mechanical, electrical and piping work.

"The contractor has contracted with a fire cleanup specialty contractor to come in on Monday (March 12) to start cleaning up the facility," Stevens said. "That cleanup operation will take somewhere around 21 days and he'll have from 150-175 people vacuuming, cleaning, wiping, encapsulating, whatever it takes to get the smoke and soot damage out of the building."

The damaged facility, an independent structure in the middle of the high bay, is the RF-4 radio frequency chamber and its five adjacent support rooms. The

CONSTRUCTION SITE — A Millimeter/Microwave Simulation Facility is to be constructed in the high bay of the Research, Development and Engineering Center.

chamber, about 30 feet square and 40 feet high, is one of about six chambers being built to test weapon systems. The damaged chamber and its support rooms will probably have to be rebuilt, according to Stevens.

The chamber and its support rooms are steel-lined. The chamber's walls and ceiling are lined with anechoic material, a foam rubber-like substance designed to absorb radio frequency waves. This material was what burned in the fire. Most of the heat damage was on the third floor of the newly-built, four-story structure. Most of the damage was described as smoke and soot damage. The chamber and support rooms were designed to contain fire and "our design held up," Stevens said.

Until the fire about 100 workers were on the job three shifts a day, six days a week to meet the projected completion date of July 1990. Construction began in June 1988.

"It was about 80 to 85 percent complete at the time

of the fire; we're probably now 60 percent," Stevens said. "We don't really know how long it's going to delay the job. The contractor's working on the schedule and he'll provide one to the Corps when it's available."

The Army shut down the construction site the day of the fire. After the Army Materiel Command and Mobile district investigators had finished their work, the site was turned back over to the contractor for cleanup and reconstruction efforts. In addition to the Army probes, the Mobile district has contracted an investigation by a private consulting engineer from Mississippi.

The Mobile district is responsible for military construction projects in Alabama, Florida, Mississippi and Tennessee.

"It's one of our construction projects," Stevens said, referring to the millimeter wave facility. The fire will delay completion "a good bit," he said.

More civilian positions to be filled by computer

A new automated system will be used to fill general schedule positions currently being filled under the merit promotion program.

The locally-developed system, called MICOM Automated Candidate Evaluation System (MACES), will apply to about 6,000 positions at the Missile Command and other activities serviced by the Civilian Personnel Office. These include non-career field positions and paratraine positions. Career program positions were added to an automated system last year.

"Our goal is to have this automated and on line ready to issue referrals by the 30th of June," said Kay Whitaker, a personnel staffing specialist.

All employees serviced by the civilian personnel office who are interested in promotion and promotion potential are urged to register in the new system. Briefings will be conducted by representatives from the civilian personnel office March 19-28 with two sessions each day beginning at 9 a.m. and 1 p.m. in the Rocket Auditorium and the Strategic Defense Command conference room (for SDC employees).

The briefings will consist of general information on MACES, how the system works, forms required to register and the suspense dates to register. Employees interested in consideration for promotion or promotion potential for paratraine positions will be registered first. These are career program positions filled at less than the full performance level of the position, such as GS-5/7 with potential.

"Under the old system we had to manually update employees records," Whitaker said. "This system is hooked in with the SCIPMIS — Standard Civilian In-

formation Personnel Management System — that automatically updates the records when someone's promoted, retires, dies, whatever."

Other expected advantages of the new system include an automated history for compiling special reports; employee access to criteria used to determine ratings; elimination of the requirement for individual merit-promotion announcements; and less time needed to fill vacancies. Under the new system, a referral list should be ready for the supervisor within 24 hours.

"Employees will be required to update annually, but they may submit changes at any time," Whitaker said. "The positions will be paneled every six months."

Seven staffing specialists, in addition to clerical support, have been assigned to the MACES team. They include Whitaker, Olene McGowen, Mary Birmingham, Pat Anthony, Gloria McDonald, Latana Pempleston and Becky Butler. "Of course all of the staffers in the Recruitment & Placement branch are involved in job analysis and developing the job element definitions in addition to the workforce management," Whitaker said. Norm Foster is chief of recruitment and placement; and James Downing is chief of the other commands section in that branch.

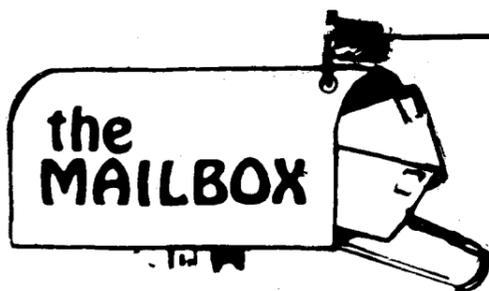

Once the new system starts, employees should see the difference. "They won't have to apply for a merit promotion every time they see a vacancy announcement," said staffing specialist McGowen. "Once they get in the system, their name will be referred automatically every time there is a vacancy."

Administrative officials in each organization are responsible for scheduling employees for the MACES

briefings and securing transportation. For more information, call the civilian personnel office at 876-2847

COMPUTERIZED — Olene McGowen, at left, and Kay Whitaker watch as staffing clerk Diane Horton enters data on computer.

Always Earth Day

Editor:

On April 22, there will be a special "Earth Day" anniversary and observation around the world and in the United States.

The MICOM Environmental Office would also like to call special attention to this celebration.

Since 1976 when this office started as a one man operation, we have grown to a six person operation in an effort to keep up with the mandated environmental laws and regulations which have been issued by federal, state, and local authorities. These laws and regulations are issued because the public (you and I and our neighbors) want a clean environment.

Redstone Arsenal Support Activity (RASA) Sgt. Maj. Robinson asked for our help in making (and keeping) Redstone Arsenal an installation to be proud of. I support this request and urge each of us to assist him here, at our homes, and on the way home as part of this effort.

Each person at Redstone Arsenal (civil service, military, contractor, or visitor) is an environmentalist in his own way. The MICOM Environmental Office strives to make every day "Earth Day" at Redstone Arsenal. As Sgt. Maj. Robinson said, "We need everyone's help to accomplish this goal."

Bill Schroder
Environmental quality coordinator
MICOM Environmental Office

Self-help answers

Editor:

The expanded Self-Help program, which includes the "Self-Help Store" referenced in a letter to the Mailbox, Feb. 14, is a program designed to elicit voluntary participation from military and civilian installation personnel in order to improve living and working conditions and the general appearance of facilities and grounds. The program covers volunteer work by occupants in offices, work areas, and other facilities including housing. It includes work beyond basic maintenance, such as repair and minor construction.

In regard to the questions posed in the above mentioned letter, responsive answers are supplied as follows:

(1) *If a person has an accident while performing self-help activities in a government office building, who pays the bill? Is the government liable or the employee?* Answer: Concerning accidents occurring

while performing voluntary work tasks, workers compensation rules apply as they would during the performance of any other official duty.

(2) *If a person has an accident while doing lawn maintenance on government grounds, who is liable, the government or the employee?* Answer: Same answer as in No. 1 above.

(3) *Is the work in government offices and on government grounds authorized during normal duty hours?* Answer: Work in government offices and on government grounds can be authorized during normal duty hours and will be considered official duty when approved in advance by management.

(4) *What happens to all the money that the government is paying to the contractor — H&N M/K, BAM-SI, or whoever — when the employees are doing the work?* Answer: Voluntary work performed by installation employees will not be tasked to the base support contractor thereby resulting in cost savings to the government.

(5) *When employees build a wall with the sheetrock that is available and they absolutely make a mess, does the contractor come in and straighten up the work?* Answer: If the employee fails to properly perform an attempted task, the employee, with guidance from the Directorate of Engineering and Housing, will make the necessary corrections.

(6) *When trees, shrubs, and flowers are planted at the buildings, will the grounds contractor mow around and pull the weeds?* Answer: When beautification projects such as planting shrubs and bushes are undertaken by an individual or group, the watering, fertilizing, weeding, and pruning must be a part of the overall project to be performed by the same individual or group.

MICOM Legal Office

Child care center

Editor:

First of all, I would like to point out that I am in no way affiliated or associated with the proposed child care center for which today's enclosed survey is collecting information. I am simply interested in having another quality on-post facility available for government employees.

Those of you reading this article will notice that the proposed cost per week (per child) for the new center is around \$70. At first glance, this seems unreasonably high. I have visited numerous off-post centers, as well as the current Army child care center and the soon-to-be defunct NASA (La Petite) center. I found the Army child care center superior in all regards to the other facilities in town, including the NASA center.

My understanding is that the proposed new center will be modeled after the current child care center. Unfortunately, I am on a long waiting list for the child care center, so I currently take my child to a family child care provider here on post. It is from personal experience that I would like to point out the following, which may make some of you reconsider what a "reasonable" fee is:

- Army regulations require a higher caregiver-to-child ratio than state-licensed facilities require.
- With the exception of an on-site swimming pool, none of the off-post facilities have playgrounds which even compare to that of the Army child care center. (The child care center does, however, make frequent field trips to on-post pools.) I encourage all parents to visit the child care center to see what quality, and quantity is proposed. By comparison, visit NASA's playground facility on Solar Circle (which is representative of many off-post facilities). Although NASA is a government agency, its requirements were not nearly as stringent as the Army's.

- Army regulations require higher standards of education and certification of child care employees than do state-licensed facilities.

- Although I must go down Goss Road (famous 25 mph speed limit), and double back to Digney Road, it still takes me less than 10 minutes out of my way to drop off my child. With normal rush-hour traffic and all the road construction going on around Huntsville, it would take me a minimum of 30 minutes extra (one way) to use an off-post facility. The new center will be more conveniently located (on Mills Road). For me the time and gas I save each day is almost enough in itself to justify the extra \$20 per week.

- If I decide to join a carpool, I will not have to worry about finding alternate transportation for my child.

- I have frequently been able to join my child for lunch and special activities without having to take a lot of annual leave.

- Consider this: La Petite is pulling out of NASA,

claiming they could not meet NASA's requirements and still make a profit. They were limited to charging \$50 per week after parents opposed a price increase to \$54 per week.

I realize that many people may not be able to afford \$70 per week, but for those of you who can, please consider what you are getting for your money — you get what you pay for (and so will your child).

