

Cemeteries

A total of 47 cemeteries are located on the installation, with one additional cemetery located on the Space and Rocket Center property. Two of the cemeteries are located on MSFC and are managed by NASA. The cemeteries were part of the existing property obtained by the Government for use by the U.S. Army. All cemeteries are preserved intact and undisturbed in accordance with Federal and state burial laws. The Environmental Office, with the help of a volunteer, is in the process of researching and documenting the history of all cemeteries on the installation.