Wanda Hengel
RD&E Center

Pay and benefits

Editor:

An automatic annual raise has been proposed for all GS employees. Representative Gary Ackerman (D-N.Y.) has introduced a bill in Congress that will require an automatic pay increase based on the cost of living. In effect, the bill will replace national scales and will be a locality area pay system. The president will be required to accept the Employment Cost Index pay increase in addition to the locality survey pay. There will be a Federal Salary Council that will consist of seven management employees and six union members. No employee will be paid at a rate less than their regular schedule. No locality raise will take effect until the beginning of the next fiscal year, two years after enactment of the bill, allowing time for the council to get organized and the Bureau of Labor Statistics (BLS) to begin pay surveys. Every three years the council will set market boundaries and possibly job categories subject to higher pay scales. The BLS will prepare competitive pay schedules in the areas designated by the council. The process will not be perfect, according to Ackerman. It is not being done by computer.

Ackerman has also come forward with a health insurance plan that will trim health costs. This plan will allow employees and retirees, who are not covered in a health maintenance organization, to be covered under one plan with only two choices — standard option and high option. Dental and vision coverage may be purchased separately. The house plan would be \$46.91 monthly, \$21.65 bi-weekly for family, \$10 bi-weekly for self only. The high option for family would be \$42.56 bi-weekly or \$19.74 bi-weekly for self only. The bill will provide for a catastrophic medical expense.

The bill is good news for all of us. I hope I can count on your help. Our headquarters has looked at the bill and they believe it is what we want.

The pay, health insurance, and retirement benefits will be hot items in Congress this year. The Bush administration's plan for health insurance is much higher in cost than Ackerman's plan. President Bush wants you to pay more and the government to pay less. His pay plan is 3.5 percent. He is gutting our retirement program.

Thank God for Congressman Bill Ford, who is chairman of the Post Office and the Civil Committee. He has presented our case to the Budget Committee and has advised them that his committee will fight for more pay, our health insurance, and our retirement benefits through the House of Congress. He also stated that the federal employees and retirees have lost \$119 billion in benefits since 1981. The lost benefits were pay, health insurance, and cost of living benefits for the retirees — \$119 billion we lost in nine years. If that doesn't set you on fire, your wood must be wet.

Help us in this fight. Join up. The American Federation of Government Employees (AFGE) is having a big legislation rally in Washington, D.C., June 16-20. Join up and donate money so that you can have representation at the rally. We must work together to save our benefits and to improve our pay, health insurance, and retirement benefits. I am ready; how about you?

I am proud to be able to work for you and to be your president.

Dennis Garrison
President,
AFGE Local 1858

Gate proposal

Editor:

We recently learned of the proposed changes in arsenal gate operating hours. The rationale for these changes was given as being the need to meet manpower and budgetary constraints. We would like to propose an alternate means to reduce operating expenses — replace the civilian guards with military police. This would reduce the cost of operating the gates as the MPs are being paid anyway and are no doubt better trained to guard a military installation.

Advertising Offices . 539-3980

The *Redstone Rocket* is published weekly on Wednesday. The publisher will receive editorial content for publication in the *Redstone Rocket* through the Public Affairs Office, Army Missile Command, Redstone Arsenal, AL 35898, Bldg. 5250, Room A-134. Extension 876-1500.

The Advertising Office of the *Redstone Rocket* is located at 108-B South Side Square, Huntsville, AL 35801, phone 539-3980. Post Office Box 5351, Zip 35805.

Advertising deadline for display and commercial classified is 5 p.m. Friday before the Wednesday publication.

The *Redstone Rocket* is distributed free of cost to Army personnel at Redstone Arsenal, and Research Park, Huntsville. Mailing rates off post for the *Rocket* are \$20.00 a year, tax included.

Everything advertised in this publication must be made available for purchase, use or patronage without regard to race, color, creed, sex or national origin of the purchaser, user or patron. A confirmed violation or rejection of this policy of equal opportunity by an advertiser will result in refusal to print advertising from that source.

Redstone's ammunition management is serious business

Editor's note: This is the second in a series of articles about the Missile Command and various Army organizations at Redstone Arsenal and in Huntsville.

BY SANDA LAGER

When the Congress established an Army in 1789, it concurrently appropriated monies to provide the ammunition that supplied that Army. Since those early days, the sophistication of ammunition has changed substantially.

Ammunition, referred to as Class V items, includes the following: bombs, explosives, mines, fuzes, detonators, pyrotechnics, missiles, rockets, propellants and other associated items.

Class V also includes components of Class V items such as boosters, heavy rocket motors, jet-assisted takeoff devices, nuclear and non-nuclear warheads, chemical or biological material and associated repair parts.

At Redstone, 90 percent of ammunition activity is related to research and development of missiles and hardware components in a test environment. The remaining 10 percent is linked to product assurance, troop training and conventional ammunition, said Leonard Jones, Installation Ammunition Program Management Officer, a Missile Command staff office position established July 1989 to oversee Redstone's ammunition program.

The recent elevation of the function to staff office level reflects the Command's commitment to effective management of the ammunition program, with special emphasis on accountability, asset visibility, safety, security and surveillance, Jones said.

Redstone Arsenal Support Activity's Directorate of Logistics plays a major role in Redstone's ammunition management, receipt, storage, issue and demolition, Jones said, while the functional responsibility for the management of classified items worldwide belongs to the Missile Logistics Center.

A 1985 Army Materiel Command review of ammunition and stockpile management found ammunition management at AMC subordinate commands to be fragmented and in need of centralized management.

As a result, an office was established in the Missile Logistics Center for the worldwide management of ammunition, and RASA was given responsibility for ammunition management within the boundaries of Redstone Arsenal.

"More than 3,000 in-bound shipments (of Class V items) arrive at Redstone Arsenal each year. As long as we have these materials in our inventory, the potential for destruction is great," Jones said.

Two ingredients, he said, create a dangerous situation: first, the very nature of the business — the fact that we have these materials; and second, the risk of having inadequately trained people responsible for the control of the items.

"These two situations create an excellent environment for a serious incident," Jones said.

Training program

In addressing the issue of ensuring personnel are properly trained in ammunition handling at Redstone, a program is being developed by the Ordnance Missile and Munitions Center and School to make sure all soldiers handling such materials are properly schooled in the procedures.

Civilians are required to be certified before handling ammunition. The U.S. Army Defense Ammunition Center and School has developed a program to train civilians in proper handling procedures for ammunition.

Jones recalls an incident four years ago when a shipment of cluster bombs was sent to Redstone Arsenal for the purpose of downloading, a function MICOM doesn't have the capability for.

"As long as we have these materials in our inventory, the potential for destruction is great."

"Had they reached the unit and someone there attempted to download them, there would have been loss of life and property," but thanks to a well-trained chief of explosives storage and demolitions who knew MICOM doesn't have the capability to download, the shipment was refused," said Jones.

Security

Another important purpose of managing the Army's ammunition inventory is ensuring it won't fall into unauthorized hands.

"Increasing terrorist activity throughout the world places Class V materiel at an ever-increasing risk for misappropriation," said Jones, adding that MICOM must take every reasonable step to reduce or eliminate the vulnerability to our Class V materiel.

He cites the success of the Stinger missile in Afghanistan and, more recently, favorable comments by commanders and soldiers involved in the Panama operation about the good performance of MICOM weapon systems, as factors making weapons in our inventory attractive to terrorists.

Environmental concerns

An ammunition cleanup program was begun in 1980 at Redstone. Around 2,000 ammunition items in various stages of deterioration were found in bunkers — items that had been there since 1955. No one would claim ownership of the items.

The loss of accountability of materials such as in this situation is what Redstone is trying to correct, Jones said.

To address this problem, the MICOM Ammunition Tracking System is being developed and further refined.

System specifications call for maintaining accountability and asset visibility for all Class V items at

Redstone Arsenal through MATS, regardless of the system to which the Class V items belong.

The MATS is being developed by the Information Systems Command, with project offices, the Ammunition Surveillance Office and the Research, Development and Engineering Center working closely with RASA on the accountability process.

"By October, if an item is in the boundaries of Redstone Arsenal, we will know where it is and who has the responsibility for its safekeeping and physical security," Jones said.

Ammunition is managed in a closed loop environment, never sacrificing one of the three concerns — environmental concerns, safety, security — for the other, he said.

The precept of ammunition management is summed up in Jones' statement, "You're allowed only one mistake with ammunition and sometimes it's your last one."

JONES

Child care survey

The following survey is intended to assess civilian child care needs for the planned on-post child development facility. Anyone who has or plans to have children should complete it and send it to AMSMIEO, Attn: C. Gant, Building 5250.

- Your age:

a. 18-21	e. 36-39
b. 22-25	f. 40-45
c. 26-30	g. other
d. 31-35	
- Your grade: _____
- Number of children you have in each age category:

a. 0-18 months	d. 5-12 years
b. 18 months - 3 years	e. plan to have or adopt a child in the next 5 years
c. 3-5 years	
- Building number at which you work: _____
- Are you willing to pay an average of \$70 per week?
- Your regular hours of employment:

a. 6:30/3:00	e. 8:30/5:00
b. 7:00/3:30	f. 9:00/5:30
c. 7:30/4:00	g. Other
d. 8:00/4:30	
- Approximate time missed per month because of lack of child care:

a. hours
b. days

Members sought for Hispanic employment committee

The Equal Employment Opportunity Office is actively recruiting employees interested in serving on the Hispanic Employment Program Committee.

This committee will provide an opportunity for more employees to become involved and to make a personal commitment and contribution to the Hispanic Employment Program, according to Barbara Alexander, Hispanic Employment Program Manager.

Committee members will serve as organizational

liaisons and will provide information regarding concerns and needs of Hispanic employees in their respective organizations. It is anticipated that the committee will meet quarterly for about an hour to an hour and a half.

The Hispanic Employment Program committee was originally established in 1986, but there has been a loss of three members due to relocation and retirement. The Department of Army issued guidance regarding

the establishment and implementation of a Hispanic Employment Program at major Army commands and subordinate commands, activities and installations.

The committee provides representation for diverse grade levels, occupational areas, age, minority and ethnic groups and includes members of both sexes.

Employees interested in serving on the committee should call Alexander at 876-8005.

Plans form for armed forces celebration in June

Plans have already begun for the sixth annual Huntsville-Madison County Armed Forces Celebration, and a combination of traditional and new activities promise to make the event one which can be enjoyed by the entire community.

The celebration, scheduled for June 10-16, is an annual observance of the friendly relations enjoyed by the military and civilian communities of Huntsville for more than 40 years.

The week will begin with a patriotic church service Sunday, June 10 at Redstone's Bicentennial Chapel

and will feature the Whitesburg Baptist Church Choir's "I Love America" program.

The patriotic theme will continue Monday evening with a patriotic concert in Big Spring Park by the Huntsville Symphony Orchestra.

The Celebration Luncheon and opening of the trade exhibits is set for Wednesday. The U.S. Marine Corps Silent Drill Platoon and the Golden Knights, the Army's precision parachute team, will perform at the Huntsville Stars baseball game Wednesday night. A military parade and special forces demonstrations are

planned for Friday. Trade exhibits will remain open through Friday.

A static aircraft display is planned for Saturday at the Redstone Arsenal Army Airfield.

Running concurrently with the celebration will be the American Defense Preparedness Association technical symposium and the Small Business Procurement Fair.

Plans are still being made, so watch the *Rocket* in coming weeks for updated information.

Two contracts awarded for Hellfire missile system

The Missile Command has awarded two contracts worth approximately \$167 million for work related to the Hellfire missile system.

One contract, for approximately \$125 million, went to Rockwell International for the 1990 production buy of 4,864 Hellfire missiles and associated equipment. The contract also contains options for additional missiles for fiscal years 1991-93.

The second contract, with a not-to-exceed-value of \$41.9 million, went to Martin Marietta Missile Systems to develop an improved Hellfire missile. The system,

called Optimized Hellfire, will feature warhead and guidance improvements and enhanced countermeasures capabilities against next generation armor threats.

The 27-month development contract calls for a 65 missile flight test program starting in late 1991 and contains options for additional missiles.

The new missile is expected to be integrated into the Hellfire production line in 1994.

The Army has competed Hellfire production between Martin and Rockwell since 1983 with the con-

tractors bidding for each production buy and the low bidder winning the major production share. The 1990 production buy, however, contained language that the Army could select a single contractor if it weren't economically feasible to have two because of dwindling quantities.

Col. Robert Huston is Hellfire/Ground Laser Designator project manager at Redstone Arsenal and Richard Shingler is his civilian deputy. Lt. Col. Gary Williamson is product manager for Optimized Hellfire.

Rocket Run road races coming soon on Redstone

If you haven't started training for the 15th annual Rocket Run 10-mile race, you only have 10 days left.

The 10-mile and 5-kilometer (3.1 mile) road races will be held Saturday morning, March 24 at Redstone Arsenal. Sponsored by the Huntsville Track Club, the races begin and end at Pagano Gym, building 3474.

The 10-mile starts at 8 a.m., the one mile fun run at 8:15 (during the 10-miler), and the 5K at 9:30. All run-

ners should register from 7-7:45 that morning at the gym. Cost is \$1 for students, \$2 for adults. While there is no entry fee for the fun run, registration is required for participants in that event also.

Trophies will be awarded to the top three places in the following age divisions: *Male, 10-mile* — 12 and under, 13-17, 18-29, 30-34, 35-39, 40-44, 45-49, 50 and over; *Female, 10-mile* — 29 and under, 30 and over. *Male, 5K* — 10 and under, 11-13, 14-17, 18-29, 30-39,

40-49, 50 and over; *Female, 5K* — 14 and under, 15-24, 25-34, 35 and over.

Last year's winners included Carl Nicholson who won the 10-miler in 54 minutes and 9 seconds, with Jenise Gillespie the top female finisher in 64:41. Kevin Keene won the 5K in 16:12, edging Nicholson by less than a second in that race. Katye Pfitzer was the female winner in the 5K with 19:27.

For more information call Jim Upton, race director, at 544-2945 (days) or 593-6554 (nights and weekends).

Luncheon planned to honor volunteers of Redstone

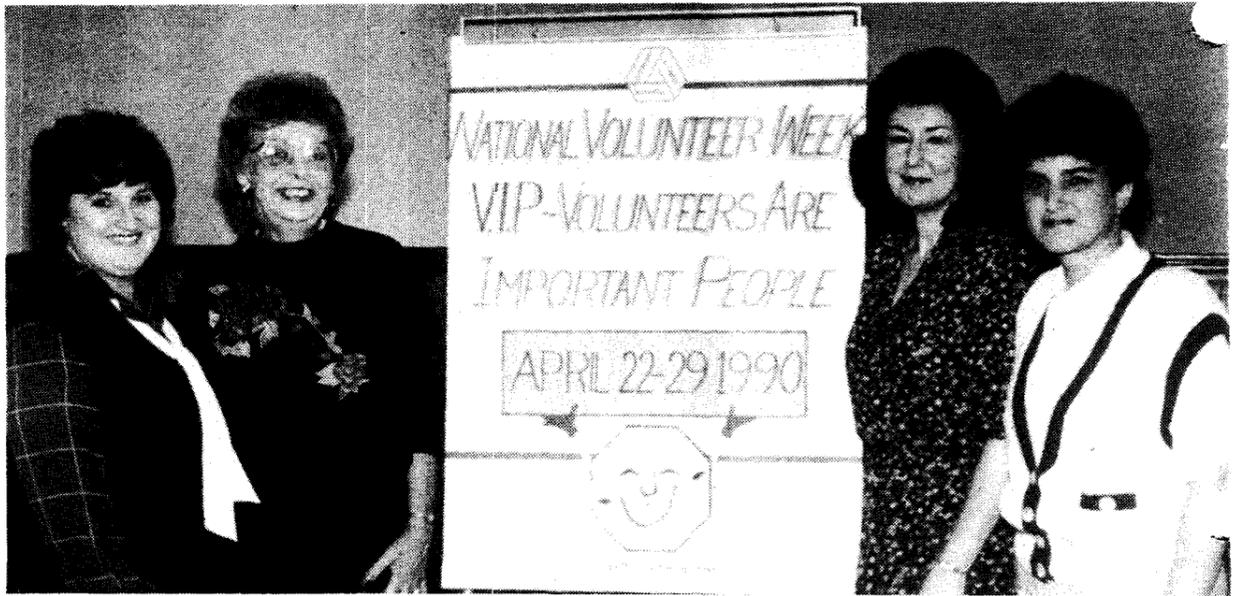

Redstone Arsenal volunteers will be recognized during National Volunteer Week, April 22-29.

The Installation Volunteer Advisory Council has been meeting to plan the 1989-90 Redstone Arsenal Volunteer Recognition Luncheon set for Monday, April 23 at the Officers Club. Sixteen volunteer agencies and 16 volunteer community nominees will be honored at that event.

The installation volunteer advisory council consists of the honorary supervisors, volunteer supervisors and agency support groups who work with volunteers at Redstone.

"V.I.P. — Volunteers Are Important People" is a slogan for National Volunteer Week.

ADVISORY COUNCIL — Some of the members of the Installation Volunteer Advisory Council include, from left, Marge Kunhart, chairman of American Red Cross volunteers; Mary Huffman, volunteer supervisor at the Thrift Shop; Vivian Moore, Army Community Service volunteer supervisor; and Sue Paddock, installation volunteer coordinator.

National Women's History Month observed in March

March has been set aside as National Women's History Month since 1987 in acknowledgement of women's contributions to the history of this nation.

Mayor Steve Hettinger signed a proclamation for this year's local observance. "We certainly have come a long way," he said, "with women now noticeable in almost all professional areas and at all levels previously reserved for men, to include female astronauts and generals."

Mary Peoples, Federal Women's Program Manager (FWPM) at the U.S. Army Strategic Defense Command, looked on during the proclamation signing ceremony which was initiated at her request in coordination with the other ladies invited to the mayor's office. They included Barbara Woolnough, president, American Association of University Women; Kay Cox, chair, Madison County Women's Political Caucus; Betty Knowles, director of residential life, Alabama A&M University; Cathy Gant, FWPM, Missile Command; Ann Westendorff, FWPM, Marshall Space Flight Center; and Sherry Sensabaugh, chair, Tennessee Valley Women's Conference 1990.

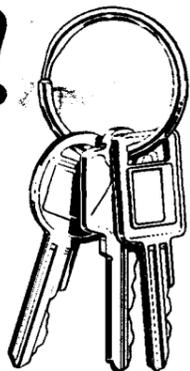

This year's celebration theme — "Courageous Voices Echoing in Our Lives" — recalls the achievements of prominent women in previous generations and the way their beliefs and ideals are reflected in our lives today.

PROCLAMATION — Witnessing Mayor Hettinger's signing of the Women's History Month proclamation are, from left: Barbara Woolnough, Betty Knowles, Mary Peoples, Sherry Sensabaugh, Ann Westendorff and Kay Cox.

Retiring secretary will miss her many friends

BY SKIP VAUGHN

The secretary to many top military officers through the years has seen her share of bosses arrive and depart; and now it's her turn.

Betty Butler will be retiring this month with 34 years of government service. March 16 is her last workday and March 24 is her final official day as secretary to the program executive officer for fire support.

"After 34 years, I think it's time to go," Butler said. "I'm really excited about it; I think you know when you're ready.

"I guess most of all I'll just miss my many friends," she said.

Butler was born and raised in Maysville, about 10-15 miles east of Huntsville. She went to Central Junior High School and Madison County High School. In March 1956, she came to work at the old Army Ballistic Missile Agency. "ABMA was just organized here in this building (4488) I think in January of that same year, and I came to work March 6 of that year," Butler, 55, recalled. She started out as a clerk typist in the Signal Office of ABMA.

After five years, Butler moved on to the old Ordnance Guided Missile School where she worked from 1961-63 for the assistant commandant and the executive assistant for education. She worked at the Army Missile Intelligence Agency from 1963-79, the final 15 years as secretary to the director.

Butler served as secretary to a series of brigadier generals since then: Benjamin Pelligrini, deputy commanding general for research and development (1979-82); Charles Murray, deputy commanding general for procurement and readiness (1982-85); John Drosdeck, deputy commanding general for the Missile Command (1985-87); and William Schumacher (1987-present).

"The last three years has really changed drastically with the PEO concept," Butler said. Drosdeck became the program executive officer for fire support in 1986, and Schumacher succeeded him the following year.

"One thing that I have seen change in my 34 years: People aren't as dedicated as they were when I started out; they don't appear to be. That bothers me."

"When I started out, I was on a manual typewriter. That has improved tremendously with the electronic typewriters and of course the computers," she said.

Not all of the changes she has seen have been for the better, however. "One thing that I have seen change in my 34 years: People aren't as dedicated as they were when I started out; they don't appear to be. That bothers me," Butler said.

Her entire government career has been spent at Redstone. She did make one official trip which lasted less than a week about 1958 or '59 to Tampa, Fla. "I had to take classified material down there that was in a big thing like this," she said, widening her arms to show the dimensions of about 4 feet by 3 feet. "They had to reduce it down and I had to bring it back. That was a hassle. Of course when it was reduced I had no problem bringing it back, but it was getting it down there to be reduced." Laughing, she added that she didn't like the plane ride either.

She has a daughter, Elizabeth, 27, and six grandchildren. Her son-in-law, George Burks, works at the Missile Logistics Center. She likes to read, and watch sports like football and tennis.

"I have met a lot of people over the 34 years and many many nice people; and I have many many friends and I will miss talking to them on a daily basis," Butler said. "But I will have some fond memories of those friends.

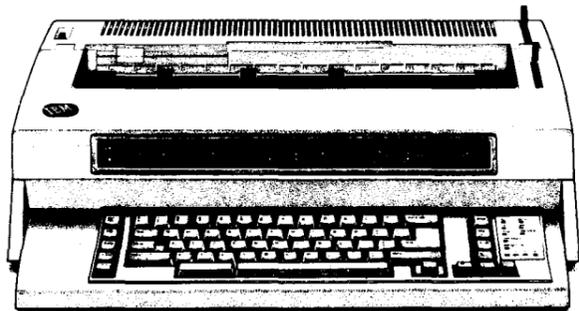

"I thank God for the opportunities I have had during my career and for the good health to work this long," she added. "Overall, my time with the U.S.

government has been very very rewarding; however, one or two assignments have caused my prayer life to increase significantly."

BUTLER

Captain helps shape future of Korean military intelligence

BY DAVE MELANCON

SEOUL, Korea — It's not often that a captain plays a role in setting up an institution which could affect a nation's military intelligence training, doctrine and development for years to come.

As the U.S. Army Intelligence Center and School's first liaison officer to the Republic of Korea Army Intelligence School, Capt. Kurtis L. Derell, 501st Military Intelligence Brigade, is helping to shape the future of intelligence doctrine for the Korean Army.

"I'm in a rare position — if I do my job well, I could have a positive affect on both U.S. and Korean Army intelligence developments," he said.

The Korean Army Intelligence School, established in 1949, is modeled after its U.S. counterpart, Derell said. But there are some differences.

"The U.S. intelligence branch is responsible for developing doctrine, training soldiers, developing systems and units that are deployed worldwide. The Korean Army school is oriented specifically toward the Korean theater. It has strictly school functions — training and developing doctrine. It's a much smaller organization."

To prepare for this assignment, Derell studied Korean at the Defense Language Institute and Yonsei University.

The school is still laying the foundations for its curriculum and training its cadre, Derell said. "Many senior intelligence officers come from other branches, and many have limited experience in the intelligence field. Sometimes this presents problems."

Derell's job is to help the school set up its programs, serve as a link between the U.S. and Korean schools and to keep the 501st and other U.S. commands informed about developments in the Korean's intelligence gathering abilities and army. He supplies similar information to the Korean officers he works with.

Derell sees living and working at the Korean Army Intelligence School as an opportunity that few junior officers receive.

"I work three to four days a week in a completely Korean Army environment," he said. "It provides me with contacts with a lot of Army organizations that as a

captain I would not normally have." (Editor's note: Sgt. Melancon works in the 501st MI Brigade public affairs office.)

REENLISTMENT — Capt. Craig Johnson, chief of Technical Escort Division, stands by as SFC Robert Warner, curriculum NCO for the technical escort division, shows pride in his field of duty by reenlisting in a toxicological agent protective suit with the help of Lt. Col. Donald Kern, director of the Munitions Training Department.

Edie-U team takes over first place in bowling league

BY JUANEZ ALEXANDER

After leading the Missile Logistics Center bowling league for most of the season, the Cobras were finally knocked off the top by Edie-U.

Edie-U slaughtered Cobras as they took all four games. Hank Lemke led the way with a 523 series while teammate Juli Polka shot 24 pins over her average. John Hope of Cobras rolled 20 pins over his average.

Lanes 7 and 8 were the hot spot of the night. Every bowler on the two teams exceeded their averages. Almost Family and Sidekicks each gave their all; and their efforts were rewarded with a split decision of two games apiece. Kay Payne rolled a whopping 72 pins over her average while teammates Debbie Colgan shot 47 pins over hers and Bill and Mike Colgan bowled 23 and 28 pins over their averages. For the Sidekicks, Ciara Randall bowled 54 pins over her average while teammates Betty Grymonprez and Don Slagle respectively shot 51 and 21 pins over their averages.

High games and series were shot by Rodney Crawford of Mixers which split two games with the Family. Crawford rolled games of 204 and 225 with a 608 series while teammate Karen Compton shot a 204 game. Family's John Edwards had a 222 game and 544 series.

Shelby Williams and Sandra Recio shot 22 and 33 pins over their averages as Bushwhackers grabbed three games from Four Aces.

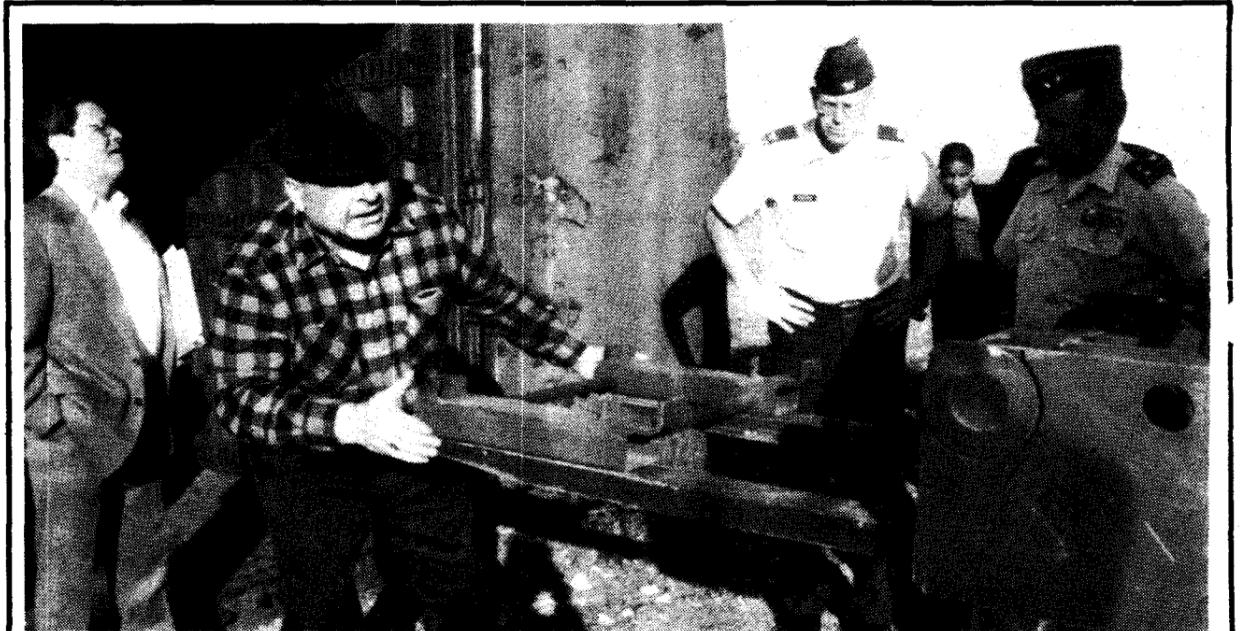

YoYo's snatched three games from BeBe's. Leading the way were Sherry McEniry who rolled 42 pins over her average and Mike Andrews who shot 22 pins over his. For BeBe's, Peggy Bartinkaitis bowled 39 pins over her average and Ray Ebersole shot 25 pins over his.

Bill Hollifield shot a 542 series to pace Ten Pins to a narrow three-game win over Comic Relief II. For

Comic Relief II Jesse Beauford had a 524 series; Lynn Stuckey bowled 24 pins over his average; and Tracy Tipton rolled 30 pins over her average.

Here are league standings as of March 7: Edie-U, 55 wins, 33 losses; Family, 54 wins, 34 losses; Cobras, 53.5 wins, 30.5 losses; Almost Family, 52 wins, 36

losses; YoYo's, 48 wins, 40 losses; Bushwhackers, 46.5 wins, 41.5 losses; Comic Relief II, 41.5 wins, 46.5 losses; Mixers, 40.5 wins, 47.5 losses; BeBe's, 35.5 wins, 52.5 losses; Ten Pins, 35.5 wins, 52.5 losses; Four Aces, 35 wins, 53 losses; Sidekicks, 31 wins, 57 losses.

FORKLIFT — Frank Vicuna, combat developments specialist and Henry Locklear, an instructor at the ammunition supply point, explain and demonstrate the uses of the variable reach forklift to Col. James Boddie, commandant of Ordnance Missile and Munitions Center and School, and Maj. Gen. James Ball, chief of ordnance. The forklifts are being fielded to OMMCS to be used in the training of 55B ammunition specialists.

Free poison prevention kit available for prevention week

The Alabama Poison Center is offering a free poison prevention packet as part of the observance of National Poison Prevention Week, March 18-24.

The packet contains a general brochure about poison safety in the home and yard, a brochure about syrup of ipecac, a children's activity book and a telephone sticker. The free kit may be obtained by calling the center at 1-800-462-0800.

"National Poison Prevention Week is set aside each year to remind people that accidental poisonings in this country are a major problem," said Dr. Perry Lovely, medical director of the center. "It is estimated by the American Association of Poison Control Centers that over 2 million people are accidentally poisoned each year. By educating Alabamians, especially those with young children, we hope to reduce the more than 34,000 accidental poisonings that occurred in this state last year. Our constant theme here at the Alabama Poison Center is that it is far easier to prevent a poisoning than it is to treat one. Once you have seen the suffering that can result from a major poisoning, you know this is true."

Since many poisoning victims are children age 6 and under, Lovely recommends parents of young children take special care about the home. "Most childhood poisonings occur while a product is being or has just been used by the caregiver. We think of our homes as being safe but, in reality, every room probably has some product or substance that, if used in the wrong way, could turn into a poison. For instance, a child who can't read might have a hard time telling the difference between a plastic milk container and a container of bleach. Or, have you ever noticed how similar a chocolate bar looks to an Ex-Lax bar? Adults know eating them produces different results, but a child doesn't know that.

"To safeguard a home with little children in it, you have to try to see the world from their eyes. What is within reach of their fingers? Where are your household cleaning supplies and medications stored?"

"Children often learn by imitating adults," Lovely continued. "If Mom takes pills, Junior might want to take them, too. That's why we advise never taking medicine in front of children, storing household products where children can't reach them, and being

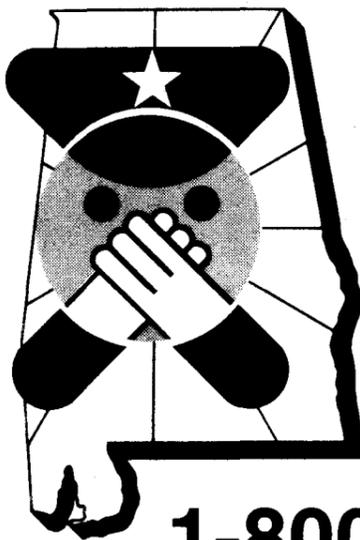

"We think of our homes as being safe but, in reality, every room probably has some product or substance that, if used in the wrong way, could turn into a poison."

especially careful in the kitchen and the bathrooms. About 40 percent of all poisoning exposures occur in the kitchen, and about 20 percent happen in the bathroom. That's why, with the very young child, the parent's main job is protection which then gives way to education as the child grows older."

Lovely also recommended keeping a bottle of syrup of ipecac in the back of the medicine cabinet for each young child in the family. It is low cost, available at the drug store, and used to induce vomiting in some

kinds of poisonings. "But do not give it to your child without checking first with the poison information specialists at the Alabama Poison Center," Lovely cautioned. "Some poisons hurt going down and they will hurt coming back up. In those instances, other treatments are recommended. However, when it is indicated, you will save yourself a great deal of extra anxiety by not having to put your poisoned child in the car, drive to the drug store, buy the syrup of ipecac, give it to your child and hope you make it home before the product works."

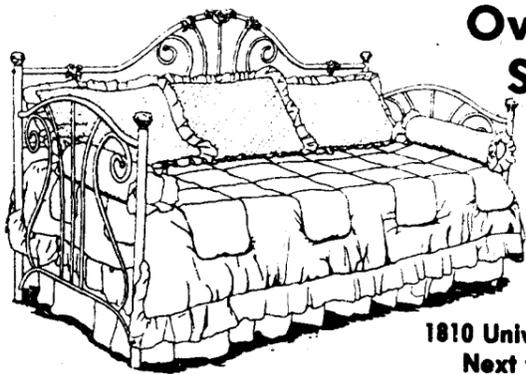

The Alabama Poison Center is located in the DCH Regional Medical Facility in Tuscaloosa. Its purpose is to be a resource in the treatment of accidental poisonings and for poison prevention information. The center is open 24 hours a day, 365 days a year, and all of its services are free by calling 1-800-462-0800. (Alabama Poison Center news release)

Drill Sergeant of Year leads his soldiers by example

BY MARIANNE BRACKEN

It takes a special breed of noncommissioned officer to turn civilians into well-rounded soldiers. That special breed of NCO is a drill sergeant.

SSgt. William Duffy of C Company, 832nd Ordnance Battalion, has been selected as Drill Sergeant of the Year for Redstone Arsenal. Competitions are also held quarterly and include testing in areas such as: drill and ceremonies, physical training instruction, hand-to-hand combat, bayonet training, etc. Candidates are tested in more areas for the annual competition than they are for quarterly competitions.

Duffy competed against one drill sergeant for the annual competition; there are usually four candidates for quarterly competitions.

"One of the toughest parts of the Drill Sergeant of the Year competition was writing a 1,000-word autobiographical narrative on the challenges that have been presented to me as a drill sergeant, my opinion of the new recruit training program, the impact I have as a drill sergeant on new soldiers, and my significant achievements as a drill sergeant," Duffy said.

Among the toughest challenges he has faced as a drill sergeant was taking soldiers with little ambition and convincing them that the Army is something good, something that will always help them, he said.

Duffy will be competing at Training and Doctrine Command beginning March 26. For his win here he received a \$200 savings bond from Morale Support, a

"Being a drill sergeant is a big responsibility. You have to lead by example both on and off duty."

"Being a drill sergeant is a big responsibility," he said. "You have to lead by example both on and off duty."

Duffy thanks his fellow drill sergeants in C Company, 832nd for their support and SSgt. Jeffrey Davis of A Company, 832nd "for sticking together when times got hard in drill sergeant school."

Drill Sergeant of the Year statue, and an Army Commendation Medal.

HONOREE — Duffy receives the Drill Sergeant of the Year trophy from Col. James Amato, commander of the 269th Ordnance Brigade, during ceremonies at the Challenger NCO Club. Standing beside Duffy is his wife, Cindy, holding their son, Zachary.

Redstone getting new disaster plan

Employee handbook explains emergency procedures, warning network

BY PAM ROGERS

After last November's tornado, it was obvious to the people who work in the Missile Command's Plans and Operations office that the arsenal workforce needs better information about disaster preparedness, and that those who run the emergency operations center during future incidents need better instructions on how to do their jobs.

The office has come up with a new employee emergency action handbook which gives information on actions to be taken during natural disasters, fire, bomb threats and war.

Sheila Jarvis, a mobilization specialist with the Plans and Operations Office, said many employees called after the tornado.

"We got so many calls from employees asking why they were not notified and if we did have (disaster) procedures. We decided the employees did not have enough information," she said.

In addition to the emergency procedures, the handbook also explains the operation of the emergency telephone warning network, activated during emergencies to alert workers.

Also included is information on igloo shelters on post to which certain employees are assigned and sur-

vival suggestions for those who are not assigned a spot in the on-post shelters.

An initial printing of 3,500 books is being made, so that every organization can get enough to make copies for each employee, Jarvis said.

The office has also drafted a new disaster control plan which combines three former plans, according to Shirley Pope, a plans and mobilization specialist. Replaced by the new plan are the Redstone Arsenal Disaster Control Plan, the Emergency Operations Center Plan for Disaster Control and the MICOM Disaster Control Plan.

"It serves as a document to give (proper) responses of all elements involved (in an emergency situation)," Pope said.

The plan covers just about every conceivable emergency, including flood, tornado and other severe weather, bomb threat, fire, explosion and escaping gas and military housing and billeting during emergencies.

"We have tried to make it as comprehensive as possible, outlining each element's responsibilities, Jarvis said.

"We solicit formal comments, criticism and remarks to enhance this product — to make it a viable resource," Pope said.

NEW RESOURCES — Shirley Pope (left) and Sheila Jarvis look over the new employee handbook and disaster control plan.

UAH PROFESSIONAL DEVELOPMENT

Science & Engineering Announces:

May & June 1990 Course Schedule

Data Acquisition and Testing Using Microcomputers

This seminar will familiarize participants with the latest techniques for real-time data acquisition, control, and testing using microcomputers. It is a practical "hands-on," how-to course designed for engineers, scientists, and test technicians. An overview of current data acquisition, hardware, software, and sensors will be provided with practical advice on how to select the right product for your applications. Attendees will tour several test areas which are using micros for testing purposes.

Course No. PD3075-02 • May 8 & 9
8 a.m.-5 p.m. • Tues. & Wed. • \$450

Noise Reduction Techniques in Electrical/Electronic Systems

This course covers both the basic and advanced principles for achieving emission compliance and susceptibility hardening of present day electronic systems. Grounding concepts and shielding will be covered. Special printed circuit-board parameters are presented for both double-sided and multiple-layer printed circuit boards employing either standard or surface-mount components. Discussions will include each specific design stage and the important design points associated with same. Information is also presented on conducting a proper EMC test program including test planning, test, and preparation of the test reports. This course is applicable to both commercial and military product designers.

Course No. PD3120-01 • May 14-18
8 a.m.-5 p.m. • Mon.-Fri. • \$975

Fundamentals of Laser Technology and Applications

This course is designed to give the layman as well as working engineers a basic understanding of the laser. The course will begin by presenting a basic understanding of how the laser works, then proceed to describing many of the applications of the modern laser. Course topics will include: Laser Light, Basic Laser Principles, The Laser Output, Modifying the Laser Output, and Different Type Lasers and Applications.

Course No. PD3123-01 • June 4-15
8 a.m.-noon • Mon.-Fri. • \$845

Program prepares employees for executive careers

BY SANDA LAGER

Four Redstone Arsenal employees have completed the Women's Executive Leadership Program, a one-year management development program for high-potential federal employees.

Graduates are:

- Mildred Nordman, a GS-12 program analyst in the Special Programs Office
- Betty Batts, a GS-12 education specialist, Ordnance Missile and Munitions Center and School's New Systems Training Office.
- Carolyn Pardue, a GS-13 electronics engineer in the Research, Development and Engineering Center's Advanced Sensors Directorate
- Bob Allen, a GS-12 configuration manager, Special Management Office.

Sponsored by the Office of Personnel Management, the program provides supervisory and managerial training for men and women at the GS-11 and GS-12 level and new supervisors with less than one year's experience.

The program is tailored to the participant's own developmental needs, focusing on those areas needed to become a successful supervisor or manager.

The program consists of both formal and informal training and development experiences. Participants are required to be away from their regular jobs for approximately four months of the year.

Components of the program include a one-week orientation in Washington, D.C., a public manager's workshop and two-week management training course in Lancaster, Pa., and group activities in Bethesda, Md.

Also, the yearlong program includes development work assignments, whereby each participant completes 30-day and 60-day assignments outside the employee's current position for the purpose of breadth of work experience.

Each participant also completes a one-week assignment to gain an understanding of managerial excellence by "shadowing" a federal manager at the GS-13 level or above.

Participants conduct executive interviews for exposure and visibility at the highest levels of management and to provide opportunities to gain critical information for long-term career planning and development.

Finally, enrollees are required to complete management reading assignments and prepare a paper addressing the perceived impact of the year's experience.

The pilot WEL program was started in 1984 and due to its initial success was continued with several changes, including the enrollment of men in the program and paring it down from 18 to 12 months.

The four recent Redstone Arsenal graduates were among a class of 235 persons from all agencies of the government. All said they think the program was extremely helpful to them in learning skills that will be helpful to them in their future job endeavors.

BATTS

NORDMAN

PARDUE

ALLEN

Nordman thinks one of the program's strengths is the opportunity to interact with participants from other government agencies.

"I would highly recommend the program and encourage others to participate," she said.

Batts said the WEL program affords an excellent opportunity for women to get training in management and leadership skills that traditionally have not been available to women in the workplace.

"The training is comprehensive. Most managers have never received some of the training offered by the program. They have to learn (management skills) on the job and sometimes at the expense of subordinate employees," Batts said.

Pardue said a person's success in the program is partially dependent upon support from the employee's supervisor, co-workers and family.

Careers

(Cont'd from page 14)

"Supervisors have to understand that the employee is going to be away a certain amount of time, and co-workers have to take on additional work," Pardue said.

Bob Allen believes the WEL program may be the only program available to government employees who need leadership training skills to prepare them for management positions.

"The program was great because it taught us how to get along with people with different backgrounds, from different parts of the country," Allen said.

For more information about the program, contact the Women's Executive Leadership Program at 202-632-5109.

The WEL program began in 1987, with 174 participants representing 29 federal agencies accepted into the 1988 program. Its purpose was to provide the federal government a pool of trained and capable women interested in pursuing management and executive careers.

Veterans memorial in need of repair

WASHINGTON — The National Vietnam Veterans Memorial Fund needs \$376,000 to repair the hairline cracks in the Vietnam Veterans Memorial in Washington, and is seeking donations.

According to fund accountants, \$90,000 is needed to replace the damaged granite panels, plus \$111,000 to engrave additional names and correct misspelled names.

Officials from the National Park Service, who maintain the memorial, say 19 additional names were added last October, and 120 changes in status from missing in action to killed in action were made.

Donations may be sent to the fund headquarters at 1110 Vermont Ave., Suite 308, Washington, DC 20005. (From a Veterans of Foreign Wars release.)

Health care program extended to ex-spouses of military

Some divorced former military spouses whose marriages ended on or after Sept. 29, 1988, have had their Champus eligibility extended by Congress in the most recent Defense Authorization Act.

Champus-eligible former husbands or wives of active or retired military must have been married for at least 20 years to a service member or former member (the 20 years of marriage must be to the same member) who had performed at least 20 years of creditable service for retirement purposes at the time the divorce or annulment occurred. The former spouse must also meet the following requirements:

- Must not have remarried
- Must not be covered by an employer-sponsored health plan
- Must meet the requirements of one (not all) of the following three situations (either 1a, 1b, or 2a):

1. Indefinite eligibility:

a. At least 20 of the years during which the former spouse and the service member were married must have been creditable in determining the member's eligibility for retirement pay. If the date of the final decree of divorce or annulment was on or after Feb. 1, 1983, the former spouse is eligible for Champus coverage of health care which is received after that date. If the date of the final decree was before Feb. 1, 1983, the former spouse is eligible for Champus coverage of health care received on or after Jan. 1, 1985.

b. At least 15 — but less than 20 — of the couple's married years must have been creditable in determining the service member's eligibility for retirement pay. If the date of the final decree of divorce or annulment was before April 1, 1985, the former spouse is eligible only for care received on or after Jan. 1, 1985, or the date of the decree, whichever is later.

2. Transitional eligibility:

a. At least 15 — but less than 20 — of the couple's married years must have been creditable in determin-

ing the service member's eligibility for retirement pay. If the date of the final decree of divorce or annulment was on or after April 1, 1985, but before Sept. 29, 1988, the former spouse is eligible only for care received from the date of the decree until Dec. 31, 1988, or two years from the date of the final decree, whichever is later. If the date of the final decree of divorce or annulment was on or after Sept. 29, 1988, the former spouse is eligible only for care received for one year from the date of the decree.

Upon completion of the transition period of eligibility for Champus explained in paragraph 2a above, the former spouse may be eligible for limited Champus coverage for one additional year upon purchase of a U.S. V.I.P. health insurance policy, which is offered by Mutual of Omaha.

The otherwise eligible former spouse who buys a U.S. V.I.P. policy may keep some Champus eligibility for one more year, but only for pre-existing medical conditions that are not covered by the U.S. V.I.P. policy.

In order to get the extension of Champus eligibility for pre-existing conditions, the former spouse must obtain proof of eligibility from the patient administration office at the nearest military medical facility.

When the former spouse receives medical care for a pre-existing condition, the claim must first be submitted to the U.S. V.I.P. health insurance plan. If U.S. V.I.P. denies the claim because the condition pre-existed, Champus will cost-share the care when the Champus claims processor receives a properly filled-out Champus claim form, a copy of the other insurance plan's claim denial, and a copy of the former spouse's proof of eligibility.

Remember — former spouse rules apply only to marriage to a single service member. A former spouse who was married to two service members, with each marriage totaling less than 20 years, but both together adding up to 20 years or more, would not be eligible for Champus even if other conditions were met. As mentioned earlier, former spouses who are covered by

an employer-sponsored health plan aren't eligible for Champus benefits, regardless of any limitations in coverage that the employer's plan may have.

A former spouse who has remarried loses Champus eligibility permanently, regardless of whether the new marriage ends for any reason. The only exception to this is when the new marriage is annulled because it's illegal in the state in which it occurred. In such cases, Champus eligibility is reinstated as of the date of the annulment.

If the remarriage is to a military sponsor, the former spouse will again be eligible for Champus as a result of the new marriage; his or her status as a "former spouse" will no longer matter.

An eligible former spouse must pay the first \$50 of what Champus determines are reasonable charges ("allowable charges") for covered outpatient services and supplies received from an authorized provider of care in any one fiscal year.

After the \$50 deductible is paid, he or she must then pay 25 percent of such charges for outpatient services and supplies received throughout the rest of the fiscal year. There's no initial \$50 deductible for inpatient care.

Former spouses who are eligible for Champus are only eligible for the basic program. They are not eligible for benefits under the Program for the Handicapped.

Also, they may not be dependents of NATO members.

These former spouse eligibility rules don't apply to Champva (the Civilian Health and Medical Program of the Department of Veterans Affairs).

SOUTHEASTERN INSTITUTE OF TECHNOLOGY

AN INDEPENDENT PROFESSIONAL SCHOOL OF ENGINEERING, MANAGEMENT, AND APPLIED SCIENCE

COURSE OFFERINGS – LATE SPRING TERM 1990

DATES: MW Sessions May 2-June 27 (Holiday May 28); TT sessions May 3-June 26; Sat. sessions May 5-June 23.

REGISTRATION: Continuous through first session. **Reservations are required** (telephone 837-9726 or 837-9769).

FEES: Full-term 300/600 level: \$270 tuition per course plus \$5 registration, or as noted. 700-level: \$120 per credit. Application (one-time): \$5 special (non-degree); \$25 regular. Textbooks additional.

FINANCIAL ASSISTANCE: Approved for tuition assistance from most governmental and industrial organizations; limited VA assistance. Half-tuition scholarships are available from Southeastern for qualified attendees. **NOTE:** Most training offices require assistance requests 30 days prior to course start.

INFORMATION: Telephone (205) 837-9726/837-9769 or write P.O. Box 1485; Huntsville, AL 35807.

* * * * *

- 11-681 ADVANCED SIGNAL PROCESSING** TT 4:30-6:40 p.m.
A study of advanced topics and algorithms in digital signal processing. Background: basic knowledge of signal processing. Instructor: Mervin C. Budge, Ph.D.; Dynetics, Inc.
- 14-502 MATERIALS/STRESS ANALYSIS** MW 6:50-9:00 p.m.
An introduction to the mechanics of solid materials and methods of stress analysis. Background: basic knowledge of mechanics and calculus. Instructor: Geoffrey L. Hearne, M.S.E.; Coleman Research Corporation
- 14-571 ROCKET PROPULSION SYSTEMS** TT 6:50-9:00 p.m.
An introduction to the theory and hardware of solid and liquid rocket propulsion systems. Background: basic knowledge of fluid-thermodynamics. Instructor: Darell B. Harmon, Jr., Ph.D.; BDM Corporation.
- 17-515 INFORMATION SYSTEMS** TT 6:50-9:00 p.m.
A study of the analysis and design of computer-based information systems. Background: basic knowledge of computers and software. Instructor: Wayne E. Suns, M.Sc.Mgt.; Computer Data Systems, Inc.
- 17-525 SIMULATION METHODOLOGY** MW 4:30-6:40 p.m.
A study of computer-based methods for simulating discrete and continuous systems. Background: knowledge of calculus and programming; Fortran desirable. Instructor: Robert R. Covelli, S.M.; Cockerham and Associates.
- 17-541 COMPUTER SYSTEM STRUCTURES** MW 6:50-9:00 p.m.
A study of the architectural structures of various types of computer systems. Background: basic knowledge of computer organization. Instructor: J. B. White, Ph.D.; Consultant.
- 17-672 SOFTWARE QUALITY/V&V** MW 6:50-9:00 p.m.
A detailed study of software quality assurance, including testing and verification/validation. Background: good knowledge of software. Instructor: Clarence J. Rocky, D.Sc.; Teledyne Brown Engineering.
- 24-516 CONTRACTS, LAW, AND ETHICS** MW 4:30-6:40 p.m.
An introduction to the legal and ethical aspects of business operations, with an emphasis on contracts. Background: basic knowledge of business. Instructor: David A. Guinn, J.D.; Hilton Systems.
- 24-645 ECONOMICS OF DEFENSE** Sat. 8:00-12:00 noon
A seminar on processes and issues of national defense economics. Background: basic knowledge of economics and defense functions. Instructor: Thomas M. Brown, M.S.S.M.; U.S. Army Missile Command.
- 27-673 MANAGEMENT OF ENGINEERING** TT 4:30-6:40 p.m.
A study of managing engineering functions, emphasizing life-cycle product development. Background: knowledge of basic management and engineering functions. Instructor: Julian S. Kobler, J.D., D.Sc.; Consultant.
- 31-525 OPERATIONS RESEARCH MODELING** TT 6:50-9:00 p.m.
A study of deterministic and probabilistic models for decision-making. Background: basic knowledge of calculus; probability desirable. Instructor: Raymond C. Watson, Jr., Ph.D.; Southeastern Institute of Technology.
- 34-504 APPLIED ELECTROMAGNETICS** TT 4:30-6:40 p.m.
An introduction to the theory and applications of electromagnetic fields. Background: knowledge of basic physics and differential equations. Instructor: Alphonsus J. Fennelly, Ph.D.; Teledyne Brown Engineering.
- 34-645 FIBER AND INTEGRATED OPTICS** MW 4:30-6:40 p.m.
A detailed study of fiber-optical waveguides and integrated optical devices. Background: knowledge of basic optics; lasers desirable. Instructor: Paul A. Ashley, Ph.D.; U.S. Army Missile Command.

SHORT-TERM COURSES

- SOVIET MONOPULSE RADARS** May 7-11; 8-12 noon
An intensive examination of the theory and technologies of Soviet monopulse radars. The course should be of value to persons involved in developing advanced radars or in threat analysis. Instructor: Larry D. Bennett, D.Sc.; U.S. Army Missile and Space Intelligence Center. Fee: \$550.
- INFRARED SYSTEMS & APPLICATIONS** June 11-15; 8-12 noon
An examination of the theory, hardware, and applications of infrared systems. The course is appropriate for engineers and technical managers, allowing them to quickly develop a background in this field. Instructor: Raymond C. Watson, Jr., Ph.D.; Southeastern Institute of Technology. Fee: \$550.

TECHNICAL AND MANAGEMENT PROGRAMS

Southeastern offers specializations in the following areas for professional programs at the master's level:

- Applications Programming
- Applied Mathematics
- Business Management
- Computer Systems
- Contracts Management
- Electro-Optical Systems
- Engineering Management
- Missile Systems
- Operations Research
- Radar Systems
- Signal Processing
- Software Engineering
- Systems Management
- Telecommunication Systems

At the doctoral level, professional specializations are available in the following areas: • Computer and Software Systems, • Defense Management and Technologies, • Management and Business Systems, • Missile and Space Systems, • Optical and Electro-Optical Systems, • Research and Engineering Management, • Sensor Systems and Signal Processing, and • Systems Engineering and Analysis.

If you are a professional working in engineering, management, or applied science, Southeastern provides an excellent selection of courses for updating and career development. The offerings may be taken as continuing education or used in the development of advanced degrees. Our faculty members are all professional practitioners, and this is our key to relevance: instructors who practice what they teach!

NEW PROFESSIONAL PROGRAMS

Southeastern now offers two additional professional degrees: the Master of Electrical Engineering and the Master of Software Engineering. Programs leading to these degrees involve 36 units of credit, and emphasize advance design techniques.

The M.Elec.Eng. degree curriculum is based on the standards for advanced electrical engineering programs as specified by the Accrediting Board for Engineering and Technology. Included are specialty options in radar, electro-optics, signal processing, computers, and telecommunications.

The DoD Software Engineering Institute has recently announced a recommended curriculum for advanced software engineering. The M.Sw.Eng. degree program from Southeastern fully conforms to this recommendation and prepares persons to assume positions of major responsibility in this field.

TECHNICAL BACKGROUND COURSES

Southeastern offers a number of intermediate-level background courses to prepare persons for advanced studies. These courses may be needed as refreshers or in gaining a new background for changing areas of specialization.

During the Late Spring Term, Materials/Stress Analysis (14-502) will be given in the Aerospace Engineering field, and Applied Electromagnetics (34-504) is available for the Electrical Engineering and Optical Engineering fields.

In the Summer Term, intermediate background courses will include Linear Systems and Signals (11-504), Fluid-Thermodynamics (14-504), Pascal/Structured Design (17-506), Optics and Photonics (34-506), and Engineering Economics (27-501).

Persons desiring to start advanced studies in the Fall (at SIT or other schools) should consider these background courses.

PROFESSIONAL BUSINESS PROGRAMS

Southeastern provides full curricula leading to master's and doctoral degrees in management of business operations. The Master of Science in Management (M.Sc.Mgt.) degree can be earned in business management, contracts management, engineering management, and systems management. The Master of Business Administration (M.B.A.) degree has options in general management as well as the following:

- Contracts Administration
- Industrial Management
- Executive Management
- Systems and Programs

At the advanced level, the Doctor of Management (D.Mgt.) degree has a specialization in management and business systems, with options tailored to fit individual needs.

Contracts, Law, and Ethics (24-516), a new course required in the M.B.A. program, will be offered during the Late Spring Term. All persons interested in business management programs should inquire concerning this course.

AN INDEPENDENT PROFESSIONAL SCHOOL

Southeastern Institute of Technology is an independent, nonprofit institution of higher education, providing continuing education and professional degree programs for mature, working adults. Fully approved by the Alabama Department of Education, Southeastern offers programs leading to the following degrees:

- Master of Electrical Engineering
- Master of Software Engineering
- Master of Business Administration
- Master of Science in Engineering
- Master of Science in Management
- Master of Science
- Doctor of Science
- Doctor of Engineering
- Doctor of Management

Southeastern's central facilities are located at 200 Sparkman Drive, Cummings Research Park. For additional information, telephone

(205) 837-9726/9769

Southeastern Institute of Technology admits attendees of any age, sex, race, color, or national and ethnic origin.

Youth activities now viable program for post kids

BY PAM ROGERS

In just over two years, Redstone's Youth Center has evolved from a minimal, underutilized program in an inadequate building to a comprehensive network of support and recreation for the post's military children.

A modern facility, combined with a structured program of activities, has given Redstone's youth a place where they can feel they belong, according to Shelby Williams, director of Youth Activities.

"At the old center we had about 30 kids a day, but at the new center, we have about 170 kids per day during the school year," she said. The new center opened in October 1988.

"Our gymnastics program enrollment went from 12 to 40, and our karate program increased from 15 to 40," she added.

She attributes the increased attendance to two recent changes in center operation: the splitting of hours by age groups and giving children an active voice in program planning.

"There are a lot of things to do here. We have cooking classes, arts and crafts, the youth council, youth sponsorship, talent shows, dances, parties and a sports program," Williams said.

The soccer program is going on right now, with tournaments coming up for baseball and softball.

Sports clinics begin in June and will include instruction in tennis, golf, baseball, basketball and volleyball. Other summer activities include cookouts, picnics and a new summer fun program.

"In the summer fun program, we plan to take the kids different places, like bowling, skating, on picnics and to the craft shop," Williams said.

Williams is concerned that some parents may have the misconception that the center is little more than a hangout.

Company commander wins pistol shoot

The commander of B Company, 73rd Ordnance Battalion won the monthly pistol shooting match sponsored by his company March 4 at Shields Range.

Capt. Gasper Gulotta took the first place trophy followed by Capt. Curtis Norris, commander of 515th Ordnance Company, in second place, and SFC John Hunter of TMDE Support Group in third.

The 15 competitors shot a practical police course. This means they shot at silhouettes at different ranges, with different time limits and had to reload during the

"This place is a whole lot bigger, with a lot more options than the old facility. We have a full-sized gym and room for classes," she said. She is looking for ballet and piano instructors to teach classes.

"And we always need parents to volunteer to help," she said.

For more information on the center or to volunteer, call Williams at 876-5437.

course of fire. They shot at ranges of 7, 15 and 25 yards.

"It's the same type of course police shoot when they have their records qualification," said SFC Steven Craven, the range NCO-in-charge.

B Company, 73rd started the monthly pistol shoots last November. The next match is set for 1 p.m. April 1. "It's open to active duty military and retired military, and we are requiring identification now for individuals," Craven said. For more information call B Company, 73rd at 876-6717.

Ninety day limit set to appeal bar to reenlistment

WASHINGTON — Soldiers now barred from reenlisting under the Qualitative Management Program have a maximum of 90 days to appeal their QMP selection or leave the Army.

According to officials in the Army's Office of the Deputy Chief of Staff for Personnel, the new measure is intended to speed the departure of substandard performers while the Army considers ways to make additional, budget-driven cuts in its forces.

Army promotion and schooling selection boards choose soldiers with poor service records for separation under the QMP. Personnel officials say about 1,500 soldiers are now barred from reenlistment by QMP actions.

Under the new rules, soldiers selected for the QMP must now appeal their selection or be discharged within 90 days or on their previously scheduled discharge date, whichever comes first. Soldiers must indicate their intent to appeal a QMP selection on DA Form 4941- R.

Letters from the Total Army Personnel Command are now on their way to QMP selectees, informing them of the new rules. Those who receive the letters have five days to acknowledge that they were notified.

Some special provisions of the new policy apply to soldiers who have already indicated that they would appeal their QMP selection. For example, soldiers who have said they would appeal but have not yet done so

must appeal within 45 days of receiving the new policy letter. If their appeals are denied, they will be discharged 90 days after they are notified of the denial.

Soldiers who planned an appeal but took no action within 90 days will be discharged with 90 days of receiving the new policy letters.

"Retirement lock-ins," or soldiers who have 18 years of service on March 1 will not face the 90-day discharge, but they must leave the Army by the last day of the month they reach 20 years' service. Soldiers with 20 years or more of service must submit their appeals with the 90-day frame or be retired.

ODCSPER officials say exceptions to the new early release policy will be granted on a case-by-case basis, but must be fully justified. (Arnews)

Announcements

Space Camp scholarships

Family members of active duty and retired military may apply for Space Camp (June 24-29) scholarships sponsored by the ACS education committee. Applications are available at ACS (Bldg 3491), Youth Center (Bldg 3148) and the PX ID card desk. For information call 876-2859/5397. Application deadline is April 20.

Women's history

Tickets are available through Friday for the Women's History Luncheon March 21 at 11:30 a.m. at the Officers Club. Thomasine Jordan, co-chair of the Native American Cultural Exchange, will speak on "Courageous Voices Echoing in Our Lives." She is a member of the Algonquin-speaking Wampanoag tribe and serves on the national advisory council for Federally Employed Women. Tickets are \$5.75 and available at the SDC and MICOM EEO offices.

Job open for nurse

Civilian Personnel Office has direct hire authority for a temporary Intermittent On-call Clinical Nurse GS-610-09. Send application to Dollie Waters, AMSMI-PT-CP-RP-OC, Redstone Arsenal 35898, telephone 876-2304.

Lacrosse club

A lacrosse club is forming in Huntsville. For information call Carl Feaux 881-8479 after 5:30 p.m.

Movies

Here's the Post Theater schedule; starting times are 7 p.m.: Thursday, March 15 — *Dance to Win*, rated R, 102 minutes. Friday, March 16 — *Tremors*, PG-13, 96 minutes. Saturday, March 17 — *Steel Magnolias*, PG, 118 minutes. Sunday, March 18 — *Steel Magnolias*. Tuesday, March 20 — *Gross Anatomy*, PG-13, 107 minutes. Admission is \$1.50 for adults, \$1 for children.

Preseparation orientation

The next preseparation orientation — not retiree orientation — for military personnel with ETS or Release from Active Duty dates through July 21 will be held 8 a.m. to noon March 22 in auditorium room 119, building 3495 (Toftoy Hall). Representatives from Veteran Affairs, Employment Services, Military Pay Division, and others will brief attendees and answer questions pertaining to post-separation plans. Spouses are encouraged to attend. It is mandatory for specified personnel to attend.

NASA surplus sale

The General Services Administration will conduct an auction of surplus NASA property at 9 a.m. Tuesday, March 20 in building 8025. Prospective buyers may inspect items to be sold and register to bid on March 19 from 8 a.m. to 3 p.m., and from 7-9 the morning of the sale. Items to be sold include miscellaneous electronic equipment, calculators, typewriters, computer equipment, copying machines, air conditioning equipment, and used tires.

Toastmasters

Tennessee Valley Toastmasters will meet 6:30 p.m. Thursday, March 15 at Shoney's, 3301 Memorial Parkway southwest. Visitors are welcome. For more information, call 883-2442.

West Point founder's day

The West Point Founder's Day Dinner will be held March 30 at the Redstone Arsenal Officers Club. Scheduled speaker is retired colonel Al Vanderbush, deputy director for athletics at the U.S. Military Academy. All graduates, former cadets, and other service academy graduates are invited. If you have not received an invitation, call Col. Arthur Meier 895-4370.

Mandatory HIV screening

The weekly HIV screening for soldiers identified by MILPO as needing an updated HIV test will be moved from building 3305 to the battalion classroom in building 3437 beginning March 21. Soldiers must report at 9 a.m. or return another Wednesday at 9 a.m. to be processed, according to Maj. Sue Willis, community health nurse.

Garden plots

Anyone residing in government quarters who wishes to have a garden plot must contact the Family Housing Office by March 30. The plots are issued on a first-come, first-serve basis. After March 30, no new plots will be issued. For more information, call Cynthia Ziegler 842-9193.

Medical assistants

The American Association of Medical Assistants (AAMA) Certification Testing will be administered 8 a.m. June 29. Anyone wanting this test must register by March 15. The AAMA is available for *active duty military personnel* by appointment only. If interested, call a counselor at the Education Center 876-9762/0800.

Space & Rocket Center

The Space and Rocket Center will begin a yearlong celebration of its 20th anniversary with a number of events Saturday, March 17 from 9 a.m. to 6 p.m. For the first time, visitors will participate in astronaut training simulators, such as the Five Degrees of Freedom or be at the controls of a spinning spacecraft, previously limited to participants in the U.S. Space Camp programs. The day begins with parachute demonstrations, continues with the opening of a major new space exhibit and features former astronaut Wally Schirra during a tribute to the founders of the Space Center.

Youth center

Here is list of activities for the Youth Center during Spring Break. April 2, *Cookout*, pre-teens, 2-4 p.m., teens, 6-10 p.m.; April 3, *Bowling*, RSA lanes, \$1.60 for two games, bring lunch or eat there, 11 a.m. - 3 p.m., limit 30; April 4, *Skating*, Carousel, \$2; 11 a.m. - 4 p.m., all ages, bring lunch or eat there, limit 30; April 5, *Picnic*, Vincent Drive, 11 a.m. - 2 p.m., all ages, no charge, limit 50; April 6, *Arts and crafts* — *T-shirt painting*, 10 a.m. - 1 p.m.; *Pre-teen dance*, 7-9 p.m., no charge, no limit; April 7, *Baking*, pre-teens, 10 a.m. - 2 p.m.; *Teen dance*, 7-10 p.m., no charge, no limit. Registration for baseball, softball, and T-ball begins tomorrow and will go through March 31.

AMC inspector general

An inspector general from the AMC Inspector General Activity will be available to hear complaints and receive requests for assistance from military and civilian personnel from 11:30 a.m. to 1 p.m. March 20 in room G-3, building 111. For more information, call Patricia Givens 876-9701.

Temporary duty orders

Chapter 7 of the Joint Federal Travel Regulation authorizes temporary duty orders to active duty service members accompanying a family member who is ill or a family member accompanying an ill soldier, i.e. (non-medical attendant). The funds allocated under Chapter 7, Joint Federal Travel Regulation, TDY orders comes out of a special fund set up for medical emergencies, not from the members command. Commands should place these individuals on DA Form 1610 using the fund cite set up for medical emergencies from finance and/or unit comptroller's offices.

Dance club

Redstone Dance Club will hold its first lesson and practice dance session of the year 7-9:20 p.m. March 20 at the old officer's club annex, building 114 (upstairs). All military and civilian employees and their dependents, both active duty and retired, are eligible to join. Dance lessons for both beginners and advanced dancers will be given by qualified instructors. For more information, call 837-8331 or 883-8386.

Logistics engineers

The Society of Logistics Engineers (SOLE) luncheon will be held March 20 at the Holiday Inn, Madison Square. Social starts at 11:30 a.m., with the luncheon at noon. Roger Newton, director of the Von Braun Civic Center, is to speak on "VBCC Logistics Operations." Cost of the luncheon is \$7. For reservations, call Janice Perry 876-2238 by noon March 16.

Supply management

The next Supply Management, career program 13, ad hoc panel is scheduled for June. The no change option is not required for this panel. The series in CP-13 are 346, 2001, 2003, 2010, 2032, 2050, and 2030. Send the original plus four copies by May 9 to AMSMI-LC-MM, Tammy Steelman, building 5681, room B4S. For more information or forms, call Steelman 876-1531/1411.

Spot bid sale

A local spot bid sale of government surplus property will be held March 21 in the Defense Reutilization & Marketing Sale building 7427 on Warehouse Road. Registration starts at 7:45 a.m. and the sale begins at 8:45. Some of the items for sale include typewriters, desks, chairs, data processing equipment, electronic test equipment, copying machines, magnetic tapes, photographic equipment, communication equipment, and scrap lead. The items may be inspected from 8 a.m. to 3 p.m. March 16, 19 and 20, and from 7:45-8:45 a.m. March 21. A list of items for sale and additional information will be available during the inspection period in building 7435.

Property managers

The March meeting of the Rocket City Chapter of the National Property Management Association will be held March 20 at 5 p.m. in the conference room of building 4471 at Marshall Space Flight Center. Main highlight of this meeting will be final preparations for the upcoming one-day workshop on property management set for April 11. For more information, call Becky LaRue 544-5665.

Government accountants

North Alabama Chapter of the Association of Government Accountants (AGA) will meet Thursday, March 15 at Michael's Restaurant, located in the Ramada Inn on South Parkway. Social hour begins at 5:30 p.m., with dinner and program to follow. Scheduled guest speakers include Dr. Daniel Kyle, legislative auditor for Louisiana, and Dr. Grover Porter, head of the accounting department at University of Alabama in Huntsville. Their topic is to be "Accounting education and certification issues." For more information call Warren Blades, of the chapter's executive committee, 876-9853.

CFC applications

The Local Federal Coordinating Committee will accept applications from agencies for funding by the Huntsville Area Combined Federal Campaign beginning March 30. Applications must be received by 4 p.m. Monday, April 30. To qualify for CFC funds an agency must be a voluntary, not-for-profit human health and welfare organization, and classified as tax-exempt under 26 USC 501(c) (3). Fund-raising and administrative expenses should not be in excess of 25 percent of total support and revenue. For more information and/or to obtain applications, call Jimmy Temple, chairman of the Huntsville Area Combined Federal Campaign, 536-0745.

Education center

The *College Level Examination Program (CLEP)* English Composition with Essay will be administered to active duty and reserve military personnel at 8 a.m. April 20; to register, call an education counselor 876-9762/0080 by Friday, March 16. *Graduate Record Exam (GRE)* will be administered to active duty and reserve military 8 a.m. April 23; to register, call an education counselor 876-9762/0080 by March 23. *American College Testing Assessment Program (ACT)* Pep Essay will be administered to active duty and reserve military 8 a.m. May 4; to register, call an education counselor 876-9762/0080 by March 16.

Space talk

Jack Lee, director of the Marshall Space Flight Center, is to speak 8:15 p.m. March 14 at the UAH University Center, room 131. Admission is free to this public event being held by the Students for the Exploration and Development of Space.

Cookout fund-raiser

A St. Patrick's Day cookout will be held from 10 a.m. to 4 p.m. March 17 to raise money for the Ordnance Corps Ball. The cookout will be held in front of the Commissary. For more information, call Capt. Craig Johnson 876-4028.

Tall club

Rocket City Tall Club, a social organization to promote friendship and fellowship among tall people, will have its monthly business meeting 7 p.m. Wednesday at the Brahan Spring Rec Center, second floor, 3770 Ivy St. The executive board will meet at 6 p.m. For information, call 1-800-239-TALL.

HOW TO PLACE A REDSTONE ROCKET CLASSIFIED AD

The REDSTONE ROCKET provides the ROCKET CLASSIFIED section as a FREE service to active duty military personnel and army civil service personnel. These FREE classifieds are limited to personal items for sale only, to include yard sales, animals, household items, automobiles, clothes, lost and found items, etc.

REAL ESTATE IN ANY FORM, BUSINESS, AND "FOR PROFIT" DO NOT QUALIFY FOR THIS FREE OFFER.

To place a ROCKET CLASSIFIED ad:

Type or legibly print a brief description of what you want to sell on an 8 1/2 x 11 inch piece of paper (no 3 x 5 cards or torn paper will be accepted).

Only home numbers will be listed in the advertisement. No office phone numbers will be accepted. Sign the ad, and list the following identification: Building number, badge number, and work phone.

The deadline is 5 p.m. on Friday before the Wednesday publication. FREE ADS will run for one week only. You may resubmit them.

Business or real estate classified ad is \$5.75 for 25 words or less, and .06 for each word thereafter. To place a business classified follow the instructions above for FREE classified ads, and enclose a check, money order, or a VISA or MC number with expiration date, sign your name under these numbers. The Redstone Rocket does not bill classified advertising, nor do we accept classified advertising over the phone. No work numbers are permitted in advertising of Arsenal Personnel, home phone or off post numbers only may be submitted.

The Redstone Rocket will not accept any classified ads by telephone.

The Redstone Rocket is not responsible for typographical errors or for omissions in FREE CLASSIFIED ADS. Classifieds will be published as space permits. First come, first served basis.

If you submit more than one classified at a time, place each one on a separate piece of paper.

Mail Rocket Classified ads to: Sara Grant & Associates, Attn: Redstone Rocket Classified, P.O. Box 5351, Huntsville, Alabama 35805.
